

How to update the KMS and KAF application's default player

Last Modified on 02/05/2024 8:19 am IST

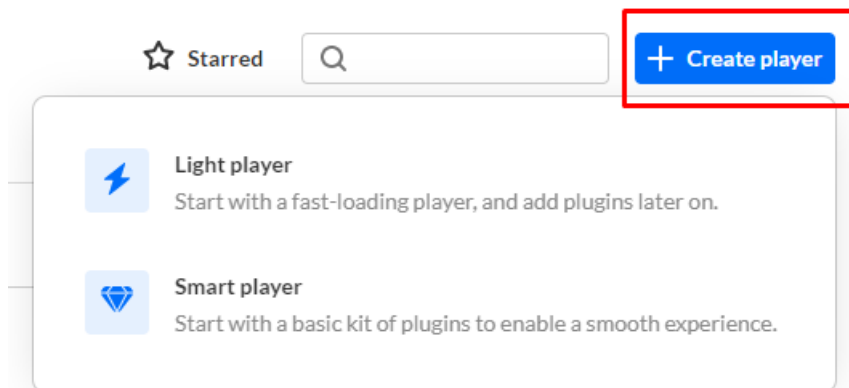

The newly released V7 Player is used for the playback of media in your Kaltura MediaSpace and KAF applications. For additional information, see the [Player module](#).

Step 1 - Create a player

Go to your KMC and create a Smart Player via the **Kaltura Player Studio**. See [The Kaltura Player Getting Started Guide](#) for more information.

7 Players							☆ Starred	Q	+ Create Player
Name	ID	Last Modified	Creation Date	Plays (Last 30 days)	Domains (Last 30 days)				
☆ MediaSpace Default Webcast Homepage Preview Player (Do Not Delete)	51398672	21/11/2022	21/11/2022	0	0	Outdated Version			
☆ MediaSpace Default Registration Player (Do Not Delete)	51398572	21/11/2022	21/11/2022	0	0				
☆ MediaSpace Default Path Player (Do Not Delete)	51398562	21/11/2022	21/11/2022	0	0				
☆ MediaSpace Default TemplatePages Player (Do Not Delete)	51398272	21/11/2022	21/11/2022	0	0				
☆ MediaSpace Default Recorder Widget Player (Do Not Delete)	51010512	16/11/2022	21/09/2022	45	2				
☆ New Player css	50970682	14/09/2022	14/09/2022	0	0				
☆ Knowledge Center Player - DO NOT DELETE	50952692	12/09/2022	12/09/2022	3	2				

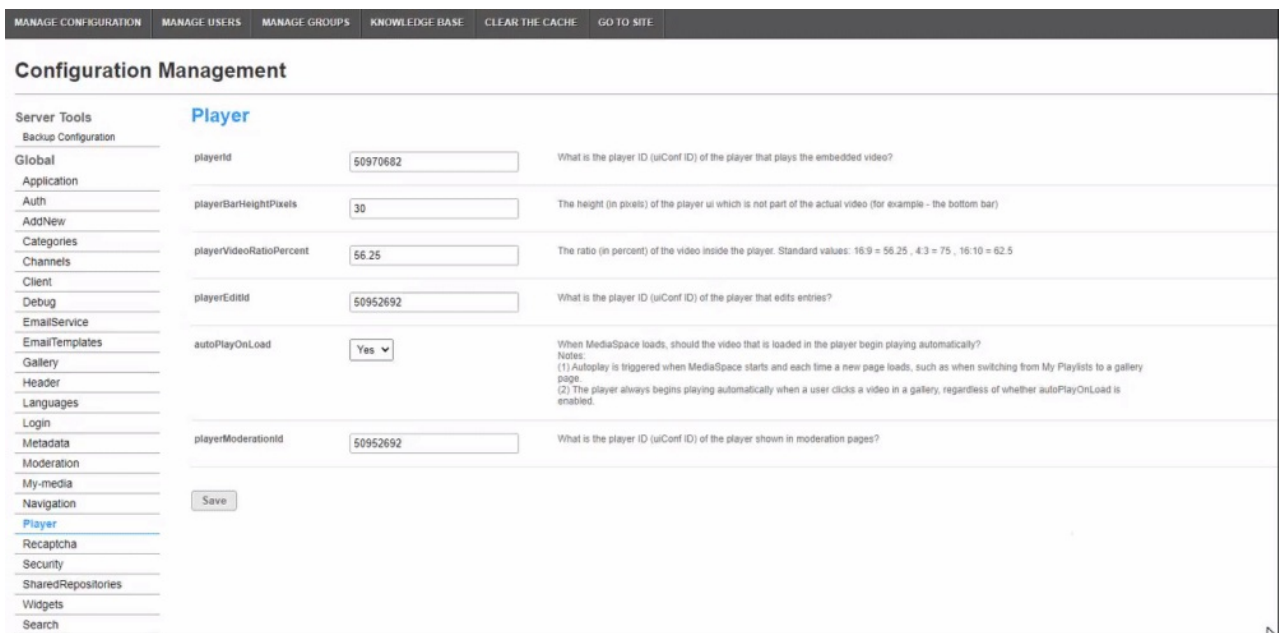

Step 2 - Configure your player

Custom the player with the desired capabilities and style using the **Kaltura Player Studio**. To learn more, see [Player Plugins & The Kaltura Player Admin Guides](#). After your player is configured, copy the player ID.

Step 3 - Apply the new player on your KMS/KAF application

1. Go to your KMS/KAF admin page and navigate to the [Player](#) module.
2. Set **playerId** with the uiConfId of the new player.
3. Optional - You may also set the same uiConfId under **playerEditId** and **playerModerationId**.
4. Save.
