

Related content plugin

Last Modified on 09/05/2025 6:35 pm IDT

 This article is designated for all users.

About

Our **Related** plugin enhances your video player by displaying a list of related videos. This feature helps keep viewers engaged by suggesting additional content that aligns with their interests. When a video ends, the related videos appear, encouraging continuous viewing and increasing overall content consumption. The Related plugin is perfect for promoting relevant content and improving viewer retention.

The related videos icon (four squares) displays at the top right of the player.

Click on the icon to display the videos related to your currently selected video.

Setup

To learn how to set the **Related** Plugin on the player, see [Settings tab](#).

Features

- Related videos may be displayed when:
 - playback is paused
 - when clicking on the Related icon
 - at the end of the video
- Related videos may be selected manually by users or set to auto-continue by default.
- Related videos may be grouped by tags, Playlist ID, or by a specified Entries list.
