Related content on player

Content updated: 07/26/2022

This article is designated for all users.

About

Related content helps you discover more videos without leaving the player. You can choose a video from the related videos list or use the **Next** button to play the next related video.

Depending on the player's configuration, the player may automatically continue to the next video after a configured delay and related videos may also display in full screen when you pause the video.

Setup

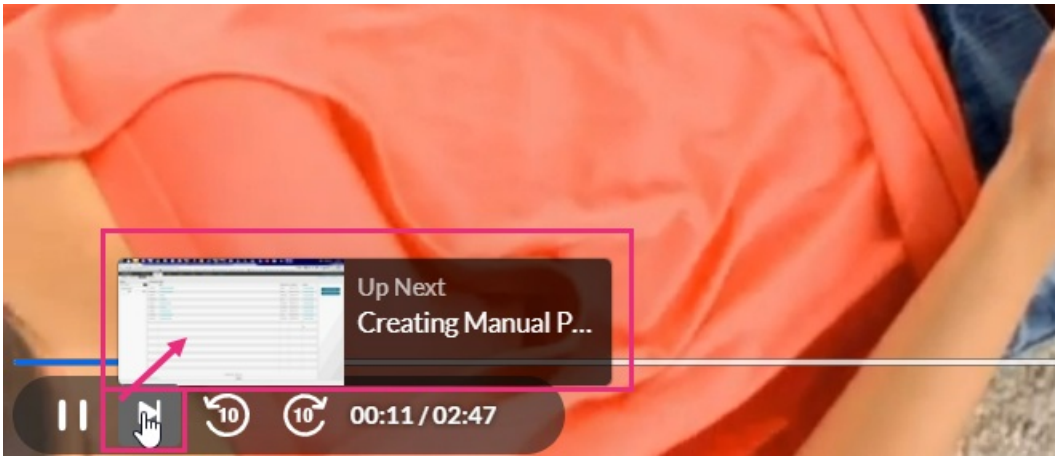

To learn how to set the **Related** plugin on the player, see Enable related content on the player.

Features

Preview the next video

Hover over the **Next** button to display a thumbnail preview of the next related video.

Play the next video

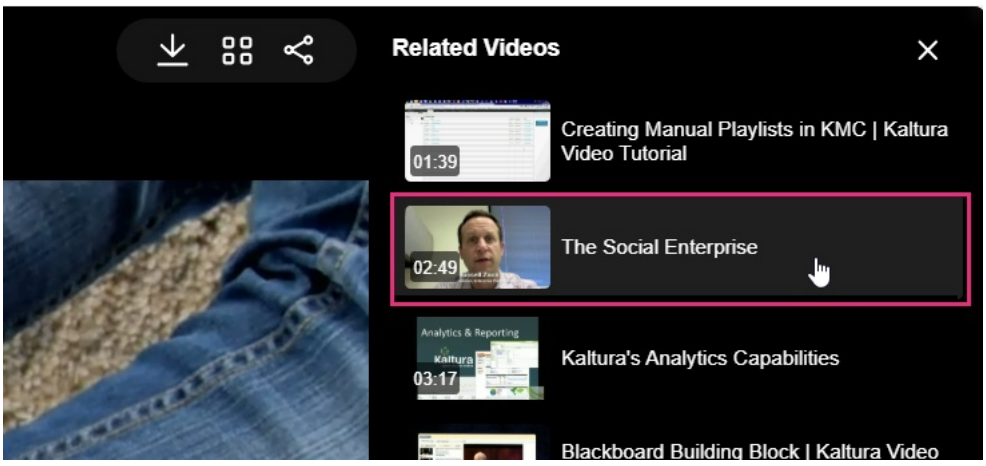

Click **Next** to load and play the next related video. You don't need to wait for the current video to finish.

Browse and select a related video

Open the related videos list using the **Related Videos** button in the player.

Browse the available videos and select a video to play it.

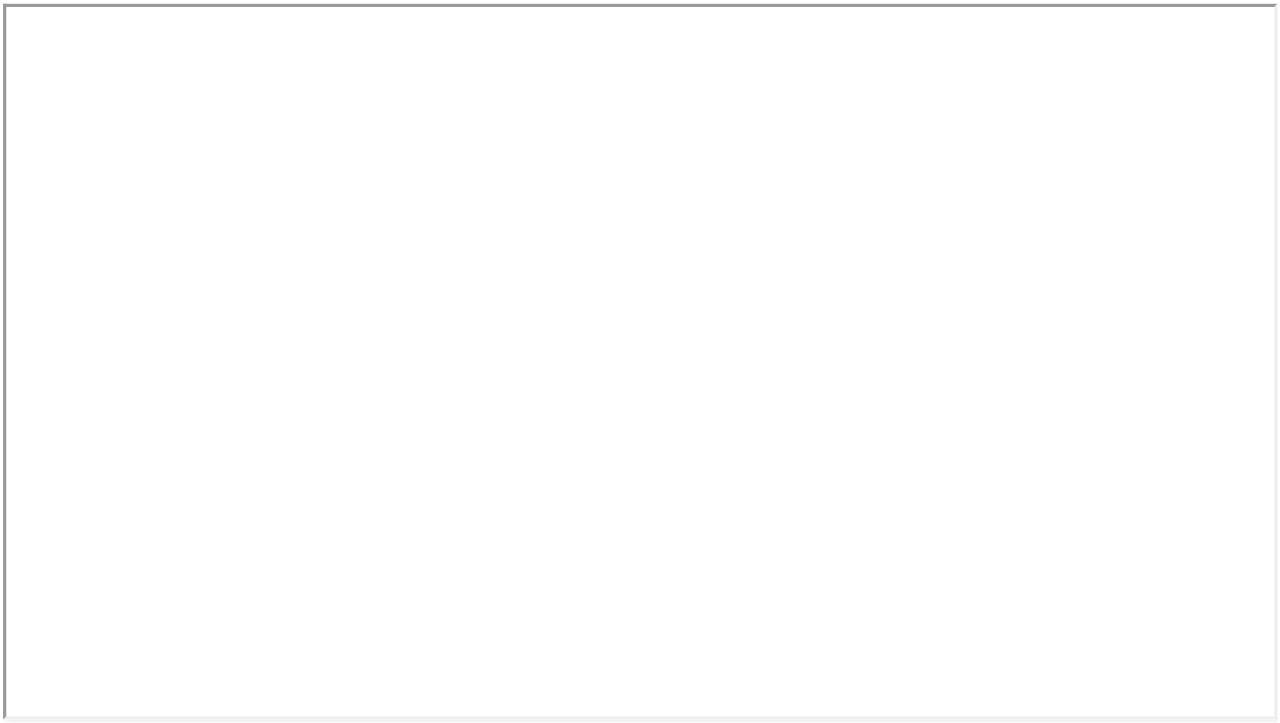

Continue automatically

If enabled, the player displays a countdown after the current video ends, then loads
