

How to update your Kaltura Embed codes

Last Modified on 02/05/2024 8:17 am IST

The newly released V7 Player is used for the playback of embedded media outside of Kaltura applications. For additional information, see the [Share & Embed](#) tab.

Step 1 - Create a player

Go to your KMC and create a player via the **Kaltura Player Studio**. See [The Kaltura Player Getting Started Guide](#) for more information.

Name	ID	Last Modified	Creation Date	Plays (Last 30 days)	Domains (Last 30 days)
MediaSpace Default Webcast Homepage Preview Player (Do Not Delete)	51398672	21/11/2022	21/11/2022	0	0
MediaSpace Default Registration Player (Do Not Delete)	51398572	21/11/2022	21/11/2022	0	0
MediaSpace Default Path Player (Do Not Delete)	51398562	21/11/2022	21/11/2022	0	0
MediaSpace Default TemplatePages Player (Do Not Delete)	51398272	21/11/2022	21/11/2022	0	0
MediaSpace Default Recorder Widget Player (Do Not Delete)	51010512	16/11/2022	21/09/2022	45	2
New Player css	50970682	14/09/2022	14/09/2022	0	0
Knowledge Center Player - DO NOT DELETE	50952692	12/09/2022	12/09/2022	3	2

Step 2 - Configure your player

Configure the player with the desired capabilities and style using the **Kaltura Player Studio**. To learn more, see [Player Plugins & The Kaltura Player Admin Guides](#)

Step 3 - Get the new embed code

Open your [KMC Dashboard](#) and follow these steps:

1. Go to the **CONTENT > ENTRIES** tab.
2. Locate your desired Entry and click the **three dots icon** on the right.
3. Select the **Share & Embed** option.
4. In the **Share & Embed** window, select the player from the dropdown on the top.
The players are sorted by the updated date, and on the left of each of them, you will see an **icon** indicating what player it is *V2* or *V7*.
5. Select the newly created *V7* Player from the list.
6. Click on Advanced Settings to select your preferred **Embed Type** or stick with the default Embed Type (IFrame Embed)
7. Copy the **Embed Code**.
This embed code is updated with the new *V7* player Embed Code.

That's all, now you can grab the Embed Code and embed it on your webpage as before.
