Share and embed plugin

Content updated: 07/26/2022

This article is designated for all users.

About

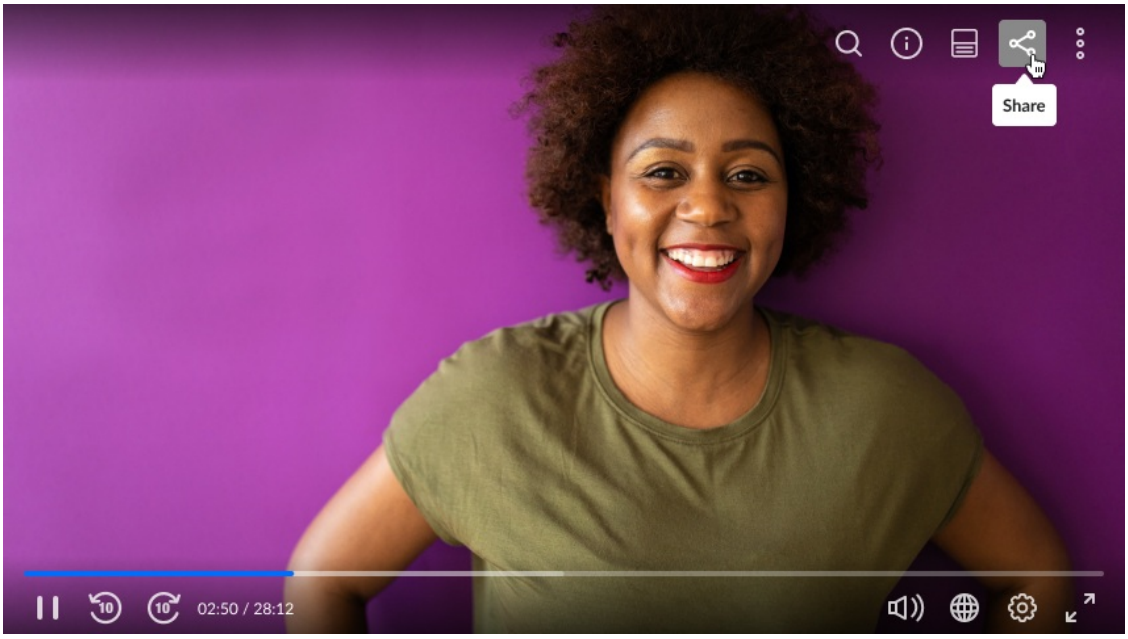

Viewers can share media from the player to social networks, by email, or as a direct link, using the **Share and embed** plugin. They can share the whole video or start it from a specific time. The plugin appears in the top right corner of the player.

To set up the plugin on a player, see Enable sharing and embedding in the player.

Share media

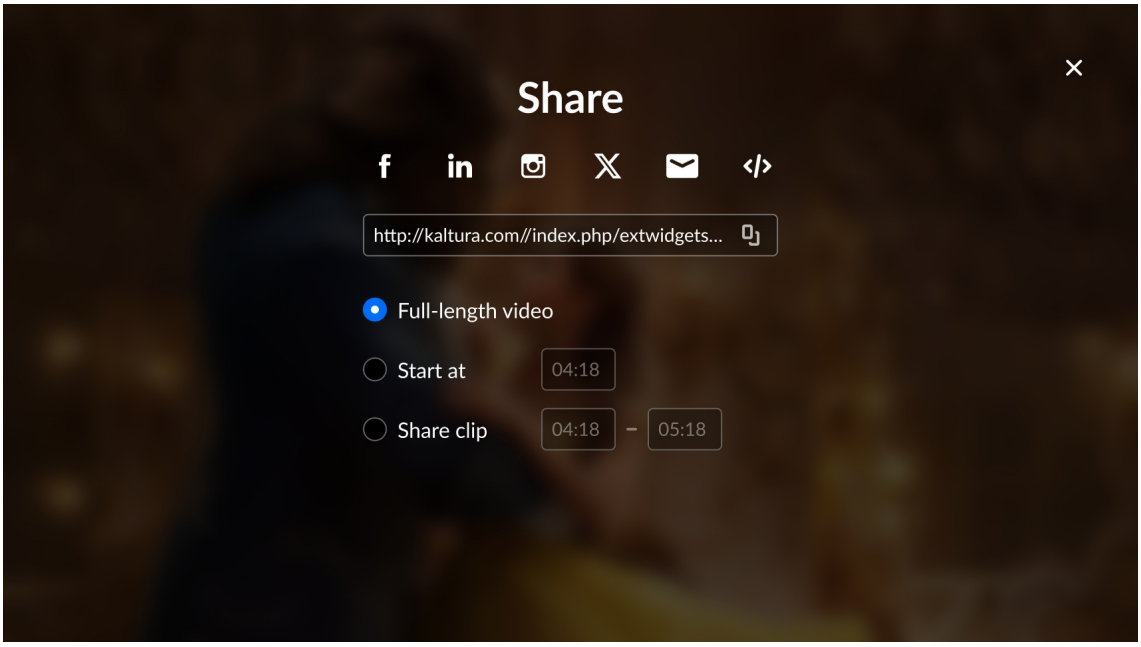

Your administrator sets which share options are available. If you don't see an option, ask your administrator to enable it.

1. Click the **share** icon.

The share options appear.

Copyright © 2025 Kaltura Inc. All Rights Reserved. Designated trademarks and brands are the property of their respective owners. Use of this document constitutes acceptance of the Kaltura Terms of Use and Privacy Policy.

2. Select a share option, and enter the details.

Share options

- **Start at** - Select the **Start at** checkbox, and enter the time you want the video to start. The shared link starts the video at that time.
- **Share clip** - Select **Share clip**, then select the start and end of the segment you want to share.
- **Use native share** - Opens your device's own share options.
- **Share via email**
- **Share via social networks** - Share to networks such as Facebook, LinkedIn, and X (formerly Twitter).

Admins can also set the URLs the plugin shares:

- **Share via URL** - Overrides the current page URL. To link to the video that's playing, add `{entryId}` to the address, for example: `https://{your_site_url}/media/{entryId}`
- **Share via embed URL** - Generates a link that updates to the video that's playing: `{embedBaseUrl}/p/{partnerId}/embedPlaykitJs/uiconf_id/{uiConfId}?iframeembed=true&entry_id={entryId}`
