Troubleshooting - things to consider when using bulk invite

Special characters:

- Email addresses cannot contain special characters (e.g., `[]@kaltura.com/Noël@kaltura.com`).
- If your CSV contains special characters in any other field (name, title, etc.), it should be uploaded as CSV with UTF-8 encoding format.

Duplications:

Make sure your list does not include duplicate email addresses.

Valid email addresses:

Make sure email addresses are valid (typos like ".con" will result in an error).
