Addcontent module

Content updated: 10/24/2022

This article is designated for administrators.

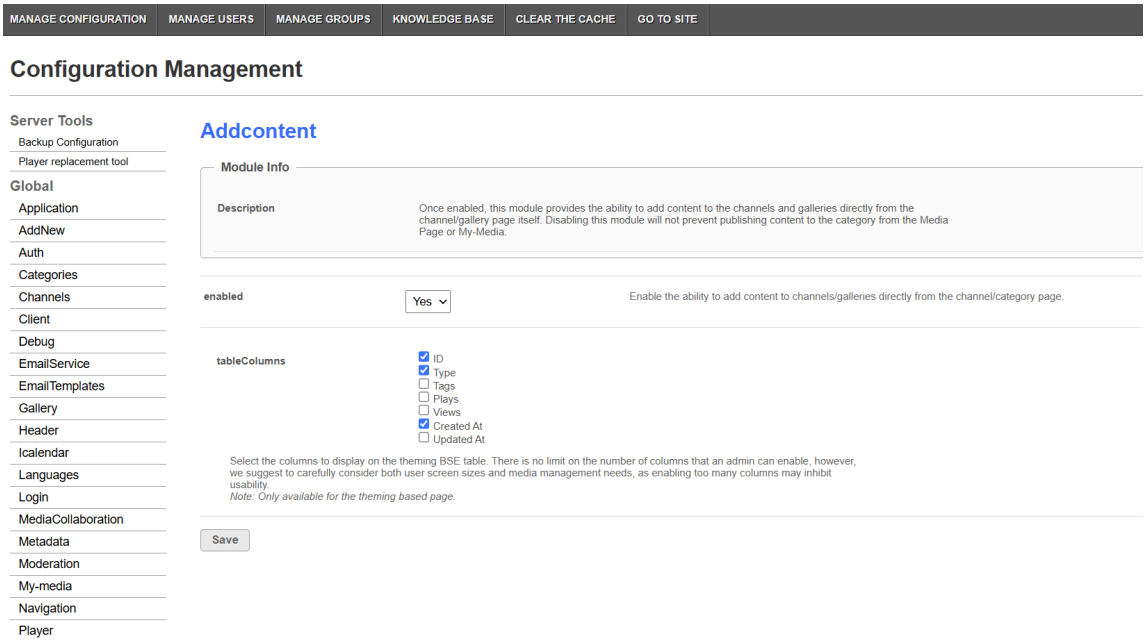

About

Once enabled, this module allows you to add content directly to channels and galleries from their respective pages. Disabling the module won't prevent content from being published to the category via the media page or My Media.

Configure

1. Go to your Configuration Management console, locate the **Addcontent** module in the left panel, then select it. You can also navigate to it directly using a link: https://{your_site_URL}/admin/config/tab/addcontent.

   The **Addcontent** page displays.

2. Configure the following:

   enabled - Set to 'Yes' to enable the module.

   tableColumns - Select which columns to display on the Theming-based **Embed Kaltura Media** table: **ID**, **Type**, **Tags**, **Plays**, **Views**, **Created At**, and **Updated At**.

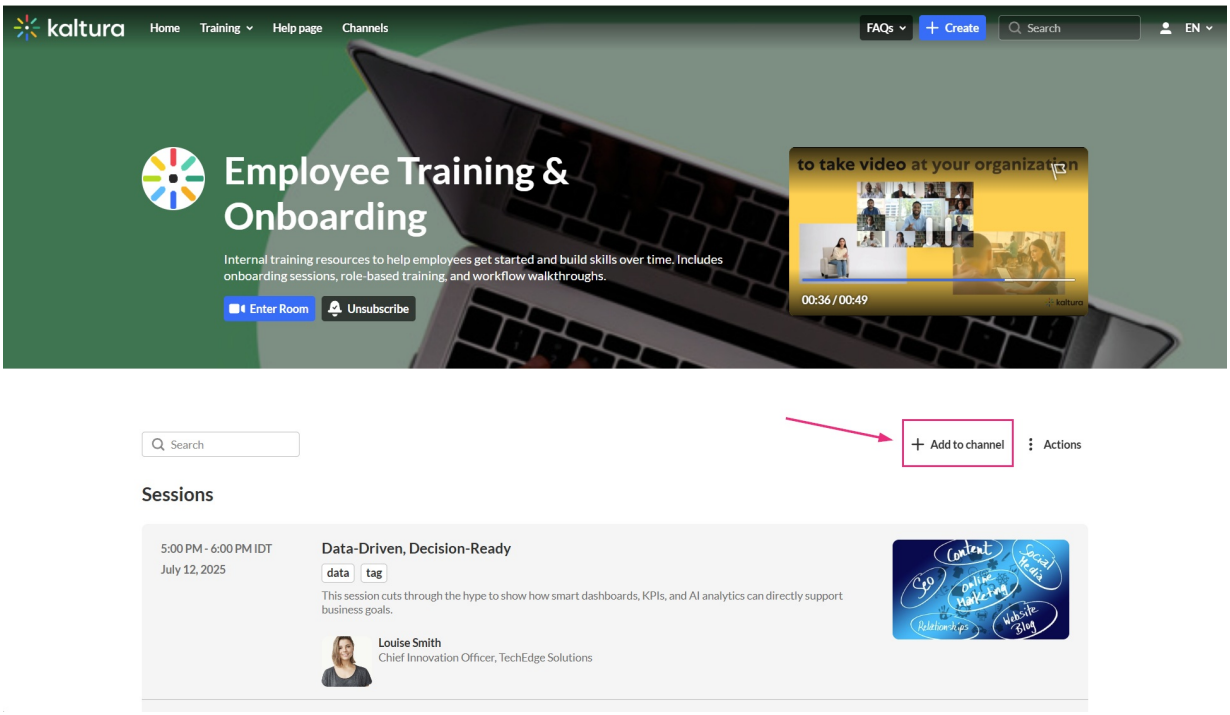

Copyright © 2025 Kaltura Inc. All Rights Reserved. Designated trademarks and brands are the property of their respective owners. Use of this document constitutes acceptance of the Kaltura Terms of Use and Privacy Policy.

You can enable as many of these columns as you like, but consider screen size and media management needs. Enabling all of them can hurt usability. This setting only applies to the Theming-based page.

3. Click **Save**.

User experience

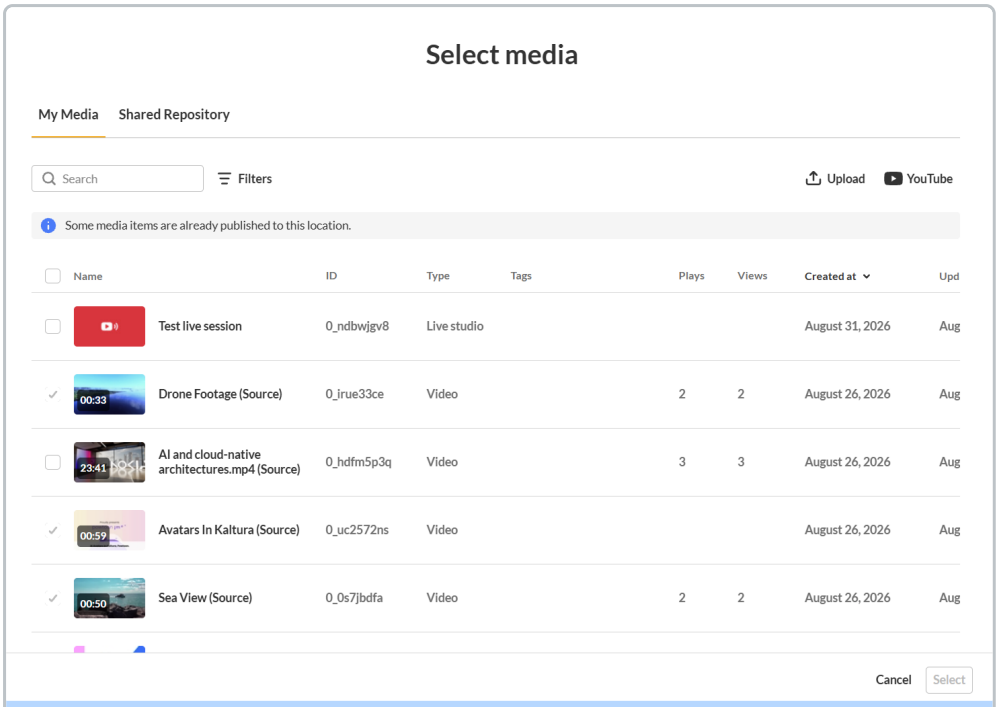

- When enabled, the **+Add to Channel** button is displayed on the channel page.

To learn more about configuring channels, visit our Channel modules category.

- When adding media to a channel or gallery, the table columns shown reflect the selection configured in the `tableColumns` field.
