

How to update the Playlist default player

Last Modified on 02/05/2024 8:17 am IST

The newly created V7 Player is used for the playback of playlists in your Kaltura MediaSpace and KAF applications. For additional information, see the [PlaylistPage](#) module.

If needed, please also follow the steps below for [Channelplaylists](#) , [Addtoplaylists](#) , [embedplaylist](#) modules respectively.

Step 1 - Create a new player

Go to your KMC and create a player via the **Kaltura Player Studio**. See [The Kaltura Player Getting Started Guide](#) for more information.

Name	ID	Last Modified	Creation Date	Plays (Last 30 days)	Domains (Last 30 days)	
MediaSpace Default Webcast Homepage Preview Player (Do Not Delete)	51398672	21/11/2022	21/11/2022	0	0	...
MediaSpace Default Registration Player (Do Not Delete)	51398572	21/11/2022	21/11/2022	0	0	...
MediaSpace Default Path Player (Do Not Delete)	51398562	21/11/2022	21/11/2022	0	0	...
MediaSpace Default TemplatePages Player (Do Not Delete)	51398272	21/11/2022	21/11/2022	0	0	...
MediaSpace Default Recorder Widget Player (Do Not Delete)	51010512	16/11/2022	21/09/2022	45	2	...
New Player css	50970682	14/09/2022	14/09/2022	0	0	...
Knowledge Center Player - DO NOT DELETE	50952692	12/09/2022	12/09/2022	3	2	...

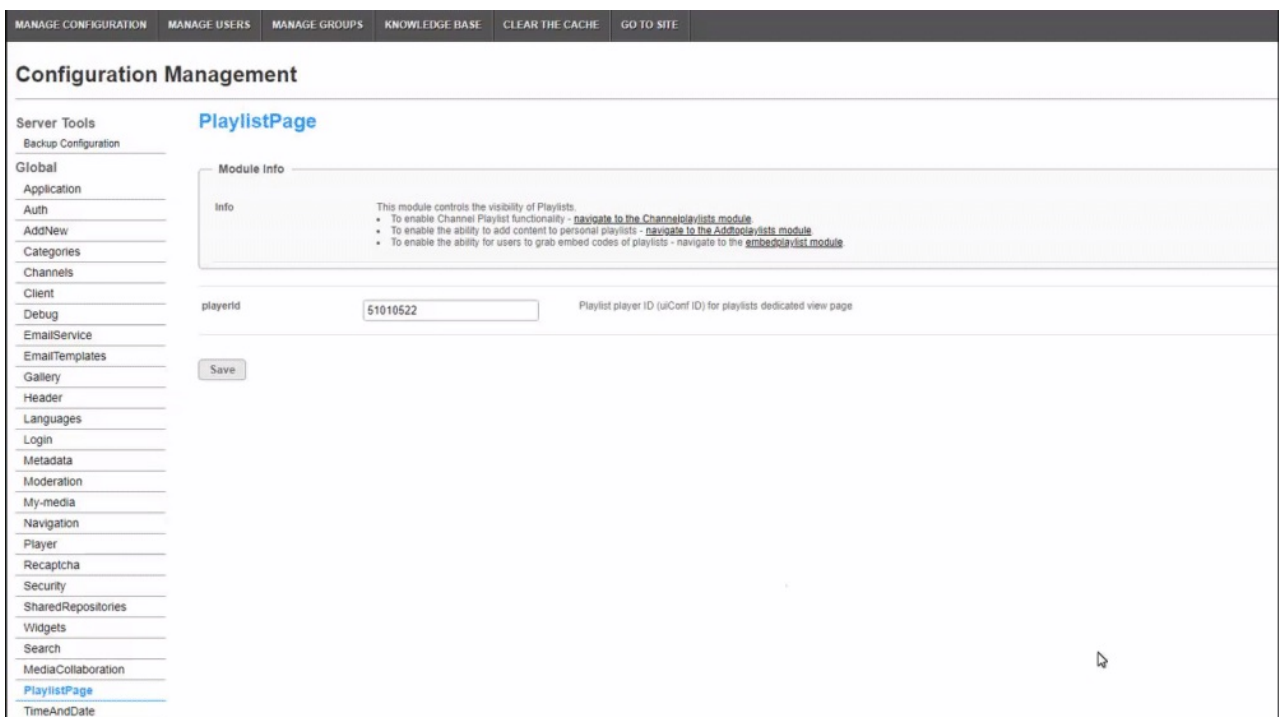

Step 2 - Configure your player

Configure the player with the desired capabilities and design using the **Kaltura Player Studio**. To learn more, see [Player Plugins & The Kaltura Player Studio Admin Guides](#) Make sure to enable the **Playlist Plugin** under the Plugins tab. After your player is configured, copy the player ID.

Step 3 - Apply the new player on your KMS/KAF application

1. Go to your KMS/KAF admin page and navigate to the [PlaylistPage](#) module.
2. Set **playerId** with the uiConfId of the new player.
3. **Save.**
