

## Recordings and Media tab - Recordings and media

Last Modified on 06/06/2024 6:02 pm IDT

This article is designated for all users.

### Start recording

1. Click **Start recording** or click the three dots button and choose **Record**.

You are asked to confirm your action.

2. Click **Start recording**.

Note the red "record" light in the lower left corner of the screen that indicates you are currently recording.

### Stop recording

1. Click the Stop Recording (square icon) button or click on the three dots button and choose **Stop Recording**.

You are asked to confirm your action.

2. Click **Stop recording**.

### Automatic recording publishing after webinar ends

Once you stop recording, a toast message displays asking you to wait for the recording to be uploaded. Another toast message displays informing you once it has been uploaded successfully. The webinar recording is now published.

On the site, the recording has now replaced the live session. Simply click on the player to watch the recording.

On the management platform, you can find the file on the Recordings & media tab. See the following section for additional functionality.

### Additional functionality on the Recordings & Media tab

#### Edit recording

1. On the Recordings & media tab, click on the recording, or click the blue dots button and select Edit.

The Editing screen displays.

2. Here you may edit the thumbnail, title, and description of the recording.
3. Click **Save** when you are finished.

### Unpublish, download, or delete recording

On the Recordings & media tab, click the three-dots button and select the appropriate action.

When unpublishing or deleting a recording, you will be asked to confirm your action.

### Upload additional media

Click on the **Upload media** button to upload additional media.
