

KMS and KAF Player V7 replacement tool

Last Modified on 06/13/2024 2:26 pm IDT

 This article is designated for administrators.

Use the **Player V7 Replacement Tool** to seamlessly modify your KMS and KAF application's default Players from the legacy player (V2) to the new player (V7). Select a dedicated system player (V7) or any unique player ID (V7) of your choice and replace the applications' default players with a simple click.

To learn how to create and customize your players, visit [The Kaltura Player Studio Getting Started](#).

 NOTE - This tool is unavailable for instances on the Regional Cloud at this point.

1. Log in to your KMS/KAF admin page.
2. Under the Server Tools, select **Player replacement tool**.

3. The **Replace Player** page is displayed.

Replace your Player, the left side will display a system player (v7) auto-populated in the ID text box followed by a list of players that should be replaced.

Manual Player Replacement, on the right side, will list the additional players that can be replaced manually.

Replace player

This page provides the ability to replace the players in your application with the latest player version. A dedicated player v7 system player was created for you (ID: 52243762), but any custom v7 player ID can be used. To create and edit players, visit the Kaltura player studio.

Replace your player

Enter a player ID to be used in the replacement:

 [Preview](#)

Choose which of the players should be replaced:

- Main application player Player ID: 51894412 ⓘ
- Edit media player Player ID: 50952692 ⓘ
- Category moderation player Player ID: 50952692 ⓘ
- Playlist player Player ID: 52243762 ⓘ
- Quiz main player Player ID: 52243762 ⓘ
- Quiz BSE player Player ID: 52243762 ⓘ
- Audio player Player ID: 0 ⓘ

[Replace players](#) [Download current players list](#)

Players backup

Backup your current player settings upon replacement. Restore from the latest backup at any time.

Manual player replacement

The following players also exist in the application, and will not be replaced automatically. If used, a manual replacement from the relevant module is available:

- Gallery theme players [Go to module](#)
- Channel theme players [Go to module](#)
- Playlist embed players [Go to module](#)
- Entry design players [Go to module](#)
- Single embed players [Go to module](#)

You can use the application system player ID (ID: 52243762), or [create new players from the Player Studio](#).

Preview

- Click **Preview** to preview the player in the text box.
- Select a preview video** arrow to choose a demo video from the drop-down. Type all or part of a video name in the search box, and click on the desired name from the offered results. In our example, we are searching for "Introduction".

The screenshot shows the 'Replace player' interface with a 'Preview Player' modal open. The modal has a search box containing 'Introduction', a dropdown menu with 'Introduction Playlist' and 'Introduction video' options, and a play button icon. Below the options, it says 'Choose a media to preview to load the player.' and has a 'Close' button.

- Optional - click **Download current player list** to download a local file of the current player settings.

Replace

6. Select the player for replacement.

Replace to the pre-defined Player

- If a system player (v7) is used,
- Select which players should be replaced.
- Click **Replace Player.**

OR

Replace to the user's choice of player

- If a customized player (v7) is used,
- Enter the desired player ID in the text box.
- Select which players should be replaced.
- Click **Replace Player.**

NOTE - In case the populated player isn't supported, the following error will display: *The player ID {player_ID} you entered is of a non-supported version. Replace player feature support V7 players only.*

Backup and Restore

7. In the **Replace players** message, select one of the following options:

Backup & replace - backup the current list of players to the system and replace it with the new player ID. Only one backup is saved.

Replace without backup - only replace to the new player ID.

Replace player

This page provides the ability to replace the players in your application with the latest player version. A dedicated player v7 system player was created for you (ID: 52243762), but any custom v7 player ID can be used. To create and edit players, visit the Kaltura player studio.
