

How to update the Entry Design default player

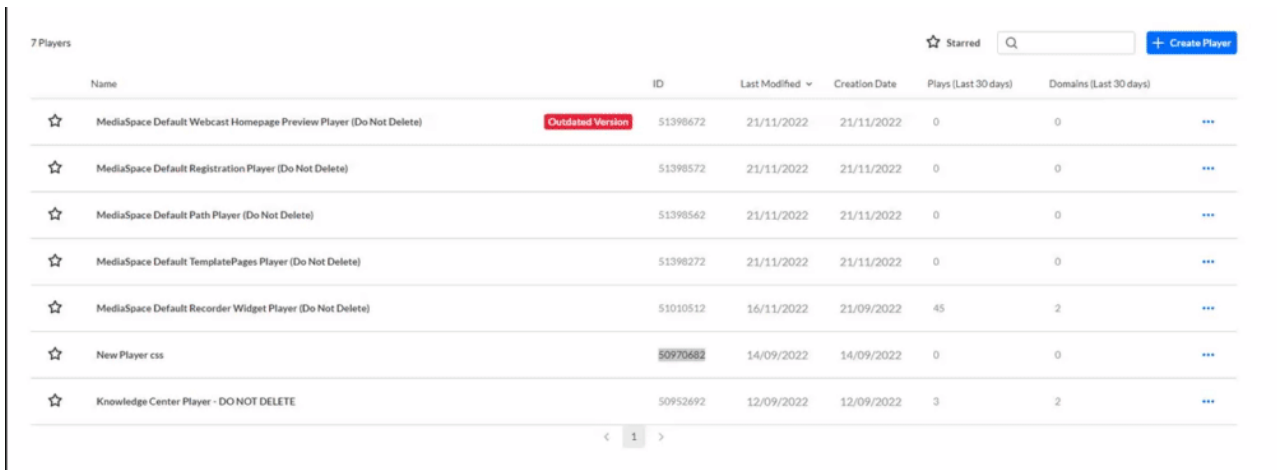

Last Modified on 02/05/2024 8:17 am IST

The newly created V7 Player is used for the playback of media designed for specific media pages in your Kaltura MediaSpace and KAF applications. For additional information, see the [Entrydesign](#) module.

By default, the [Entrydesign](#) module uses the site's default player. If a different player is specified, follow the steps below.

Step 1 - Create a new player

Go to your KMC and create a player via the **Kaltura Player Studio**. See [The Kaltura Player Getting Started Guide](#) for more information.

Name	ID	Last Modified	Creation Date	Plays (Last 30 days)	Domains (Last 30 days)
MediaSpace Default Webcast Homepage Preview Player (Do Not Delete)	51398672	21/11/2022	21/11/2022	0	0
MediaSpace Default Registration Player (Do Not Delete)	51398572	21/11/2022	21/11/2022	0	0
MediaSpace Default Path Player (Do Not Delete)	51398562	21/11/2022	21/11/2022	0	0
MediaSpace Default TemplatePages Player (Do Not Delete)	51398272	21/11/2022	21/11/2022	0	0
MediaSpace Default Recorder Widget Player (Do Not Delete)	51010512	16/11/2022	21/09/2022	45	2
New Player css	50970682	14/09/2022	14/09/2022	0	0
Knowledge Center Player - DO NOT DELETE	50952692	12/09/2022	12/09/2022	3	2

Step 2 - Configure your player

Configure the player with the desired capabilities and style using the **Kaltura Player Studio**. To learn more, see [Player Plugins & The Kaltura Player Admin Guides](#). After your player is configured, copy the player ID.

Step 3 - Apply the new player on your KMS/KAF application

1. Go to your KMS/KAF admin page and navigate to the [Entrydesign](#) module.
2. Under **players**, set **playerId** with the uiConfId of the new player.
3. **Save.**

Module Info

name	Entry Design	
description	Enable the entryDesign Module to allow media owners and co-editors to specify the look and feel of the entry view page.	

enabled Yes Enable the Entrydesign module

entryDesignRole Roles that are allowed to theme entries

players

Fill in the player ID and player display name you wish to allow the users to use in the entry page. If no Player ID is filled, the site's default player will be used.

1	DELETE		
		playerDisplayName <input type="text" value="video"/>	Player Display Name
		playerId <input type="text" value="51398652"/>	Player ID
		entryType <input type="text" value="Video"/>	Entry Type

showEmbedPlayerOption

Select the EntryDesign players behavior with the Embed and default players. Select 'User Selects' to show a new button for the users called 'Set as Embed Player' next to the player selection. For more info about each value, [visit Kaltura Knowledge Base](#)

showEmbedElements Select which elements can be displayed for the media owners to control. The media owners will be able to choose which of the elements
