

Channelthemingui module

Last Modified on 07/25/2025 1:47 pm IDT

Can an anticle is designated for administrators.

About

Once enabled, this module applies the new Theming design to channel pages. Channel owners will see the updated design and gain access to new configuration options in both this module and the channel edit page.

•

This module is designed for the Video Portal and LMS Video and requires the Theming module to be enabled for full functionality.

Configure

1. Go to your Configuration Management console, and click on the **Channelthemingui** module. You can also navigate directly using a

link: https://{your_KMS_URL}/admin/config/tab/channelthemingui.

2. Configure the following:

enable - set to 'Yes' to enable the module.

channelLayoutMode - Set the desired layout of channels. Choose from the following options (select 'Tabs' to display **Sessions**, **Videos**, **Playlists**, and **About** in tabs, and select 'Vertical' to show the channel elements one above the other, allowing navigation between the elements with a scroll):

- Per Channel, Default Tabs (default)
- Per Channel, Default Vertical
- Fixed Layout, Tabs
- Fixed Layout, Vertical

AddFiltersByTags - Enable filtering media within a channel using tag-based filters. Filters will appear in the vertical channel layout and on the **Sessions tab** within the 'Tabs' channel layout.

To add tags, click the **+AddFiltersByTags** button.

An additional section displays.

DELETE		
channels	Specify the channel IDs to apply this filter. Use a comma-separated list for multiple IDs or all for all channels.	
label	Define the display name for the filter.	
allValuesElement	Specify the label for the Choose All Tags option in the filter.	
tags	Add tags for the filter, one tag per line. The order entered here will dictate the display order of the filter.	

Complete the following fields:

channels - Enter the channel IDs to apply this filter. Use a comma-separated list for multiple IDs, or type 'all' to apply it to all channels.

label - Type in the name you want to display for the filter.

allValuesElement - Type in the label you want to display for the 'Choose All Tags' option in the filter.

tags - Type in tags for the filter, entering one tag per line. The order you enter will determine how they are displayed in the filter.
