Floating player

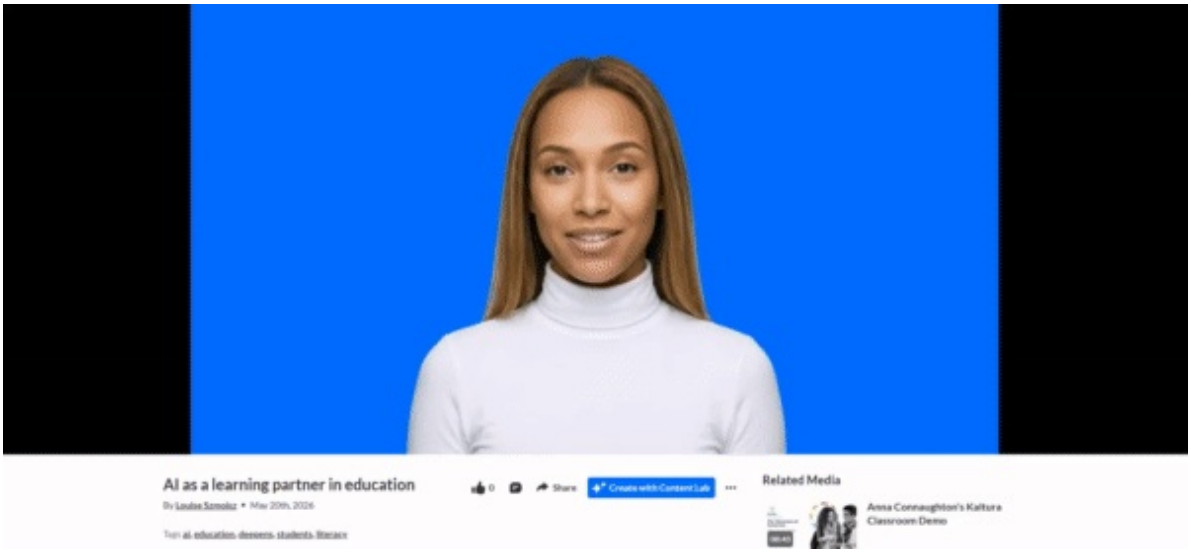

Last Modified on 07/23/2026 1:14 pm IDT

This article is designated for all users.

About

The **Floating player** feature keeps video playback visible while viewers scroll through page content. When the player scrolls out of view, it reappears as a floating player and positions itself based on the configured settings.

This allows viewers to continue watching the video while reading or navigating the page without interruption.

Setup

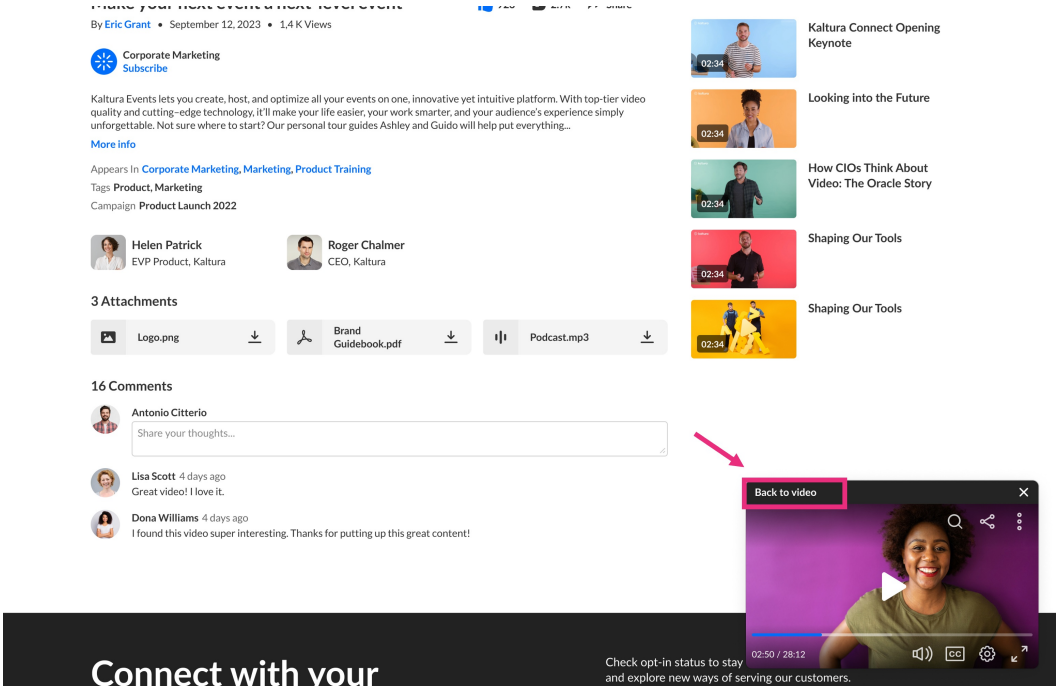

To learn how to set the **Floating** plugin on the player, see Enable a floating player.

Features

- Position of floating
- Width
- Height
- Margin X
- Margin Y
- Draggable - Users have the option to drag the floating video to a different position on the screen.
- Dismissable - Users can dismiss the floating video by clicking 'Back to video' (as
