Share & Embed

Last Modified on 06/02/2024 5:19 pm IDT

> **This article is designated for all users.**

Overview

The share plugin appears on the top right corner of the screen and offers the viewer the ability to share content to social media channels, email, or as a direct link. Viewers can share the entire video or from a specific time stamp.

Setup

To learn how to set the **Share & Embed** plugin on the player, see Settings tab.

Display

Click on the Share icon to display the sharing options.

Select a sharing option and enter the relevant details to share your content.

> ⚠ The sharing options are set by your administrator. If you don't see all of these options, ask your administrator to enable them.

Features

- Share via URL - This URL will override the current page-sharing URL. If desired, you can add {entryId} to the address, for example: {entryId}, and the link updates according to the entry ID of the video being played.
- Share via embed URL - This URL generates a link that dynamically updates based on the entry ID of the video being played: {embedBaseUrl}/p/{partnerId}/embedPlaykitJs/uiconf_id/{uiConfId}? iframeembed=true&entry_id={entryId}
- Start at - You can share the video from a specific time. Check the box **Start at** and enter the time you want the video to start. You can now share the link to start at the specified time.
- Share clip - You can share a segment of a video by choosing **Share clip** and then selecting the start and end position of the segment you'd like to share.
- Use native share - Invokes the native sharing mechanism of your device. (Web

[Share API](#))
- Share via email
- Share via social networks, such as Facebook, Linkedin, and X (formerly Twitter).
