 This article is designated for administrators.

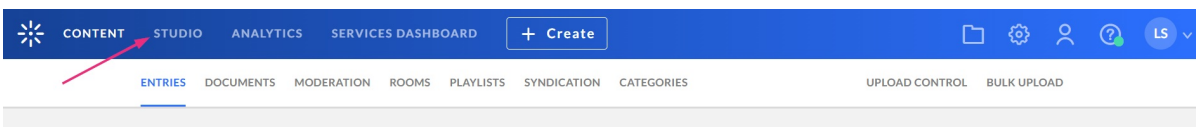

About

The **Visual** tab contains settings that control the appearance and behavior of your player, including colors, logos, watermarks, error images, and bumper videos.

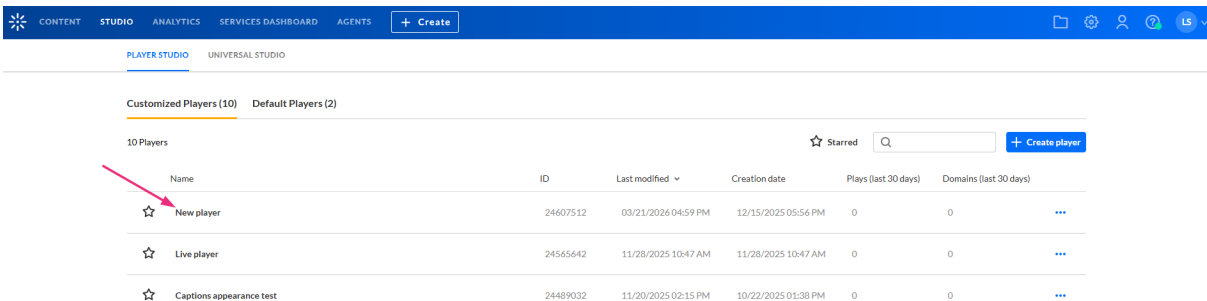

Available settings vary depending on the player type.

Access the Visual tab

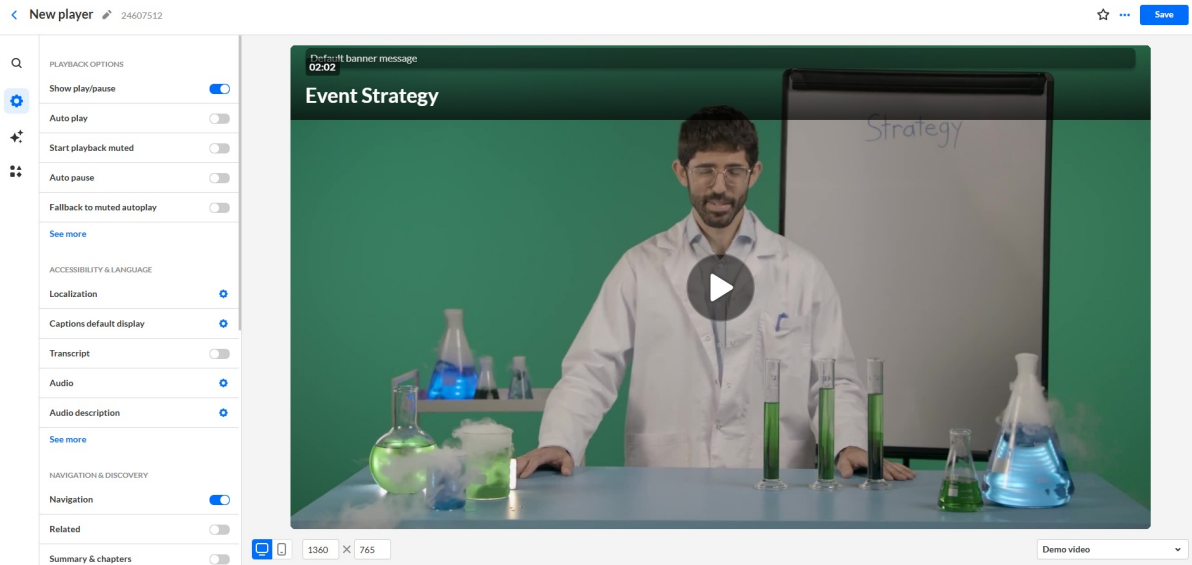

1. Log into your Rich Media CMS and click the **Studio** tab.

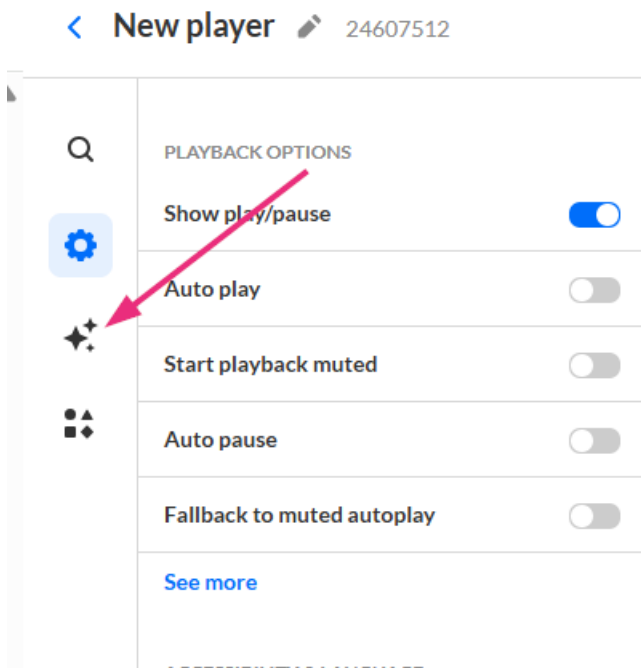

2. From the list, choose the player you want to customize.

The settings tab opens.

3. Click the **stars icon**.

A list of available settings for that player is displayed.

Visual settings

Visual settings vary depending on the type of player.

VOD player	Audio player	Reels player
------------	--------------	--------------
