

How to manually upgrade to Player V7

Last Modified on 06/13/2024 2:27 pm IDT

 This article is designated for administrators.

About

Kaltura applications allow for various digital media players made available to end users in different features, components, and forms all useful in the transmission, performance, and/or playback of multimedia content.

This article describes how to upgrade your Kaltura default players **manually** from the legacy player (V2) to the new Kaltura Player (V7) in 3 simple steps.

You might repeat the steps in this guide for each player configured on your account. You may apply the same Kaltura Player (V7) across all the default players' components or set different ones. For the full player list, see [Kaltura Players list in KMS and KAF](#).

 **Recommended!** to upgrade your players using the **automatic tools**, please visit [Upgrade the Kaltura Player](#). A tool for automatically upgrading the BSE players will be available in future releases.

 **Note** - The legacy player (v2) will remain unchanged and will continue to be accessible through the Universal Studio. However, Universal Studio will eventually be deprecated.

Prerequisites

First, make sure that the **Kaltura Player Studio** is available in your KMC application. If not, please contact your Kaltura representative to have it enabled. To learn more, see [The Kaltura Player Studio Getting Started](#).

3-step Guide to Upgrading to the Kaltura Player (v7)

Step 1 - Create a player

Go to your KMC and create a player via the **Kaltura Player Studio**. See [Getting Started Guide - Player](#) for more information.

7 Players ☆ Starred [+ Create Player](#)

Name	ID	Last Modified	Creation Date	Plays (Last 30 days)	Domains (Last 30 days)
☆ MediaSpace Default Webcast Homepage Preview Player (Do Not Delete)	Outdated Version 51398672	21/11/2022	21/11/2022	0	0
☆ MediaSpace Default Registration Player (Do Not Delete)	51398572	21/11/2022	21/11/2022	0	0
☆ MediaSpace Default Path Player (Do Not Delete)	51398562	21/11/2022	21/11/2022	0	0
☆ MediaSpace Default TemplatePages Player (Do Not Delete)	51398272	21/11/2022	21/11/2022	0	0
☆ MediaSpace Default Recorder Widget Player (Do Not Delete)	51010512	16/11/2022	21/09/2022	45	2
☆ New Player css	50970682	14/09/2022	14/09/2022	0	0
☆ Knowledge Center Player - DO NOT DELETE	50952692	12/09/2022	12/09/2022	3	2

< 1 >

Step 2 - Configure your player

Custom your player with the desired capabilities and style using the **Kaltura Player Studio**. To learn more, see [Player Plugins & Kaltura Player Studio Admin Guide](#). After your player is configured, copy the player ID.

Step 3 - Apply the newly created player on your KMS/KAF application

Go to your KMS/KAF admin page, navigate to the desired module and paste the new player ID in its designated field.

Player

playerId	<input type="text" value="50970682"/>	What is the player ID (uiConf ID) of the player that plays the embedded video?
playerBarHeightPixels	<input type="text" value="30"/>	The height (in pixels) of the player ui which is not part of the actual video (for example - the bottom bar)
playerVideoRatioPercent	<input type="text" value="56.25"/>	The ratio (in percent) of the video inside the player. Standard values: 16:9 = 56.25 , 4:3 = 75 , 16:10 = 62.5
playerEditId	<input type="text" value="50952692"/>	What is the player ID (uiConf ID) of the player that edits entries?
autoPlayOnLoad	<input type="button" value="Yes"/>	When MediaSpace loads, should the video that is loaded in the player begin playing automatically? Notes: (1) Autoplay is triggered when MediaSpace starts and each time a new page loads, such as when switching from My Playlists to a gallery page. (2) The player always begins playing automatically when a user clicks a video in a gallery, regardless of whether autoPlayOnLoad is enabled.
playerModerationId	<input type="text" value="50952692"/>	What is the player ID (uiConf ID) of the player shown in moderation pages?

Updating the Modules Players

The above instructions should be applied for each player configured on your instance. Following you may find explicit guides for updating the player in the common modules.

[How to update the KMS and KAF application's default player?](#)

[How to update your default Embed player?](#)

[How to update the Quiz default player?](#)

[How to update the Webcasting default player?](#)

[How to update the Browse And Embed default player?](#)

[How to update the Entry Design default player?](#)

[How to update the Playlist default player?](#)

[How to update your Kaltura Embed codes?](#)

 The [registration](#) player and the [recorder](#) player are already set with the Kaltura Player (V7) by default.

Congratulations!!

You entered the V7 Players Club!
