

Introduction to Advanced Settings in the player

Last Modified on 03/23/2026 5:39 pm IST

 This article is designated for administrators.

About

Use **Advanced Settings** to configure player behaviors that aren't available in the standard Player Studio interface.

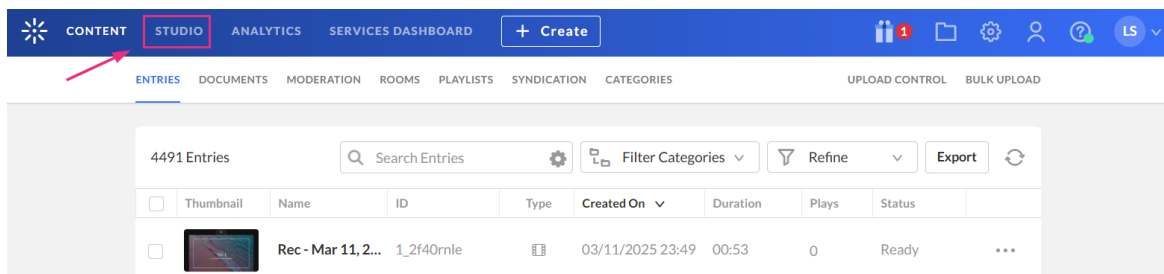

These settings provide a flexible configuration layer. If you're comfortable working with player configuration, you can extend and customize behavior beyond the examples documented here.

This article highlights commonly used configurations. For detailed steps, see the dedicated articles below.

Access the Advanced Settings editor

VOD **AUDIO** **REELS**

1. Log in to your KMC and click the **Studio** tab.

The **Player Studio** page displays.

2. Click the player you want to edit from the list (or use the search bar in the top right).

If you haven't created a player yet, check out our article [Create a player](#) for guidance.

3. Scroll to the bottom of the player settings and click **Advanced Settings**.

The Advanced Settings editor displays.

When you finish making changes, click **Save** at the top right before exiting..

Available settings

Advanced Settings allow you to control areas such as:

- **Playback behavior** – Volume, playback speed, looping, fullscreen behavior
- **Player UI** – Seek bar thumbnails, control visibility, layout tweaks
- **Text & captions** – Caption styling and display settings
- **Content & providers** – VR mode triggers and content handling
- **Moderation & interactions** – Player moderation-related options

Specific configurations

The following articles cover specific player configurations. For step-by-step instructions, click the links below:

- [Customize player text labels](#)
- [Enable in-browser fullscreen](#)
- [Show preview thumbnails on the seek bar](#)
- [Change the default caption style](#)
- [Disable the advanced captions settings option](#)
- [Set the default player volume](#)
- [Set a custom tag for VR mode](#)
- [Define available playback speeds](#)
- [Set the default audio language](#)
- [Enable loop playback](#)
- [Modify moderation settings](#)
- [Control how captions are rendered](#)
