

Order live captions for scheduled events in legacy Video Portal

Last Modified on 06/04/2026 9:15 am IDT

 This article is designated for all users.

About

Kaltura provides machine-generated **live captions** through its [Reach service](#). Once enabled on your account, this service can be ordered for any scheduled event via your legacy Video Portal, Events platform or [Rich Media CMS](#).

Live captions are only supported for [scheduled events](#) created using the Webcasting (kwebcast) setup. This is because [Reach](#) relies on scheduling data (like start and end times), which regular live entries created manually don't include.

If you don't see the **Live captions** option, your event may be a regular live stream or the feature may not be enabled. Please contact your Kaltura representative to check your setup or enable this feature.

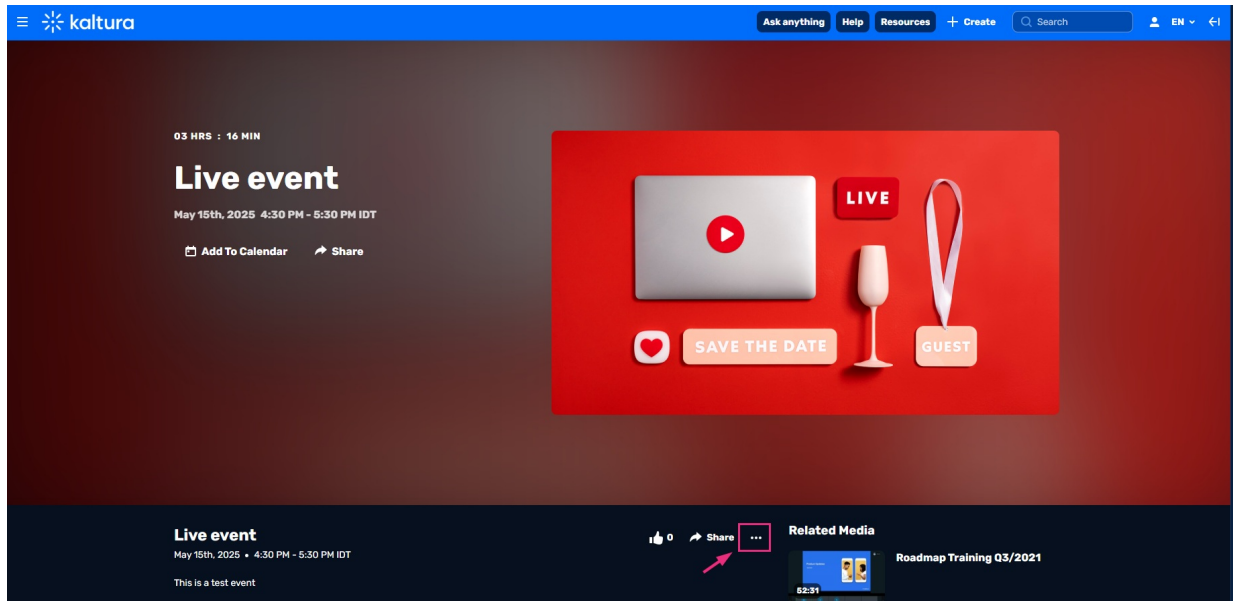

If you're using captions from your **encoder** instead of Reach, see [Ingest live captions \(encoder-based\)](#).

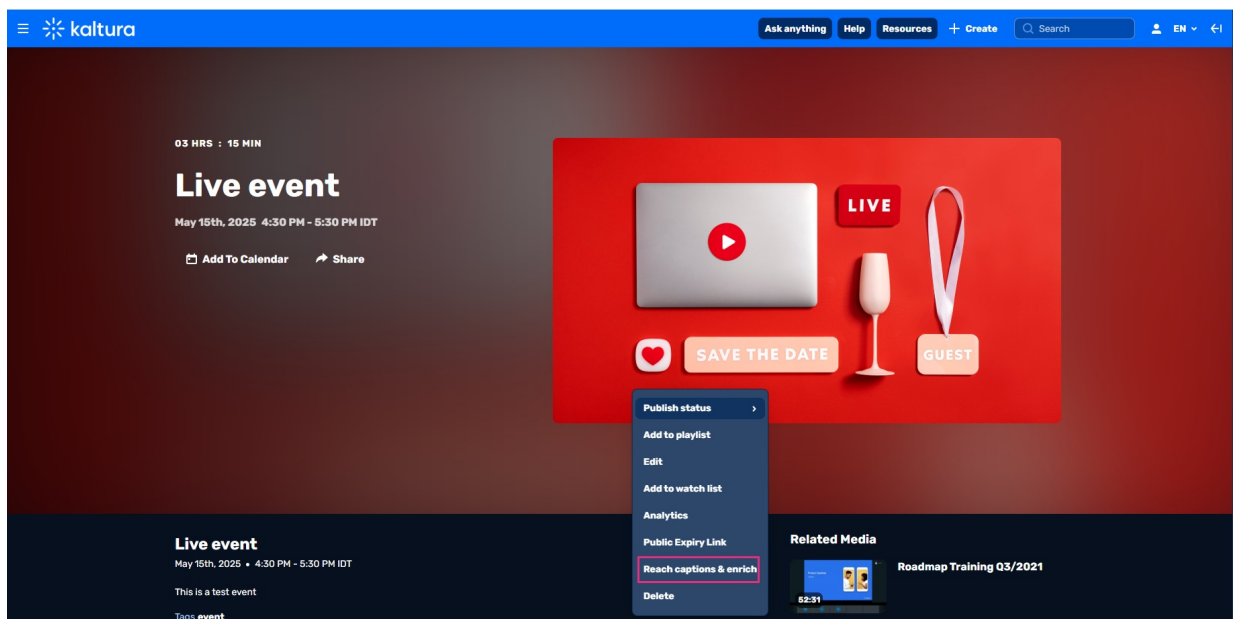

The instructions below show the Theming interface. If your site doesn't use Theming, see our article [legacy Video Portal Theming tour](#) to learn more.

Order live captions

1. Open the event entry page and click the **three-dot menu** below the player.

2. From the drop-down options, select **Reach captions & enrich**.

3. The **Reach captions and enrich** screen displays.

Reach captions & enrich

ASR order is approved automatically, Pro Human requires moderation. reach@kaltura.com for questions.

Feature Live Captions	Service type Machine
Source media language English	
We recommend to extend the live captions scheduling to avoid disconnections before the event ends	
Live captions start time: At the beginning of the event	Live captions end time: At the end of the event

Close **Order**

Make sure your event was created as a scheduled webcast. This option isn't available for regular live entries.

4. Complete the following fields:

- **Feature** - Select **Live Captions**
- **Service** - Choose **Machine**
- **Source media language** - Select the spoken language

Multiple languages are supported. Don't see yours? Contact your Kaltura rep to request it.

- **Live captions start time** - Choose when the captioning service should start:
 - at the beginning of the event
 - 15 minutes before the event starts (recommended)
 - 30 minutes before the event starts
 - 60 minutes before the event starts
- **Live captions end time** - Choose how long captions should run after the scheduled end time:
 - at the end of the event
 - 15 minutes after the event ends
 - 30 minutes after the event ends
 - 60 minutes after the event ends

To avoid disconnects, schedule captions to start slightly before your event, and place the order at least 5 minutes in advance.

- Click **Order** at the bottom right.

To return to the order summary, click **Back**.

ⓘ Please note that if you reschedule the event, the original order won't update automatically. You will have to cancel it and place a new order.

Status definitions

- **Pending** - The vendor has not yet opened the request
- **Scheduled** - The request has been accepted and is being processed
- **Completed** - The captioning job was completed successfully

ⓘ Only start streaming when all caption orders show **Scheduled**. If the status is **Pending**, wait and refresh the list manually.

Reach captions & enrich					
Language	Service type	Feature	Request Date	Status	Actions
English	Machine	Live Captions	May 15th, 2025	● Scheduled	ⓘ
Spanish	Machine	Live Translation	May 15th, 2025	● Scheduled	ⓘ
German	Machine	Live Translation	May 15th, 2025	● Pending	🗑️ ⓘ

Best practices for live captions

- Start streaming a few minutes early to ensure full caption coverage.

- Machine captions must be ordered at least 15 minutes before the event.
 - You can cancel machine orders anytime before the event.
 - Captions apply to the primary stream only - backup streams aren't supported.
 - Events must be at least 10 minutes long (600 seconds minimum).
 - Captions can last up to 8 hours per session.
-
