

## The Kaltura game services leaderboard

 This article is designated for administrators.

### About

Use this module to create a leaderboard page on your the KMS site . The leaderboard presents users with score and rank for each of the site's users.

### Configuring the leaderboard

**enabled** - Select Yes to enable the Leaderboard module.

**dataSource** - Select how the page will get its data. When selecting the manual option, you will be asked to import a csv file with the rank, score, and ID of each user. Automatic options are currently unavailable and should be released soon.

The currently supported data sources are:

- Registration events
- Entry Playback ( live /VOD
- Quiz submission
- Chat and Collaborate upvote
- External Sources

**importUsersData** - Click Upload to upload a CSV containing the users' "userId, Score, Rank".

The CSV should be sorted by Rank (1 is at the top), and have a header line, starting with "\*" (e.g. "\*userId, Score, Rank").

**LeaderboardId** - Enter the Leaderboard ID.

**numberOfUsers** - Choose to display all users in the system on the leaderboard using pagination, or display the top users only.

**pageDescription** - Enter a description for the page.

**tableColumns** - Select the column you want to display for each user that is on the leaderboard.
