

## Verbit

Last Modified on 06/15/2026 8:11 pm IDT

 This article is designated for all users.

### About

With a suite of voice AI solutions, simple integrations and the largest professional captioner workforce in the world, Verbit makes delivering access easier than ever before.

Verbit's partners around the globe are now making their content and experiences more engaging and equitable to everyone. Plus, they're not only meeting accessibility guidelines, but making their information searchable and actionable.

Verbit helps you find it, teach it, or share it. Kaltura, through our REACH framework, automates Verbit's captioning services within the platform itself.

To learn about Kaltura's approach to responsible AI, see [Kaltura's Artificial Intelligence Principles](#).

Following are the Verbit services that you may order within Kaltura.
