

How to update the Browse And Embed default player

Last Modified on 02/05/2024 8:16 am IST

This is the default player that is selected for the playback of embedded media items in your course Media Gallery in KAF applications only. For additional information, see the [Browseandembed module](#).

Step 1 - Create a new player

Go to your KMC and create a player via the **Kaltura Player Studio**. See [The Kaltura Player Getting Started Guide](#) for more information.

Name	ID	Last Modified	Creation Date	Plays (Last 30 days)	Domains (Last 30 days)
MediaSpace Default Webcast Homepage Preview Player (Do Not Delete)	51398672	21/11/2022	21/11/2022	0	0
MediaSpace Default Registration Player (Do Not Delete)	51398572	21/11/2022	21/11/2022	0	0
MediaSpace Default Path Player (Do Not Delete)	51398562	21/11/2022	21/11/2022	0	0
MediaSpace Default TemplatePages Player (Do Not Delete)	51398272	21/11/2022	21/11/2022	0	0
MediaSpace Default Recorder Widget Player (Do Not Delete)	51010512	16/11/2022	21/09/2022	45	2
New Player css	50970682	14/09/2022	14/09/2022	0	0
Knowledge Center Player - DO NOT DELETE	50952692	12/09/2022	12/09/2022	3	2

Step 2 - Configure your player

Configure the player with the desired capabilities and style using the **Kaltura Player Studio**. To learn more, see [Player Plugins & The Kaltura Player Admin Guides](#). After your player is configured, copy the player ID.

Step 3 - Apply the new player on your KMS/KAF application

1. Go to your KMS/KAF admin page and navigate to the [Browseandembed](#) module.
2. Set **BSEPlayerId** with the uiConfId of the new player.
3. If additional players are available under **embedSettings**, make sure to set their **playerId** with the new uiConfIds.
4. **Save.**

Module Info

Info

The 'Browseandembed' module control the way users can use the Browse, Search & Embed (BSE) tool.

- Please make sure players are set. We recommend to make sure the 'BSEPlayerId' field is filled up
- Note that depending on the LMS/CMS used, the feature set might be different. To read more, please see the [BSE documentation](#).

enabled	<input type="checkbox"/> Yes	Enable the Browseandembed module.
returnUrlMethod	POST	Which method to use for the return url action.
allowEmbedFromMultipleCourses	No	Defines how many categories to include when embedding media.
filterTypeAttribute	custom_filter_type	The LTI attribute the get the filter type from.
disableAddNewAttribute	custom_disable_add_new	The LTI attribute the get the disable-add-new from.
enableNewBSEUI	v3	This field enables the brand new Browse and Embed UI and functionality.
EmbedSettingsButton	Show	Select 'Yes' to present the Embed Settings button, allowing users to change the embed settings before embedding media.
enableQuickIngest	Yes	Turn on the Quick Ingest endpoint. Once on, it can either replace the existing Browse and Embed endpoint, or can be used as a standalone tool using this URL: <input type="text" value="(KAF_Base_URL)/browseandembed/quick-ingest"/>
setBSEtoQuickingest	Browse and Embed	Select 'Quick Ingest' in order to redirect requests from browseandembed/index/browseandembed to working with the quick ingest directly.
quickingestLargeicons	<input type="checkbox"/>
