

How to update your Kaltura Embed codes

The newly released V7 Player is used for the playback of embedded media outside of Kaltura applications. For additional information, see the [Share & Embed](#) tab.

Step 1 - Create a player

Go to your KMC and create a player via the **Kaltura Player Studio**. See [The Kaltura Player Getting Started Guide](#) for more information.

7 Players ☆ Starred [+ Create Player](#)

	Name	ID	Last Modified	Creation Date	Plays (Last 30 days)	Domains (Last 30 days)	
☆	MediaSpace Default Webcast Homepage Preview Player (Do Not Delete)	Outdated Version 51398672	21/11/2022	21/11/2022	0	0	...
☆	MediaSpace Default Registration Player (Do Not Delete)	51398572	21/11/2022	21/11/2022	0	0	...
☆	MediaSpace Default Path Player (Do Not Delete)	51398562	21/11/2022	21/11/2022	0	0	...
☆	MediaSpace Default TemplatePages Player (Do Not Delete)	51398272	21/11/2022	21/11/2022	0	0	...
☆	MediaSpace Default Recorder Widget Player (Do Not Delete)	51010512	16/11/2022	21/09/2022	45	2	...

Step 2 - Configure your player

Configure the player with the desired capabilities and style using the **Kaltura Player Studio**. To learn more, see [Player Plugins & The Kaltura Player Admin Guides](#)

Step 3 - Get the new embed code

Open your [KMC Dashboard](#) and follow these steps:

1. Go to the **CONTENT > ENTRIES** tab.

2. Locate your desired Entry and click the **three dots icon** on the right.
3. Select the **Share & Embed** option.
4. In the **Share & Embed** window, select the player from the dropdown on the top.
The players are sorted by the updated date, and on the left of each of them, you will see an **icon** indicating what player it is V2 or V7.
5. Select the newly created V7 Player from the list.
6. Click on Advanced Settings to select your preferred **Embed Type** or stick with the default Embed Type (IFrame Embed)
7. Copy the **Embed Code**.

This embed code is updated with the new V7 player Embed Code.

That's all, now you can grab the Embed Code and embed it on your webpage as before.

The screenshot shows the Kaltura 'Share & Embed' interface. At the top, there's a 'Select Player' dropdown set to 'V7 media player'. Below this is a video player showing a hand against a red background. To the right of the video player, there's a sidebar with several sections: 'Say Hello', 'Embed Code' (containing a code snippet and a 'Copy' button), 'Standalone Preview' (with a URL), 'Scan Code for Mobile Preview' (with a QR code), and 'Advanced Settings' (with a link).
