

# Player replacement tool

Last Modified on 03/10/2025 6:52 pm IST

 This article is designated for administrators.

## About

Use the **Player replacement tool** to modify your KMS and KAF application's default players from V2 to the V7 player. Select a dedicated system player (V7) or any unique player ID (V7) of your choice and replace the applications' default players with a simple click.

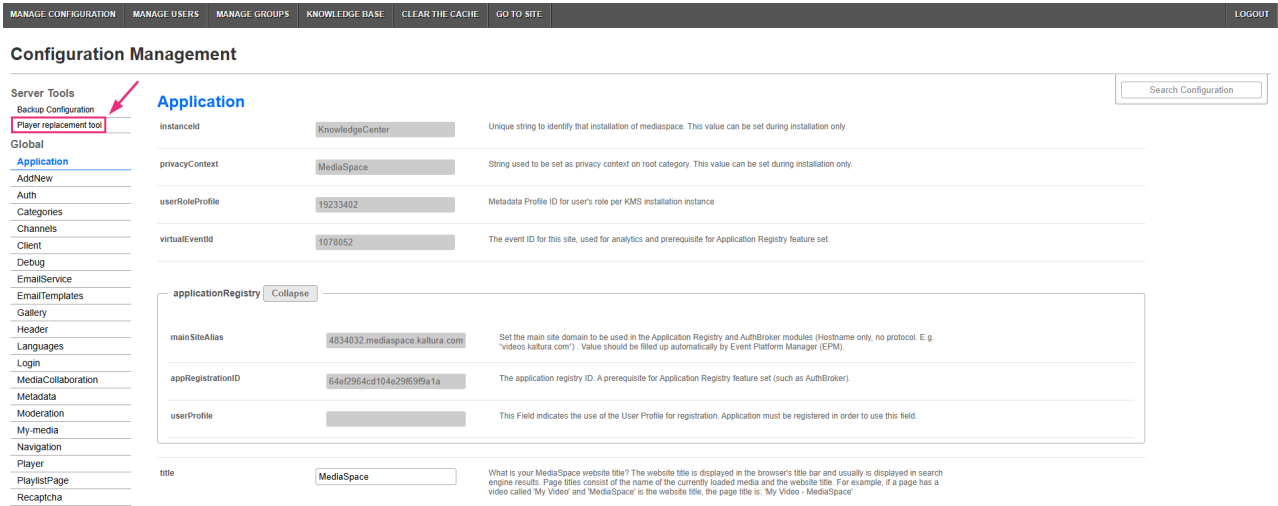

This tool is currently unavailable for instances on the Regional Cloud.

## Access the Configuration Management console

Log into your Configuration Management console.

Under the **Server Tools**, select **Player replacement tool**.

The screenshot shows the Configuration Management console interface. At the top, there is a navigation bar with links: MANAGE CONFIGURATION, MANAGE USERS, MANAGE GROUPS, KNOWLEDGE BASE, CLEAR THE CACHE, GO TO SITE, and LOGOUT. Below this, the 'Configuration Management' section is active. On the left, a sidebar menu lists various tools, with 'Player replacement tool' highlighted in red and a red arrow pointing to it. The main content area displays the 'Application' configuration page, which includes several fields for configuration, such as 'instanceId' (KnowledgeCenter), 'privacyContext' (MediaSpace), 'userRoleProfile' (19233402), and 'virtualEventId' (1078952). There is also an 'applicationRegistry' section with a 'Collapse' button and fields for 'mainSiteAlias', 'appRegistrationID', and 'userProfile'. A 'title' field is set to 'MediaSpace'.

The **Replace player** page displays.

## Replace player

This page provides the ability to replace the players in your application with the latest player version. A dedicated player v7 system player was created for you (ID: 52243762), but any custom v7 player ID can be used. To create and edit players, visit the Kaltura player studio.

### Replace your player

Enter a player ID to be used in the replacement:

 [Preview](#)

Choose which of the players should be replaced:

- Main application player Player ID: 52243762 [i](#)
- Edit media player Player ID: 52243762 [i](#)
- Category moderation player Player ID: 50952692 [i](#)
- Playlist player Player ID: 52243762 [i](#)
- Quiz main player Player ID: 52243762 [i](#)
- Quiz BSE player Player ID: 52243772 [i](#)
- Audio player Player ID: 52243762 [i](#)

[Replace players](#) [Download current players list](#)

#### Manual player replacement

The following players also exist in the application, and will not be replaced automatically. If used, a manual replacement from the relevant module is available:

Gallery theme players [Go to module](#)

Channel theme players [Go to module](#)

Playlist embed players [Go to module](#)

Entry design players [Go to module](#)

Single embed players [Go to module](#)

You can use the application system player ID (ID: 52243762), or [create new players from the Player Studio](#).

**Replace your Player** - The left of the page displays a V7 player auto-populated in the ID text box followed by a list of players that should be replaced.

## Replace player

This page provides the ability to replace the players in your application with the latest player version. A dedicated player v7 system player was created for you (ID: 52243762), but any custom v7 player ID can be used. To create and edit players, visit the Kaltura player studio.

Replace players

Download current players list

## Replace the pre-defined player

1. Select which players should be replaced.
2. Click **Replace Player**.

**OR**

## Replace the user's choice of player

If a customized player (v7) is used,

1. Enter the desired player ID in the text box.
2. Select which players should be replaced.
3. Click **Replace Player**.

In the case that the populated player isn't supported, the following error will display: *The player ID {player\_ID} you entered is of a non-supported version. Replace player feature support V7 players only.*

## Backup and restore

In the **Replace players** message, select one of the following options:

**Backup & replace** - backup the current list of players to the system and replace it with the new player ID. Only one backup is saved.

**Replace without backup** - only replace to the new player ID.

**Replace player**

This page provides the ability to replace the players in your application with the latest player version. A dedicated player v7 system player was created for you (ID: 52243762), but any custom v7 player ID can be used. To create and edit players, visit the Kaltura player studio.

**Replace your player**

Enter a player ID to be used in the replacement:

[Preview](#)

Choose which of the players should be replaced:

- Main application player** Player ID: 51894412 [i](#)
- Edit media player** Player ID: 50952692 [i](#)
- Category moderation player** Player ID: 50952692 [i](#)
- Playlist player** Player ID: 52243762 [i](#)
- Quiz main player** Player ID: 52243762 [i](#)
- Quiz BSE player** Player ID: 52243762 [i](#)
- Audio player** Player ID: 0 [i](#)

[Replace players](#) [Download current players list](#)

**Players backup**

Backup your current player settings upon replacement. Restore from the latest backup at any time.

**Manual player replacement**

The following players also exist in the application, and will not be replaced automatically. If used, a manual replacement from the relevant module is available:

- [Gallery theme players](#) [Go to module](#)
- [Channel theme players](#) [Go to module](#)
- [Playlist embed players](#) [Go to module](#)
- [Entry design players](#) [Go to module](#)
- [Single embed players](#) [Go to module](#)

You can use the application system player ID (ID: 52243762), or [create new players from the Player Studio](#).

**Replace Players**

Backup the current player set and then replace the selected players. Existing backups will be overwritten!
