

Set up Kaltura LMS Video integration for Moodle 4.x

Last Modified on 05/06/2026 8:41 pm IDT

 This article is designated for administrators.

About

This guide covers plugin installation, connection to Kaltura, and configuration of Kaltura features for **Moodle version 4.x** (4.0-4.5).

Moodle 4.x supports the Kaltura LMS Video integration using either **LTI 1.1** or **LTI 1.3**.

Before you start

Make sure the following is already in place:

- A Kaltura account with:
 - a Partner ID (PID)
 - an Admin secret (required for LTI 1.1 only)
- A KAF (Kaltura Application Framework) instance URL, e.g., <https://12345.kaf.kaltura.com>
- Moodle version **4.x** (4.0-4.5)
- Access to your [KAF Configuration Management console](#)

Install the Kaltura Video plugin for Moodle

Installing the **Kaltura Video plugin** is required before configuration. This step does not affect active Moodle users and can be completed anytime in advance.

When you install the Kaltura Video plugin, the following features become available in Moodle:

- My Media (personal media library)
- Media Gallery (course media repository)
- Kaltura Media Assignment*
- Kaltura Video Resource
- Kaltura Media embedding in text editors

*In **Moodle 4.5 and later**, video assignments can also be created using the [native Moodle Assignment activity](#) with Kaltura Media enabled as a submission type. For instructions, see [Create a video assignment in Moodle](#).

To install the plugin:

1. Download the latest Kaltura Video Plugin to your Moodle root directory from [here](#).
2. Unzip the downloaded package and when prompted to choose an extraction location, select the Moodle root directory (the folder that contains the admin, mod, and local folders).
3. Log in to your Moodle site in a web browser as an administrator. If Moodle detects the new plugin files, it automatically displays the plugin installation screen.
4. When prompted, click **Continue** at the bottom of the welcome screen to start the plugin installation.
5. Review the server checks and click **Continue**.
6. Wait for the installation to complete, then click **Continue**.
7. Complete the required fields and click **Update profile**.
8. Configure the front page settings and click **Save changes**.

Configure the Kaltura-Moodle connection and features

After installing the Kaltura Video plugin, complete the following configuration steps to connect Kaltura to Moodle and enable features.

Step 1: Configure the Hosted module

1. Go to your Configuration Management console and click on the **Hosted** module. You can also navigate to it directly using a link:

https://{your_site_URL}/admin/config/tab/hosted.

| SharedRepositories | sharedRepositoryCategoryId | <input type="text" value="235289443"/> | Shared repository category ID Click here to disable Shared Repositories |
| UserSelect | | | |
| Widgets | | | |

2. Scroll down the page to the **authMethod** field and select the LTI version you plan to use.

| Hosted | | |
|----------------------------|--|--|
| enabled | <input type="button" value="Yes"/> ▼ | Enable the Hosted module. |
| enableLike | <input type="button" value="Yes"/> ▼ | Enable the 'Like' feature for entries. |
| allowEditPublished | <input type="button" value="No"/> ▼ | Enable editing of published entries |
| allowDeletePublished | <input type="button" value="No"/> ▼ | Enable deletion of published entries |
| AllowUnpublishPublished | <input type="button" value="Yes"/> ▼ | Enable unpublishing of published entries |
| enableEntryDelete | <input type="button" value="Yes"/> ▼ | Enable deleting media |
| enableViews | <input type="button" value="No"/> ▼ | Enable showing number of views per entry. |
| showPageTitles | <input type="button" value="Yes"/> ▼ | Show page titles |
| expandButton | <input type="button" value="Auto"/> ▼ | Player expand button. Auto is on only if there are modules providing an entry sidebar. |
| manPublish | <input type="button" value="Yes"/> ▼ | Enable publish to a list of categories - from the menu, media, and upload. Disable this if you do not have access to the list of categories. |
| authMethod | <input type="button" value="lti"/> ▼ | |
| sharedRepositoryCategoryId | <input type="text" value="235289443"/> | Shared repository category ID Click here to disable Shared Repositories |

If you select **LTI 1.3**, additional fields display.

| | | |
|---|-------------------------------------|---|
| authMethod | <input type="text" value="Iti1.3"/> | |
| Iti13PlatformOidcAuthUrl | <input type="text"/> | Single endpoint at the platform domain (i.e. LMS) the tool will redirect the browser to, to initiate the OIDC authentication flow. |
| Iti13AuthTokenUrl | <input type="text"/> | OAuth 2 auth token endpoint of the platform (KAF will use this to get access token to be able to call the relevant services on the platform, like ags, caliper etc.) |
| Iti13KeysUrl | <input type="text"/> | JWKS URL that contains the platform's key for JWT verification |
| Iti13ClientId | <input type="text"/> | client ID for the tool as provided by the platform |
| Iti13ServicePrivateKey | <input type="text"/> | Service Private Key - this is used to sign the JWT or other calls done from KAF to the platform like in Deep Linking Response. You can generate key pair here |
| <div style="border: 1px solid black; width: 100%; height: 100%;"></div> | | |
| Iti13ServicePublicKey | <input type="text"/> | Public key matching the above private key |

• 3. Configure the following fields:

- **Iti13PlatformOidcAuthUrl** - Enter the Moodle platform OIDC authentication URL:
https://{your_Moodle_domain}/local/kaltura/auth.php
- **Iti13AuthTokenUrl** - Enter the Moodle OAuth token URL:
https://{your_Moodle_domain}/mod/lti/token.php
- **Iti13KeysUrl** - Enter the Moodle JWKS URL:
https://{your_Moodle_domain}/mod/lti/certs.php
- **Iti13ClientId** - Leave this field empty for now. You will populate it after [obtaining the Client ID in Step 2](#).
- **Iti13ServicePrivateKey** - Click the '[generate key pair here](#)' link.

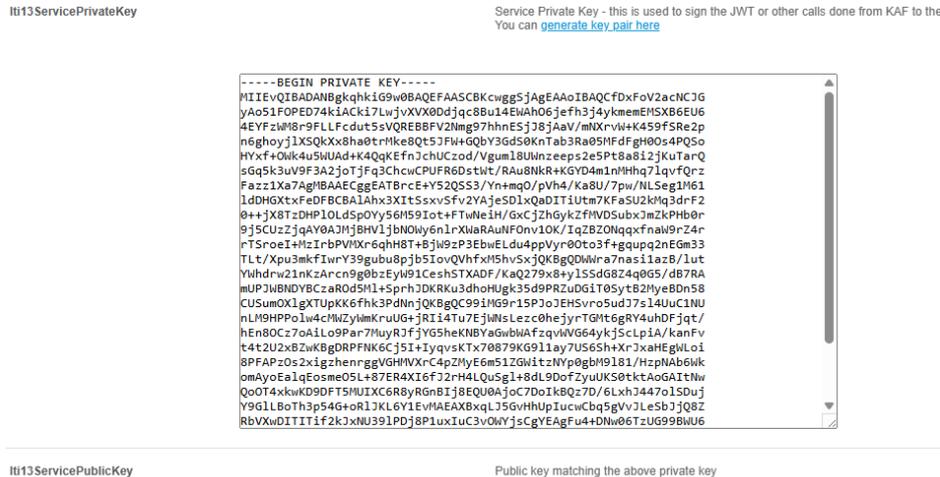

Iti13ServicePrivateKey Service Private Key - this is used to sign the JWT or other calls done from KAF to the platform like in Deep Linking Response. You can [generate key pair here](#)

The 'Certificate generator' window opens and displays a private key and a public key.

4. In the Certificate Generator, click **Use**.

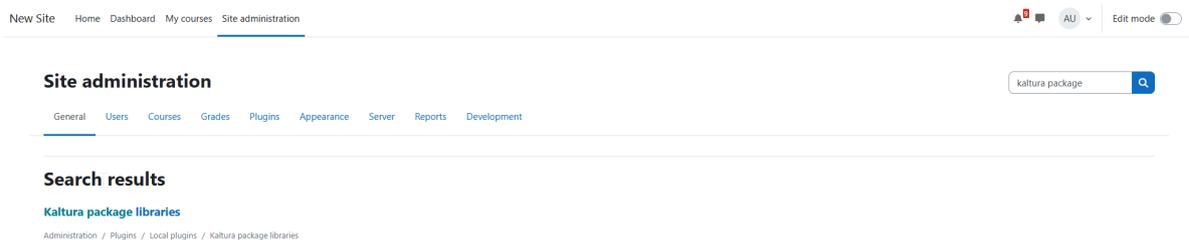

The private and public keys are automatically copied into the **Iti13ServicePrivateKey** and **Iti13ServicePublicKey** fields.

5. Scroll to the bottom of the page and click **Save**.

Step 2: Configure the Kaltura connection in Moodle

1. In Moodle, go to **Site administration**.
2. Use the search field to locate **Kaltura package libraries**.

3. Click to open the 'Kaltura package libraries' page.

The KAF configuration page displays.

This page contains the KAF connection, LTI, and optional feature settings. (The values shown in the image below are examples only.)

<https://220-22.kaf.nvq2.mediaspace.kaltura.com/admin>

KAF URI
local_kaltura | kaf_uri Default: Empty

Type in the server URI of your KAF instance.

Server URI
local_kaltura | uri Default: www.kaltura.com

Type in the server URI you want to connect to. Otherwise just type in the default settings (This setting is used for migration purposes).

LTI Version
local_kaltura | lti_version Default: LTI 1.0/1.1

Choose which LTI version the account works with

Partner id
local_kaltura | partner_id Default: Empty

Enter the partner id for your account.

Client ID
 Should be used in the KAF hosted module

Enable trace logging
local_kaltura | enable_logging Default: No

If enabled, all requests and responses to and from Kaltura are logged. These logs can be used by Kaltura support to diagnose any problems encountered. Enabling this setting may affect Moodle performance. You may download a CSV file of the logs from [here](#).

Clone Submissions
local_kaltura | enable_submission Default: No

If enabled, any media submitted via the Kaltura Video Submission flow will be cloned under a different user name to prevent editing and deletion.

Guest support
local_kaltura | guest_support Default: Yes

If enabled, use Moodle's ability to identify guests and non-logged in users, and provide them with the 'Guest' LTI role.

Core settings

1. Configure the following required settings:

- **KAF URI** - Enter your KAF instance URL. Format: `https://{your_KAF_URL}`, for example, `https://123456.kaf.kaltura.com`, or `https://123456-1.kaf.kaltura.com`, or `https://kaltura.kaf.university.edu`

The "https://" is required. Do not include an ending "/".

- **Server URI** - Default: `www.kaltura.com`. In most cases, this does not need to change.
- **LTI version** - Select the LTI version your Moodle site uses with Kaltura. The page updates to show the fields required for that LTI version.
- **Partner ID** - Enter your PID (Kaltura Partner ID). You can find this value on the 'Integrations' page in the Rich Media CMS (Rich Media Content Management System). For information, see [Account information in Rich Media CMS](#).
- **Admin secret** - This field displays if you are using **LTI 1.1**. Enter the admin secret from the 'Integrations' page in the Rich Media CMS. For information, see [Account information in Rich Media CMS](#).
- **Client ID** - This field is populated automatically when using **LTI 1.3**. You will copy this value in Step 3.
- **Enable trace logging** - Checked

Optional settings

- **Enable Clone Submission** - Controls whether Moodle can duplicate assignments that include Kaltura media.

For assignment cloning to work, the **enableAssignmentSubmission** setting must also be enabled in the [Browseandembed module](#). See [Set up Kaltura's media assignment tool for Moodle](#) for configuration steps.

- **Guest support** - Controls access for guest and non-logged-in users. Leave this setting enabled unless you explicitly require guest access.

2. Click **Save changes**.

Step 3: Complete the LTI 1.3 connection (LTI 1.3 only)

This step applies only if you selected LTI 1.3 in the previous steps. If you are using **LTI 1.1**, skip this step and continue to **Step 4**.

1. In Moodle, open the Kaltura package libraries page ([see above](#)).
2. Copy the **Client ID** value.

Kaltura package libraries

KAF configuration

https://220-22.kaf.nvq2.mediaspace.kaltura.com/admin

KAF URI Default: Empty
local_kaltura | kaf_uri

Type in the server URI of your KAF instance.

Server URI Default: www.kaltura.com
local_kaltura | uri

Type in the server URI you want to connect to. Otherwise just type in the default settings (This setting is used for migration purposes).

LTI Version Default: LTI 1.0/1.1
local_kaltura | lti_version

Choose which LTI version the account works with

Partner id Default: Empty
local_kaltura | partner_id

Enter the partner id for your account.

Client ID Should be used in the KAF hosted module

Enable trace logging Default: No
local_kaltura | enable_logging

3. Return to the Hosted module in the Configuration Management console, and paste the Client ID into the **Iti13ClientId** field ([see above](#)).

Iti13ClientId  client ID for the tool as provided by the platform

4. Scroll to the bottom of the page and click **Save**.

The LTI 1.3 connection between Moodle and KAF is now complete.

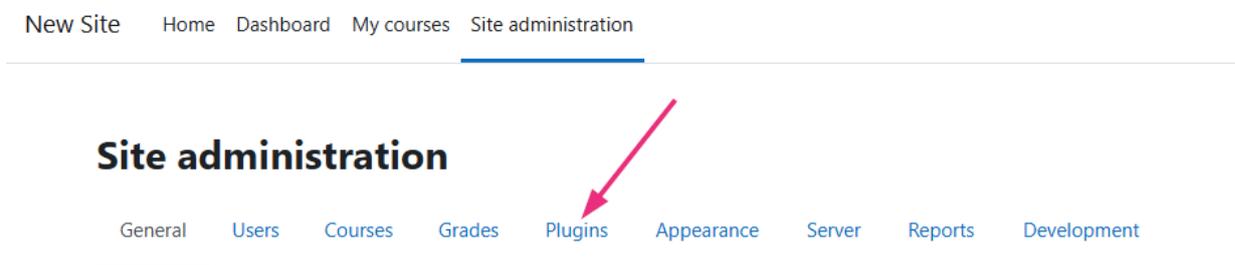

Step 4: Configure Kaltura features and access

After installing the integration, configure Kaltura features and user access based on how you plan to use Kaltura in Moodle.

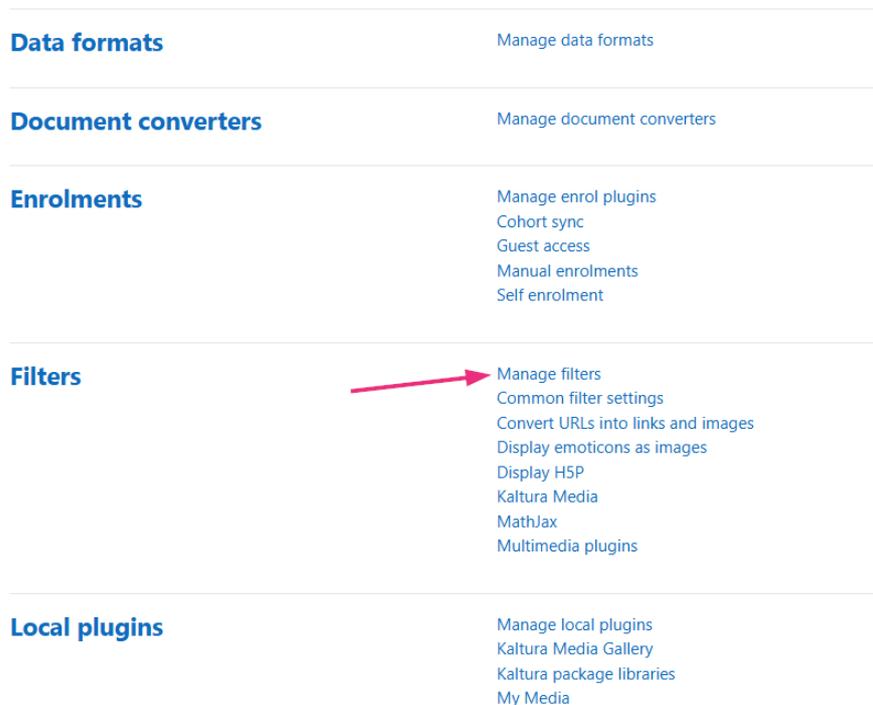

Enable the Kaltura media filter

The Kaltura Media filter enables embedded Kaltura media to display correctly in rich-text areas.

1. Go to your Moodle **Site administration** and select **Plugins**.

2. Scroll down the page to the **Filters** section and select **Manage filters**.

The Manage filters page opens.

3. Locate **Kaltura Media** in the list.

Manage filters

| Filter | Active? | Order | Apply to | Settings | Uninstall |
|------------------------------------|----------|-------|----------|----------|-----------|
| Display HSP | On | ↓ | Content | Settings | Uninstall |
| Activity names auto-linking | On | ↑ ↓ | Content | | Uninstall |
| Mathlax | On | ↑ ↓ | Content | Settings | Uninstall |
| Display emoticons as images | On | ↑ ↓ | Content | Settings | Uninstall |
| Convert URLs into links and images | On | ↑ ↓ | Content | Settings | Uninstall |
| Multimedia plugins | On | ↑ | Content | Settings | Uninstall |
| Algebra notation | Disabled | | Content | | Uninstall |
| Code highlighter | Disabled | | Content | | Uninstall |
| Database auto-linking | Disabled | | Content | | Uninstall |
| Email protection | Disabled | | Content | | Uninstall |
| Glossary auto-linking | Disabled | | Content | | Uninstall |
| Kaltura Media | Disabled | | Content | Settings | Uninstall |

4. Enable the **Kaltura Media** filter and click the **Settings** link.

Manage filters

| Filter | Active? | Order | Apply to | Settings | Uninstall |
|------------------------------------|---------|-------|----------|----------|-----------|
| Display HSP | On | ↓ | Content | Settings | Uninstall |
| Activity names auto-linking | On | ↑ ↓ | Content | | Uninstall |
| Mathlax | On | ↑ ↓ | Content | Settings | Uninstall |
| Display emoticons as images | On | ↑ ↓ | Content | Settings | Uninstall |
| Convert URLs into links and images | On | ↑ ↓ | Content | Settings | Uninstall |
| Multimedia plugins | On | ↑ ↓ | Content | Settings | Uninstall |
| Kaltura Media | On | ↑ | Content | Settings | Uninstall |

The Kaltura Media page displays.

Kaltura Media

Embed Kaltura Video Links Default: Yes
filter_kaltura_enable

Convert Kaltura video links to embed code

Alternate KAF URIs
filter_kaltura_urls

Default: Empty

Enter alternate KAF URIs to filter, one per line

[Save changes](#)

5. In the Kaltura Media settings, make sure **Embed Kaltura Video Links** is selected.

Kaltura Media

Embed Kaltura Video Links Default: Yes
filter_kaltura_enable

Convert Kaltura video links to embed code

Alternate KAF URIs

files = emojiPicker, image, media, recordrtc, managefiles, h5p, kalturamedia
accessibility = accessibilitychecker, accessibilityhelper
style2 = underline, strike, subscript, superscript
align = align

Default:
collapse = collapse
style1 = title, bold, italic
list = unorderedlist, orderedlist, indent
links = link
files = emojiPicker, image, media, recordrtc, managefiles, h5p
accessibility = accessibilitychecker, accessibilityhelper
style2 = underline, strike, subscript, superscript
align = align
insert = equation, charmap, table, clear
undo = undo
other = html
```

The list of plugins and the order they are displayed can be configured here. The configuration consists of groups (one per line) followed by the ordered list of plugins for that group. The group is separated from the plugins with an equals sign and the plugins are separated with commas. The group names must be unique and should indicate what the buttons have in common. Button and group names should not be repeated and may only contain alphanumeric characters.

7. Click **Save changes** at the bottom of the page.

The Kaltura embed button now appears in the Atto editor toolbar.

Description

Configure My Media placement

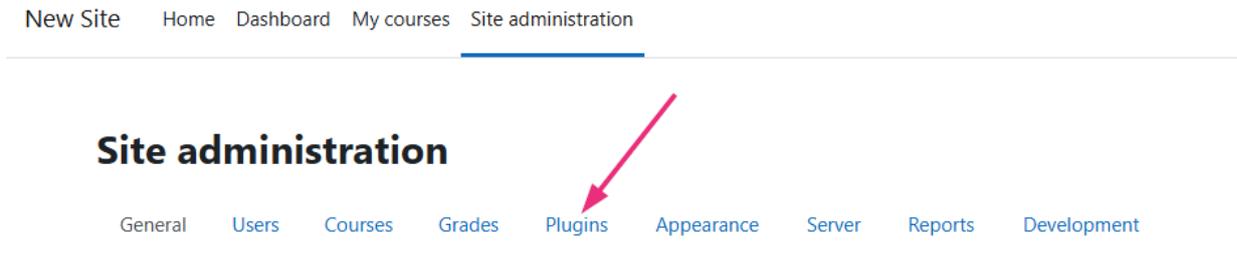

My Media is each user's personal media repository in Moodle (based on their Moodle role and permissions). You can control where the My Media link appears in the Moodle interface.

Available locations include:

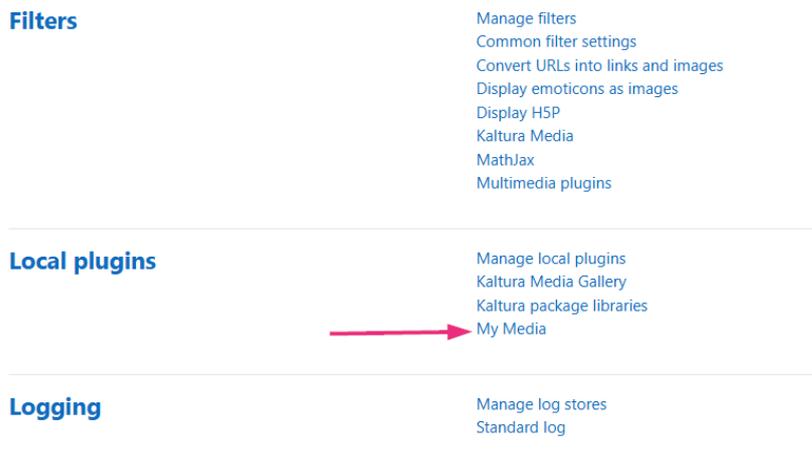

- Top navigation menu
- Side navigation menu
- User navigation menu

To configure where the 'My Media' link appears:

1. Go to your Moodle **Site administration** and select **Plugins**.

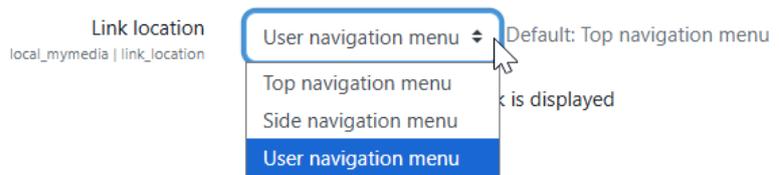

2. On the 'Plugins' page, scroll down to the **Local plugins** section and select **My Media**.

3. In the **Link location** dropdown, select where you want the My Media link to appear.

My Media

Settings

4. Click **Save changes**.

The My Media link is now available to users in the selected location.

Media Gallery

The Media Gallery is a shared media repository for a Moodle course. It allows instructors and students to view and interact with media that is associated with a specific course.

Access to the Media Gallery and available actions are controlled by Moodle roles and permissions.

Media Gallery navigation using Boost theme

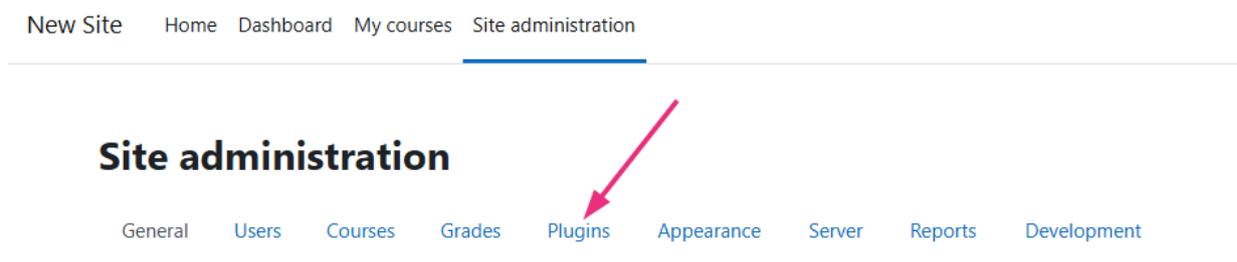

Boost is the default Moodle theme in Moodle 4.x. It uses a different navigation layout than older Moodle themes, which can affect where course links appear.

When using the Boost theme, the Media Gallery link may not appear in the standard Navigation menu. Instead, you can display the Media Gallery link in one of the following locations:

- Navigation block
- Course settings menu

To configure where the 'Media Gallery' link appears:

1. Go to your Moodle **Site administration** and select **Plugins**.

2. On the 'Plugins' page, scroll down to the **Local plugins** section and select **Kaltura Media Gallery**.

Filters

- Manage filters
- Common filter settings
- Convert URLs into links and images
- Display emoticons as images
- Display H5P
- Kaltura Media
- MathJax
- Multimedia plugins

Local plugins

- Manage local plugins
- Kaltura Media Gallery
- Kaltura package libraries
- My Media

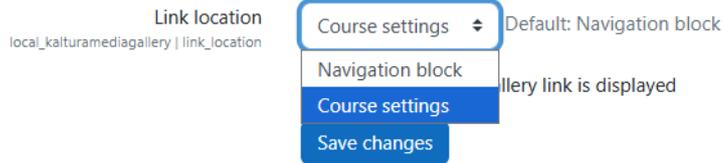

Logging

- Manage log stores
- Standard log

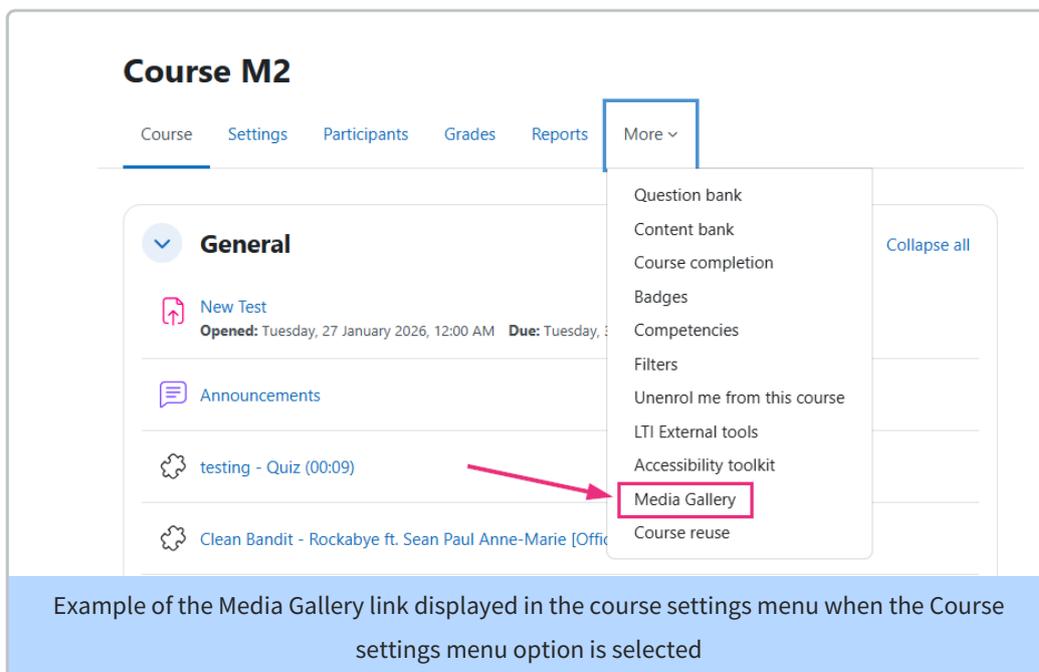

3. In the **Link location** dropdown, select where you want the **Kaltura Media Gallery** link to appear.

Kaltura Media Gallery

Settings

4. Click **Save changes**.

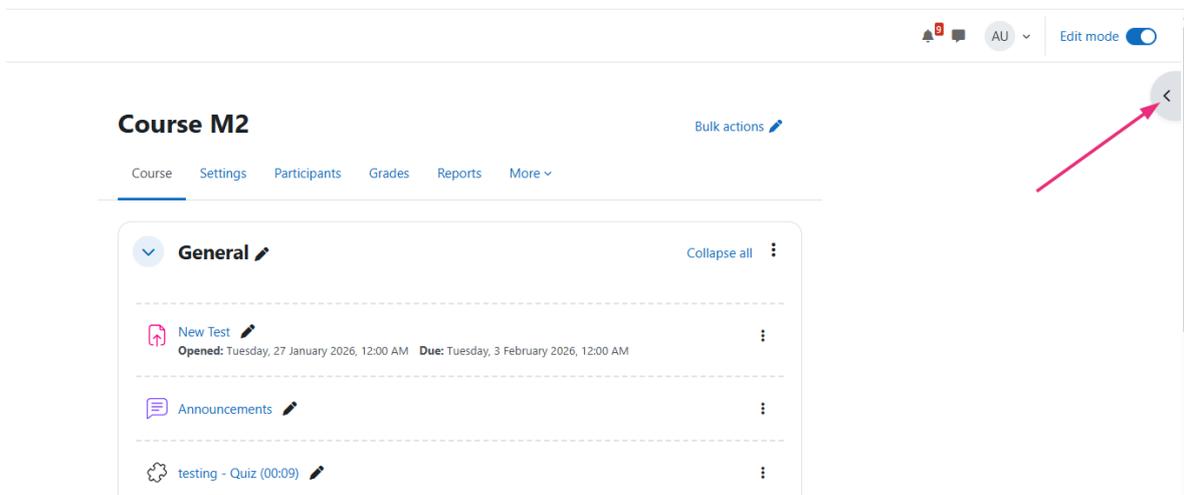

Add the Media Gallery as a separate block

In addition to displaying the Media Gallery link in navigation, you can add the Media Gallery as its own block within a course that appears in the course side panel.

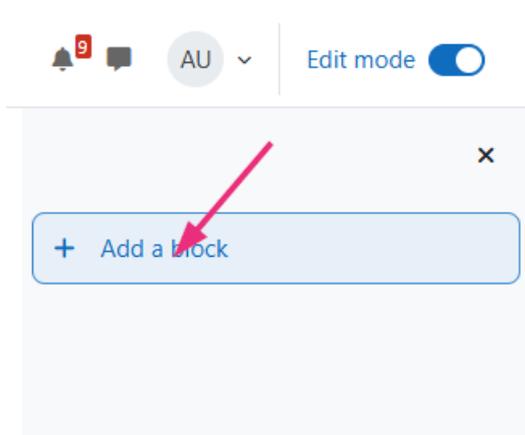

Adding the block can be done regardless of the Media Gallery link location you selected.

1. Open the course where you want the Media Gallery block to appear (you must have editing permissions for the course).
2. In the top-right corner of the course page, toggle on **Edit mode**.
3. Click the arrow on the right side of the page to open the block drawer.

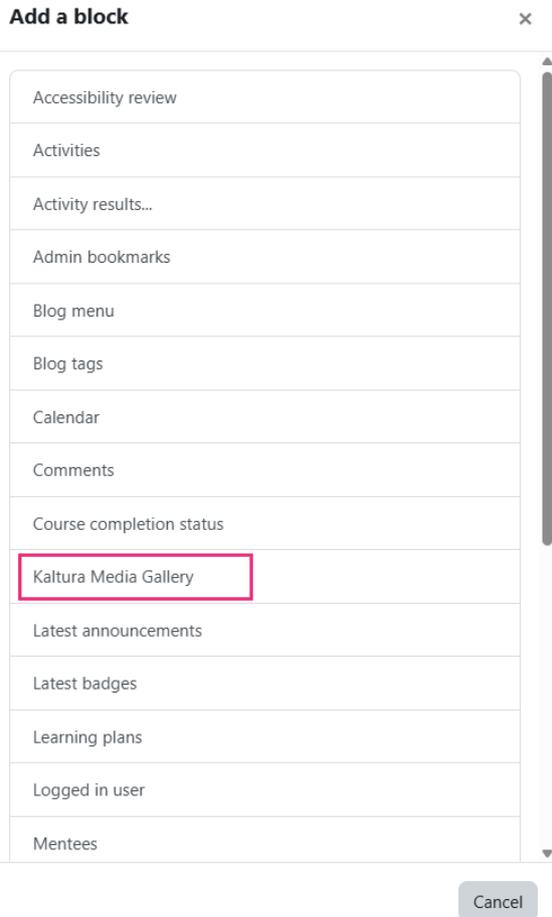

4. Click **Add a block**.

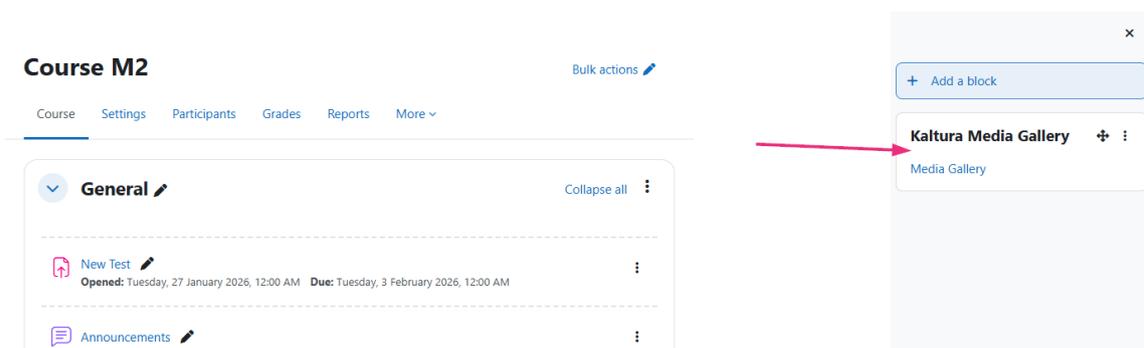

The 'Add a block' window opens.

5. Select **Kaltura Media Gallery**.

6. Select **Kaltura Media Gallery**.

The new block appears in the course side panel.

Roles and permissions

Moodle roles control access to Kaltura features and allowed actions.

To define roles:

1. Go to your Moodle **Site administration** and select **Users**.

Video Quiz Integration with Gradebook

To complete your Kaltura LMS Video integration, you must configure Video Quiz gradebook integration based on the LTI version you are using. Follow the appropriate guide:

- for LTI 1.1, see [Kaltura Video Quiz Moodle Gradebook Integration with LTI 1.1 Deployment Guide](#).
- for LTI 1.3, see [Kaltura Video Quiz Moodle Gradebook Integration with LTI 1.3 Deployment Guide](#).

The screenshot shows the Moodle 'Editing role' interface for the 'Course creator' role. At the top, there are navigation tabs: 'Manage roles', 'Allow role assignments', 'Allow role overrides', 'Allow role switches', and 'Allow role to view'. The main heading is 'Editing role 'Course creator''. Below this are two buttons: 'Save changes' and 'Cancel'. The form is divided into several sections:

- Short name:** A text input field containing 'coursecreator'.
- Custom full name:** An empty text input field.
- Custom description:** A large empty text area.
- Role archetype:** A dropdown menu showing 'ARCHETYPE: Course creator'.
- Context types where this role may be assigned:** A list of checkboxes with the following options:
 - System
 - User
 - Category
 - Course
 - Activity module
 - Block
- Allow role assignments:** A list of roles that can be assigned to this role:
 - Manager
 - Course creator
 - Teacher
 - Non-editing teacher
