Oracle Cloud Infrastructure Speech

Oracle Cloud Infrastructure (OCI) Speech provides fast, accurate transcription of audio or video files by applying ASR (Automatic Speech Recognition) technology. Through Kaltura's REACH platform, you can use Oracle's OCI Speech service to add subtitles to your audio and video files for enterprise scenarios including transcribing video files from trainings, meetings, keynote presentations, classrooms, and more. Upload your files to Kaltura's REACH platform and REACH will automatically transcribe your files using OCI's fast Speech To Text engine, reducing production time and making it faster to publish your content.

Following are the OCI Speech services that are available through Kaltura:

Machine Caption Language	English
Turn-around Time	24 hours

Please see the following articles for information on configuring and working with REACH.
