Kaltura Events release notes - February 2026

Date Released: February 2026

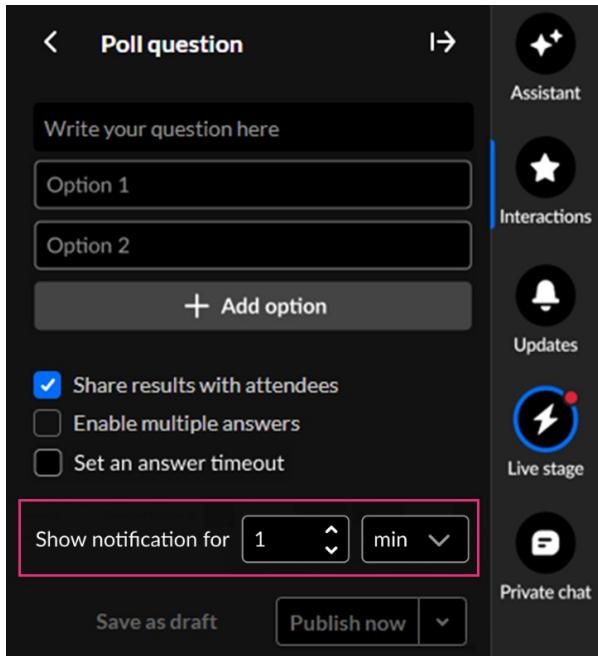

What's new?

Flexible session types for custom event templates

Organizers can now use custom event templates when creating single-session events and select the relevant session type (Live, DIY, or pre-recorded).

This makes custom templates more flexible by allowing the same template to be used across both multi-session events and single-session events of different supported types, rather than being tied to a single session type.

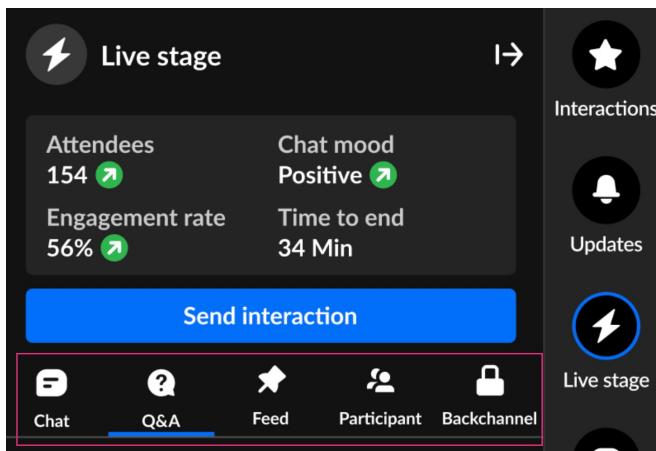

- Seconds: 5-60 seconds
- Minutes: 1-10 minutes

Check out this [Knowledge center article](#) to see, for example, how to set the duration of a poll question in the Interactions tab.

Customize optional text labels under Live stage icons

We're enhancing the Live Stage navigation by allowing customizable text labels under the existing Live Stage icons (Chat, Q&A, Feed, Participant, Backchannel). This improves discoverability and clarity, especially for new users or those who use Chat & Collaboration less frequently.

Please contact your Kaltura representative to enable this feature on your account.

For a refresher on the Live stage tab of Chat and Collaboration, see our [Knowledge center article](#).

Upcoming

- Enable/disable reactions per event
- Upload a designated image to appear when sharing event links on social platforms

Resolved Issues

Support ticket ID #	Description
SUP-50425	Fixed issue where a session could not be deleted from an event and upon attempt was returning a 500 error.
SUP-50744	Fixed issue where users who had attended an event were missing from “All Users” list.

Kaltura Events release notes - January 2026

Date Released: January 2026

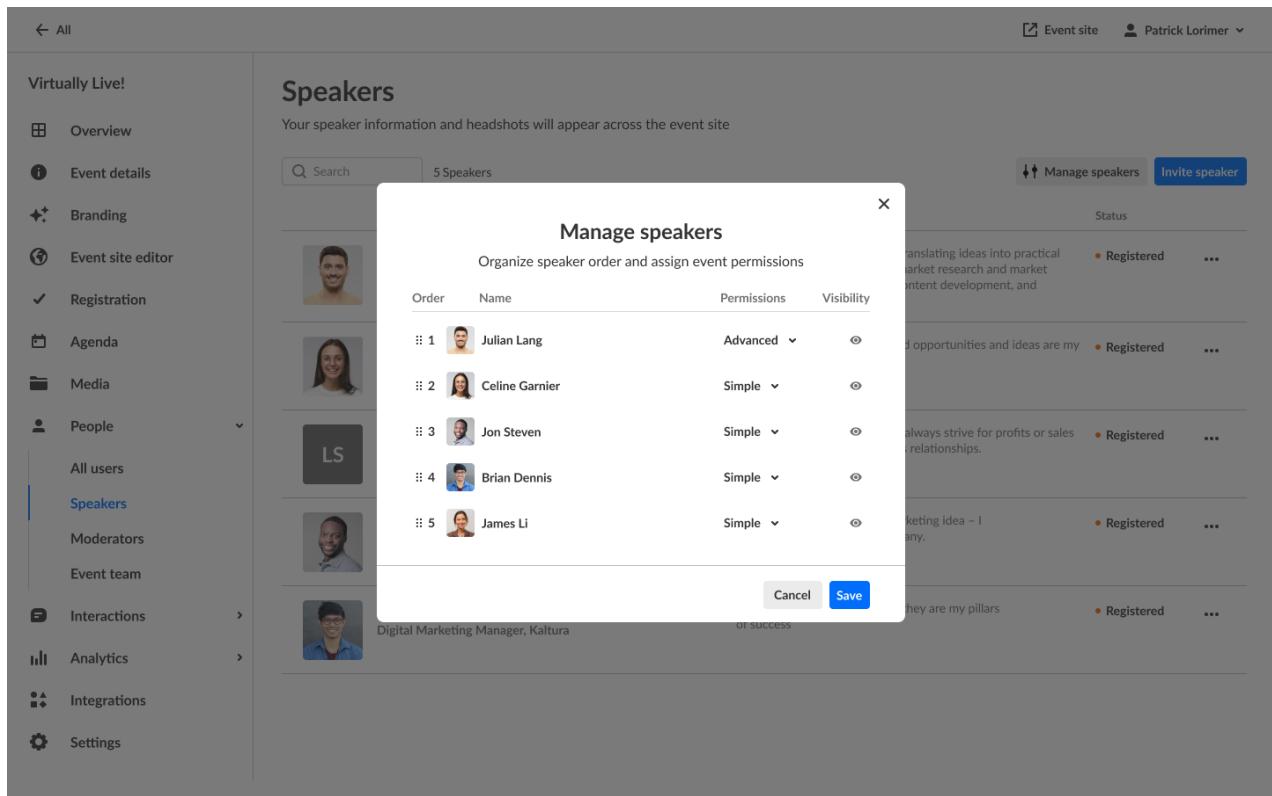

What's new?

Manage speakers on single session events

Speaker management is now supported for single session events. Organizers can:

- Order speakers (for example, by seniority or agenda flow)
- Show or hide speakers on the event (session) page
- Set speaker permissions (Simple or Advanced)

This gives organizers control over how speakers are presented and what they can manage during the session.

Speakers

Your speaker information and headshots will appear across the event site

Manage speakers

Organize speaker order and assign event permissions

Order	Name	Permissions	Visibility
1	Julian Lang	Advanced	Visible
2	Celine Garnier	Simple	Visible
3	Jon Steven	Simple	Visible
4	Brian Dennis	Simple	Visible
5	James Li	Simple	Visible

Digital Marketing Manager, Kaltura

See our [Knowledge center article](#) for complete details.

Duplicate pre-recorded sessions

Similar to other session types, organizers can now duplicate a pre-recorded session within an event, making it easy to reuse existing content and setup.

This is especially helpful when:

- Re-running the same session for a different audience or time zone
- Creating variations of an existing pre-recorded experience
- Saving time on repetitive configuration

When duplicating a pre-recorded session, the new session keeps the original setup and uses the same video source, while allowing organizers to make adjustments as needed.

SRT support for live webcast sessions

Live webcast sessions now support streaming via SRT, a live video streaming protocol, in addition to existing RTMP options.

This gives broadcasters and event producers more flexibility when configuring live streams, especially with advanced encoders or remote production setups for high-quality, large-scale events.

Agenda

All 6 Sessions

Date and time	Name

Kaltura Events release notes - December 2025

Date Released: December 2025

What's new?

Chat & Collaboration experience -

Public Q&A

We're excited to announce a significant update to our Q&A experience, featuring a new infrastructure for instant visibility and collaborative responses, along with enhanced moderation tools.

New Capabilities:

Upvoting: Participants can upvote both questions and answers, surfacing the most valuable content and helping moderators prioritize what matters most to the audience.

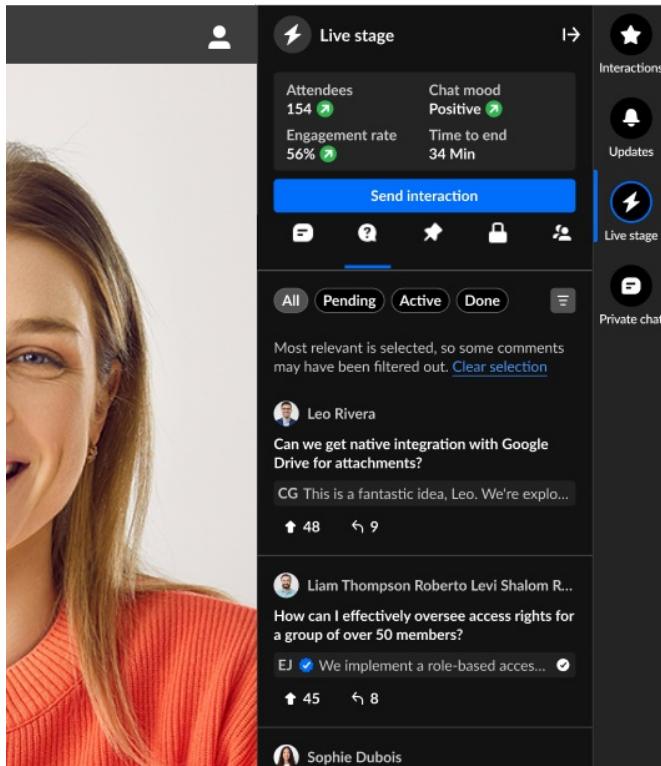

Advanced filtering & sorting: Flexible filters and sorting (My items, newest, oldest, most relevant) for attendees, moderators and speakers make it easy to find specific questions, track personal items, and focus on what's most important as the Q&A grows.

Mark as correct answer: Moderators can mark the best reply as the correct answer, clearly signaling resolved questions and guiding participants to trusted answers faster.

Close discussion: Moderators and speakers can end conversations once they're resolved, keeping the Q&A organized and preventing unnecessary follow-ups or duplicate replies.

Moderator collaboration views: Dedicated views (All, Pending, Active, Done) help moderators and speakers manage questions efficiently, prioritize unanswered items, and track progress across the session.

Verified badges: Replies from speakers and moderators are visually distinguished, helping participants quickly recognize official responses from session organizers.

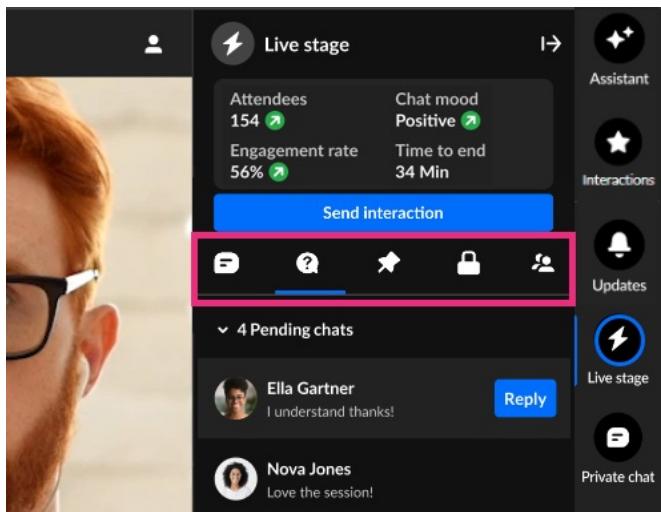

See our [Knowledge Center article](#) for complete details.

Enhanced Live stage navigation

We've updated the Live stage tabs for a cleaner, easier-to-navigate experience.

Icon-based tabs: Tab names are now represented by intuitive icons, eliminating horizontal scrolling.

Localized tooltips: Icon tooltips show tab names and support localization (with some language exceptions).

Events -

Advanced Speaker role for multi session events

We've introduced a new **Advanced speaker** role, adding an additional speaker permission level alongside the existing **Simple speaker** role.

When assigning a speaker to a session, organizers can now define the speaker's permission level in addition to setting their order and visibility on the event site. This provides more flexibility for production-heavy events, enabling delegation of engagement and interaction management without granting full moderator access. This is especially useful for sessions with complex event setups with multiple speaker roles that include engagement, moderation, and production responsibilities.

Simple speaker (formerly called Speaker) - Can join the studio, appear on stage, and participate in the Backchannel.

Advanced speaker (new) - Includes all Simple speaker capabilities, plus the ability to create and manage audience interactions (polls, Q&A, quizzes, etc.) and notifications before and during the session.

Speakers

Add speakers

Rank	Speaker	Role	Actions
1	Julian Lang	Advanced	Eye, Delete
2	Celine Garnier	Simple	Eye, Delete
3	Jon Steven	Simple	Eye, Delete
4	Brian Dennis	Advanced	Eye, Delete
5	James Li	Simple	Eye, Delete

Simple speaker (Default)
Simple capabilities with back channel access, without content sharing.

Advanced speaker
All Simple speaker capabilities plus content presentation and audience interaction tools.

See this new feature in the context of [adding an Interactive Room session to your event](#).

Post-event redirect

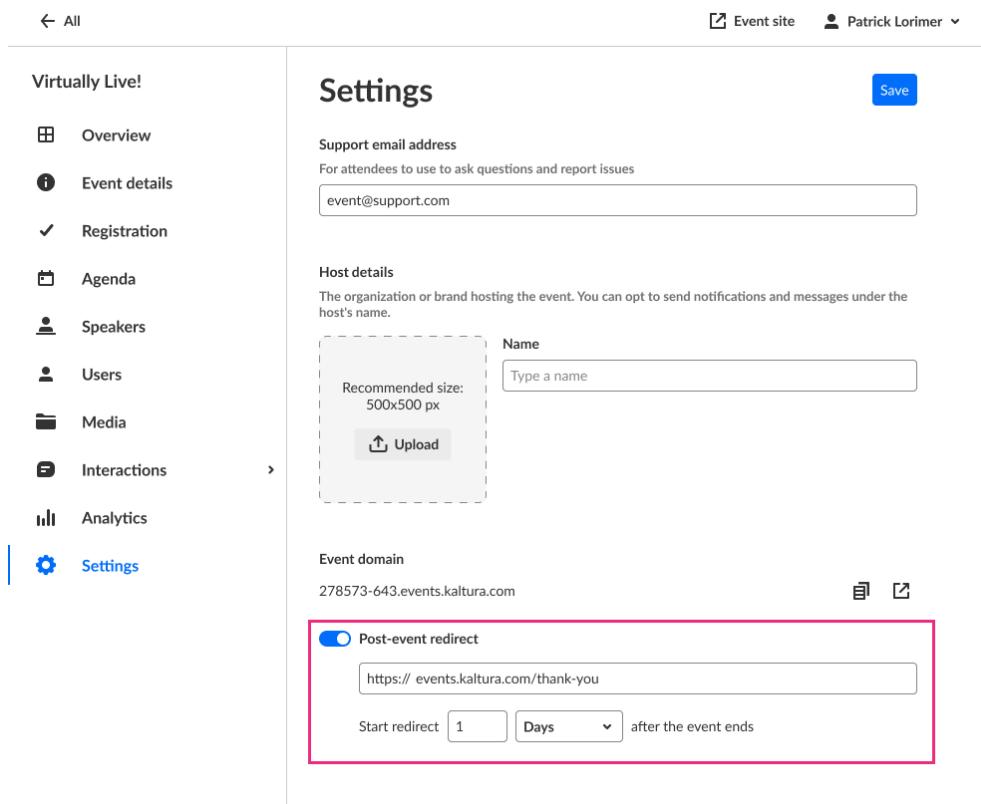

Organizers can now enable and configure a post-event redirect URL. When the event concludes, visitors to the event page will be automatically redirected to the selected destination.

Here are a few ways this feature can be useful:

- Redirect visitors to the organization's event or webinar listings so they can easily

discover upcoming sessions.

- Direct users to a dedicated video portal, content hub, or follow-up resource for continued engagement after the event.
- Ensure outdated or expired event links no longer lead to inactive or unavailable pages by redirecting users to a valid destination.

The screenshot shows the 'Settings' page for an event. The left sidebar lists 'Virtually Live!' sections: Overview, Event details, Registration, Agenda, Speakers, Users, Media, Interactions, Analytics, and Settings. The 'Settings' section is selected and highlighted with a blue border. The main content area is titled 'Settings' with a 'Save' button. It includes sections for 'Support email address' (event@support.com), 'Host details' (Name: Type a name, Recommended size: 500x500 px, Upload button), 'Event domain' (278573-643.events.kaltura.com), and 'Post-event redirect' (checkbox checked, URL: https://events.kaltura.com/thank-you, Start redirect: 1 Days after the event ends). The 'Post-event redirect' section is highlighted with a red box.

See our [Knowledge Center article](#) for more details.

Updated report titles & descriptions

Report titles and descriptions are now more intuitive, making it easier for organizers to select and export the correct report.

Kaltura Events release notes - November 2025

Date Released: November 2025

What's new?

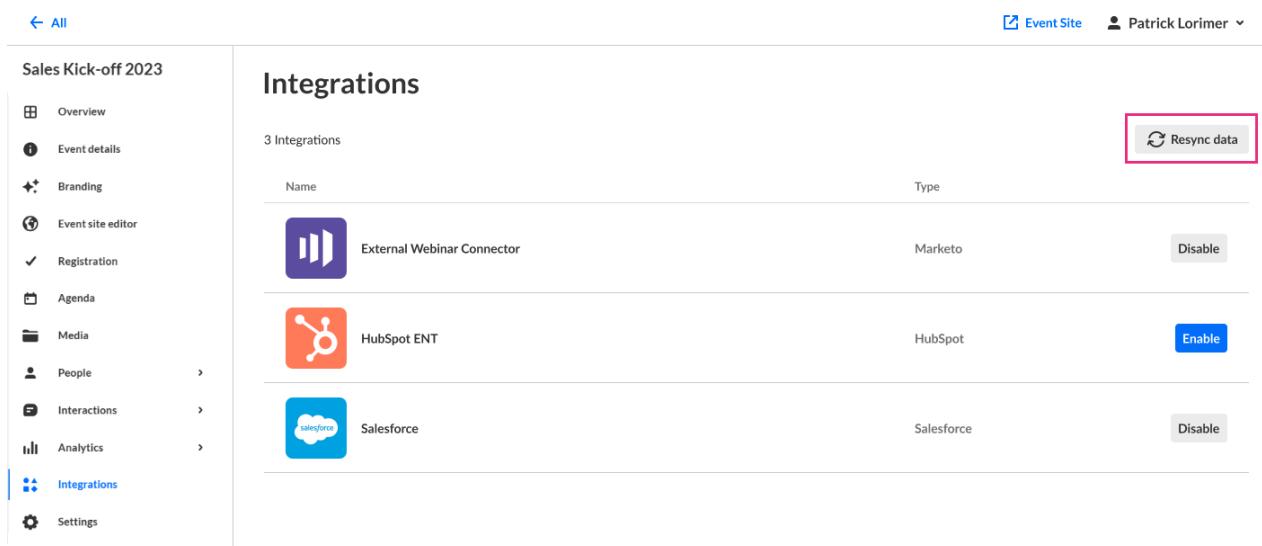

Manually sync registration & attendance data

Event organizers can now manually trigger a sync of user data (registration details and attendance status) between Kaltura Events and integrated systems like Marketo or HubSpot, giving you more control, reducing reliance on support, and ensuring data stays up to date across systems.

Note: Engagement sync will continue to be handled separately.

Leverage this feature when:

- Integrations were enabled during or after registration and earlier registrants require retroactive data sync.
- You experience data delays or sync errors and need to manually push the latest attendee information.
- An on-demand data refresh is needed to ensure reporting dashboards or downstream workflows remain up to date.

Sales Kick-off 2023

Integrations

3 Integrations

Name	Type	Action
External Webinar Connector	Marketo	Disable
HubSpot ENT	HubSpot	Enable
Salesforce	Salesforce	Disable

See how it works, for example, in our Knowledge Center article on [HubSpot integration](#).

Single session experience

Single sessions are currently a beta feature. Please contact your Kaltura representative about enabling this feature on your account.

The Single session event experience simplifies virtual event creation and management by streamlining event setup into a single, unified flow. With one cohesive banner, title, description, and scheduled time/duration, organizers only need to input event details once - eliminating the need to manage separate event and session configurations.

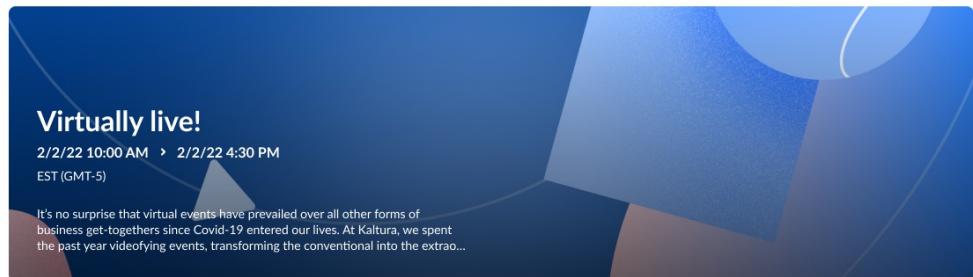

Speakers and moderators are automatically assigned to the session upon invitation, and all essential event information is prominently displayed on the Overview page. This frictionless approach significantly reduces setup complexity, enabling teams to focus more on delivering engaging content and less on administrative overhead.

Currently, the single session event experience supports live webcasts, DIY live broadcasts, and Pre-recorded live events.

Following is an example of a **Single session Live webcast** Overview page:

Resolved Issues

Support ticket ID #	Description
SUP-49964	Fixed an issue where the announcement notification could not be saved if a semi colon was in the URL.
SUP-49317	Fixed an issue where a user could not be added as an organizer.
SUP-49802	Fixed an issue where several countries were missing from the registration form.

Upcoming

- Redirect event URL at the end of the event
- Speaker permissions

Kaltura Events - October 2025

Date Released: October 2025

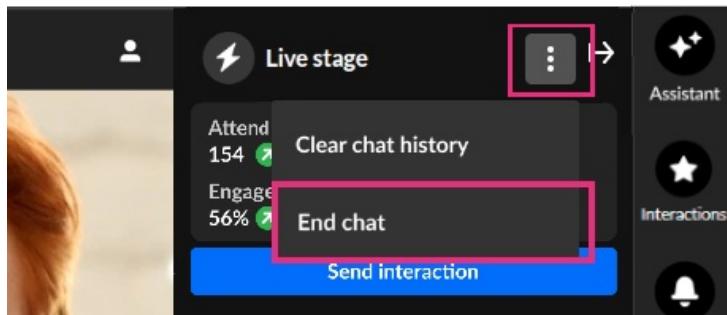

What's new?

End group chat

Moderators can now temporarily end group chats for all session participants, providing better control during high-traffic discussions or when conversations need to be paused.

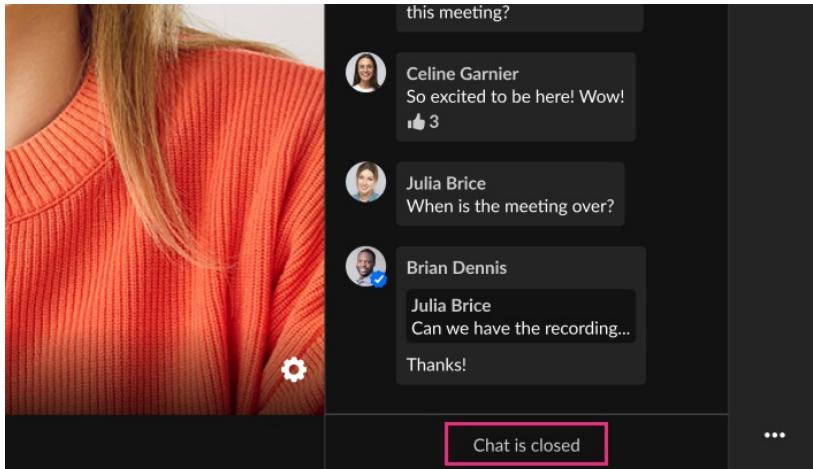

For Moderators:

- Easy chat control: End any group chat instantly using the new "End Chat" button
- Flexible management: Restart closed chats at any time to resume the discussion

For Participants: When a chat is closed:

- Read-only mode: View all existing messages and conversation history
- Limited interactions: Continue to like messages and delete your own messages
- Clear status indicator: A visible message displays that the chat is currently closed
- No new messages: Sending new messages is temporarily disabled until the chat is reopened

Examples of use cases for this feature:

- The conversation has achieved its purpose - the topic was covered and there's no need for further discussion.
- The discussion is off topic or unproductive - the conversation is repetitive or no longer constructive.
- There's a conflict or inappropriate behavior - argument, inappropriate content, etc.

See our [Knowledge Center article](#) for more details.

Streamlined DIY experience for speakers and moderators

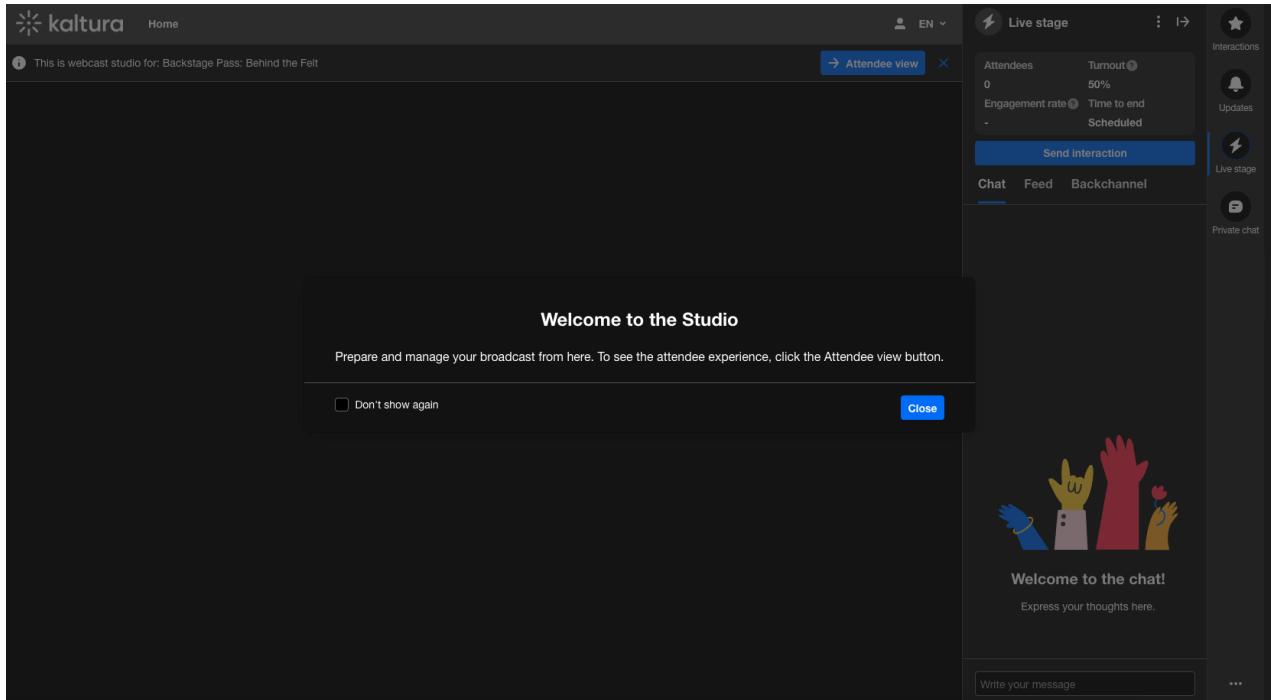

Kaltura is excited to announce a great enhancement to the speakers and moderators experience with DIY sessions as well as great improvement for organizers. Any **new DIY session created** will have the updated experience which includes:

Simplified access: Speakers and moderators are now taken **directly to the studio** when entering the session from the event site with no need to send a dedicated link.

Smarter routing: The platform automatically directs users to the correct view based on their role (speaker, moderator, or attendee). Moderators and speakers can also easily switch between the views.

Flexibility maintained: The separate studio link can still be used when needed, but the default experience is now more intuitive and aligned.

This enhancement removes confusion, shortens the setup process, and ensures everyone lands exactly where they need to be - ready to go live faster.

The screenshot shows the Kaltura Studio interface for a live event. The main content area displays a video thumbnail of the Muppets. To the right, a sidebar titled 'Live stage' shows metrics: 0 attendees, 50% turnout, and an engagement rate of 0%. The sidebar also includes a 'Send interaction' button and tabs for 'Chat', 'Feed', and 'Backchannel'. The 'Chat' tab is selected. A welcome message in the chat area says 'Welcome to the chat! Express your thoughts here.' A message input field is at the bottom of the chat window. The top right corner of the interface has a 'Live stage' button and a 'Private chat' link.

For more information about the Kaltura Studio room, see our [Knowledge Center article](#).

New user analytics dashboard

Kaltura is pleased to present a comprehensive, purpose-built analytics view that provides event organizers and managers with deep insights into individual attendee engagement throughout the event lifecycle. This new dashboard expands beyond the video-focused metrics of the previous user dashboard, capturing the full spectrum of attendee interactions including:

- Session participation and viewing patterns across live broadcasts, recordings, and on-demand materials
- Interactive engagement through polls, Q&A, surveys, reactions, and chat
- Content exploration through attachment downloads

Kaltura Events - September 2025

Date Released: September 2025

What's new?

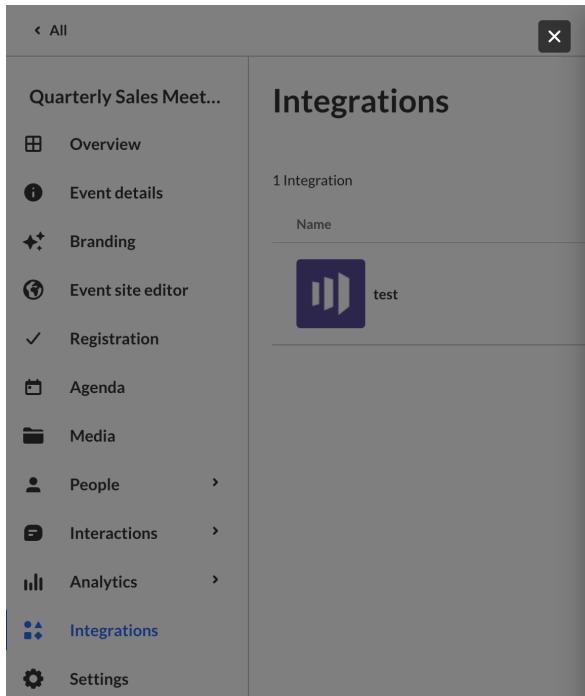

Events:

Auto sync engagement data

Engagement data now syncs automatically to your CRM (Marketo, Salesforce, or

HubSpot) one hour after each event ends. This feature can be configured on a per-event basis, ensuring timely and accurate attendee insights without manual intervention.

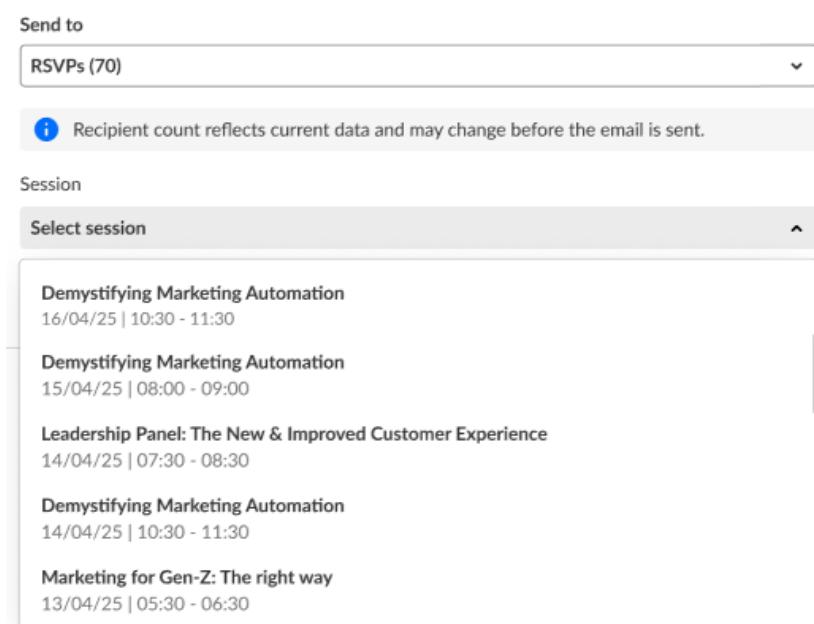

The screenshot shows the Kaltura interface with the 'Integrations' tab selected. On the left, a sidebar lists various event management options: Overview, Event details, Branding, Event site editor, Registration, Agenda, Media, People, Interactions, Analytics, Integrations (which is selected and highlighted in blue), and Settings. On the right, a detailed view of a Marketo integration is shown. The integration is named 'test'. The 'Program Name' field contains 'Quarterly event', and the 'Program id' field contains '5427800'. A checked checkbox for 'Automatic sync' is followed by the text 'Automatically sync data when the event ends'. At the top right of the integration view, there are 'Cancel' and 'Enable' buttons.

See, for example, our [Knowledge Center article on Marketo](#).

RSVP reports and emails now include session schedule

Each session's schedule (date and time) now appears in the RSVP report and RSVP email audience list, helping organizers quickly distinguish between sessions with the same name and target the right one when sending emails or exporting reports.

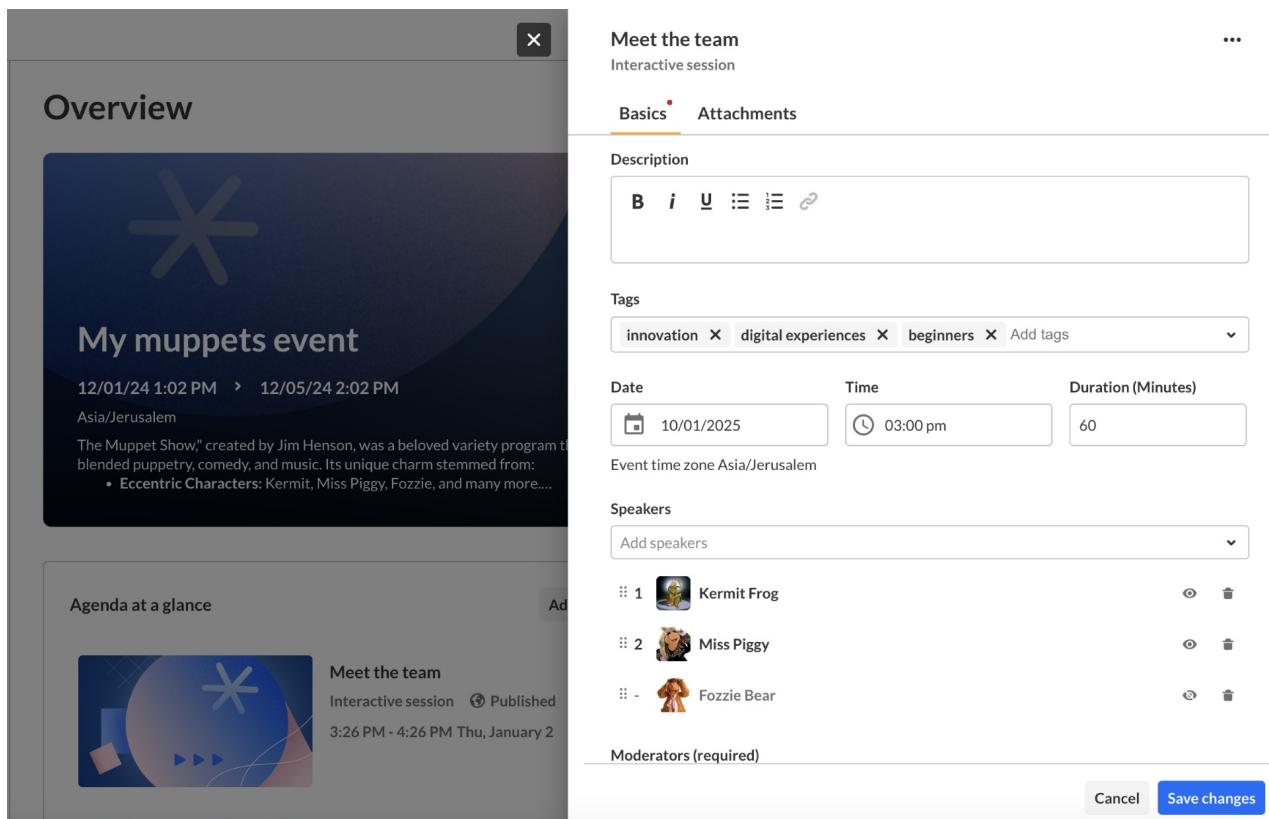

The screenshot shows the Kaltura RSVP report interface. At the top, there is a 'Send to' dropdown set to 'RSVPs (70)'. A note below it says 'Recipient count reflects current data and may change before the email is sent.' Below this is a 'Session' section with a 'Select session' dropdown. The dropdown list shows several sessions: 'Demystifying Marketing Automation' (16/04/25 | 10:30 - 11:30), 'Demystifying Marketing Automation' (15/04/25 | 08:00 - 09:00), 'Leadership Panel: The New & Improved Customer Experience' (14/04/25 | 07:30 - 08:30), 'Demystifying Marketing Automation' (14/04/25 | 10:30 - 11:30), and 'Marketing for Gen-Z: The right way' (13/04/25 | 05:30 - 06:30).

See, for example, how it looks when working with [custom emails](#).

Manage how speakers display

Event organizers can now reorder speakers using a simple drag-and-drop interface, for example, arranging speakers by seniority or session flow. They can also select to hide specific speakers from being displayed, while keeping them active in the session, for example, 'highlight' keynote speakers while hiding secondary contributors.

Meet the team

Date: 10/01/2025 Time: 03:00 pm Duration (Minutes): 60

Event time zone: Asia/Jerusalem

Speakers

Moderators (required)

Cancel Save changes

For information on how to use these features on the add/edit Interactive room session screens, for example, check out our [Knowledge Center article](#).

Auto assign custom domains

Customers with custom domains configured (like "ABC-company.com") can now automatically assign new events to their custom domain, giving them branded URLs like "PID-123.ABC-company.com" without additional manual configuration. Previously, custom domain customers would sometimes forget to manually assign their domain when creating events, resulting in generic Kaltura URLs like "PID-123.events.kaltura.com" instead of their professional branding. This enhancement ensures consistent URL branding across all customer events while reducing manual work.

For more details, see our [Knowledge Center article](#).

HubSpot integration, engagement data

Similar to our Marketo and Salesforce integrations, you can now sync attendee engagement data to HubSpot as well. This includes data like views, reactions, poll responses, and more.

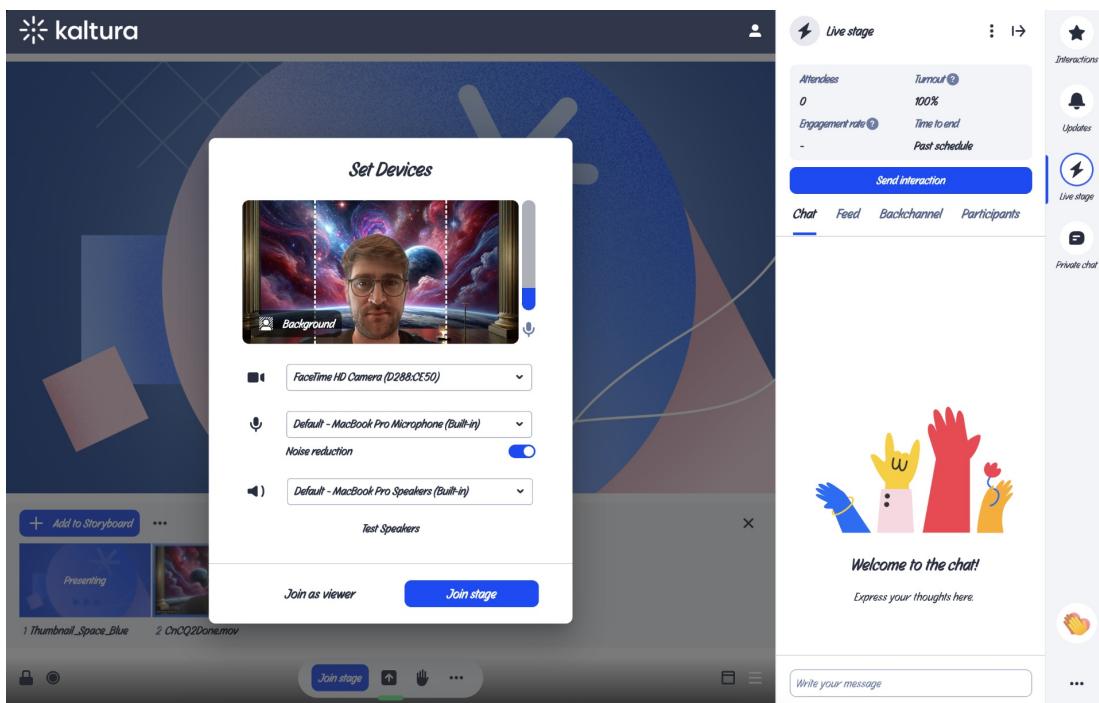

Existing HubSpot users will need to edit and re-authenticate their integration for this enhancement to work.

For more details, see our [Knowledge Center article](#).

Rooms:

Theming extends to rooms

We're excited to announce that Kaltura Rooms created in Events now fully support your chosen theme. Any new room automatically inherits the theme set in your event's [Branding tab](#), keeping the look and feel consistent for attendees without extra setup.

Key Capabilities:

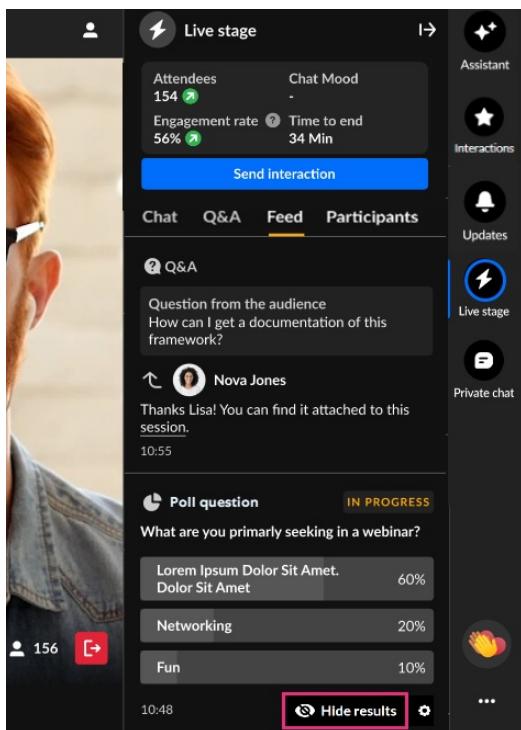

- **Automatic Theme Inheritance:** Rooms automatically use the theme selected in your event's Branding tab.
- **Dynamic Font Adaptation:** Room fonts automatically adjust to match the hosting app's typography
- **Seamless Integration:** No extra setup required; the selected theme is applied as soon as rooms are created.

To learn how to set it up, visit our [Knowledge Center article](#).

Chat and Collaboration:

Skip to results

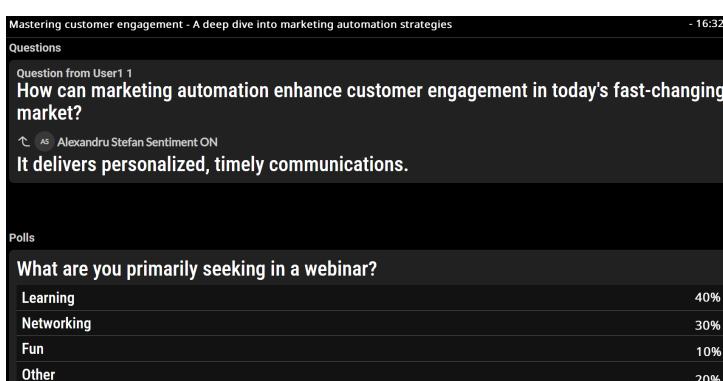

For enhanced moderator workflow when viewing interactions in the feed, results are now visible to moderators by default. The moderator must simply tap the "Hide results" button, then click to choose their answer.

Check out our [Knowledge Center article](#) for more details.

Stage monitor update

When polls and Q&A are displayed together on the Stage monitor, they stretch across the screen and stack vertically, instead of being split into two columns. The new stacked layout provides clearer visibility and easier reading for presenters on stage.

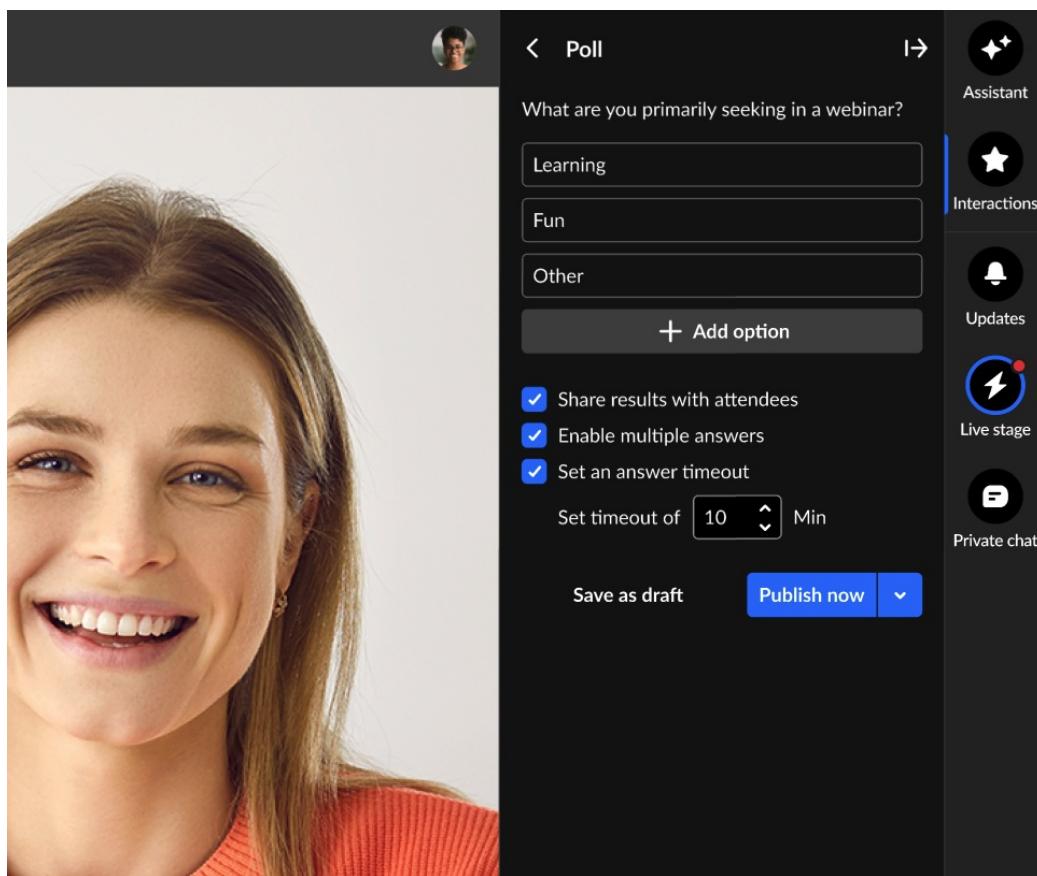

See our [Knowledge Center article](#).

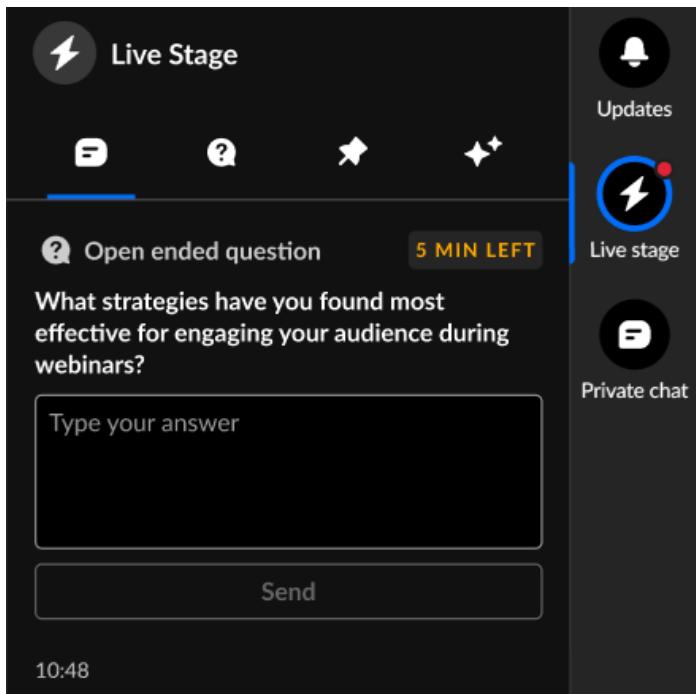

Schedule and manage engagement interactions

Moderators can now schedule and time polls, quizzes, surveys, and other engagement tools to better plan participation during live sessions.

Choose when interactions go live

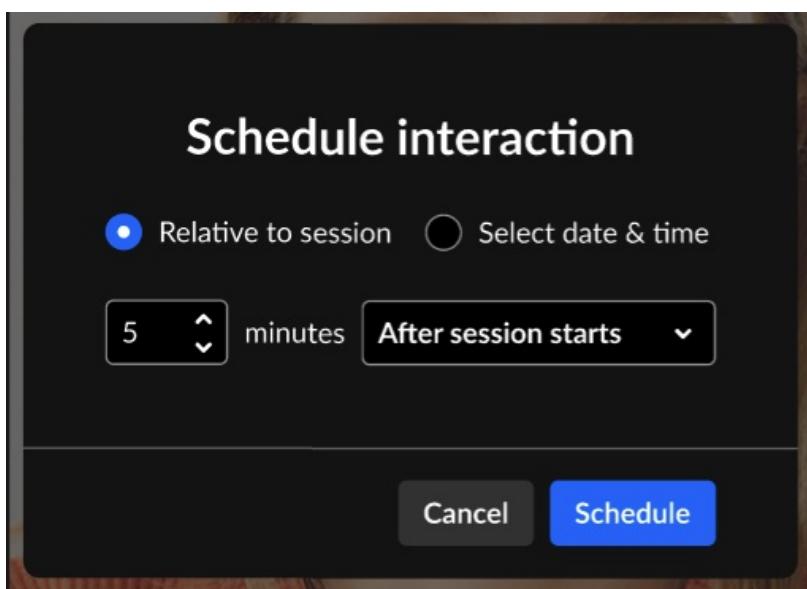

- Set publish time based on session schedule
- Configure triggering range from 1 to 120 minutes after session start or before session ends
- Set specific date and time for interaction publication

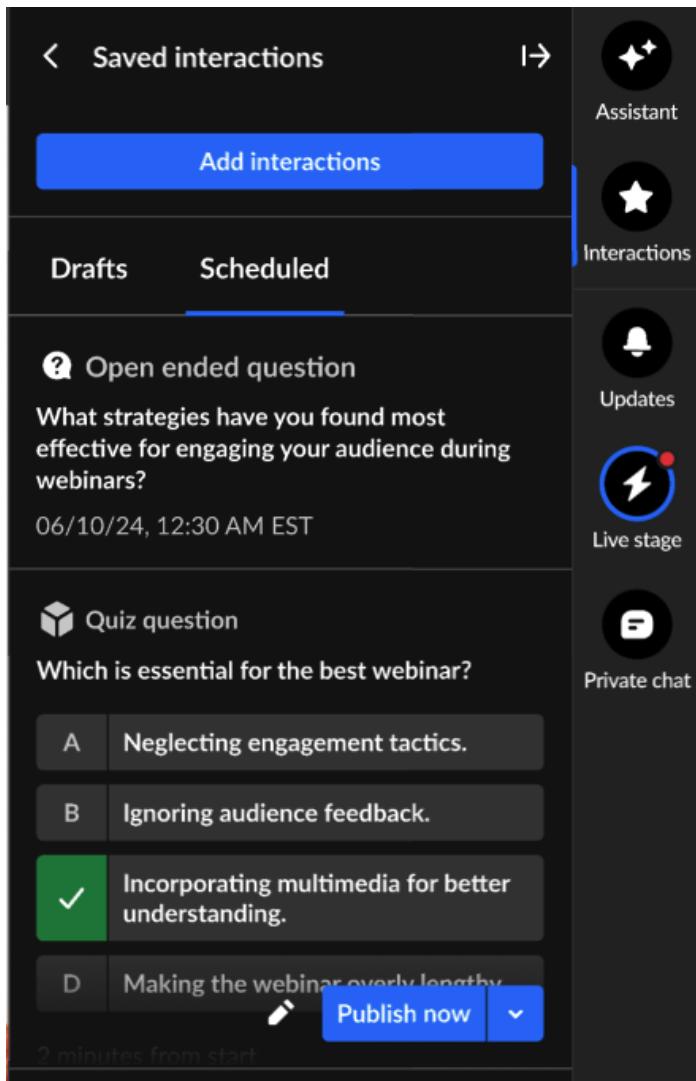

Choose how long interactions stay live

- Live countdown and status indicators
- Interactions automatically conclude at set duration
- 1-60 minute range accommodates different interaction types

See scheduled drafts in one place

Scheduled items now appear in a dedicated Scheduled tab.

The screenshot shows the Kaltura moderator app interface. At the top, there are navigation arrows and a 'Saved interactions' button. Below that is a blue 'Add interactions' button. The main area shows two tabs: 'Drafts' and 'Scheduled', with 'Scheduled' being the active tab. A list of scheduled interactions is displayed:

- Open ended question:** 'What strategies have you found most effective for engaging your audience during webinars?' (Scheduled for 06/10/24, 12:30 AM EST)
- Quiz question:** 'Which is essential for the best webinar?'
 - A** Neglecting engagement tactics.
 - B** Ignoring audience feedback.
 - C** Incorporating multimedia for better understanding. (This option is selected, indicated by a green checkmark)
 - D** Making the webinar overly lengthy.

At the bottom of the list, it says '2 minutes from start'. To the right of the list is a sidebar with five icons:

- Assistant** (star with a plus)
- Interactions** (star)
- Updates** (bell)
- Live stage** (lightning bolt)
- Private chat** (messaging bubble)

- The scheduling option is not available from the moderator app.
- Crowd reactions and announcements can't be scheduled.

For more details, see our [Knowledge Center article](#).

Upcoming

- Speaker permissions
- Single Live DIY and Pre-recorded session experience
- SRT endpoints for live sessions

Resolved Issues

Support ticket ID #	Description
SUP-49682	Fixed issue where the v-react tag was being automatically removed from the custom email HTML code when editing the button in Events.

Kaltura Events - August 2025

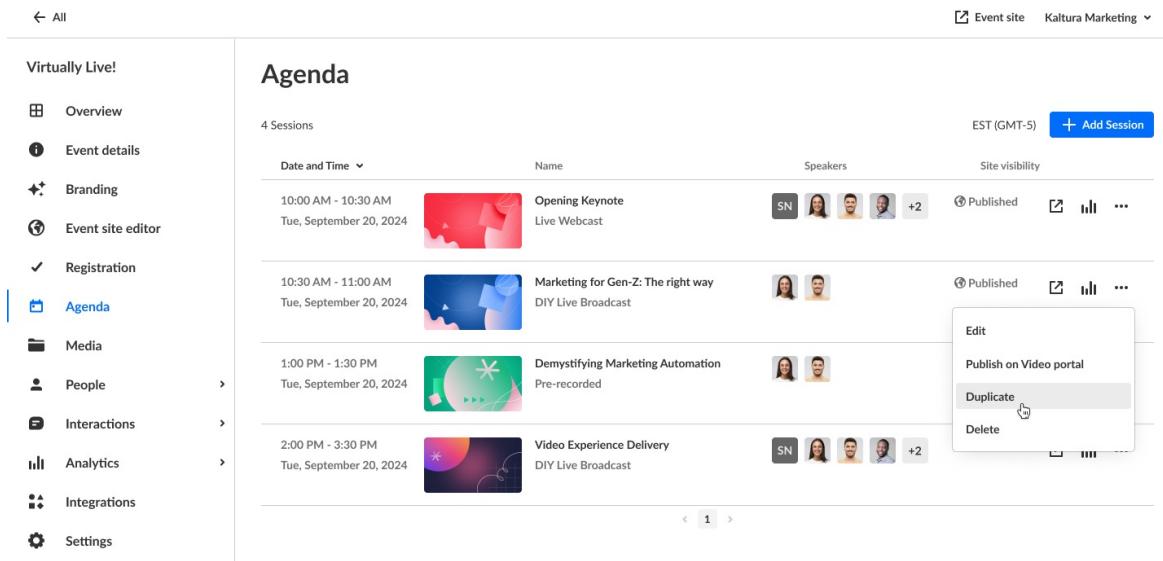

Date Released: August 2025

What's New?

Events

- Duplicate Live, DIY, and Interactive sessions within an event

Event organizers can now duplicate an existing Live, DIY, and Interactive session inside an event - saving time and ensuring consistency. This is especially useful for recurring formats or when setting up multiple sessions with similar structures. Duplicated sessions include their title, description, thumbnail, tags, speakers (optional), moderators (optional), attachments, room setup (including storyboard and assets), and interaction drafts (polls, quizzes, surveys, and announcements).

The screenshot shows the Kaltura Events interface. On the left, a sidebar menu is open with the following items: Virtually Live!, Overview, Event details, Branding, Event site editor, Registration, Agenda (which is selected and highlighted in blue), Media, People, Interactions, Analytics, Integrations, and Settings. The main area is titled 'Agenda' and shows '4 Sessions'. The sessions are listed as follows:

- 10:00 AM - 10:30 AM, Tue, September 20, 2024: Opening Keynote, Live Webcast. Speakers: SN, [redacted]. Status: Published. Actions: Edit, Publish on Video portal, Duplicate (highlighted with a mouse cursor), Delete.
- 10:30 AM - 11:00 AM, Tue, September 20, 2024: Marketing for Gen-Z: The right way, DIY Live Broadcast. Speakers: [redacted]. Status: Published. Actions: Edit, Publish on Video portal, Duplicate, Delete.
- 1:00 PM - 1:30 PM, Tue, September 20, 2024: Demystifying Marketing Automation, Pre-recorded. Speakers: [redacted]. Status: Published. Actions: Edit, Publish on Video portal, Duplicate, Delete.
- 2:00 PM - 3:30 PM, Tue, September 20, 2024: Video Experience Delivery, DIY Live Broadcast. Speakers: SN, [redacted]. Status: Published. Actions: Edit, Publish on Video portal, Duplicate, Delete.

For more information, see our [Knowledge Center article](#).

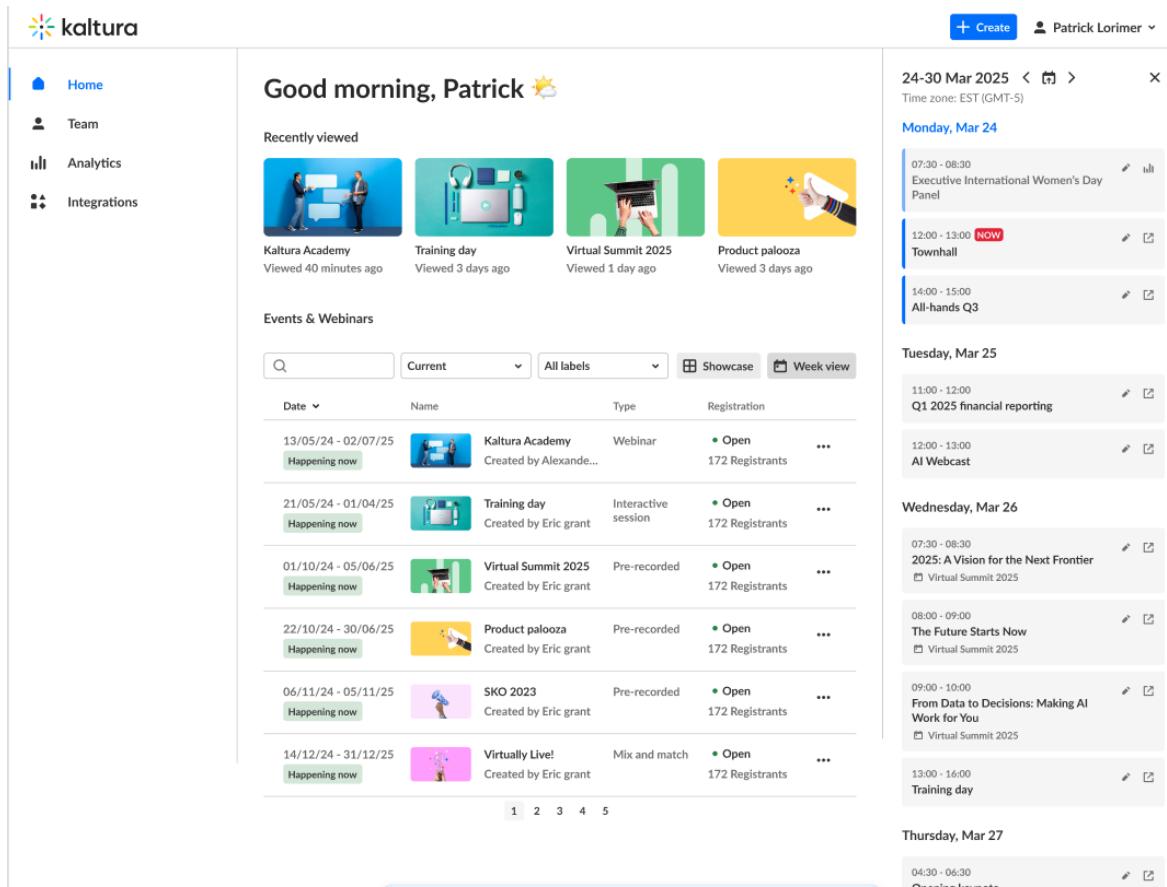

- Release custom URL/domain on event deletion

When an event with a custom URL or domain is deleted, the URL will now be automatically released. This ensures the URL can be reused for future events.

See our [Knowledge Center article](#).

- **Schedule view**

A new widget next to the Events list lets **admins** quickly see all upcoming **sessions** as a weekly schedule view (today + next 6 days). No more clicking into each event; this update makes weekly planning faster, clearer, and more efficient. Sessions are displayed with event names, times (in your local time zone), and a quick link to edit and view. This update is designed to streamline planning and improve visibility for admins.

The screenshot shows the Kaltura Events & Webinars interface. On the left, a sidebar includes links for Home, Team, Analytics, and Integrations. The main area features a "Good morning, Patrick" greeting and a "Recently viewed" section with thumbnails for "Kaltura Academy", "Training day", "Virtual Summit 2025", and "Product palooza". Below this is the "Events & Webinars" section, which displays a grid of sessions. The grid includes columns for Date, Name, Type, Registration, and an "Open" status with a count of 172 registrants. The sessions listed are: "Kaltura Academy" (Happening now), "Training day" (Happening now), "Virtual Summit 2025" (Happening now), "Product palooza" (Happening now), "SKO 2023" (Happening now), and "Virtually Live!" (Happening now). To the right, a weekly schedule view shows sessions for Monday, Mar 24, Tuesday, Mar 25, Wednesday, Mar 26, and Thursday, Mar 27. Each day's schedule includes a list of sessions with their names, times, and a "Edit" or "View" link.

For more details, see our [Knowledge Center article](#).

- **Image-related UI updates**

- Adjusted recommended registration banner image size for improved display consistency.
- Updated interface copy for clarity and alignment with style guidelines.

To see the updates to the registration banner, for example, see our [Knowledge Center article](#).

Chat and Collaboration

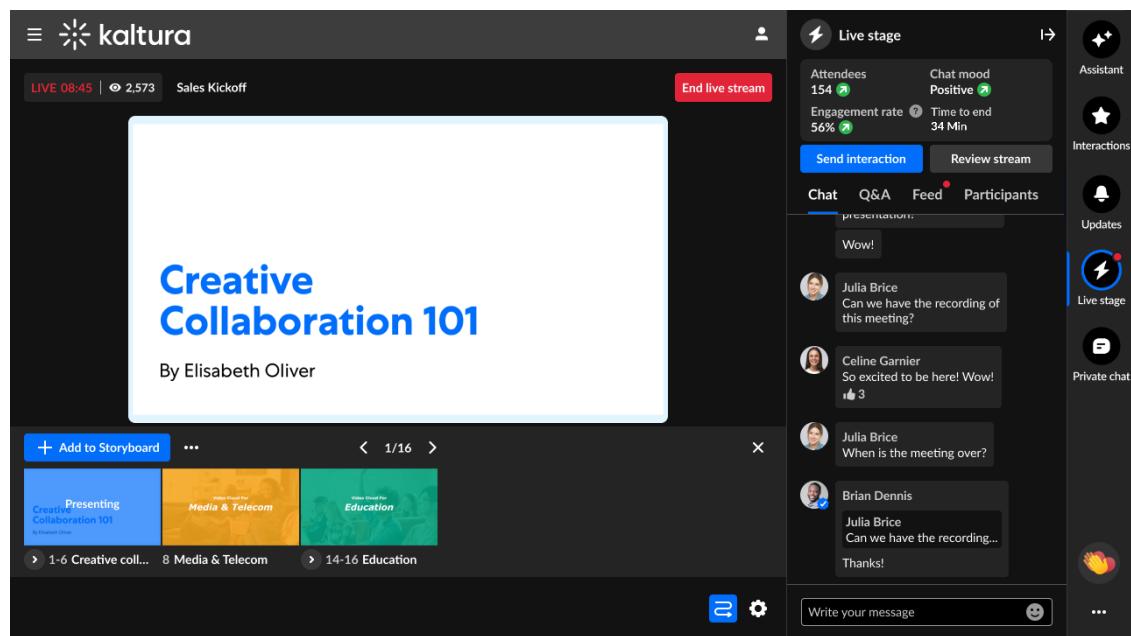

- Stream health analytics dashboard and player preview

You may now view essential stream health analytics and monitor the live player during your Live webcast session. Access to this capability is found via the **Review Stream** button on the Chat and Collaboration widget right next to the Send interaction button on the Group chat, Q&A, Feed, and Backchannel tabs.

Key capabilities:

- **Integrated stream health analytics** - Monitor essential streaming metrics in real-time
- **Live player preview** - View your broadcast directly within the Live webcast studio, including the dual screen plugin to review the cue points
- **Unified workflow** - Access all streaming insights without leaving your workspace

Note - This feature is only available in the [Kaltura webcast studio](#) during a live stream.

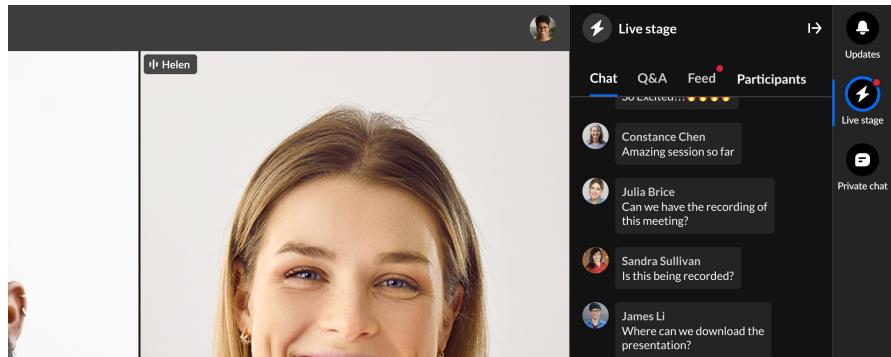

Want more information on this feature? See [Stream health analytics and player preview](#).

- Activity indicators on Live Stage section

Activity indicators now appear on Group chat, Q&A, Feed, and Backchannel tabs. These indicators

help you stay in sync across all tabs by signaling when there's new activity in tabs you're not currently viewing. These visual cues make sure you never miss what matters - even when you're multi-tasking across multiple tabs.

- A notification dot on the Chat or Backchannel sub-tabs indicates there is a new message.
- A notification dot on the Q&A sub-tab indicates new questions or new chat under existing answers.
- A notification dot on the Feed tab indicates that a new item has been published to the feed.

The notification dot disappears once the user clicks on the tab.

A notification dot also displays on the *Live Stage icon* when the widget is closed and there's activity in any tab.

For more details, see our [Knowledge Center article](#).

- **Extended language support**

Chat and Collaboration now opens in your selected language. Users can change the language from the hosting platform (not inside the widget), and the widget will automatically refresh with the updated settings. See the list of officially supported languages [here](#).

Upcoming

- Single live session experience
- Speaker management (order, hide)

Kaltura Events - July 2025

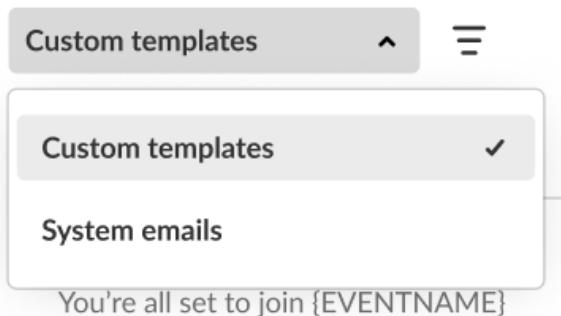

Date Released: July 2025

What's New

Events

- Sent tab updates - speaker and moderator system emails

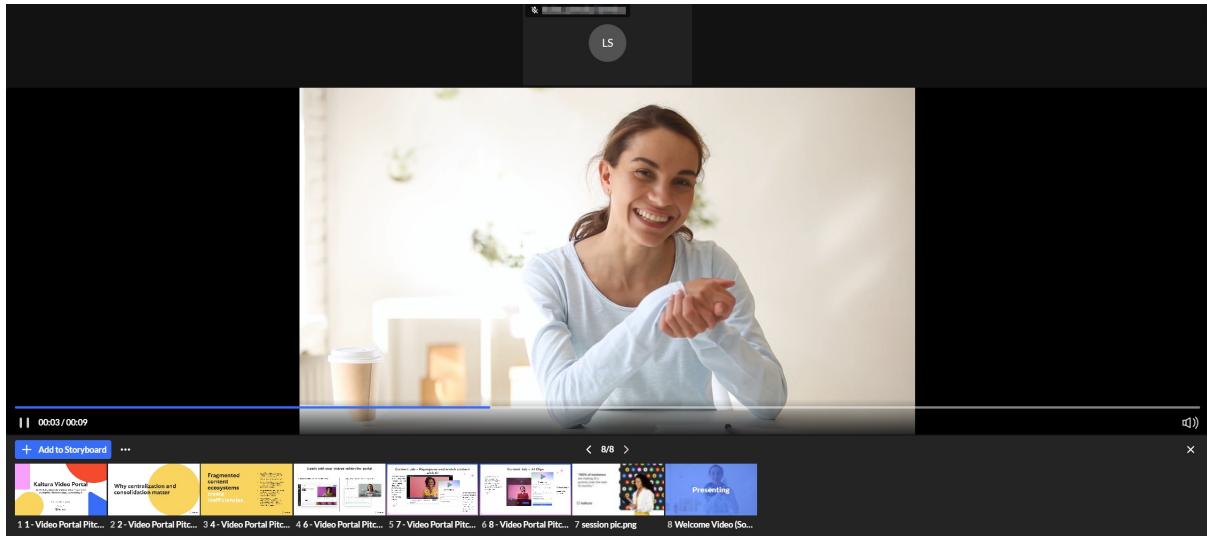

Following our enhancement to the Emails "Sent" tab for those with messaging service enabled, we've added the ability to choose "System emails" if any moderator/speaker automated system emails are configured (i.e., Notify speaker/moderator of session assignment or Notify speaker/moderator of schedule change).

For more details, see our [Knowledge Center article](#).

- Video and audio auto-play on storyboard

Previously, moderators had to manually click Play to start a video or audio file from the storyboard. Now, when presenting a video or audio file from the storyboard (either by clicking it directly or navigating to it using the arrows), it starts playing automatically with sound on - no need to click Play.

For more details, see our [Knowledge Center article](#).

- **Enable AI assistant per session**

Event organizers with the AI Events bundle configured on their account will be able to activate the AI assistant. This includes [access to sentiment analysis](#) and the [live session assistant in the Chat & Collaboration widget](#), which provides notifications about general audience sentiment, engagement levels, and suggests ways to increase interaction. Activating the AI assistant also enables [creation of custom email templates with AI](#).

Please contact your Kaltura representative to enable this feature.

Example of the AI assistant toggle before activating:

Example of confirmation screen displayed after activating the toggle:

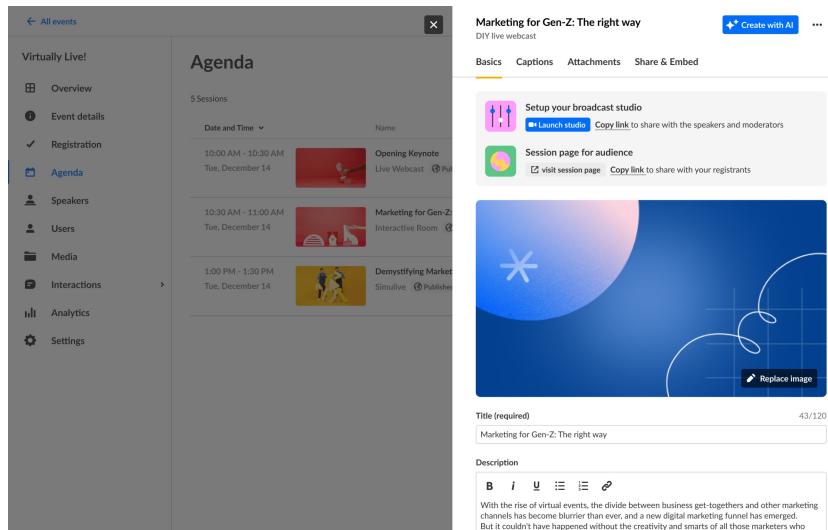

For information on enabling AI assistant when creating an Interactive room session, for example, check out our [Knowledge Center article](#).

- **Content Lab**

Kaltura's AI-powered repurposing engine that lets you generate multiple assets from your content to drive engagement, learning, and growth is now available in Kaltura Events! Organizers can now use AI to automatically generate clips and

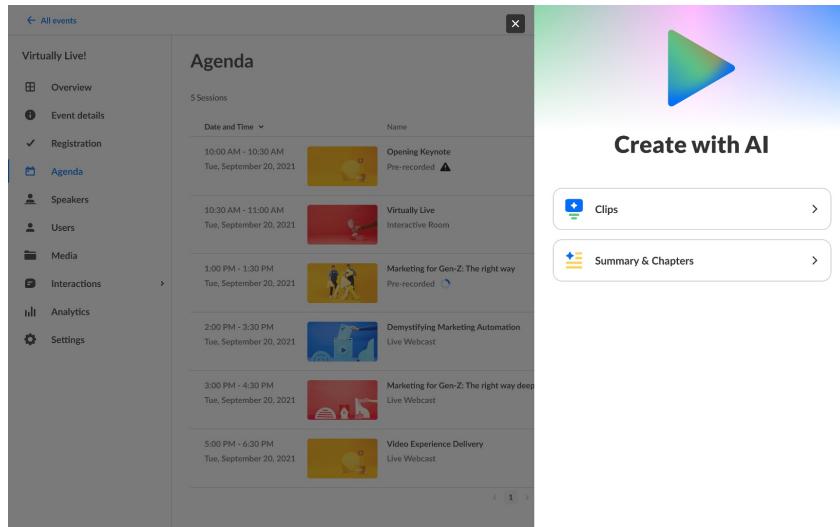

summary/chapters form their session recordings or event media. Access the Content Lab through the **Create with AI** button on the [Edit media page](#) or the [Edit session page](#).

Example of the Create with AI button on the Edit session page for a DIY live webcast:

The screenshot shows the Kaltura Edit session page for a DIY live webcast. The 'Create with AI' button is located in the top right corner. The agenda section shows a session titled 'Marketing for Gen-Z: The right way'. The session details include a date and time of Tue, December 14, and a name of 'Opening Keynote'. The session is marked as 'Pre-recorded'. The description area contains a title 'Marketing for Gen-Z: The right way' and a description: 'With the rise of virtual events, the divide between business get-togethers and other marketing channels has become blurrier than ever, and a new digital marketing funnel has emerged. But it couldn't have happened without the creativity and smarts of all those marketers who'. The interface also includes sections for 'Basics', 'Captions', 'Attachments', 'Share & Embed', and 'Setup your broadcast studio'.

Content Lab opening screen:

The screenshot shows the Kaltura Content Lab opening screen. The 'Create with AI' button is prominently displayed in the center. The agenda section shows a session titled 'Marketing for Gen-Z: The right way' with a date and time of Tue, September 20, 2021. The session is marked as 'Pre-recorded'. The interface also includes sections for 'Clips' and 'Summary & Chapters'.

For information on using AI from the Edit media page, see our [Knowledge Center article](#).

For information on using AI when editing a Live webcast session, for example, check out our [Knowledge Center article](#).

- **Time zone search**

A small but impactful UX improvement - The time zone selector in Kaltura Events

now supports auto-complete during event creation and editing. Users can quickly search and filter time zones by typing, streamlining selection and improving efficiency.

Example auto-complete functionality when editing the details of an event:

For more details of time zone search during event creation, see our [Knowledge Center article](#).

Chat & Collaboration experience

- **Mini session analytics dashboard**

We're excited to announce enhanced visibility into session engagement and performance metrics for moderators. This update provides valuable insights to help you better understand and optimize session management.

- **Key Capabilities:**

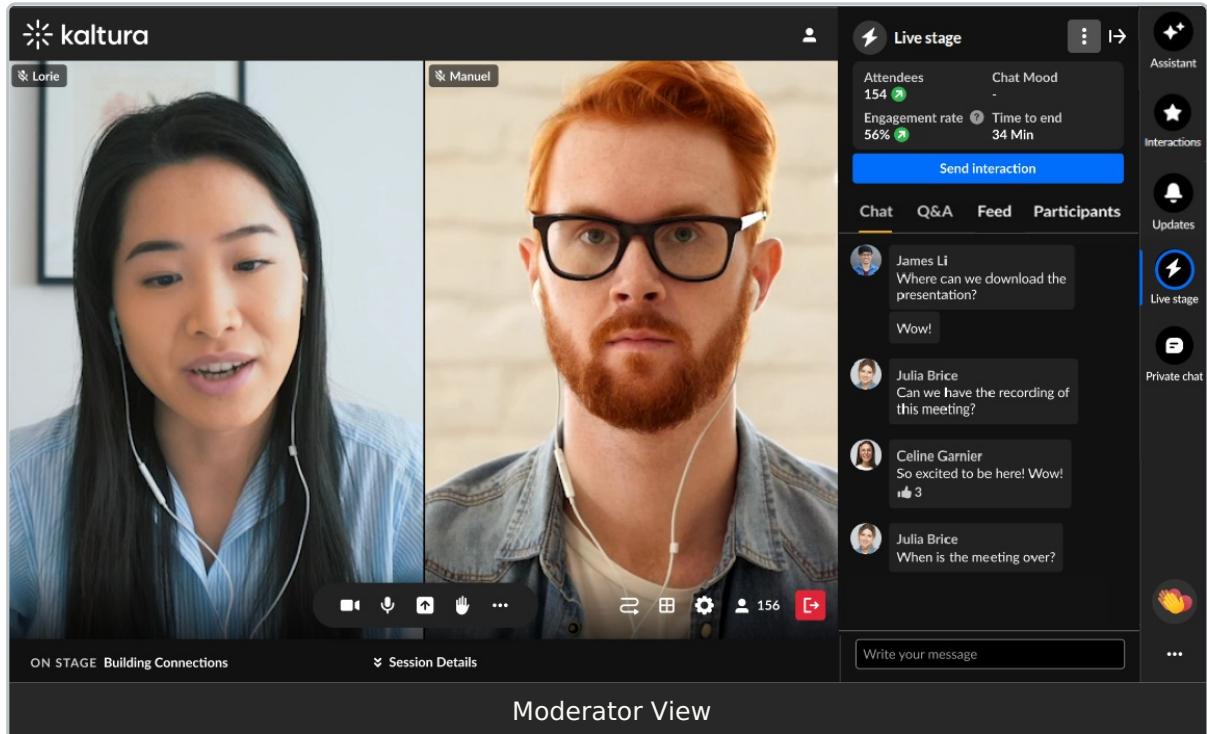

- **Enhanced Visibility** - Get comprehensive insights into session engagement metrics and overall performance.
- **Real-time Monitoring** - Track how your sessions are performing as they happen.
- **Improved Decision Making** - Use data-driven insights to optimize your moderation approach.

- **Data Points Available:**

- **Turnout** - Number of attendees on session vs. registrants
- **Attendees** - Number of users currently watching the session
- **Engagement Rate** - Real-time engagement metrics

- **Time to End** - For scheduled sessions, displays a countdown to session end

Example of the Mini session analytics dashboard on the Live stage tab of the Chat & Collaboration widget:

For more details, see our [Knowledge Center article](#).

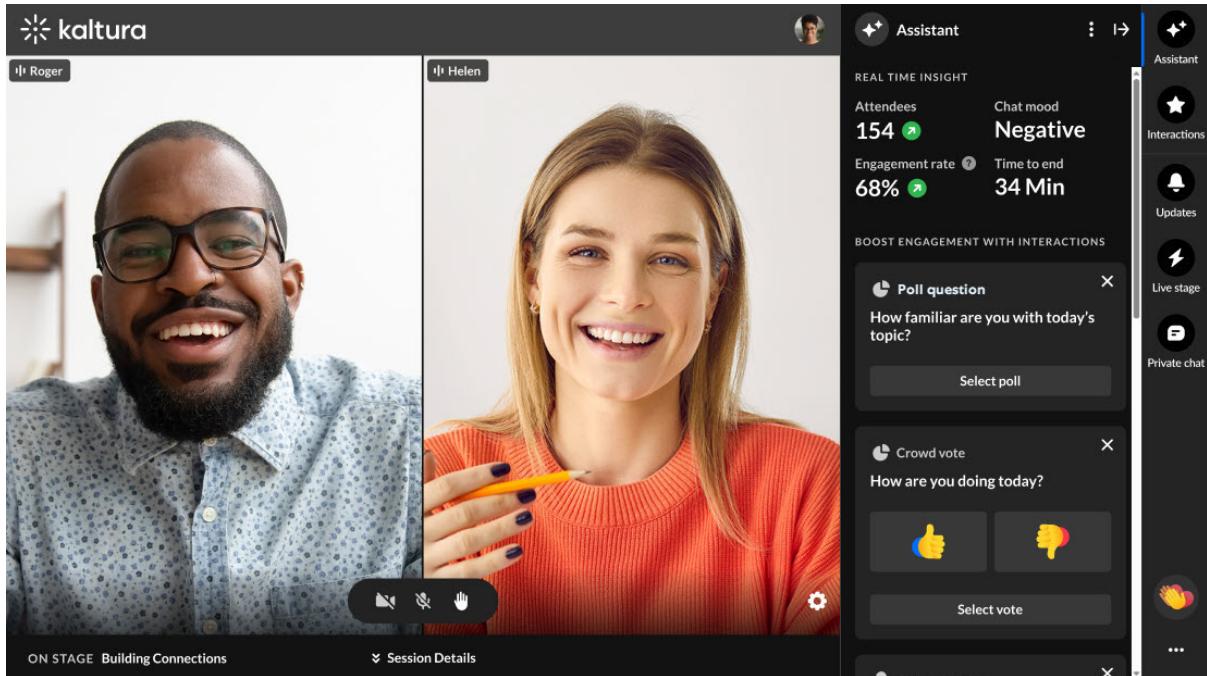

- **AI Events Bundle - Effect on Chat & Collaboration experience**

The AI Events Bundle includes additional enhancements to the Chat & Collaboration experience.

- **Enhanced Sentiment Analysis:** Replaces basic turnout metrics with sentiment indicators
- **Assistant Tab:** Provides suggested polls and notifications to help moderators take action when needed
- **AI-Powered Capabilities:**
 - Call-to-action notifications
 - Interaction suggestions
 - Advanced engagement recommendations

Please contact your Kaltura representative to enable this feature.

Example of the Assistant tab in the Chat & Collaboration widget:

For more details, see our [Knowledge Center article](#).

Upcoming

- Single session events

Kaltura Events - June 2025

Date Released: June 2025

What's New

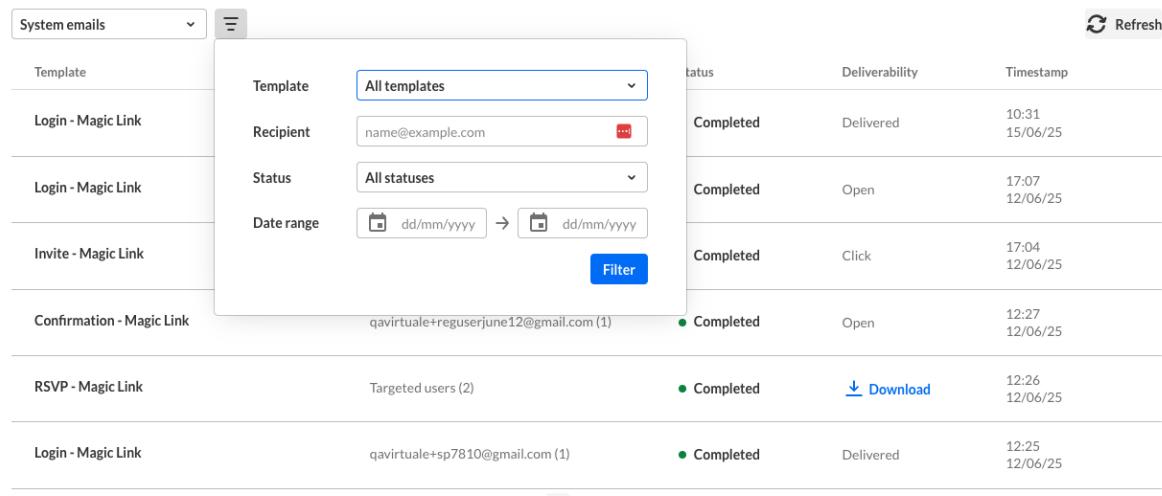

Events

- Enhanced Emails "Sent" tab

We've enhanced the Emails "Sent" tab for those with messaging service enabled. This enhancement will help organizers gain clearer visibility into attendee communication, improve email performance monitoring, and reduce the risk of missed or undelivered system messages.

Emails

Templates Scheduled Sent

The screenshot shows the Kaltura Email interface. On the left, a sidebar lists system email templates: Login - Magic Link, Login - Magic Link, Invite - Magic Link, Confirmation - Magic Link, and RSVP - Magic Link. The Confirmation - Magic Link template is selected. On the right, a main panel displays a list of sent emails. The list includes the following data:

Status	Deliverability	Timestamp
Completed	Delivered	10:31 15/06/25
Completed	Open	17:07 12/06/25
Completed	Click	17:04 12/06/25
Completed	Open	12:27 12/06/25
Completed	Download	12:26 12/06/25
Completed	Delivered	12:25 12/06/25

Below the list are navigation buttons: < 1 2 3 >.

For more details, see our [Knowledge Center article](#).

- **Assign live resource**

Kaltura is excited to announce that now, once you have a configured resource, such as an Epiphan encoder, it becomes available as a resource and appears in the live resource location list. You can then select it when creating a new webcast session, making it easy to reuse reliable setups, save time, and ensure a smooth, consistent streaming experience.

Assign resource location

Select a resource

Resource	Status
The Nexus Hall	Available
The Synergy Room	Available
The Catalyst Hall	Available
The Agora Room	Available
The Summit Room	Not available
The Orbit Hall	Not available

For more details, check out our [Knowledge Center article](#).

Chat & Collaboration experience

- Word cloud

Announcing a brand-new interaction type - Word cloud! Designed to increase user engagement and deliver deeper insights, Word cloud opens up fresh possibilities for immersive experiences and data collection. Word cloud is a full screen overlay interaction that encourages users to actively participate by contributing words or ideas in response to a prompt. Its prominent design ensures high visibility and interaction rates.

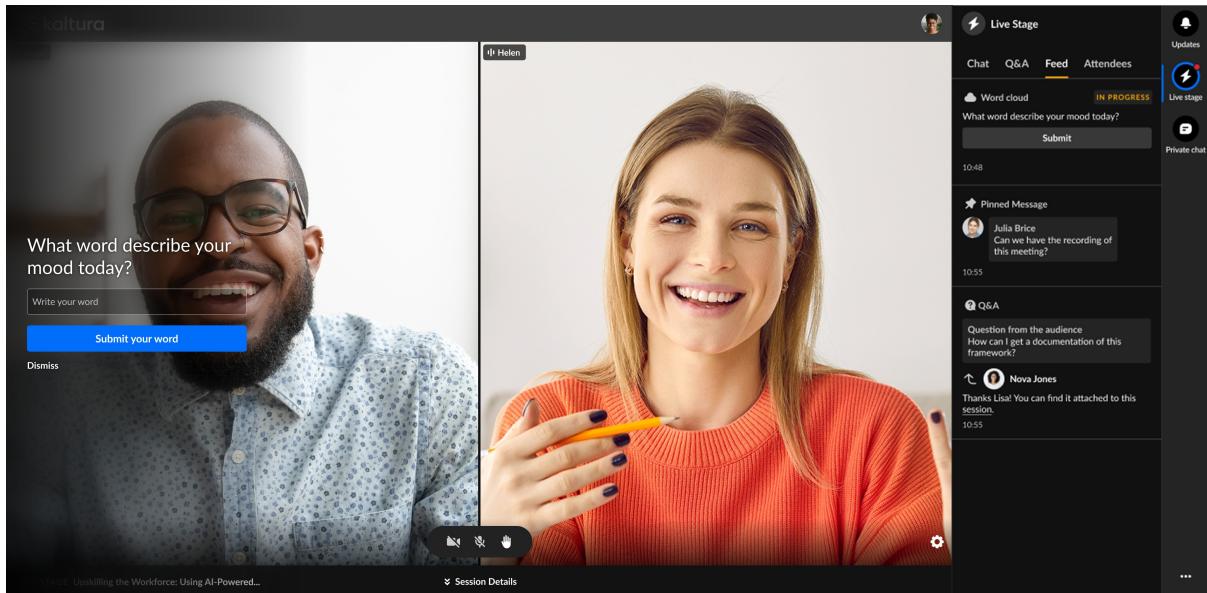

Versatile Use Cases This flexible interaction type supports multiple applications:

- Learning & Education: Help learners explore key concepts, vocabulary, or themes through interactive word exploration
- Brainstorming Sessions: Facilitate creative thinking and idea generation in collaborative environments
- User Feedback Collection: Gather opinions, sentiments, or responses in an engaging, visual format
- Content Discovery: Guide users through related topics or categories in an intuitive way

Enhanced User Engagement The overlay format creates an immersive experience that naturally draws users in, resulting in higher interaction rates and more meaningful engagement with your content.

All interaction data points are available in the interaction report and follow the same data structure as open questions, ensuring seamless integration with your existing analytics workflows.

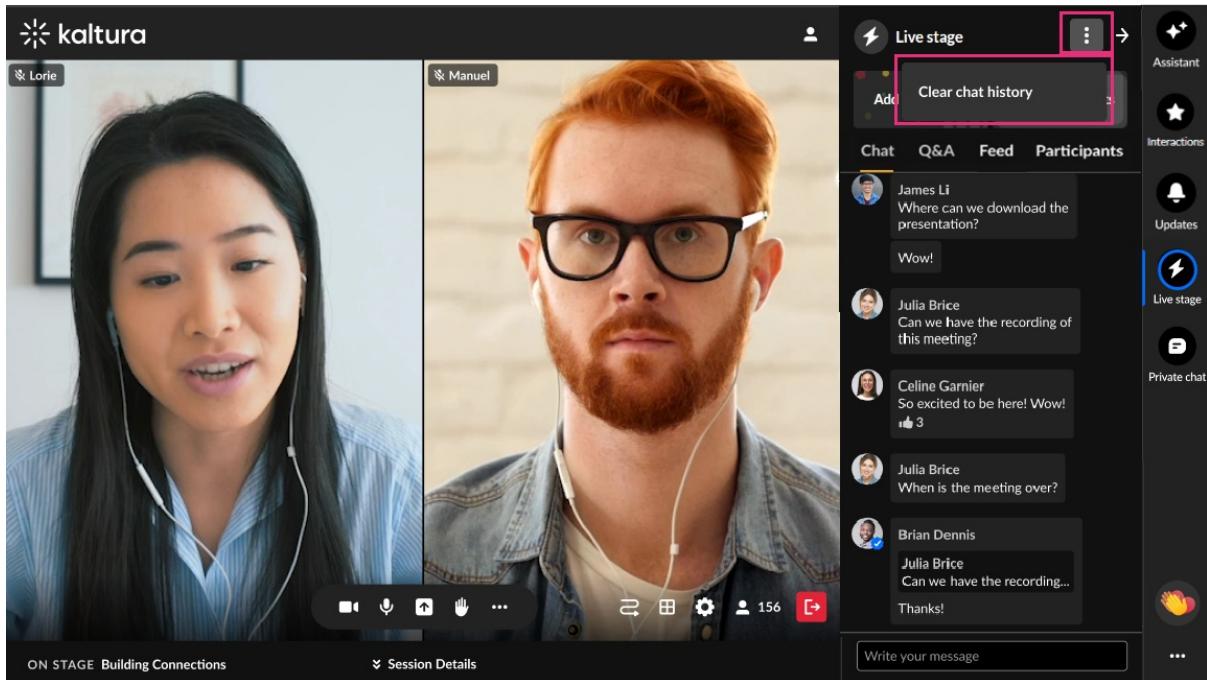

This feature empowers you to create dynamic, data-rich experiences that serve both educational and analytical objectives.

For more details, check out our [Knowledge Center article](#).

- ## Clear Chat History

Moderators can now clear the chat history during a session with the click of a button. Clearing the chat helps moderators refocus the discussion, remove distractions, and create a clean space for the next part of the session.

For more details, check out our [Knowledge Center article](#).

Upcoming

- Content Lab for Events
- Single session experience

Kaltura Events - May 2025

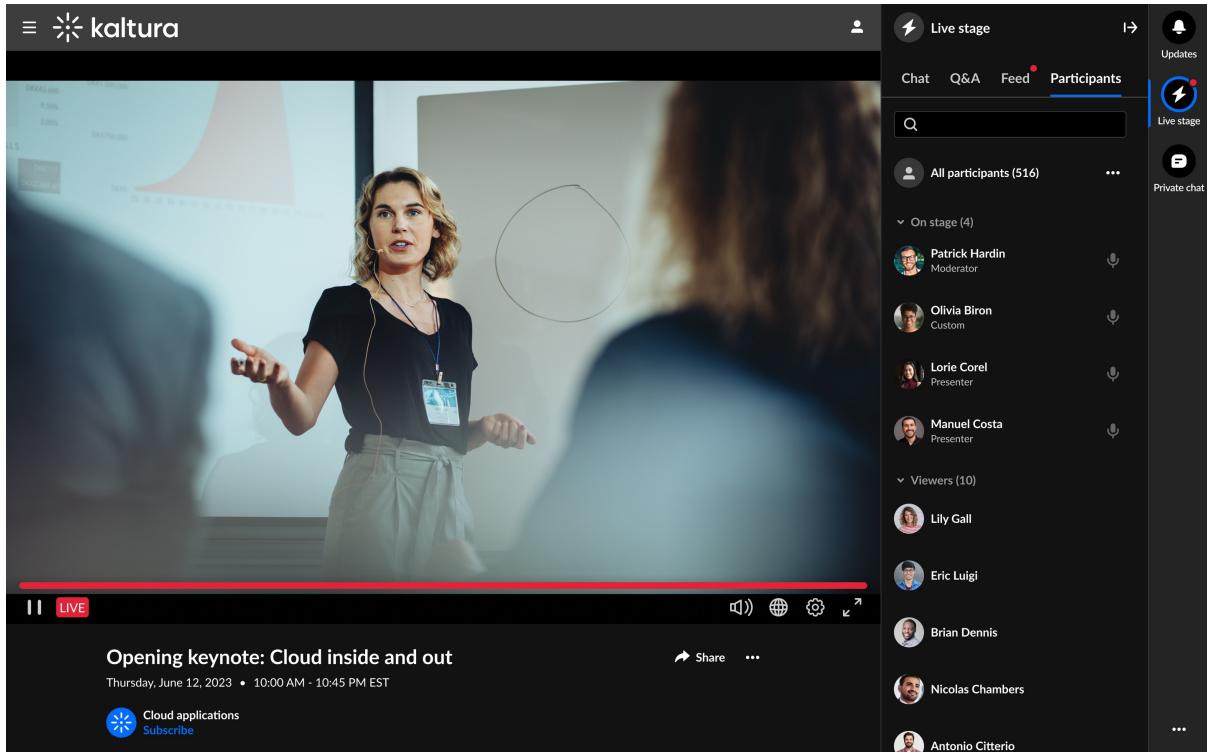

Date Released: May 2025

What's New

Chat & Collaboration experience

- Participants list

The session participants list - where hosts access and manage attendees - has been moved from the Presenter View to the Chat & Collaboration (C&C) panel. This change is designed to streamline the experience, declutter the Presenter View, and make key attendee information easier to access and manage. Note the Participants tab is automatically applied to preset event templates and some custom event templates. If you are using a custom event template, and the Participants tab is not visible, feel free to contact your Kaltura representative to have it added.

For more details, check out our [Knowledge Center article](#).

- **Speakers - Engage Directly**

Speakers now have full access to view and answer Q&A questions and use the backchannel for easy coordination - all without leaving the Chat and Collaboration interface. No need to jump between screens - everything is in one place.

For example, take a look at our [Events Chat & Collaboration article](#) to learn more.

- **Jump Right In (Moderators)**

Moderators can now access the sessions moderation tool faster than ever. Clicking 'Open Moderator App' from a session will take them directly to the relevant session view, without the need to scroll and search.

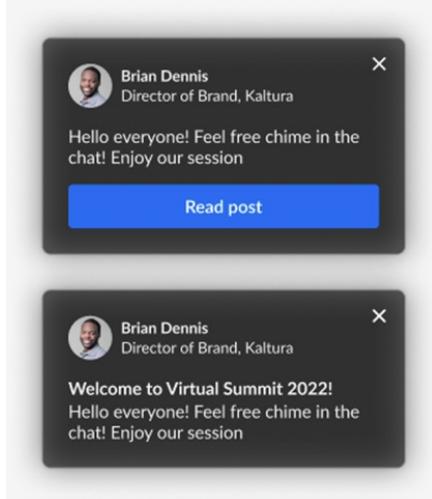

For more details, check out our [Knowledge Center article](#).

- **Longer Questions Allowed**

We've increased the character limit for questions across all interaction widgets from 150 to 300 characters. This improvement is ideal for longer in-session surveys, more detailed Q&A exchanges, and richer audience feedback.

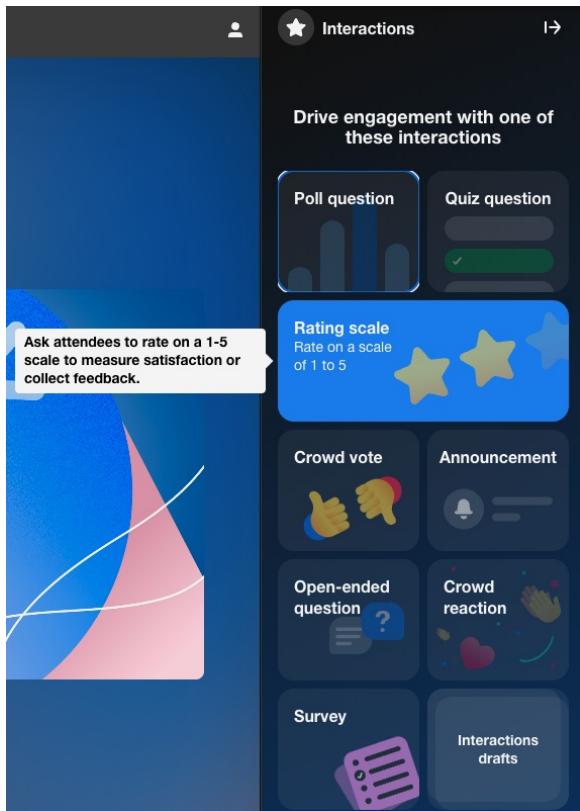

- **Smarter Notifications (and More Coming!)**

We've refreshed the notification interface for a cleaner, more intuitive experience. This also lays the groundwork for future enhancements like real-time word clouds and deeper interaction insights.

- **New Feature Tooltips**

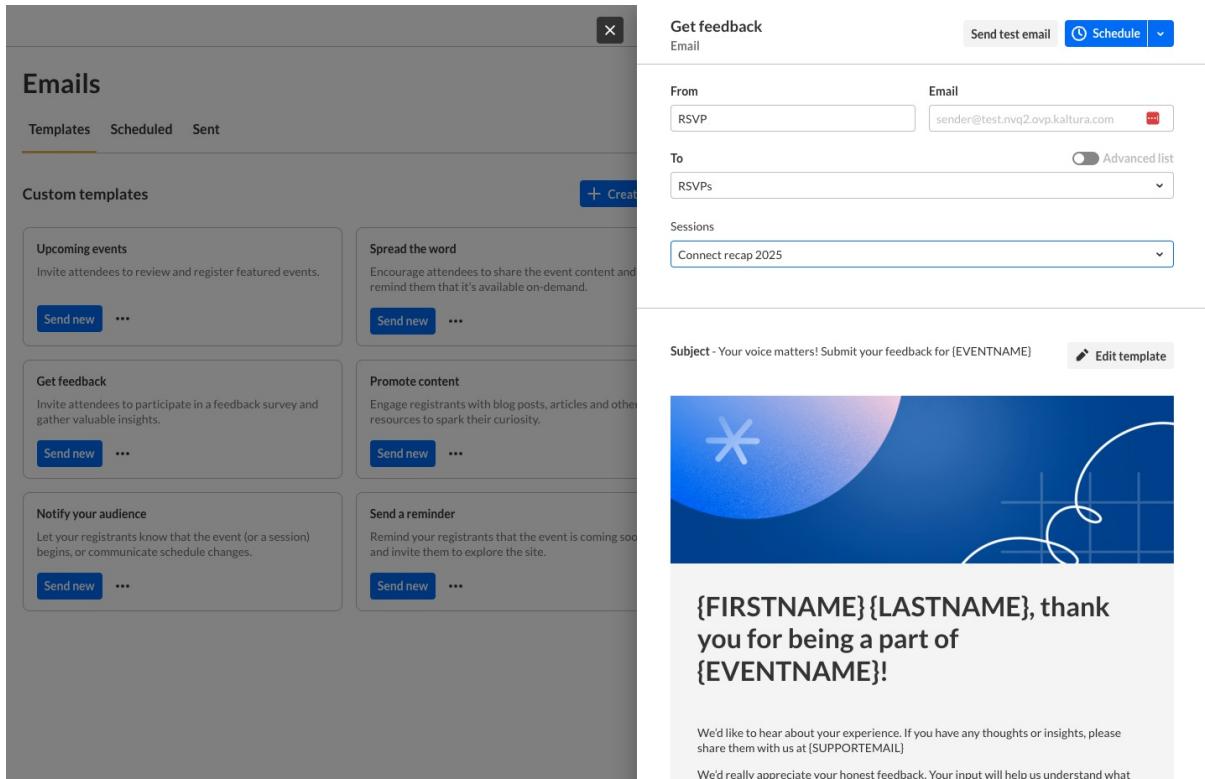

We've added helpful tooltips to our interaction area. These tooltips guide users through the best uses for each feature while providing quick explanations and tips, helping everyone master all functionality with ease.

Events

- **RSVP target audience for custom emails**

Building on the RSVP feature released in April, we've added the ability to send dedicated emails to the RSVP attendees. This helps organizers better target and communicate with their audience.

The screenshot shows the Kaltura Events interface. On the left, there's a sidebar with 'Emails' selected, showing tabs for 'Templates', 'Scheduled', and 'Sent'. Below this are 'Custom templates' with six options: 'Upcoming events', 'Spread the word', 'Get feedback', 'Promote content', 'Notify your audience', and 'Send a reminder'. Each option has a 'Send new' button and a more options button. On the right, a detailed view of an email template is shown. The top right has buttons for 'Get feedback', 'Email', 'Send test email', 'Schedule', and a dropdown. The 'From' field is 'RSVP' and the 'Email' field is 'sender@test.nvq2.ovp.kaltura.com'. The 'To' field is 'RSVPs' with an 'Advanced list' toggle. The 'Sessions' field is 'Connect recap 2025'. The subject line is 'Subject - Your voice matters! Submit your feedback for {EVENTNAME}' with an 'Edit template' button. The email content area features a blue and white abstract graphic with the text '{FIRSTNAME}{LASTNAME}, thank you for being a part of {EVENTNAME}!'. Below the content, there are two paragraphs: 'We'd like to hear about your experience. If you have any thoughts or insights, please share them with us at {SUPPORTEMAIL}' and 'We'd really appreciate your honest feedback. Your input will help us understand what'.

For more details, check out our [Knowledge Center article](#).

- **Analytics navigation/UX improvements**

We've improved the inner navigation to make it easier to drill down, go back, and switch between dashboards. We've also made session analytics more accessible by surfacing them on the Agenda and Overview pages, making them easier to discover and use.

- Enhanced reporting with intuitive and descriptive column titles

Kaltura analyzes collected event data to generate meaningful metrics that help you evaluate your event's performance. Admins can access these metrics through the analytics dashboards and generate detailed reports. Now, admins can select more intuitive and descriptive column titles when exporting these reports, making post-event data easier to understand and interpret. Each exported CSV file also includes a link to the full metric guide, which provides detailed explanations for every data

point.

Export report to email

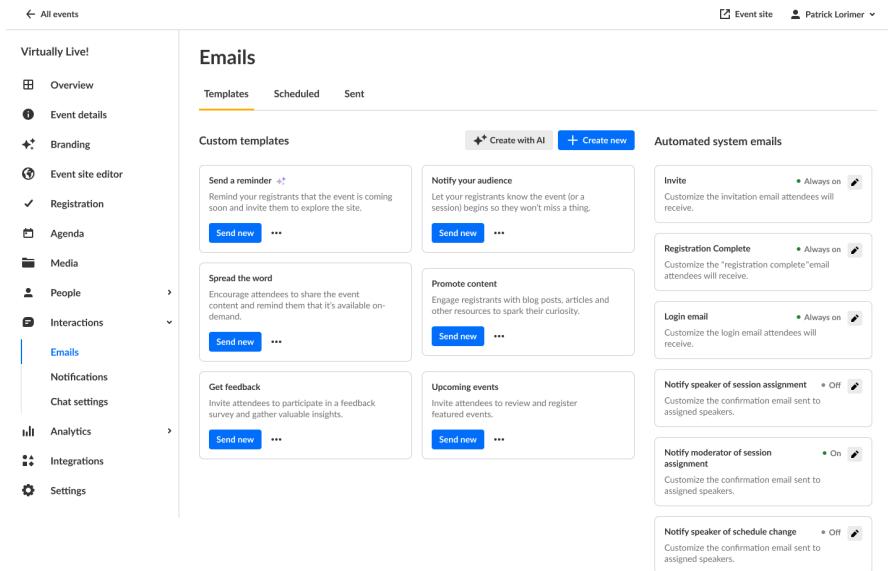

You are about to export and email the report to [johndoe@kaltura.com](#). Please confirm by clicking the button below.

Descriptive Headers [?](#)

[Cancel](#) [Export via email](#)

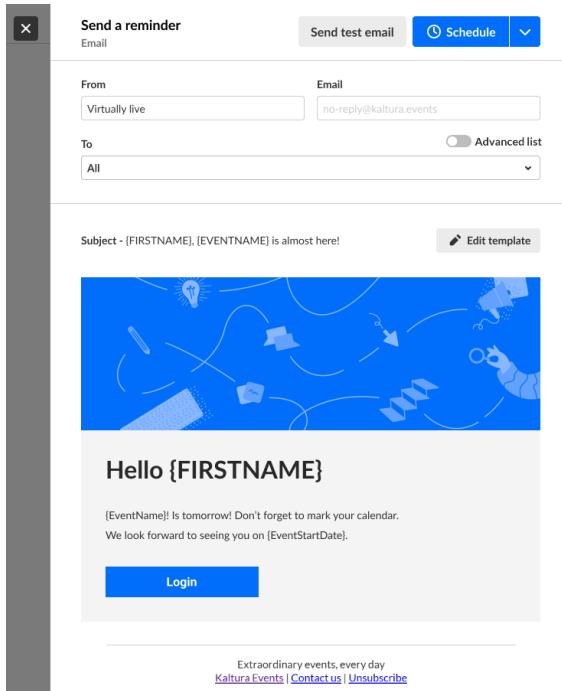

- **Emails page**

We're seeing increased usage of custom emails, so we've updated the layout of the Emails page to better accommodate a larger number of both custom and automated system templates.

The screenshot shows the 'Emails' page within the Kaltura interface. On the left, a sidebar lists various sections: Virtually Live!, Overview, Event details, Branding, Event site editor, Registration (which is selected), Agenda, Media, People, Interactions, Emails (which is also selected), Notifications, Chat settings, Analytics, Integrations, and Settings. The main area is titled 'Emails' and contains two tabs: 'Templates' (selected) and 'Scheduled' and 'Sent'. The 'Templates' tab displays a grid of 12 email templates, each with a 'Send new' button and an ellipsis button. The templates are categorized into 'Custom templates' and 'Automated system emails'. The 'Custom templates' section includes: 'Send a reminder' (remind registrants about the event), 'Notify your audience' (let registrants know the event begins), 'Spread the word' (encourage attendees to share event content), 'Promote content' (engage registrants with blog posts and articles), 'Get feedback' (invite attendees to participate in a feedback survey), and 'Upcoming events' (invite attendees to review and register for featured events). The 'Automated system emails' section includes: 'Invite' (always on, customize invitation email), 'Registration Complete' (always on, customize 'registration complete' email), 'Login email' (always on, customize login email), 'Notify speaker of session assignment' (off, customize confirmation email for assigned speakers), 'Notify moderator of session assignment' (on, customize confirmation email for assigned speakers), and 'Notify speaker of schedule change' (off, customize confirmation email for assigned speakers).

In addition, since most users are now scheduling their emails to be sent at a later date/time, we've improved the workflow - *Schedule email* is now the default action and *Send now* is available as an option upon selection.

For more details, check out this [Knowledge Center article](#).

- **Adding existing attendees as Kaltura Events team members**

Previously, adding a team member who had already attended an event required opening a support ticket or using workarounds. Now, event admins can seamlessly add any past attendee as a Kaltura Events team member - no user deletion or workarounds needed. New team members receive an email to set their password, or if they already have a Kaltura account with another partner, they'll simply use their existing credentials.

Upcoming

- Assign resource for live sessions

Resolved Issues

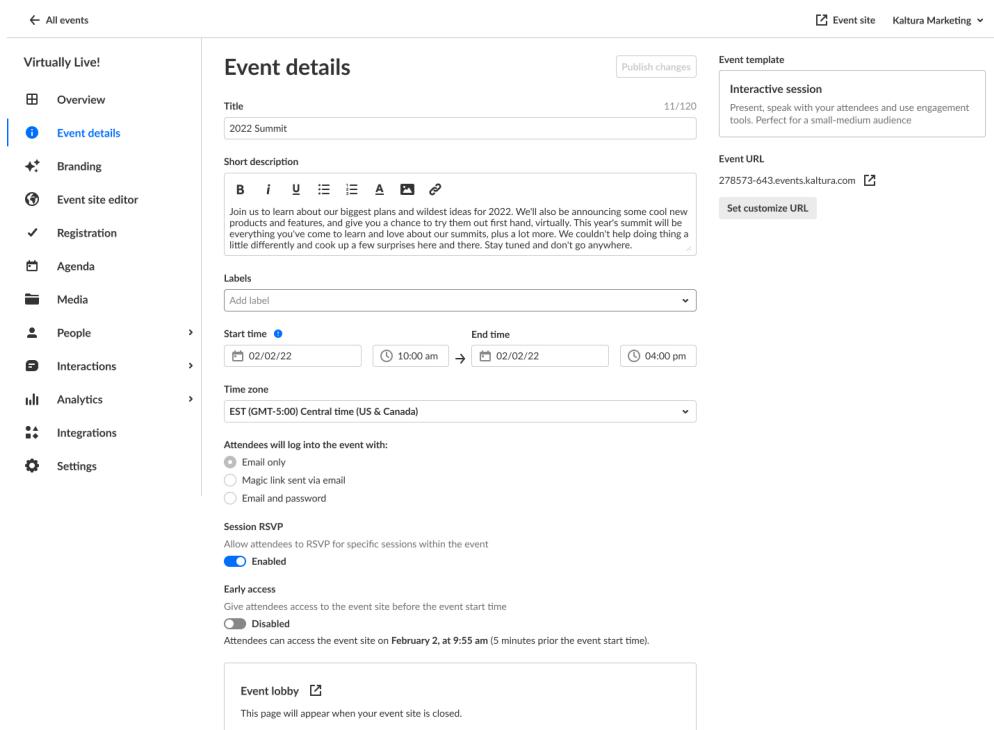

Support ticket ID #	Description
SUP-47989	Fixed issue where users were receiving an "Invalid URL" error when attempting to create a notification URL containing special characters.
VEC-5432	Added Amsterdam time zone as a selection during event creation.
SUP-47953	Fixed issue where the "You've been assigned as a moderator" email was not triggering properly for shared vs non shared users.
SUP-45323	Fixed issue where the Token {EVENTENDDATE} was supported in Registration emails, but not in Reminder emails.

Kaltura Events - April 2025

Date Released: April 2025

What's New

RSVP - We're excited to introduce this powerful feature that allows attendees to sign-up to specific sessions, creating a personalized and organized event experience for large / multisession events. Upon registration or when browsing sessions, attendees can easily RSVP to individual sessions. RSVP can trigger an automatic email with a calendar invite (based on configuration) to help them stay on track. RSVP can also help organizers with the data needed to optimize event management, including understanding which sessions generate the most interest and reaching out to attendees with personalized follow-ups. Organizers can enable / disable RSVP (on newly events), view the number of RSVP attendees on the agenda page, and download RSVP report.

The screenshot shows the 'Event details' page for a '2022 Summit' event. The left sidebar lists various event management sections: Overview, Event details (which is selected and highlighted in blue), Branding, Event site editor, Registration, Agenda, Media, People, Interactions, Analytics, Integrations, and Settings. The main content area is titled 'Event details' and includes fields for 'Title' (2022 Summit), 'Short description' (a text box with a rich text editor placeholder), 'Labels' (a dropdown menu), 'Start time' (02/02/22), 'End time' (02/02/22 at 04:00 pm), 'Time zone' (EST (GMT-5:00) Central time (US & Canada)), 'Attendees will log into the event with:' (radio buttons for 'Email only', 'Magic link sent via email', and 'Email and password'), 'Session RSVP' (a toggle switch set to 'Enabled'), 'Early access' (a toggle switch set to 'Disabled'), and an 'Event lobby' section (a note: 'This page will appear when your event site is closed'). On the right, there are sections for 'Event template' (set to 'Interactive session') and 'Event URL' (278573-643.events.kaltura.com). The top right corner shows 'Event site' and 'Kaltura Marketing'.

Notes on Session RSVP:

This option **will not** display for existing events, only newly created events. If you would like to add Session RSVP to an existing event, please contact your Kaltura representative.

For newly created events from a preset template, Session RSVP will be enabled and ON by default, including auto invite for RSVP attendees.

If you would like to have the auto calendar email, please contact your Kaltura representative to update your custom event template with the relevant email configuration/branding.

Polls on session dashboard - You may now view analytics on polls that were initiated during your Event session, including poll questions, poll types, and the number of unique participants that answered each poll.

You may download a PDF of all the poll questions and even click on a poll question to drill down and view additional information about that question, including each possible answer to the question, the number of participants who gave each particular answer, and a percentage of unique participants who gave each particular answer.

For more details, check out this [Knowledge Center article](#).

Interactive session on mobile view - Interactive sessions are now supported on mobile devices! Attendees joining an interactive session from mobile devices will get the new mobile web experience, allowing them to participate in the session from their mobile device. Plus, desktop Safari users can now join seamlessly as well, keeping everyone in the platform context throughout their entire experience.

Note: If you are using a custom event template, please contact your Kaltura representative to make sure you have this feature enabled.

Resolved Issues

Support ticket ID #	Description
SUP-46925	Fixed issue where "Failed to remove user" error was being given when trying to remove a user from the People > All Users page.
SUP-45974	Fixed an issue where "Invalid URL" error was being given when attempting to enter a URL that included an ampersand under Button in the New notification screen.
SUP-45315	Fixed an issue where error was being given when attempting to view engagement data for a user in Kaltura Events admin analytics.

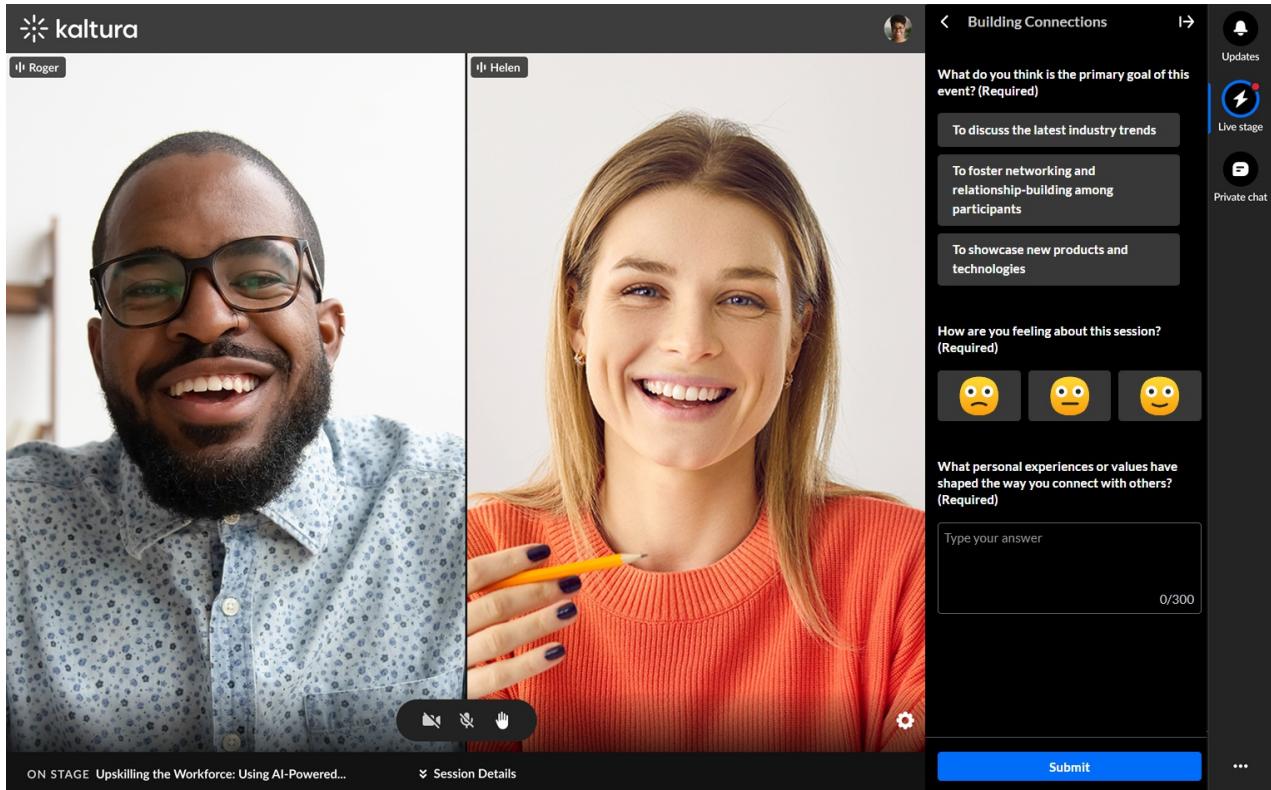

Kaltura Events - March 2025

Date Released: March 2025

What's New

In-session surveys - We're excited to announce the launch of in-session surveys, a powerful new feature in our engagement suite designed to collect meaningful feedback from attendees. Surveys let moderators and organizers group a series of interaction types at once, including choice questions, rating scales, open-ended questions, and more.

While results from polls, crowd votes and quizzes and other interaction tools are shared with the moderator during the session, survey responses are accessible only to the event organizer within the Poll & Quiz report. This level of privacy encourages attendees to provide their honest feedback about the session experience.

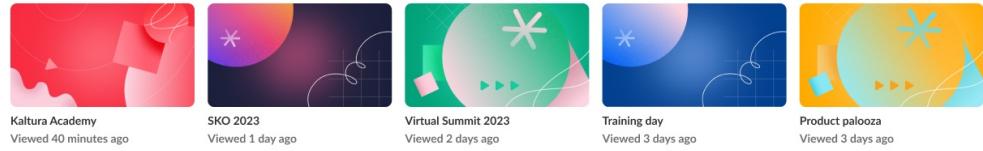

For more details, check out this [Knowledge Center article](#).

Events & Webinars list default view on the Home tab - We've updated the Events & Webinars list default view to show current events (instead of all events), displaying ongoing events and webinars first and then upcoming events and webinars.

Good morning, Patrick ☀️

Session tags - Organizers may now create and attach useful, relevant tags to any created or edited session to help categorize them within their event. These tags are visible to event attendees, allowing them to quickly identify sessions based on topics, themes, or any other classification. This feature is particularly beneficial for large-scale events with multiple sessions.

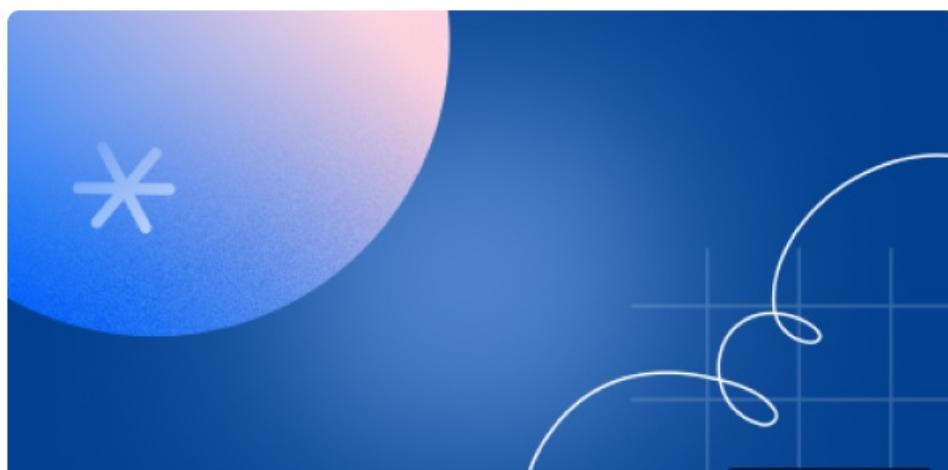

Marketing for Gen-Z: The right way

Description**B** *i* u   

With the rise of virtual events, the divide between business get-togethers and other marketing channels has become blurrier than ever, and a new digital marketing funnel has emerged. But it couldn't have happened without the creativity and smarts of all those marketers who wielded their events into immersive experiences and personal interactions that fit right into people's every day, anywhere on the customer journey.

Localizations - We're excited to announce enhancements to better support custom

multi-lingual event templates, localizing, and editing the transactional emails attendees receive.

- **Set language and send invite in different languages** - When inviting an attendee, speaker, or moderator using a multi-lingual custom event template, you may select their language to send the invite email and set their event experience on both single and bulk invite.

For more details, check out our [Knowledge Center article](#).

- **Edit localized versions of transactional system emails (Login, Invite, Registration Confirmation)** - Using a multi-lingual custom event template, you can now edit the different localized versions of the transactional system emails such as login, invite and registration confirmation.

We are glad to invite you to [EVENTNAME], which is happening on [EVENTSTARTDATE] at [EVENTTIMEZONE].
We look forward to seeing you there.

To access the event site, please click on the link below.

Access site

For more details, check out our [Knowledge Center article](#).

What's new - in-product communications - We've added a section where we will publish updates directly to our users. We will use this area to announce new updates and communicate changes to our users on the account/event level. (If you do not see this section, there are no new updates for you.)

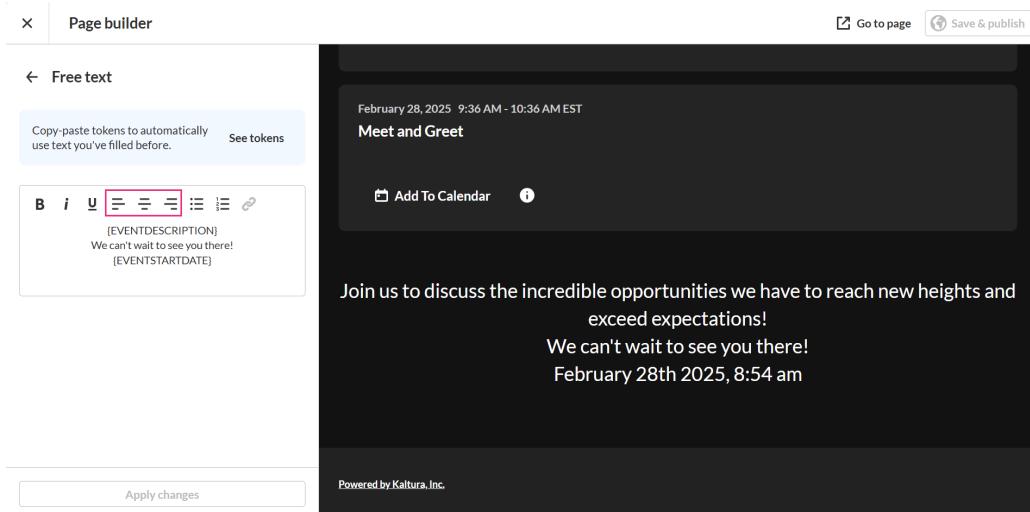

Following is an example of a notification users may receive:

The landing page features a 'NEW' badge with a gift icon. The main headline reads: 'Your insights matter. Help shape Kaltura's AI roadmap in our hackathon!'. Below the headline is a photo of a person's hands typing on a laptop keyboard. To the right, a box with the title 'Shape the Agentic AI Future' and a subtext about sharing challenges for a breakthrough. A 'Share my insights' button is at the bottom.

For more details, check out our [Knowledge Center article](#).

Free text section of Page builder - We've added a text alignment option to the Free text section of Page builder, allowing you to further tailor your custom event pages.

The screenshot shows the Kaltura Page builder interface. On the left, a sidebar shows a 'Free text' section with a toolbar and a preview area containing placeholder text: '[EVENTDESCRIPTION] We can't wait to see you there! [EVENTSTARTDATE]'. On the right, the main content area displays a dark-themed event card for 'Meet and Greet' on February 28, 2025, with an 'Add To Calendar' button. The main text area contains promotional text and a date: 'Join us to discuss the incredible opportunities we have to reach new heights and exceed expectations! We can't wait to see you there! February 28th 2025, 8:54 am'.

Resolved Issues

Support ticket ID #	Description
SUP-46503	Fixed error when attempting to download Poll and Quiz report.
SUP-46821	Fixed an issue where the chat setting was auto-disabled.
SUP-42849	Fixed an issue where Copy Event was not scheduling notifications properly.

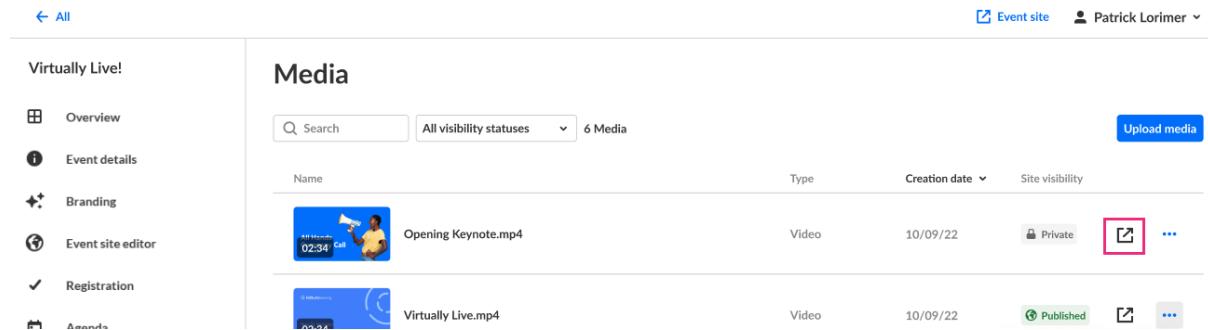

Kaltura Events - February 2025

Date Released: February 2025

What's New

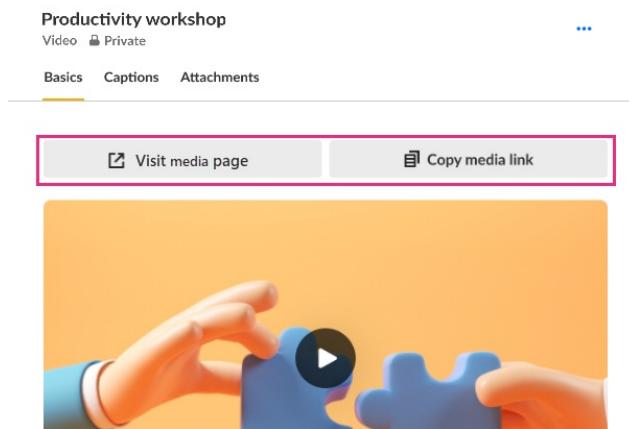

Media page -

- You may now navigate directly to your event site to view media uploaded. Simply click the redirect button to the right of the desired media to visit its Media page on your event site.

The screenshot shows the 'Media' section of an event site. The left sidebar lists event management tabs: Overview, Event details, Branding, Event site editor, Registration, and Agenda. The main area displays a table of media items. The first item is 'Opening Keynote.mp4', a video file uploaded on 10/09/22, marked as Private. The second item is 'Virtually Live.mp4', a video file uploaded on 10/09/22, marked as Published. Each media item has a 'Redirect' button (represented by a blue square with a white arrow) to its right.

- The Basics tab of the Edit panel* now includes two new capabilities -
 - **Visit media page** - Visit the media page in your event site.
 - **Copy media link** - Copy the media link to share with others.

*Reach the Edit panel from the Media page by either clicking on the media name itself or clicking the three blue dots to the right of the media and selecting Edit.

For more details, check out our [Knowledge Center article](#).

- Accessibility fixes
- Localization of transactional emails (registration complete, invite, login) for multi-lingual event templates

Resolved Issues

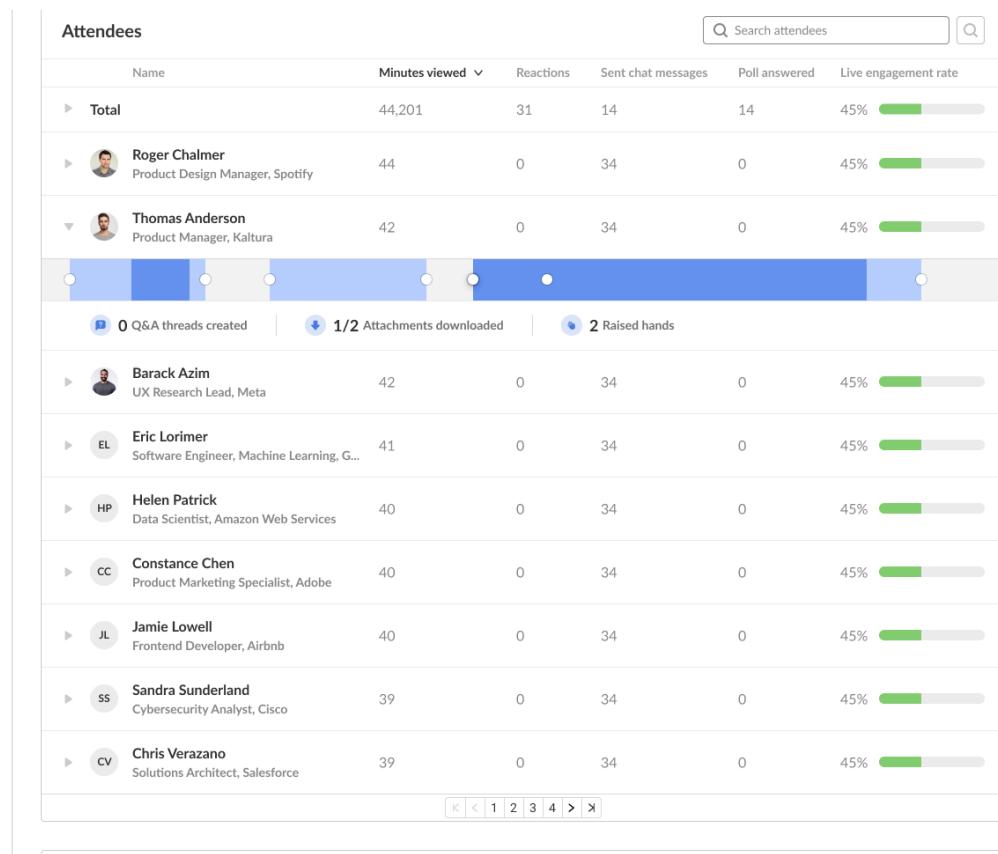

Support ticket ID #	Description
SUP-45729	Fixed an issue where special characters used in the session name, which are not allowed in the URL, were remaining in the URL.
SUP-42478	Fixed an issue where users were given a "Failed to get event users" error when attempting to access a user list containing over 1,000 pages (via the People > All users tab).

Kaltura Events - December 2024

Date Released: December 2024

What's New

Session analytics dashboard enhancements - Additional user information is now available on the session analytics dashboard, as well as an added searchability feature. Information in this portion of the dashboard now includes attendee name, minutes viewed, reactions, sent chat messages, polls answered, and live engagement rate. You can even hover over an attendee's name to display user registration information, such as name, role, company, industry, and country. In addition, if you'd like to search for a specific attendee in the list, simply type at least three letters of the attendee's name in the search field, then click the search "magnifying glass" icon or simply press Enter on your keyboard.

For more details, check out our [Knowledge Center article](#).

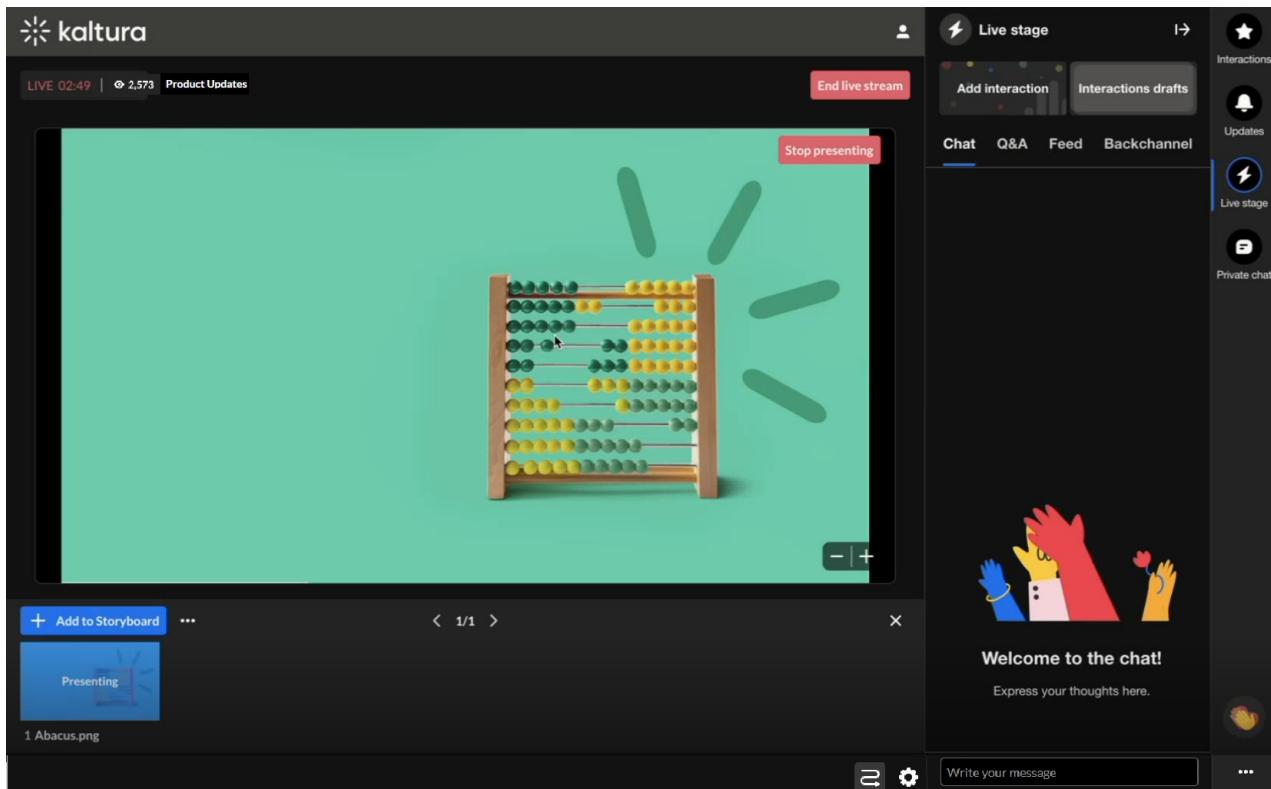

Webcast studio - Introducing a new addition to the live webcast session - Webcast Studio! This next-generation "Town Hall" is designed to elevate live-streaming experiences for large audiences. Each live session created in Kaltura Events will have the option to add a webcasting studio where producers can plan and manage their broadcast.

Key features of the Webcast Studio include:

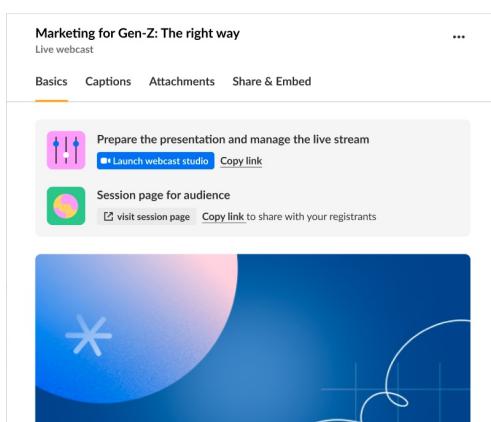

- Prepare ahead of your broadcast - Access the webcast studio via private links to set up visuals and engagement assets before going live.

- Upload visuals to your session – Enjoy an effortless integration of slides and images to enrich your live broadcast and simplify session prep.
- Simple management of your stream - Start, stop, and manage live streams directly from the intuitive studio interface.
- Enhanced audience experience – Let your attendees leverage dual screens and cue points to make your content more accessible and to the point.

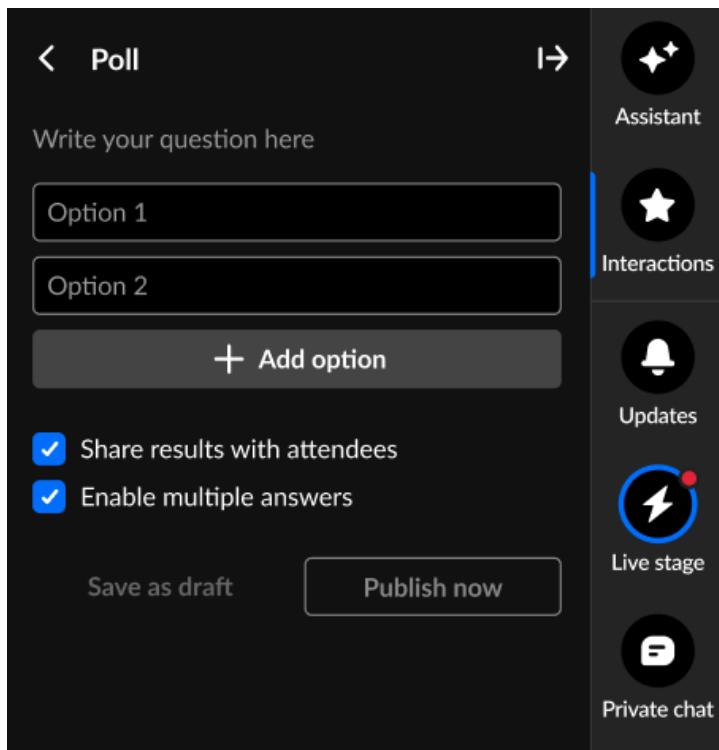

We've also improved the user experience! We increased the visibility of the "Launch" CTA in the session panel. We also simplified the process for copying and sharing session links. Additionally, clicking the "Launch" CTA now automatically opens the studio with auto-login and takes you directly into the room—no extra "Start Meeting" click required.

For more details, check out our [Knowledge Center article](#).

Support for more answers in polls and quizzes - The Interactions tab of the Chat & Collaborate widget is where moderators create and publish various interaction tools for their event, including text polls, quiz questions, rating scales, crowd votes, and open-ended questions. For polls and quizzes, we've increased the number of possible answers from 5 to 8, giving moderators more customization options for their interactions with attendees.

For more details, check out our [Knowledge Center article](#).

Increased character limit for Q&A message board questions - The Q&A area of our Moderator app is where moderators answer common questions from the audience by publishing questions with answers on the feed. We've now increased the question character limit from 150 to 500, giving moderators more flexibility to accommodate longer questions from the audience.

Automated system emails for speakers and moderators - Speakers and moderators can now get an automated email when they are assigned to a session or upon session schedule change. This streamlines the process of speakers/moderators getting notified about their sessions and getting into the event site/relevant session. The email includes relevant CTA buttons, for example, on a DIY session (live broadcast from a room), they get a direct link to the room and also a calendar invitation for the session. The automation of the emails is configurable and can be turned on/off on the template level, as well as the email templates content.

Email example:

Welcome to Meet and Greet!

Hi Shaked,

Welcome to the event- Meet and Greet .

This is an automated notification to let you know you've been added to session Meet and Greet as a speaker.

The session occurs at:

19th December 2024, 4:45 pm Asia/Jerusalem.

Skip email on bulk invite - You can now skip sending invite emails when using the bulk invite process, just like with single invites. This is particularly useful when you're still working on your event or managing a physical event and want to avoid sending unnecessary emails to executives or other participants. You can add users (e.g. speakers and moderators) without triggering an invite email. When you're ready, simply use the "Resend Email" option to send the invites.

Resolved Issues

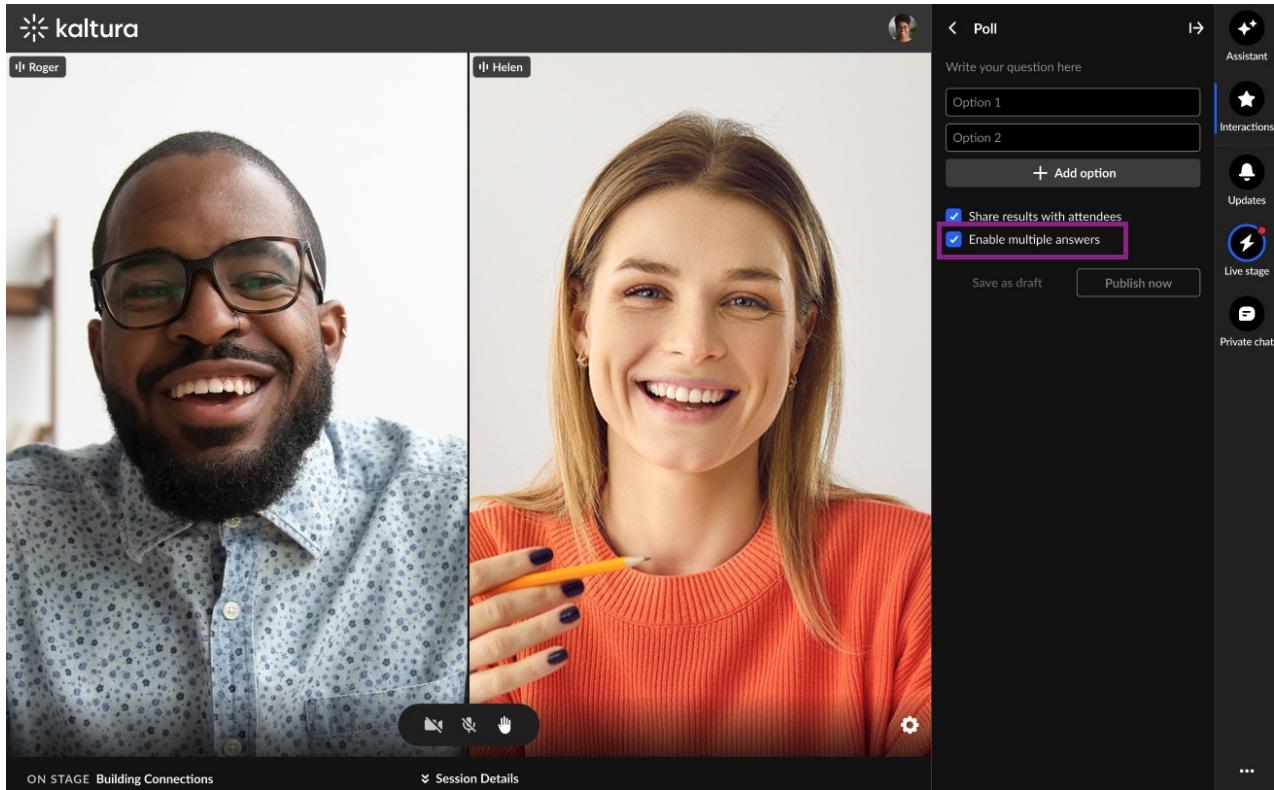

Support ticket ID #	Description
SUP-45231	Fixed an issue where admins were sporadically receiving errors when attempting to login.
SUP-45071	Fixed an issue where the duration of an event was being incorrectly displayed.
SUP-44835	Fixed an issue where the session moderator dropdown wasn't displaying all assigned moderators.
SUP-41870	Fixed an issue where users were unable to change from Unlisted to Private.
SUP-42551	Fixed an issue where the announcement notification was not allowing "!" or ":" in URL.
SUP-45119	Fixed an issue where Claravine URL code in notifications was not being accepted.

Kaltura Events - November 2024

Date Released: November 2024

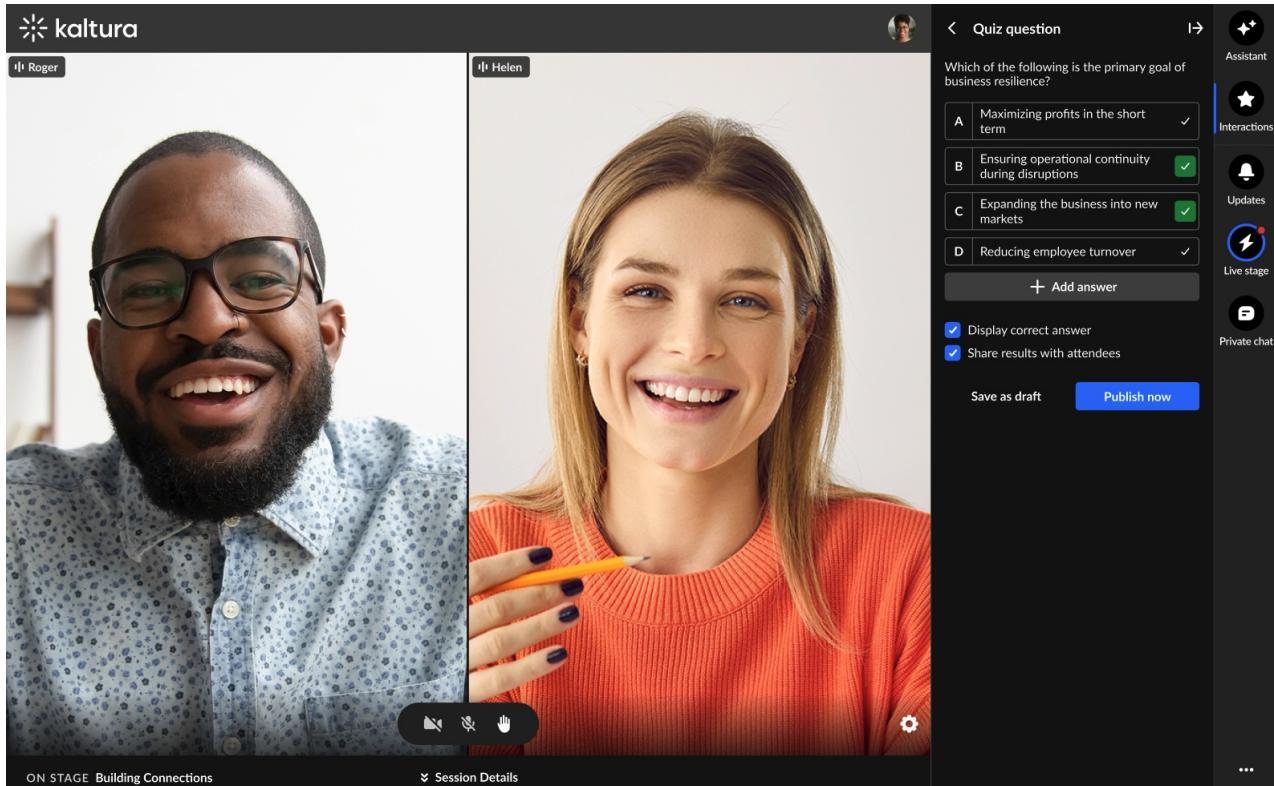

What's New

Multi-selection in Polls - We are happy to announce that multi-selection in poll answers is now available! This new feature supports questions like "Select all that apply", giving attendees more flexibility in their responses. To enable multiple selections when creating a poll, simply check the new "Enable multiple answers" checkbox.

For more details, check out our [Knowledge Center article](#).

More than one correct answer in Quiz question - We are also excited to introduce the option to select multiple correct answers in quiz questions. Moderators can now mark more than one correct answer when creating a quiz, by simply selecting multiple correct options. This enhancement broadens the range of quiz possibilities, enabling more dynamic and flexible question types for engaging participants.

For more details, check out our [Knowledge Center article](#).

Polls on Stage Monitor - We're happy to introduce a new ability - adding polls to the Stage Monitor. Moderators can now display poll questions and results on the Stage Monitor, enabling speakers to view them while on a physical stage. This enhancement strengthens our hybrid event solution, enhancing the engagement between speakers and their audience.

Question from the audience

How can marketing automation enhance customer engagement in today's fast-changing market?

In today's rapidly evolving market, how does marketing automation contribute to boosting customer engagement?

Resolved Issues

Support ticket ID #	Description
SUP-45632	Fixed an issue where users were not able to copy events when a special character was used in the title.
SUP-44690	Fixed an issue where users were not able to add a social stream to a DIY live room.
SUP-44701	Fixed an issue where the option to login via SSO to KMS was missing and the only option shown was to login with email and password.
SUP-45496	Fixed an issue where the Analytics page was not responding if opened from the Edit Session drawer.

Kaltura Events - October 2024

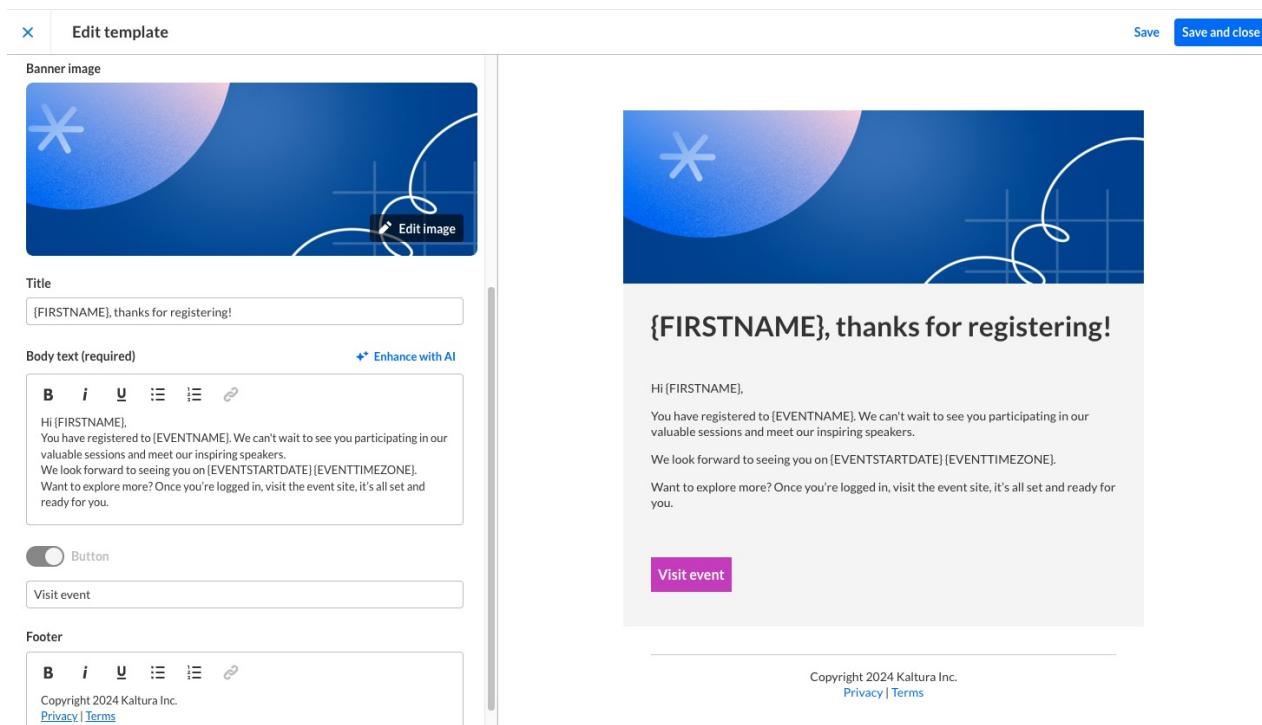

Date Released: October 2024

What's New

System email templates improvements - Our latest additions will provide event organizers with greater control and personalization options for event branding & communication.

- Branding consistency: The CTA button color in the template preview area now follows branding customization selected on the custom event template.
- Customization options: Edit the CTA button label and footer text across all system emails (registration complete, invite, and login emails).

Note: If you're using a custom event template, the template may need to be updated to view these options.

The screenshot shows the 'Edit template' interface. On the left, there's a preview area with a blue gradient background, a white asterisk icon, and a 'Edit image' button. Below it are sections for 'Title' (containing '{FIRSTNAME}, thanks for registering!'), 'Body text (required)' (with an 'Enhance with AI' button and a rich text editor), 'Button' (a blue button labeled 'Visit event'), and 'Footer' (containing 'Copyright 2024 Kaltura Inc.' and links to 'Privacy' and 'Terms'). On the right, the 'Save' and 'Save and close' buttons are visible. The preview on the right shows the final design with the same elements and the personalized text '{FIRSTNAME}, thanks for registering!'.

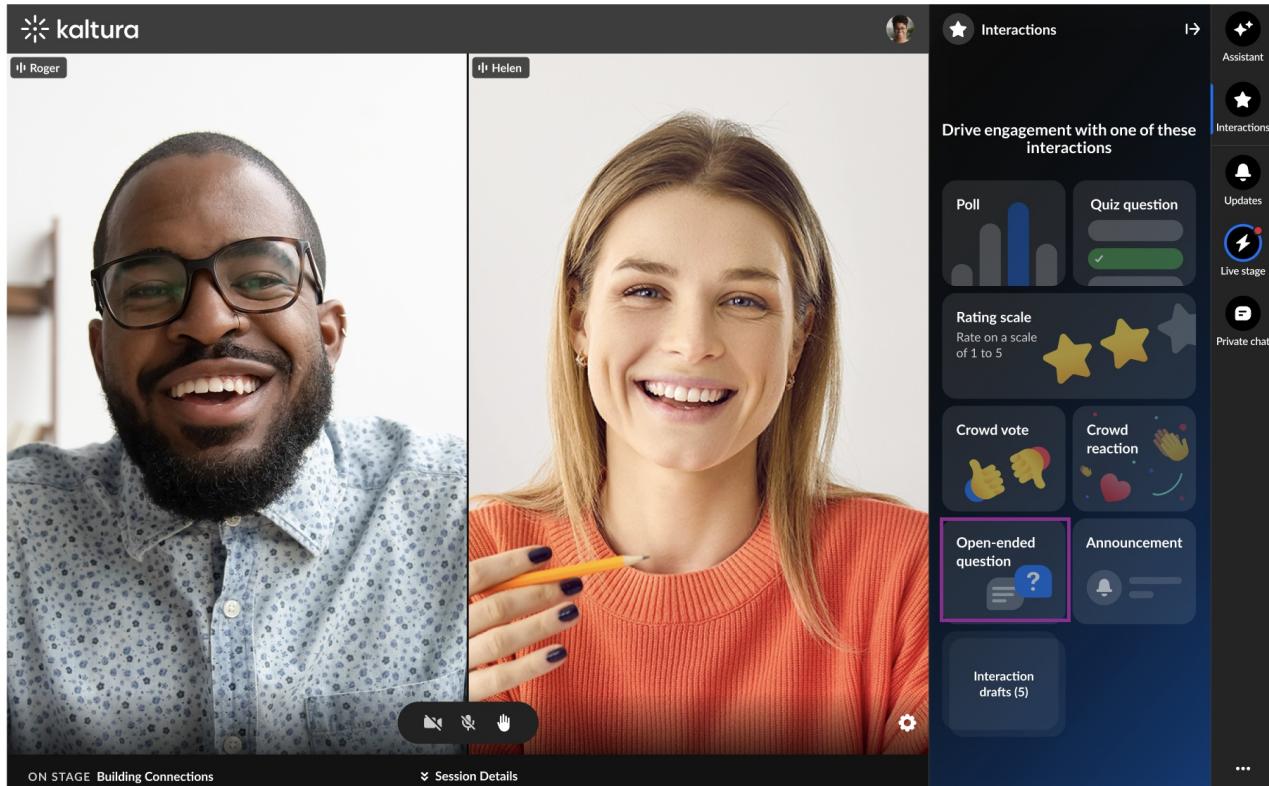

For more details, check out our [Knowledge Center article](#).

Open-ended questions - This highly anticipated feature empowers moderators to create open-ended questions, allowing attendees to submit their responses in free text. This provides a powerful way to gather insightful and valuable feedback directly from the audience.

- Enhanced engagement: Encourage deeper interaction from participants by allowing them to express their thoughts and opinions in their own words.
- Rich insights: Collect nuanced and qualitative data, enabling moderators to gain valuable insights beyond standard multiple-choice polls.
- Customization and Flexibility: Moderators can tailor questions to fit specific needs,

fostering a more personalized and relevant experience for attendees.

- **Real-time Feedback:** Receive immediate feedback from participants, allowing for dynamic and responsive discussions during live sessions.

Responses will be displayed immediately in the Feed tab, and all submissions will be

saved in the Polls Report for easy access and review.

The screenshot shows a live video feed with two participants: Roger and Helen. The interface includes a sidebar with 'Live Stage' and 'Updates' buttons, and a poll section titled 'Open question' with the question 'What strategies have you found most effective for engaging your audience during webinars?'. The poll is marked as 'IN PROGRESS'. A response from Nova Jones is shown: 'Incorporating interactive content, visual aids, personalized touches, storytelling, expert speakers, engaging openings and closings, and follow-up engagement are the most effective strategies for keeping an audience engaged during webinars.' A 'See all 5 answers' button is visible. The poll section also lists 'Learning', 'Networking', 'Fun', and 'Other' as options. The bottom of the screen shows 'ON STAGE Building Connections' and 'Session Details' buttons.

The screenshot shows the same live video feed with Roger and Helen. The poll section now displays multiple responses. The first response is from Nova Jones: 'Incorporating interactive content, visual aids, personalized touches, storytelling, expert speakers, engaging openings and closings, and follow-up engagement are the most effective strategies for keeping an audience engaged during webinars.' The second response is from Ella Gartner: 'Use interactive content, visuals, storytelling, and expert speakers to keep your webinar audience engaged.' The third response is from Emma Scott: 'To keep your audience engaged during webinars, incorporate interactive content, visual aids, storytelling, expert speakers, and follow-up engagement.' The fourth response is from Celine Garner: 'The best strategies for webinar engagement include interactive content, personalized touches, expert speakers, storytelling, visual aids, and engaging openings and closings.' The fifth response is from Lily Douglas: 'Keeping an audience engaged during webinars involves a combination of interactive content, compelling visual aids, storytelling, expert speakers, personalized touches, and strong openings and closings, followed by ongoing engagement after the event.' The bottom of the screen shows 'ON STAGE Building Connections' and 'Session Details' buttons.

Schedule email notification  10 Minutes Before the event

Email will be sent on 09/23/24 9:50 AM America/New_York

[Cancel](#) [Schedule](#)

Hi {FIRSTNAME} {LASTNAME},

[EVENTNAME] has officially started, and we know you're just as excited as we are. To join [EVENTNAME] simply click on the link below and log in: [EVENTBASEURL]

The benefits of scheduled email templates are numerous -

Save time: Automate repetitive email tasks and focus on other aspects of your event.

Ensure timely delivery: Never miss a beat with automatically sent emails at the right time.

Enhance attendee experience: Provide a personalized and timely communication experience.

For more details, check out our [Knowledge Center article](#).

UX/UI enhancements to Kaltura Events - In order to streamline event management and provide a more intuitive interface, Kaltura is excited to announce the following UX/UI enhancements:

- **Consistent terminology** - We've replaced "Event manager" with "Organizer" throughout the platform for better clarity and to support additional use cases.
- **Unified event list** - We've consolidated the event list into a single view, eliminating the need for separate "upcoming" and "past" tabs. Event Organizers can use (previously released) event labels to easily filter their ever-growing event list.
- **Improved date and time selectors** - We've introduced new and improved date and time selectors for easier event scheduling.
- **Button refinements** - "Create event" is now "Create" and "Events Showcase" is now "Showcase".

The screenshot shows the Kaltura Events interface. On the left is a sidebar with navigation links: Home, Team, Analytics, and Integrations. The main area has a greeting "Good morning, Patrick" with a sun icon. Below it is a "Recently viewed" section with five event cards: "Kaltura Academy" (Viewed 40 minutes ago), "SKO 2023" (Viewed 1 day ago), "Virtual Summit 2023" (Viewed 2 days ago), "Training day" (Viewed 3 days ago), and "Product palooza" (Viewed 3 days ago). Below this is a "All Events & Webinars" section. It features a search bar, a dropdown for "All labels", and a button for "Showcase". The table lists four events:

Date	Name	Labels	Showcase	Type	Registration
07/24/24 - 07/24/24 In 16 hours	From Concept to Launch	Product +2	✓ Added	Webinar	● Open 172 Registrants
07/24/24 - 07/24/24 In 16 hours	How to Drive Conversions		✓ Added	Interactive session	● Open 172 Registrants
07/24/24 - 07/24/24 In 16 hours	Tips and Techniques for	Marketing	✓ Added	Interactive session	● Open 172 Registrants
10/24/23 - 11/30/23 Ended 8 months ago	Marketing Kick-off	Marketing	✓ Added	Interactive session	● Closed 172 Registrants

For more details, check out our [Knowledge Center article](#).

Upcoming

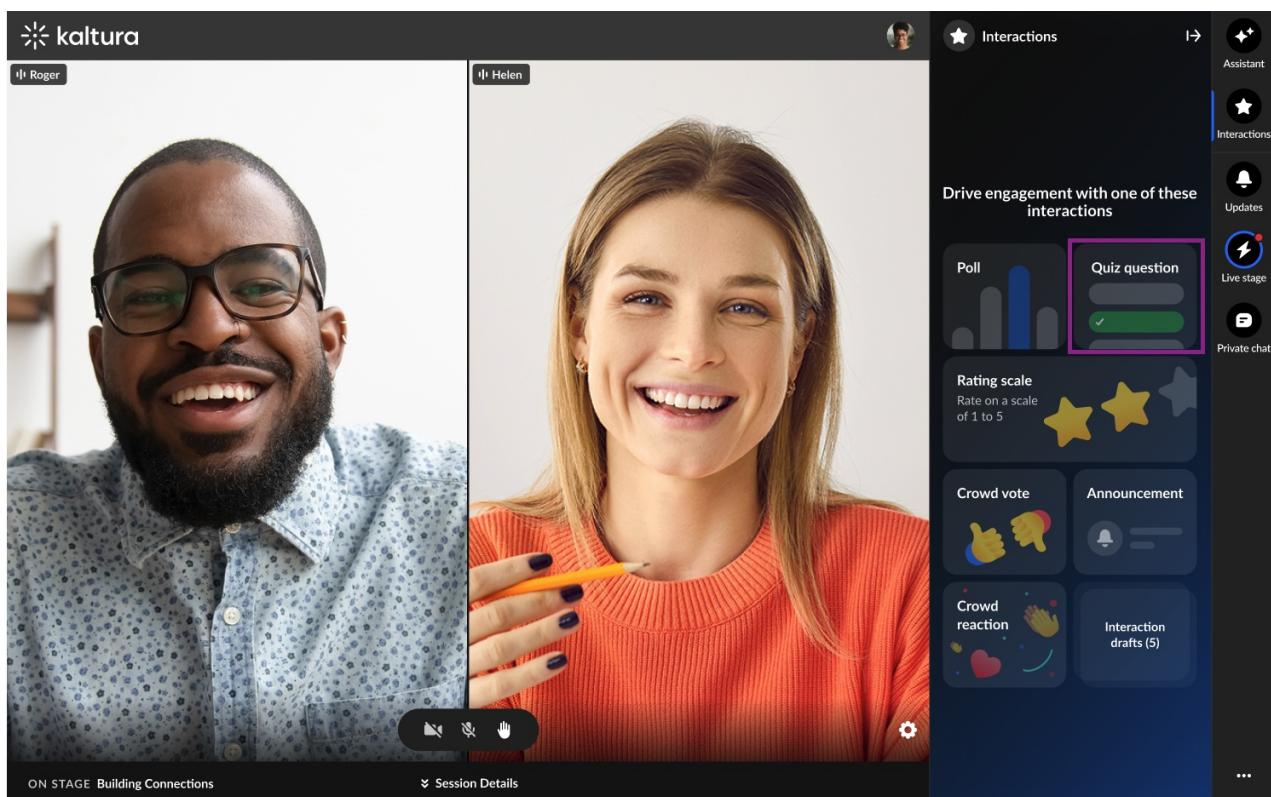

- Stay tuned for updates to system email templates button and footer.
- Also coming soon - updates to preset event templates.

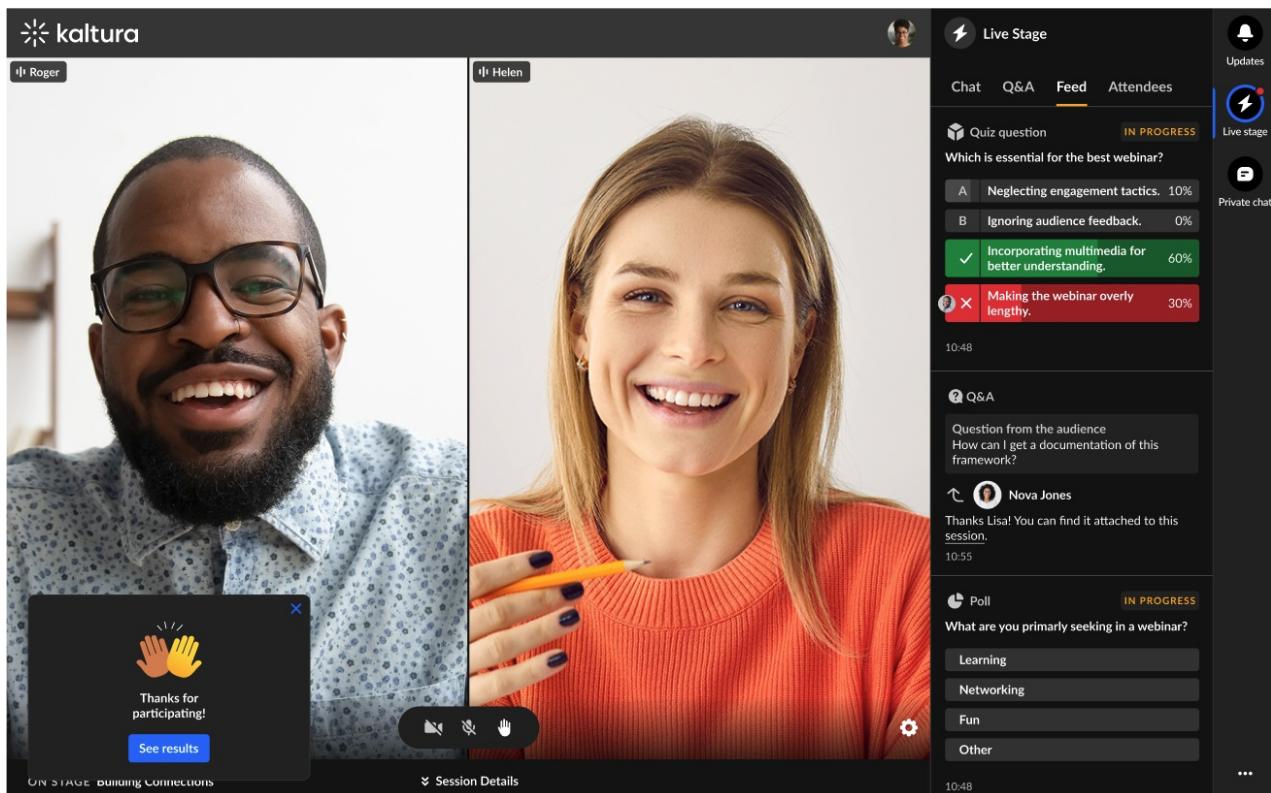

Kaltura Events - August 2024

Date Released: August 2024

What's New

New Quiz question interaction - We are excited to introduce Quiz question, a new interaction added to the 'Interactions tab of the Chat and Collaborate widget. This feature allows moderators to send a multiple-choice question with one correct answer. Attendee responses are included in all of the existing poll reports and data. Use quiz questions to boost the interactivity and educational value of sessions, making it easier for moderators to assess participants' understanding in real-time. The new quiz question also provides admin with valuable insights from participants.

For more details, check out our [Knowledge Center article](#).

Upcoming

- Stay tuned for the upcoming Chat and Collaborate Open-ended question feature which aims to gather qualitative feedback by allowing participants to respond in their own words and foster deeper discussions during our events.
- Also look out for Chat and Collaborate Accessibility as part of our cross-product accessibility efforts.

Resolved Issues

Support ticket ID #	Description
SUP-44326	Fixed an issue where user was unable to change the Chat and Collaborate capabilities from announcement.

Kaltura Events - July 2024

Date Released: July 2024

What's New

Event dashboard -

Now Event managers can see a complete analytical overview of their event all on one page! Introducing the new event dashboard! The event dashboard combines metrics on registration, viewership, chat and collaboration, top pages, and more - all from which Event managers can draw actionable insights and conclusions. See [Analytics tab - Analytics summary](#) for complete information.

3,784 Attended
20% Post attendance

32:44 Avg. minutes viewed per viewer

86% Of attendees sent 1,402 reactions

48% Of attendees sent 2,554 messages on live stage

Attendee interactivity

- 78% Participated in polls
- 16% Created 155 Q&A threads
- 7% Downloaded attachments 417 times
- 2% Engaged in 1:1 chat

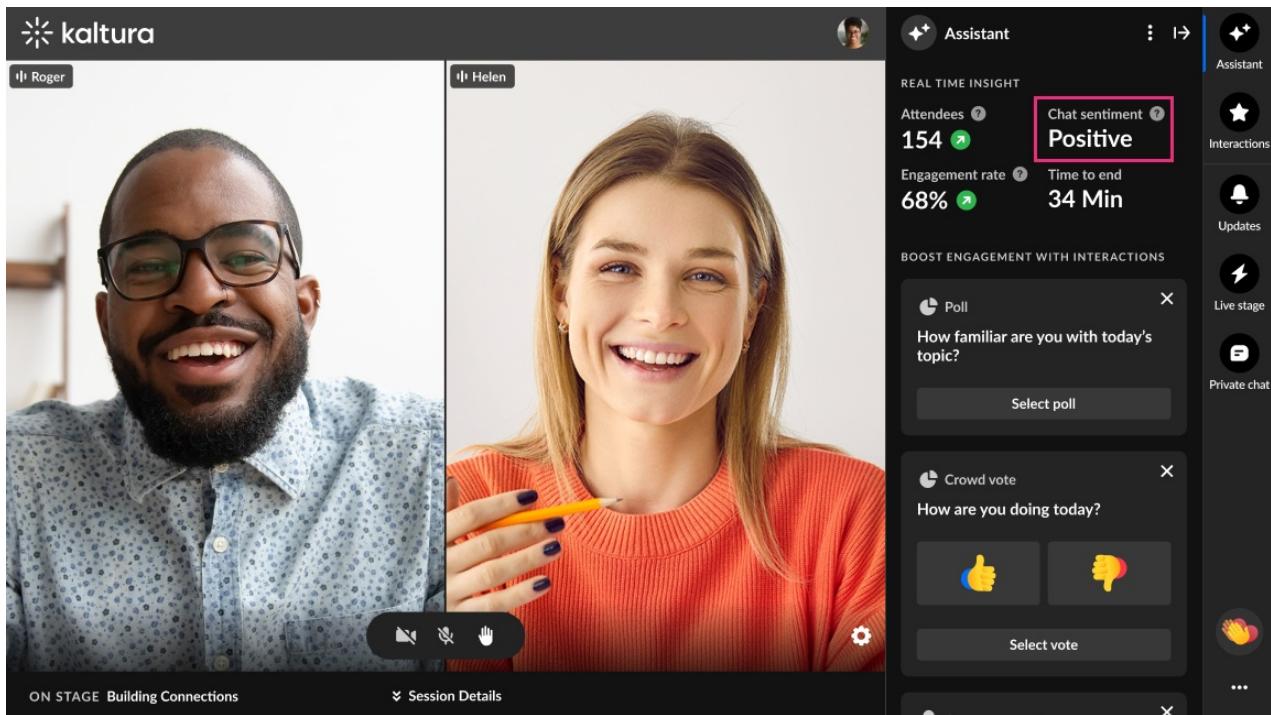

Top moment

During this moment in Opening Keynote, the event reached its 4,554 peak viewers

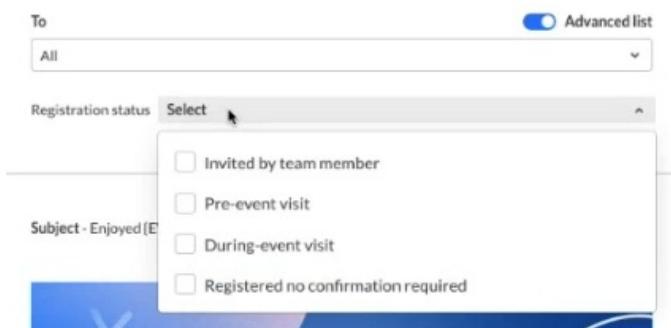

Chat sentiment analysis -

More real time insight on your session is now available in the Assistant tab of the Chat and Collaborate widget. Kaltura now helps you determine the sentiment of your attendees during a session. Sentiment values presented to the moderator are Positive, Neutral, Negative, or Quiet (no new messages in the chat for at least 5 minutes) according to data that is carefully extrapolated and calculated based on the text messages sent on the chat. For more information on this feature, see [Chat and Collaborate widget](#).

Email notifications based on registration status -

When sending custom emails via the Interactions tab > Emails page of Kaltura Events, you now have the option of choosing from a more advanced list of users, thereby precisely focusing in on your target audience. In other words, sending relevant content to your relevant audience based on their registration status. The statuses listed reflect the granularity seen upon hovering over the registration status of a user in the All users page. For more information on this feature, see [Interactions tab - Emails](#).

AI based notification suggestions -

Got writer's block? You may now create custom email templates using AI! Simply click the **Create with AI** button, decide what kind of template you would like to create, optionally provide additional context, and click **Generate**. The AI template uses all the event details (i.e., speakers, sessions, etc.) to create a custom email template just for you! See [Interactions tab - Emails](#) for complete information.

Create with AI Beta

What kind of template would you create?

What would you like to say? (optional)

The AI template uses all event details like speakers and sessions

Automated system email notifications to Event managers and Content managers added to events -

Event managers and Content managers assigned to events will now automatically receive an email notification from Kaltura. This email will include:

- **Event Name:** Quickly identify the specific event to which you've been assigned.
- **Assigned By:** See who added you as an Event/Content manager.
- **Your Role:** Understand your specific permissions and responsibilities for the event.
- **Event Link:** Easily access the relevant event for further details and action.

This notification improves communication and ensures Event/Content managers are promptly informed of their assignments.

Welcome to Driving Sustainability in Enterprise: Strategies for a Greener Future!

Hi Sam

You've been added by Joe Reed to a new event - Driving Sustainability in Enterprise: Strategies for a Greener Future.

Assigned as: Event Manager

Everything is ready for you! To get started, click the button below.

Get started

For more information on this feature, please see [People tab > Event team - Add team members to your event](#).

Kaltura Events - June 2024

Date Released: June 2024

What's New

Remove users -

You may now remove users (attendees, speakers, and moderators) from an event by simply clicking "Remove" on the user action menu. A user who has been removed from an event will no longer have access to that event.

See the following articles for complete information:

[People tab > All users - Invite attendees to your event](#)

[People tab > Speakers - Invite speakers to your event](#)

[People tab > Moderators - Invite moderators to your event](#)

Duplicate event with users -

In April, Kaltura released the "copy event" feature allowing you to copy an existing event and save the time of configuring and setting up a new event from scratch.

We are happy to announce that you may now choose to copy over certain types of users, including speakers, moderators, and members of the event team. You may even choose to send an email invitation to them upon creation of your new event.

Here is a complete list of what's copied over when copying an event:

- Branding - Event banner image, logo image, and custom theme
- Emails - Both system emails and custom email templates
- Registration form
- Template/custom pages - Lobby page and any custom pages
- Notifications - Announcements and crowd reactions
- Chat Settings
- Event settings - Support email address and organizer name and image
- Users - Speakers, Moderators, and Event team (if selected).

See [Events tab](#) for complete information.

Richer live engagement analytics to include additional Chat and Collaborate data -

Live engagement analytics previously included rate of engagement during the session and percentage who sent live reactions during the session. Event managers now have access to more in-depth Chat and Collaborate analytics in the session dashboard including:

- Total number of reactions sent in the session
- Percentage who sent messages on the group chat and total number of group chat messages sent in the session
- Percentage who participated in polls
- Percentage who created Q&A threads and total number of Q&A threads opened in the session
- Percentage who downloaded attachments and total number of downloads of session attachments

See [Agenda tab - Session analytics](#) for complete information.

Consolidated session dashboard report -

With the click of one button on the session dashboard, you may now easily export one report that combines engagement data with user registration data (name, email, company). Simply click the **Export** button and Kaltura Events will prepare the report and send it to your email address.

See [Agenda tab - Session analytics](#) for complete information.

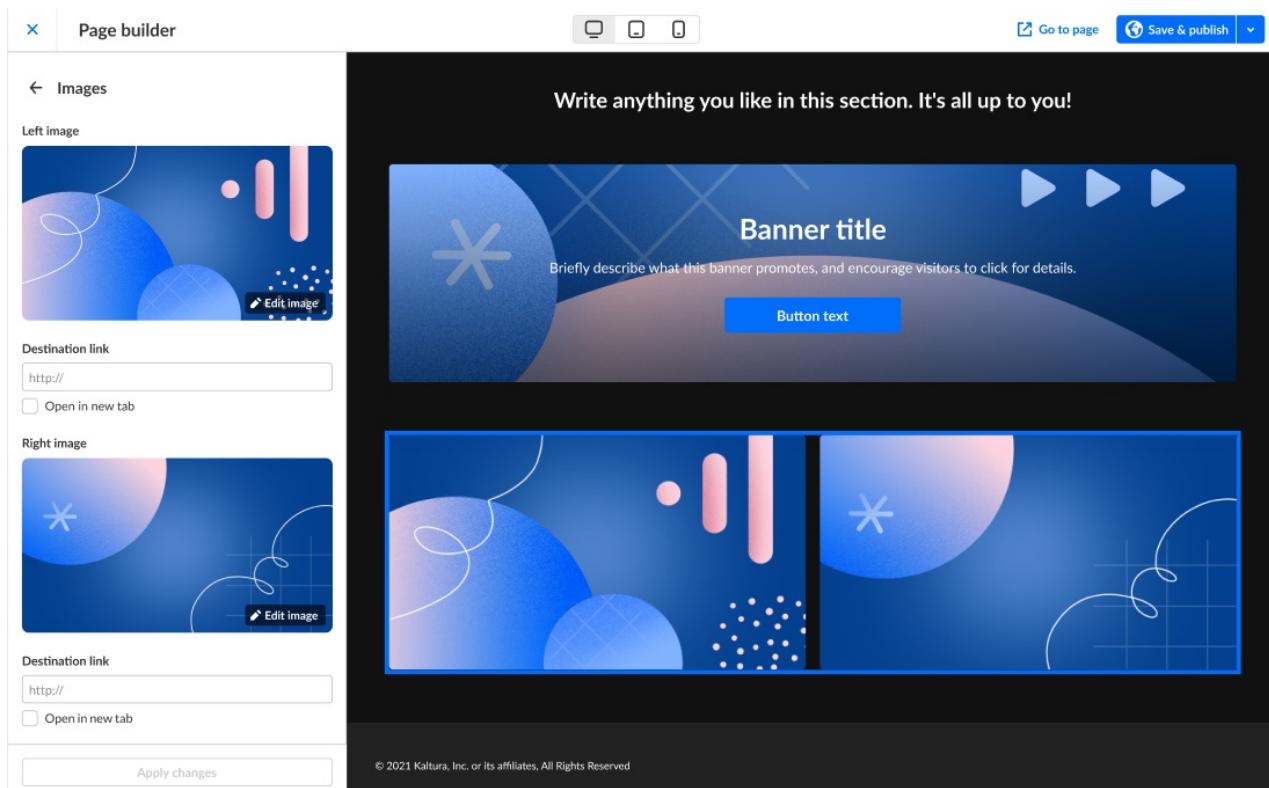

Kaltura Events - May 2024

Date Released: May 2024

What's New

"Images" component on the Event site editor -

Kaltura now offers a new component, "Images", on the Event site editor that allows you to even further customize custom pages for your event! You may now add two clickable images that are side-by-side, one on the left and one on the right. You may add destination links to these images so that when your users click on them, they are redirected to a given web page, either inside the event site or out of it.

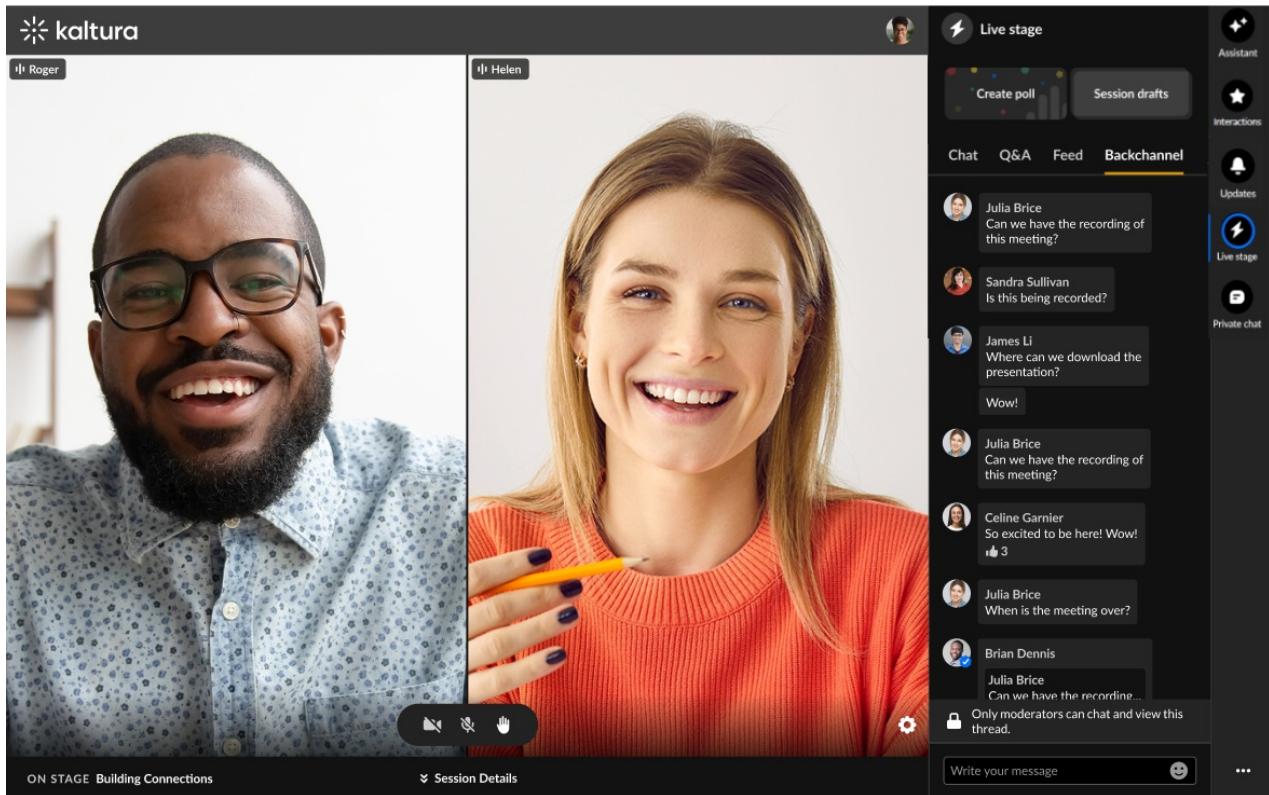

See [Event site editor tab - Create custom event pages](#) for complete information.

Moderator Back Channel -

Kaltura's Chat and Collaborate widget now includes a moderator back channel, a space where moderators can chat privately with other moderators.

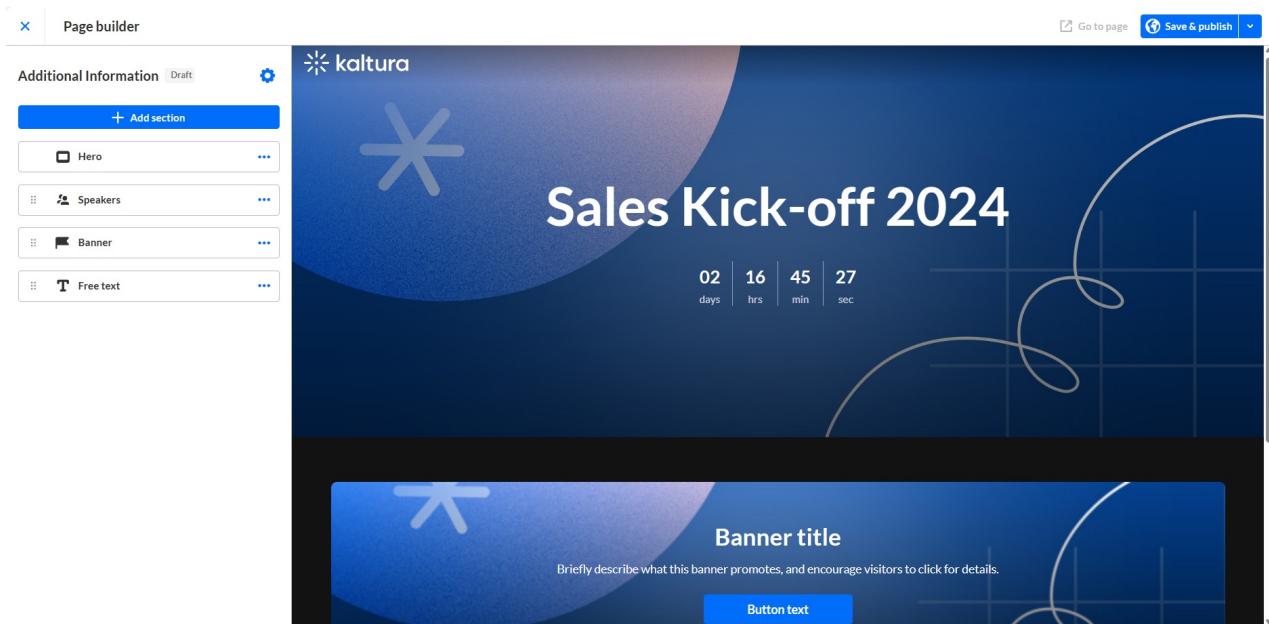

To ensure a smooth transition to the new C&C backchannel, we are enabling both chats (room and C&C) in parallel until the end of next week. Then, we will disable the built-in room chat capability from the templates that include it: Interactive Session, DIY Session, and some custom templates. **Note** that the new backchannel will also appear in existing events, not just newly created ones.

See [Chat and Collaborate widget](#) for complete information.

Custom pages for Kaltura Events -

You can now build custom pages to better customize and control the structure of your event! Use this powerful design tool to create as many different pages as you want, styled with unique components, creating different experiences based on your audience. You can even choose to make these pages public, or only available to a select group of authenticated users.

See [Event site editor tab - Create custom event pages](#) for complete information.

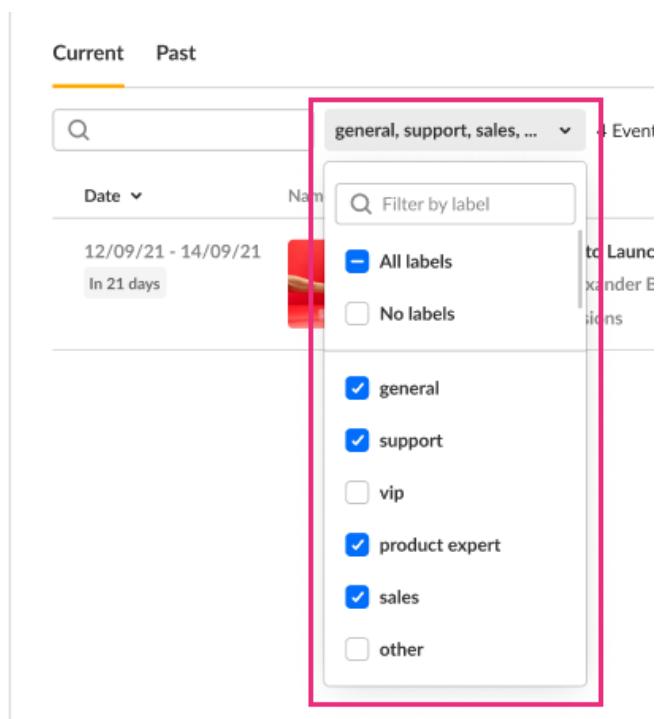

Kaltura Events - April 2024

Date Released: April 2024

What's New

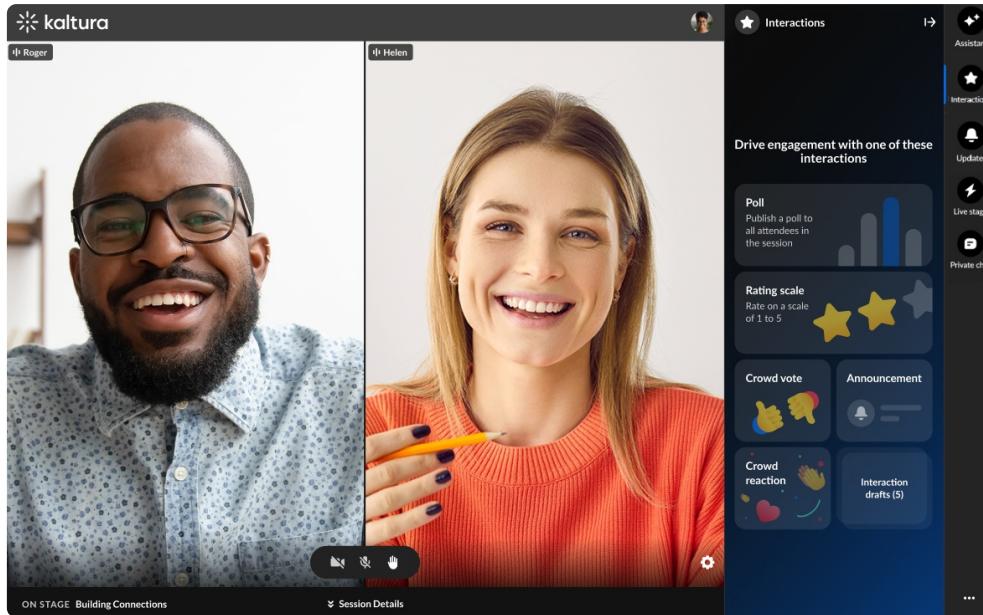

Event list filtering -

You may now add labels to your event and filter the event list by labels in Kaltura Events. Labels are used to better manage events in scale. For example, an Event Manager may label the event as having to do with a specific topic or related to a specific group (i.e., Marketing). See [Kaltura Events - Edit the Event Details](#) for information on adding labels to your event. See [Events tab](#) for information on filtering the event list by labels.

In-session notifications and crowd reactions -

In addition to being able to initiate announcements and crowd reactions from inside Events, Kaltura now allows event moderators to create and publish announcements (including titles) and crowd reactions right from the Chat and collaborate widget! This is quick and efficient way for moderators to interact with their audience in real-time while the session is happening, thus increasing overall engagement.

See [Chat and collaborate widget](#) for more details.

Copy event -

You may now choose to copy an existing event and save the time of configuring and setting up a new event from scratch.

Copying an event copies over the following data:

- Branding - Event banner image, logo image, and custom theme
- Emails - Both system emails and custom email templates
- Registration form
- Template/custom pages - Lobby page and any custom pages
- Notifications and crowd reactions
- Chat Settings
- Event settings - Support email address and organizer name and image

Please note: Sessions, registrants, and media *are not* copied.

Copy event

Easily create & schedule new events similar to past ones. The sessions, registrants, and media will not be copied.

Title 29/120

Short description

B i U :≡ A ↗ ↘

With the rise of virtual events, the divide between business get-togethers and other marketing channels has become blurrier than ever, and a new digital marketing funnel has emerged. But all that couldn't have happened without the creativity and smarts of all

Start time End time

mm/dd/yyyy → hh:mm AM/PM → mm/dd/yyyy hh:mm AM/PM

See [Events tab](#) for complete information.

Roles and Permissions -

Kaltura is excited to introduce a new user role in Events - the Content Manager. The Content Manager manages content of specific events. The Content manager is responsible for curating, organizing, and managing the content that will be presented during the event. Content managers **cannot** create events and do **not** have access to the full user list, analytics, and reports. See [Event user roles](#) for more details.

Kaltura Events - March 2024

Date Released: March 2024

What's New

Lead scoring report -

Kaltura now offers Lead scoring reports for Events. Lead scoring reports rank leads based on user profile and engagement level scores. You may choose from two types of Lead scoring reports - Lead Scoring Summary Report or Lead Scoring Detailed Report. See [Analytics tab - Reports](#) and [Lead Scoring Report](#) for more details.

Multi-thread in Q&A chat with a moderator -

During a session, attendees use the Q&A tab of the Chat and Collaborate widget to pose questions to the moderator. Now, with Kaltura's new multi-thread capability, each

question that an attendee asks is given its own separate thread, meaning attendees may have several chats/threads open with a moderator at the same time. This allows for organization of questions based on context. See [Chat and Collaborate widget](#) for complete information.

Attachment management -

You may now manage documents, spreadsheets, presentations, audio/video files, and images for your event sessions and attach downloadable content to your media, like videos, images, or documents. Read all about attaching media to sessions in any of the Knowledge Center articles about adding and editing sessions, such as [Agenda tab - Add and edit Interactive Room session](#). For information about attachments on media, see [Media tab - Manage media for your event](#).

Theme editor with fonts -

Kaltura now offers additional branding capabilities via the [Branding tab](#). If your account is configured with custom templates, you may now choose from a preset list of fonts or attach an external stylesheet URL containing your embedded fonts to be used on your event site.

Increased character limit on event and session titles -

We've doubled the character limit on Event and Session titles from 60 to 120 characters, leaving you more room for descriptive titles. See [Kaltura Events Home page - Create an event](#) and all the Knowledge Center articles on adding and editing event sessions, such as [Agenda tab - Add and edit Interactive Room session](#).

Kaltura Events - February 2024

Date Released: February 2024

What's New

Manage access for "closed" Single Sign on (SSO) events -

Kaltura enables hosting of "closed" SSO events, attendees of which are based on existing groups in an Identity provider (IdP). Users who are members of those IdP groups are automatically synced to Kaltura and can log into the said "closed" event.

Event Admin and Event Managers who are authorized to manage the said "closed" event can further manage access to the event via the Event Access tab in the [All users page](#), i.e., granting event access to certain groups, while removing event access from others, and enabling/disabling the option to invite or publish registration for additional users outside of the synced IdP groups.

Closed events are created via a [custom event template](#).

Kaltura Events - January 2024

Date Released: January 2024

What's New

Customize your Lobby page - The Lobby (coming soon) page acts as a "waiting room" or a landing page until the event site is open. You may now customize the look of your Lobby page. Quickly and easily change the banner image, customize the "hero" banner, add new and duplicate existing sections, re-order sections, and so much more! See [Customize your lobby page](#).

Download captions - In addition to editing the caption files, you may now download the captions file from Pre-recorded sessions directly to your local machine. See [Agenda tab - Add and edit Pre-recorded session](#).

Stage Monitor - Event speakers/presenters can now see questions from the audience in real time via the Stage Monitor. Event moderators can use the new Stage Monitor tab in the Moderator app to change the order of Q&As presented to the speaker, edit Q&As, and remove Q&As from the Stage Monitor console window. The Stage Monitor tab also provides direct access to the Stage Monitor console window and a way to copy the link to the Stage Monitor console window to share it with the speaker. See [Moderator App](#).

Conversation ID/Thread ID - As part of our expansion of moderation management capabilities, moderators can now use a unique conversation ID/thread ID as a thread a thread indicator visible in both in the Chat and Collaboration widget in-session moderation and the Moderator App. The conversation/thread ID is particularly useful for moderators' internal communication when there are several attendees with the same name. See [Moderator App](#).

Assistant - Moderators now enjoy a new "Assistant" in the Chat and Collaborate widget, The Assistant offers moderators peace of mind via several functionalities that empower them to more easily moderate and do more with their time during a session.

Kaltura pulls data points right into the session, including attendee numbers, turnout rate (percentage of those registered who are actually logged into the session), engagement rate (viewers who watch in full screen or with the focus on the tab and sound on), and time to end. These real time, crucial metrics keep moderators minded of how their session is performing.

In addition, Kaltura provides "signals" to moderators based on metric trends. Moderators are, thus, empowered to choose appropriate engagement methods based on what's going on in their session. For example, if engagement rates are trending up

(indicated by a green up arrow next to Engagement rate), it may be a great time to send out a poll. Better still, Kaltura provides shortcuts to drive these actions (creating and publishing polls, crowd votes, and chat messages to the group) right inside the Assistant, keeping everything at the moderator's fingertips. See [Events - Chat and Collaborate widget](#) and [Webinars - Chat and Collaborate widget](#).

Set sender name for email notifications - Event managers can now set a sender name for email notifications created from custom templates. In addition to "no-reply@kaltura.events", recipients will now see the *name* you set in the "From" field. This gives a more personalized feel to your email notifications. See [Interactions tab - Emails](#).

Recently viewed events - The Events page now provides Event managers easy access to events they've recently viewed. Clicking on any of these recently viewed events opens them for editing. Instead of searching through the list of events, Event managers can use this new feature to quickly revisit events they are managing. See [Kaltura Events Account Home page - Manage your events plan](#).

Easier assignment of events to Event managers upon role change - When changing a user's role from Admin to Event manager on the Teams tab, you may now quickly identify and assign events to that Event manager without ever leaving the window, similar to the flow when you add a new Event manager. See [Kaltura Events Account Home page - Manage your events plan](#).

Better control over profile pages on the event site - "Bio" information entered when adding speakers, moderators, and event team members displays on profiles pages of the event site. Instead of a simple plain text field, you are now able to better design the look and feel of this information through rich text and you may even add hyperlinks to important related information. See an example on [People tab > Speakers - Invite speakers to your event](#).

Improved flow to manage captions for your Live and DIY live webcast sessions - Edit session pages for Live and DIY live webcasts are improved to allow both the ordering of live captions for a session (before the session begins) and the ordering and upload of captions for a session recording after the session is over (if a recording is present for the session). See [Agenda tab - Add and edit Live Webcast session](#) and [Agenda tab - Add and edit DIY live webcast session](#).

Kaltura Events December 2023

Date Released: December 2023

What's New

Roles & permissions - Kaltura Events now has a new user type – Event Manager.

In addition to the existing Admin user, the Event Manager user type is specifically designed to cater to the needs of individuals responsible for planning, organizing, and overseeing events within the system. This new role can create and manage events but **cannot** access account level settings or analytics or edit other events without being specifically assigned to them.

- **Admin** is the platform admin; the one who has access to all configurations and events created for this account, adds/removes team members, and manages their user type.
- **Event manager** manages specific event(s). The Event manager can view all events but has full access only to events they manage and within them can manage and configure all the different capabilities, settings, content, and people including adding co-event managers to their event team. For more information about event roles, see [Event user roles](#).

This addition allows for more team members to manage events at scale and edit and make changes only to the events to which they have access.

For more information about this new feature, please see [Kaltura Events Account Home page - Manage your events plan](#) and [People tab > Event team - Add team members to your event](#).

Registration Analytics dashboard updates - Kaltura is now providing more meaningful insight into event registration! The Registration Analytics dashboard was recently revamped to include.

- A modification to the registration funnel which displays
 - The number of attendees registered for the event
 - The number of attendees confirmed via verification email (only shows for events with verification email enabled)
 - The number of attendees who attended the event (who logged into the event once at any period of time)
- A chart interface of registrants by origin – be it registration form, webhook, invitation from the admin, via SSO, or if they are admins of the event. Those of each origin who logged into the event (“Attended”) versus those of each origin who didn't log into the event (“No-show”) are differentiated by color.
- A modification to the way we display registrants over time. Now the percentage of registrants on each date out of the total number of registrants is displayed to help you understand the periods at which registration peaked.

For more information on Registration Analytics, see [Analytics tab > Registration analytics](#).

Registration Report updates - Kaltura updated the Registration Report to include data on custom registration form fields! The Registration Report was improved to include additional registration data pulled from custom fields in the registration form like phone number, interests, etc.

For more information on the Registration Report, see [Registration Report](#).

Simplification of registration statuses - Kaltura simplified the way you view registration statuses on the All users page! We are differentiating between two granularities of statuses - a simplified status that gives you a basic understanding of the registration status and a more detailed status that give you more information about the user's current status.

For more information on the All users page, see [All users - Invite attendees to your event](#).

Display of both simplified and detailed status in the People tab - Hovering over the registration status in the All users page reveals a higher granularity of status. For instance, hovering over a user with a registration status of "Attended" may reveal that they visited the site pre-event or during the event. Hovering over a user with a registration status of "Registered" may reveal that they were confirmed via verification email, or they registered but there was no confirmation required. See the following table detailing two levels of status.

Registration Status	Detailed Status
Registered	Registered
Invited	Invited by team member
Invited	Invited by team member to register
Registered	Confirmed email
Registered	Registered no confirmation required
Attended	Pre-event visit
Attended	During-event visit
SSO login	SSO login
Unregistered	Unregistered
Blocked	Blocked

For more information on the People tab, see [All users - Invite attendees to your event](#), [Speakers - Invite speakers to your event](#), and [Moderators - Invite moderators to your event](#).

Kaltura Events November 2023

Date Released: November 2023

What's New

- **UTMs on Registration Report** - As an Event manager, is it critical to discern which marketing campaigns are driving (or drove) the most traffic to your webinar. This knowledge is key to better allocating budgets for current and future campaigns.

Kaltura tracks the source of your registrants through the use of UTM (Urchin Tracking Module) parameters that are embedded as hidden fields in the registration form. UTM parameters consist of the following.

Traffic source (utm_source) - Are your registrants coming from Facebook, LinkedIn, Google, etc.?

Medium (utm_medium) - Are your registrants coming as a result of an email, social media, a referral, etc.?

Campaign name (utm_campaign) - What campaign drove your registrants here? You can base this on your own campaign naming conventions.

This resulting data is displayed as part of the [Registration Report](#).

Kaltura Events October 2023

Date Released: October 2023

What's New

- **Connected use cases; publishing to the video portal** - Event Managers may now publish event content (sessions and media) to video portal(s).
 - Publish sessions from the Agenda page (see [Session publishing capabilities](#)) -

- **Live/DIY recording management** - Live and DIY sessions include automated transition from live to VOD (meaning, once the live session is finished, the recording is automatically published to the event site). Event managers may now remove a VOD after the session and replace it with any video. (See [Agenda tab - Add and edit Live webcast session](#) and [Agenda tab - Add and edit DIY live webcast session](#).)

Session recording

The last recording is published automatically to the session page, but you can remove or replace it with any video.

- **Magic link token on custom/reminder emails** - We now support the magic link token on custom email templates (recommended as the button URL). You can now send a reminder for the event and include a magic link token (for supported events, using login link) so that your attendees can directly login and get a seamless experience. (See [Interactions tab - Emails](#).)

- **Event Side panel updates; People tab** - All user related pages (for users, speakers, and moderators) are now located under a new People tab.

Overview

- UTM Report** - As an Event Manager, is it critical to discern which marketing campaigns are driving (or drove) the most traffic to your event. This knowledge is key to better allocating budgets for current and future campaigns. Kaltura now tracks the source of your registrants through the use of UTM (Urchin Tracking Module) parameters that are embedded as hidden fields in the registration form. This resulting data is displayed as part of the Registration Report. (See [Registration Report](#).)
- Thread labeling (Oct 29th)** - Event moderators can now manage big events with efficiency by adding tags to threads, filtering them, and monitoring the Q&A tab with ease. Just login to the moderator app, open a question and add your labels (for more information, see [Moderator app](#)).

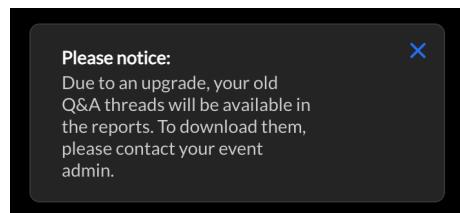

As a part of this update, old Q&A threads in old sessions (from before Oct 29th, 2023) will be available only in the reports. (see [Analytics tab - Reports](#)).

When entering an old session with old Q&A threads, the moderator will be prompted

with the following message:

Kaltura Events September 2023

Date Released: September 2023

What's New

- **Preset template updates** - We've updated our preset event templates to include:
 - New design of the session page
 - Embedded C&C
 - Hidden reCapcha

[Let's talk](#)

- **Brand editor** - Enabled accounts can now use the theme/branding editor per event and create a custom branded experience. This editor brings simplicity and better self-operated capabilities to theming settings, empowering event managers to create a comprehensive experience with their brand front and center. With just a click of a button, event managers now have access to three simplified color options for theming: Neutral, Monochromatic, and Custom. We have also added a dynamic preview feature, providing you with a real-time understanding of your theme's look and feel. [Learn more about branding options](#).

- **Captions editor** - We've previously added the option to upload/order captions for session and media, but now you can also edit them within Kaltura Events. Simply click edit on the uploaded captions and edit your captions. [Learn more about Captions Editor](#).

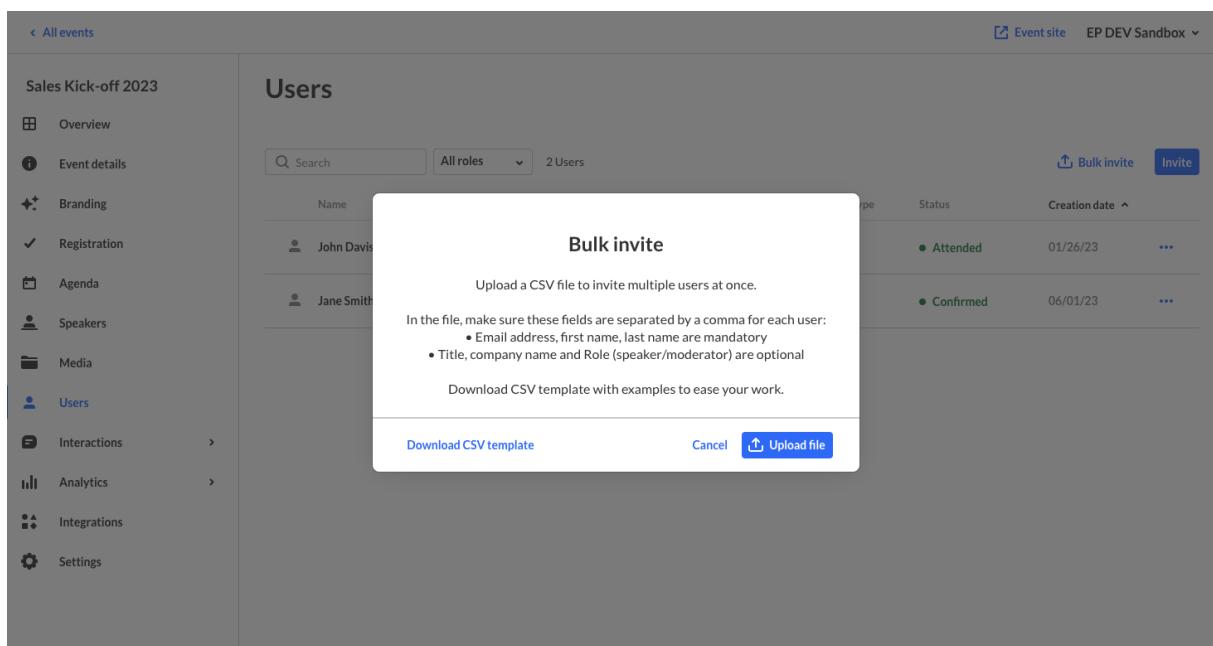

- **Skip email on invite** - You can now add and edit your speakers without sending them an invite email. If needed you can use the resend email option once you are ready to send them. Learn more about skipping the email invite for [attendees](#) and

speakers.

The screenshot shows the Kaltura event management interface. On the left, a sidebar lists various event management sections: Overview, Event details, Branding, Registration, Agenda, Speakers, Media, Users, Interactions, Analytics, Integrations, and Settings. The 'Speakers' section is currently selected. The main content area is titled 'Users' and shows a list of two users: John Davis (jennifer.harris+epdev@kaltura.com) and Jane Smith (jenniferharris01@yahoo.com). A search bar and a dropdown for 'All roles' are at the top of the user list. To the right, a modal dialog box titled 'Invite' is open. It contains a note: 'This invitation will be sent as an email to complete the registration.' Below this are fields for 'Email (required)' (containing 'ella.bloch@kaltura.com'), 'First name (required)' (containing 'Ella'), and 'Last name (required)' (containing 'Bloch'). There is also a section for 'Additional roles' with checkboxes for 'Moderator' and 'Speaker'. At the bottom of the dialog are buttons for 'Invite without an email', 'Cancel', and a blue 'Invite' button.

- **Assign role with bulk invite** - You can now bulk invite to your event and also assign them a moderator/speaker role so that if for example you have a regular group of speakers/moderators you can have a ready-made csv file you can re-upload on new events to save you time. [Learn more about bulk invite.](#)

The screenshot shows the Kaltura event management interface. The sidebar and user list are identical to the previous screenshot. A modal dialog box titled 'Bulk invite' is open in the center. It contains instructions: 'Upload a CSV file to invite multiple users at once.' Below this, it says: 'In the file, make sure these fields are separated by a comma for each user: • Email address, first name, last name are mandatory • Title, company name and Role (speaker/moderator) are optional'. It also provides a link to 'Download CSV template with examples to ease your work.' At the bottom of the dialog are buttons for 'Download CSV template', 'Cancel', and a blue 'Upload file' button.

- **Support magic link email token on custom/reminder emails** - We've added the

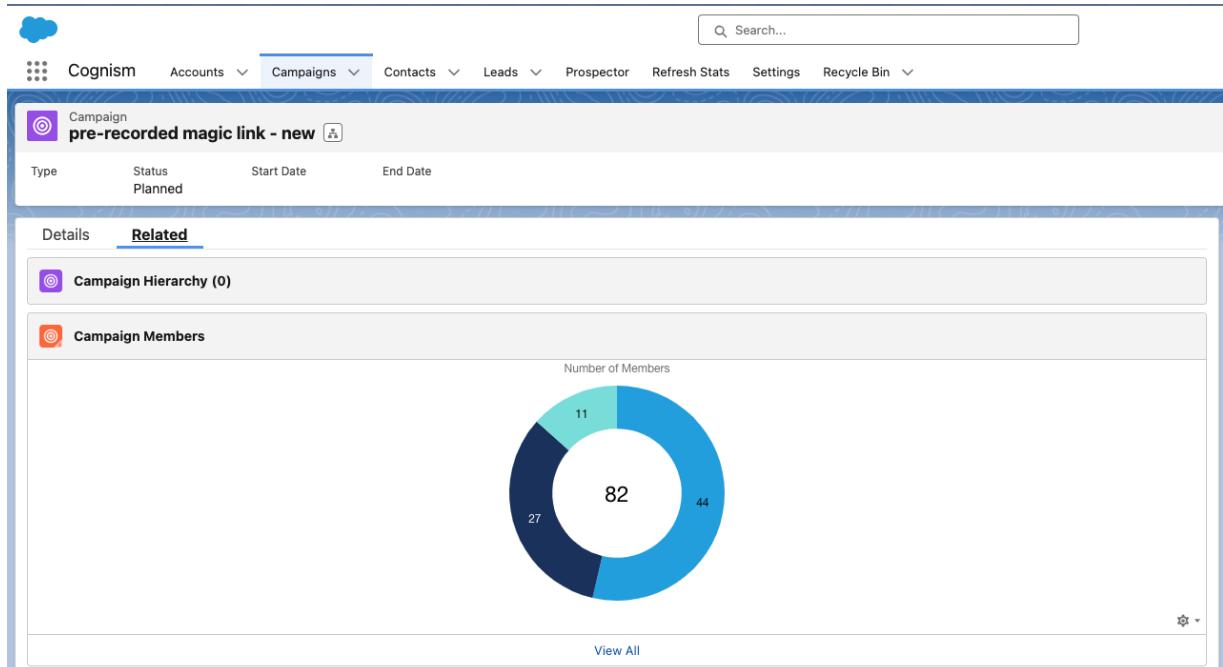

option to use Magic Link on custom email templates, so that you can now send a reminder to the event and include a login link so that your attendees could directly login and get a seamless experience. [Learn more about customization tokens](#).

The screenshot shows the Kaltura 'Edit template' interface. On the left, there are fields for 'Template name (required)' (15/44) and 'Send a reminder'. Below that is a 'Template description' field (90/1) with the placeholder 'Remind your registrants that the event is coming soon and invite them to explore...'. Under 'Email details', there is a note: 'Use customization tokens to easily add dynamic information to emails.' A 'Customization tokens' button is highlighted. The 'Subject (required)' field (40/1) contains '[FIRSTNAME], [EVENTNAME] is almost here!'. A 'Banner image' section shows a blue abstract graphic with a 'Edit image' button. A 'Title' field contains 'Hi [FIRSTNAME], [EVENTNAME] is coming soon!'. On the right, a modal window titled 'Customize email tokens' lists tokens like '[FIRSTNAME] Attendee first name', '[LASTNAME] Attendee last name', and '[MAGICLINK] Attendee login link'. The email preview on the right shows a blue background with abstract shapes and the text 'STNAME, [EVENTNAME] is soon!'.

- **Salesforce integration** - You can now select Salesforce from the integration types and push leads to Salesforce as campaign members, update on their attendance status, and sync engagement data. [Learn more about Salesforce integration](#).

The screenshot shows the Kaltura 'My integrations' interface. On the left, there are navigation links for 'Events', 'Team', 'Analytics', and 'Integrations'. The 'Integrations' link is selected. The main area shows '5 Integrations' and a list of existing integrations: 'salesforce' (Type), 'hubspot' (Type), 'hubspot' (Type), and 'marketo' (Type). On the right, a 'New integration' dialog is open. It has a 'Select integration type' dropdown set to 'Salesforce', a 'Name of integration' field with placeholder 'Choose a descriptive name', and a 'Registration data pulled from' dropdown set to 'Select'. Under 'Events data', there are three checkboxes: 'Registrants information' (checked), 'Attendees data', and 'Attendees engagement and activity'. At the bottom of the dialog are 'Cancel' and 'Next' buttons.

The screenshot shows a Kaltura Cognism interface. At the top, there's a navigation bar with a cloud icon, 'Cognism', 'Accounts', 'Campaigns', 'Contacts', 'Leads', 'Prospector', 'Refresh Stats', 'Settings', and 'Recycle Bin'. A search bar is also at the top. Below the navigation, a campaign card is displayed with the title 'Campaign pre-recorded magic link - new'. The card shows 'Type: Planned', 'Status: Planned', and fields for 'Start Date' and 'End Date'. Below the card, there are two tabs: 'Details' and 'Related'. The 'Related' tab is selected, showing 'Campaign Hierarchy (0)' and 'Campaign Members'. A donut chart titled 'Number of Members' is shown with the following data: 82 (dark blue), 44 (light blue), and 11 (light green). A 'View All' link is at the bottom of the chart.

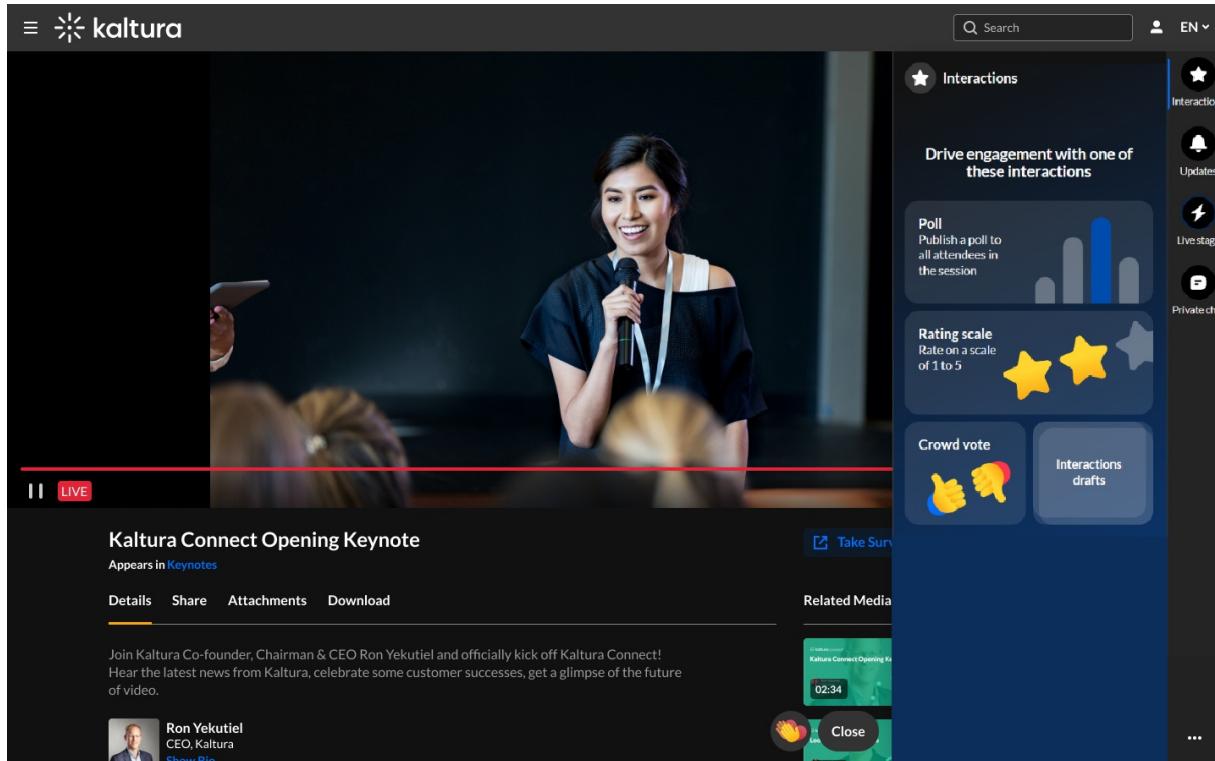

Kaltura Events August 2023

Date Released: August 2023

What's New

- **Interactions tab** - The Interactions tab is a central place where event moderators can elevate their sessions. Three interactions options are now available:
 - The existing polls.
 - Rating scale polls - The new rating scale polls empower moderators to create engaging polls that prompt attendees to rate their response using a selected emoji, based on a scale of 1 to 5. Use this poll to understand how your attendees are feeling and to increase their engagement in the session.
 - Crowd vote polls - The new crowd vote polls allow moderators to quickly publish a poll with a ready set of emojis as an answer. You can either write your question or ask it out loud when publishing the poll. Use this poll to gather opinions fast and gain instant insights.
- In addition, the existing poll report includes data on the new poll types, and we've added "Poll Type" and "Emoji Type" columns to the report for richer insights.

For additional information, please see [Chat and Collaborate Widget](#).

Kaltura Events July 2023

Date Released: July 2023

What's New

- Registration form customizations** - Event managers creating a new event can now modify their registration form and choose which data to collect on their attendees so they can leverage this data after the event. Registration form customization includes changing the field's display name, order, deciding which field should be mandatory per event, or removing/adding fields from a fixed field list, as well as updating 'section' names.

 Our preset event templates (on newly created events) now have additional fields available for event managers to add, such as city, zip code, bio, industry, and role. If you are using a custom event template, contact Kaltura to add fields to your form.

 For additional information, please see [Set Up Registration for Kaltura Events](#).

- **Scheduled session analytics (Live) -**

- Session engagement heatmap: In this dashboard, admins can see engagement of users who attended the session, specifically when they were engaged and for how long. This dashboard displays minutes viewed, reaction clicks, and hand raises for each attendee. All of these indicate the level of the attendee's engagement, which can help admins improve their content, and speakers' presentation and help them understand in real-time whether they need to catch the audience's focus with our engagement tools (e.g. send them a notification).

- **Recording analytics -**

- Recording performance over time: Event organizers can now differentiate between the real-time session's data and the recording's data and receive a

whole session story with a better understanding of their gated sessions' audience and relevance.

- **In-session polls -**

Now, moderators can effortlessly publish polls and save poll drafts without ever leaving the chat widget interface. These in-session polls are fully synchronized with the moderator app, ensuring a seamless experience across both platforms. Any poll created in one app will be instantly visible in the other.

Kaltura Events June 2023

Date Released: June 2023

What's New

- **Login link via email (aka magic link)** - Event managers creating a new event using a preset event template can now decide how they would like for their attendees to log in - using login link (aka magic link) or using username and password. Once selected, the following happens.

- The default registration form is modified to use only email (no password field).
- The relevant system emails (invite, registration confirmation) use the magic link on their CTAs.
- A new system email, “login email” is displayed and can be customized (this is the email attendees will receive when they try to log in to the event site).
- The event organizer is able to regenerate the login link from the users tab in case attendees are having issues logging in or not receiving the email as expected.

Let's get started

Start with a few details about your event

Title 19/60

My magic link event

Short description

Start time (required) **End time**

06/12/2023 03:25 PM → 06/12/2023 04:25 PM

Time zone

IDT (GMT+03:00) Asia/Jerusalem

Attendees will log into the event with:

Login link via email
 Email and password

Create **Cancel**

Notes -

1. Once set on create event, you cannot change the authentication via Kaltura Events, only as a managed service.
2. If you are using custom event templates with magic link (email login), you will **not** have the option to select the authentication on create event but you will have the new login email available, the relevant token, and regeneration option on users tab.

- **Captions on media** – Following Simulive sessions, event managers can now upload and order captions (via Reach) on Media (VODs). You can find the captions tab on videos under the media tab (just like on sessions).

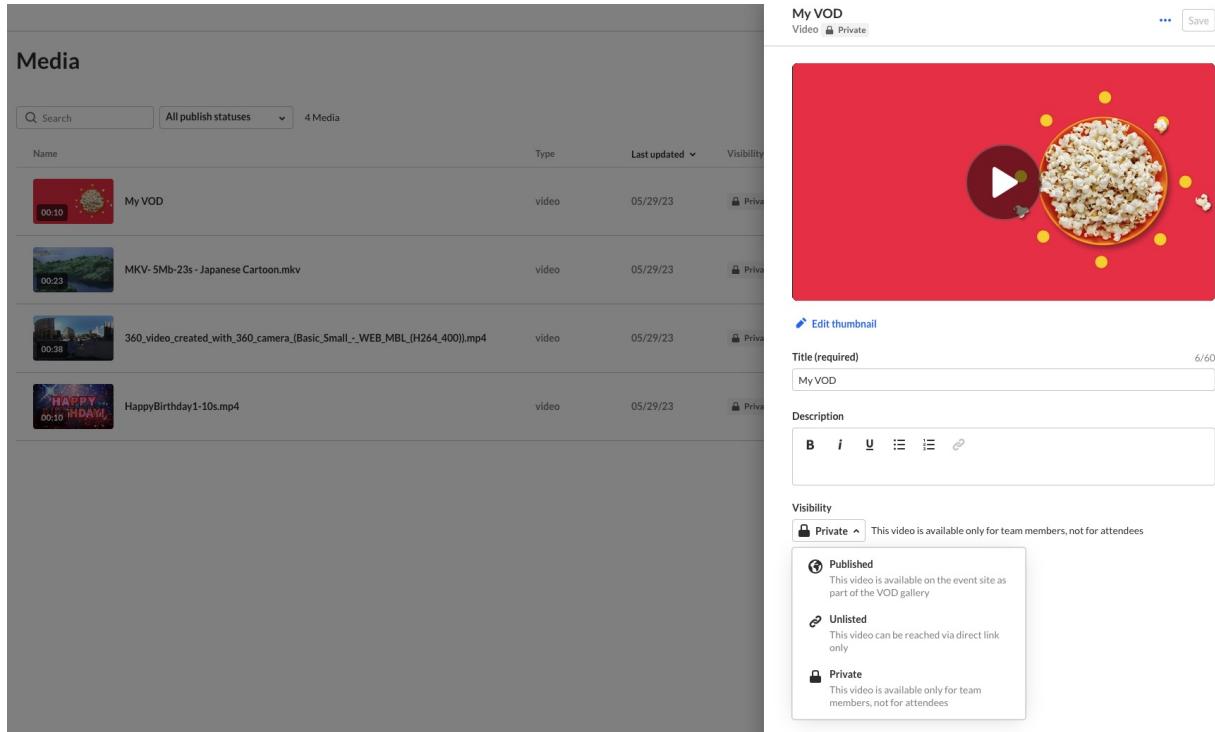

- **Pre-recorded (Simulive) sessions - Select video source from library** - Event organizers can now reuse the same video source and select from a library instead of uploading it twice. This can be used for 'follow the sun' type sessions or even as a simplified Simulive production when you record yourself on an interactive room and use the recording as a Simulive source without downloading/re-uploading the same video. In addition, Simulive video sources you've uploaded are now available on the Media tab (and set as "private"). Note that these do **not** need to be published. If you publish them, they will appear on the media section of the event site **in addition** to the Simulive session.

The image shows two side-by-side screenshots of the Kaltura interface. The left screenshot is titled 'Media' and shows a list of four media items: 'My VOD' (00:10), 'MKV-5Mb-23s - Japanese Cartoon.mkv' (00:23), '360_video_created_with_360_camera_(Basic_Small-.WEB.MBL_(H264,400)).mp4' (00:38), and 'HappyBirthday1-10s.mp4' (00:10). Each item has a thumbnail, duration, last updated date (05/29/23), visibility (Private), and a 'Select' button. The right screenshot is titled 'mySimu' and shows a 'Pre-recorded' session. It includes a thumbnail of a rocket launching, session details (Title: mySimu, Description: [rich text editor]), and a video source section featuring a thumbnail of a stadium. It also shows start and end times (05/30/2023 09:39 PM to 05/30/2023 10:39 PM), event time zone (Europe/Rome), and video source options (Upload or Choose from Media).

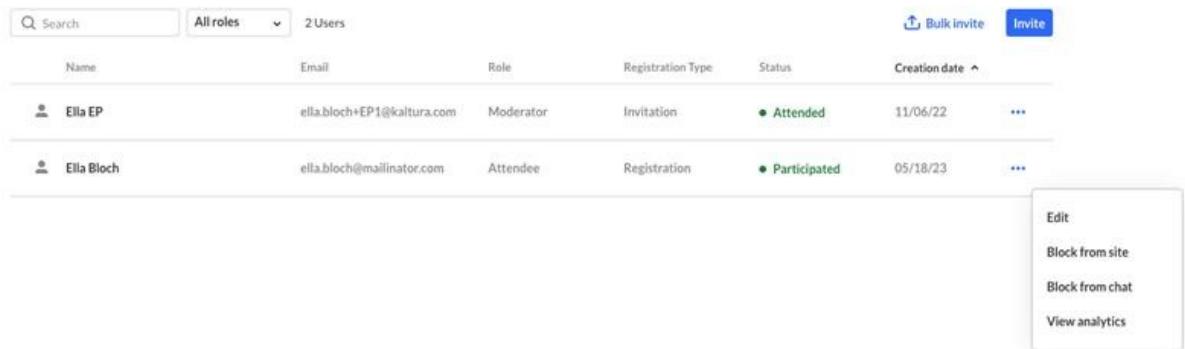

- Upload and order captions-** Event organizers can now order (via Reach, when configured on the account) or upload caption files for their pre-recorded sessions and media videos (on Session Edit and on Edit Media Videos screens). Ordering and uploading captions for pre-recorded sessions is available once you have a 'ready' video source (uploaded or selected from library).
- Private media -** Similar to private sessions (on the agenda), Kaltura now offers "private" visibility on media/VODs. Event organizers can now completely hide a VOD from attendees by changing the visibility to "private" and control their content access even better. This can be used when you don't want the media to be available for attendees or when using a recording of a webinar as a pre-recorded video source.

The screenshot shows the Kaltura Media Library interface. On the left, a list of media items is displayed with columns for Name, Type, Last updated, and Visibility. The items include 'My VOD' (video, 05/29/23, Private), 'MKV-5Mb-23s - Japanese Cartoon.mkv' (video, 05/29/23, Private), '360_video_created_with_360_camera_(Basic_Small_-_WEB_MBL_(H264_400)).mp4' (video, 05/29/23, Private), and 'HappyBirthday1-10s.mp4' (video, 05/29/23, Private). On the right, a detailed view of the 'My VOD' video is shown, featuring a red background with a bowl of popcorn and a play button icon. The video thumbnail shows a red screen with a yellow play button. The video details include 'Edit thumbnail', 'Title (required): My VOD', 'Description' (with rich text editor), and 'Visibility' options: 'Published' (selected), 'Unlisted', and 'Private'.

- **Block from chat** - Event managers can now block attendees from using the chat/interaction features from the Users list. Blocking from chat is available on the Users/Attendees action menu for users who logged in to the event **and** accepted the terms (if required). Once the user is blocked, they will not be able to interact and send messages/start conversations on the chat.

Users

The screenshot shows the Kaltura Users list with 2 users: 'Ella EP' (Moderator, Invitation, Attended, 11/06/22) and 'Ella Bloch' (Attendee, Registration, Participated, 05/18/23). A context menu is open for 'Ella EP', showing options: 'Edit', 'Block from site', 'Block from chat', and 'View analytics'.

- **Deliverability report for emails** - Event managers using the new Reminder Email feature can now download a report on completed sent requests. This report includes all the email addresses to which the email was sent and their delivery status.

Emails

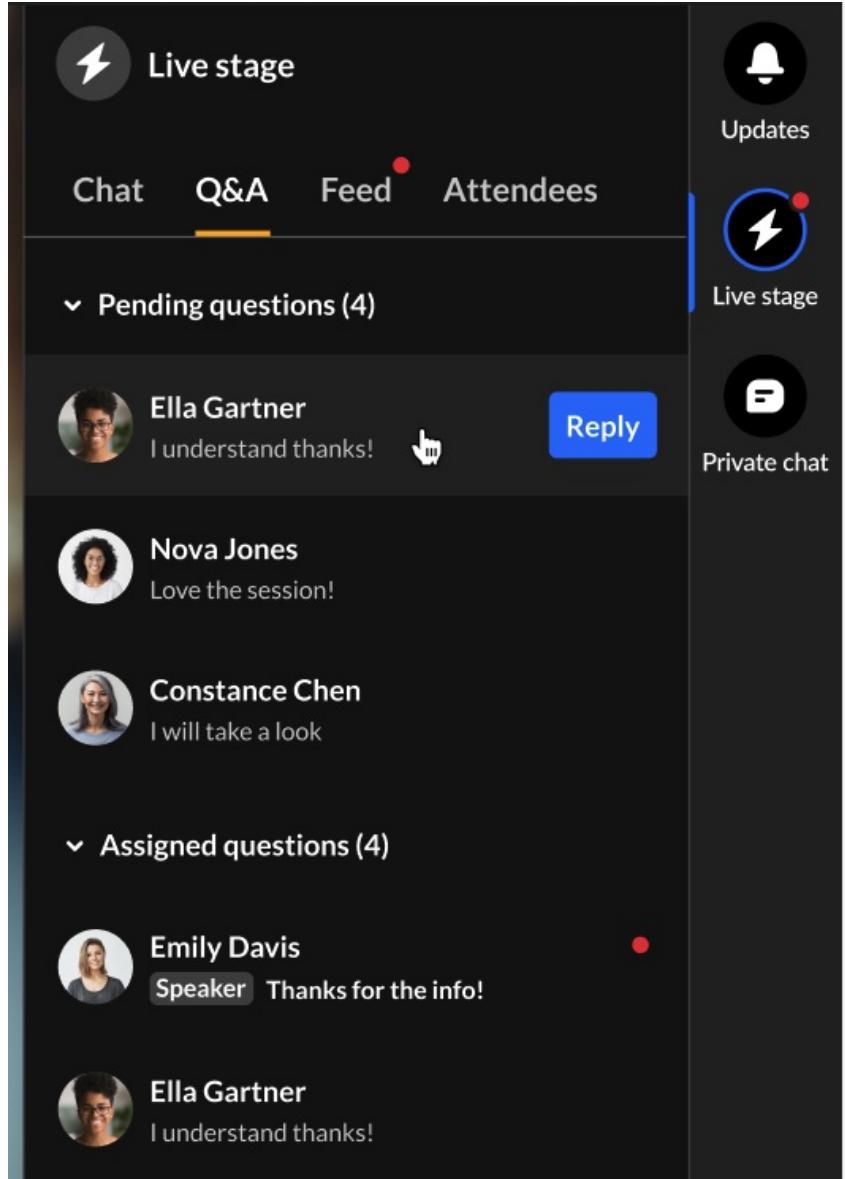

Templates Outbox

All statuses

Refresh

Name	Recipients	Status	Request sent	...
Notify your audience Let your registrants know that the event (or a session) begins, or...	All (2)	● Completed	10:04 AM 05/18/23	Download report

- **Auto login** - Event managers clicking event site links (Event site, Registration page, Session page, etc.) will now be automatically logged in and be able to view the event site seamlessly.
- **In-session moderator chat** - This feature allows moderators to answer Q&A directly from the chat widget itself, eliminating the need to navigate to another screen. Now, moderators have the flexibility to choose whether they prefer answering audience questions from the chat widget, the moderator app, or both.

The screenshot shows the Kaltura Live stage interface. At the top, there are tabs for "Live stage", "Updates", "Chat", "Q&A", "Feed" (which is selected and highlighted with a yellow bar), and "Attendees". Below the tabs, there is a section titled "Pending questions (4)". It lists four messages:

- Ella Gartner: I understand thanks! Reply
- Nova Jones: Love the session!
- Constance Chen: I will take a look
- Emily Davis (Speaker): Thanks for the info!

Below the pending questions, there is a section titled "Assigned questions (4)". It lists two messages:

- Emily Davis (Speaker): Thanks for the info!
- Ella Gartner: I understand thanks!

On the right side of the interface, there are three circular icons with labels: "Updates" (bell icon), "Live stage" (lightning bolt icon), and "Private chat" (messaging icon).

Kaltura Events May 2023

Date Released: May 2023

What's New

- **Private Session** – Event organizers can now completely hide a session from attendees by changing the visibility to private, making it available to event admins only. This can be used when you do not want the recording to be available for attendees or while editing a session on an existing event.
- **Share and Embed** – Event organizers can now share their live sessions and stream them on other social platforms as well as copy the embed code and embed the session on a different site.

Kaltura Events April 2023

Date Released: April 2023

What's New

- **Events Showcase** - An amazing tool to promote events and brands has arrived! Admins and event hosts can now share or embed this beautiful page, showcasing their past and upcoming events and webinars. Marketers can easily use this page to promote their entire events portfolio. Event organizers can select specific events from their event list they want to "showcase" and publish them to a new page which they can send to prospects and also embed on their website. They can also customize the showcase page's title, description and logo as well as theme (light or dark) for the embedded version. Read more about this new feature [here](#).
- **Custom Email Reminders and Notifications** - A great addition to Kaltura Events now allows admins and event hosts to send email reminders and notifications to their registrants and attendees to keep the attendance and engagement rates high. They can manage and send different email template like event reminders before and during the event, upcoming events to keep the audience close or a feedback request after the event is over. An email can be sent on demand to all/speakers/moderators. Read more about this new feature [here](#).

To make it easier, we've created a few basic templates to start from when using our present event templates:

- Send a reminder - Bring awareness to the site, calling registrants to check the speakers and agenda, wander around and watch some VOD stuff.
- Notify your audience - Attracting registrants to join the event after it has started.
- Spread the word - Inviting attendees to share content, making it clear that the recordings are available and that the site is open for registration.
- Promote content - Providing extra content regarding the event's subject with a spotlight on the company blogposts, products, etc.
- Get feedback - Asking participants for feedback with an external form.
- Upcoming events - Showcasing the company's upcoming events.

Customers using custom event templates can also have their own set of 'preset' email templates.

- Q&A chat Auto-Reply - Event organizers can now define an automatic response for the Q&A chats from the chat settings (Interactions>Chat settings). The auto-reply can help ensure that participants in our event receive a quick response to their questions, even if there are no available representatives to respond at the moment. This can improve satisfaction and trust during our events.

Kaltura Events March 2023

Date Released: March 2023

What's New

- New Reports tab - A new tab designed to help event organizers easily access all available reports for their events in one convenient location. With this new page, event organizers can quickly download reports without having to navigate through different pages or modules. Each report has a link to our knowledge base, so admins can easily understand the report they are downloading and make better use of the data it provides. Read more about this new feature [here](#).

The new Reports page also includes new reports: Chat user activity, Chat moderation, Moderator transcript, Group chat transcripts, and Polls activity.

Important to note:

- Some reports may require you to choose specific time frames or sessions before downloading the report.
- Some reports will be available only on newly created events. To see all available reports, create a new event.

Kaltura Events February 2023

Date Released: February 2023

What's New

- Live captions: Event organizers can now order live captions for their live webcast and DIY sessions. Check captions tab on edit session. Note that the ability to order live captions requires Reach services. Contact Kaltura to learn more.
- Hide notifications: Event organizers have the option to hide a notification that was already sent directly from Kaltura Events. You can also show it back again.

Kaltura Events January 2023

Date Released: January 2023

What's New

- Event admins can now create their own personalized invite email template for an event — banner and customization tags included. Stop by the Emails tab in the events platform today, and start customizing your own event invitation template.

Kaltura Events December 2022

Date Released: December 2022

What's New

Running events from more than one account? Now you can smoothly switch between accounts from within Kaltura Events, and run your entire events program with ease.

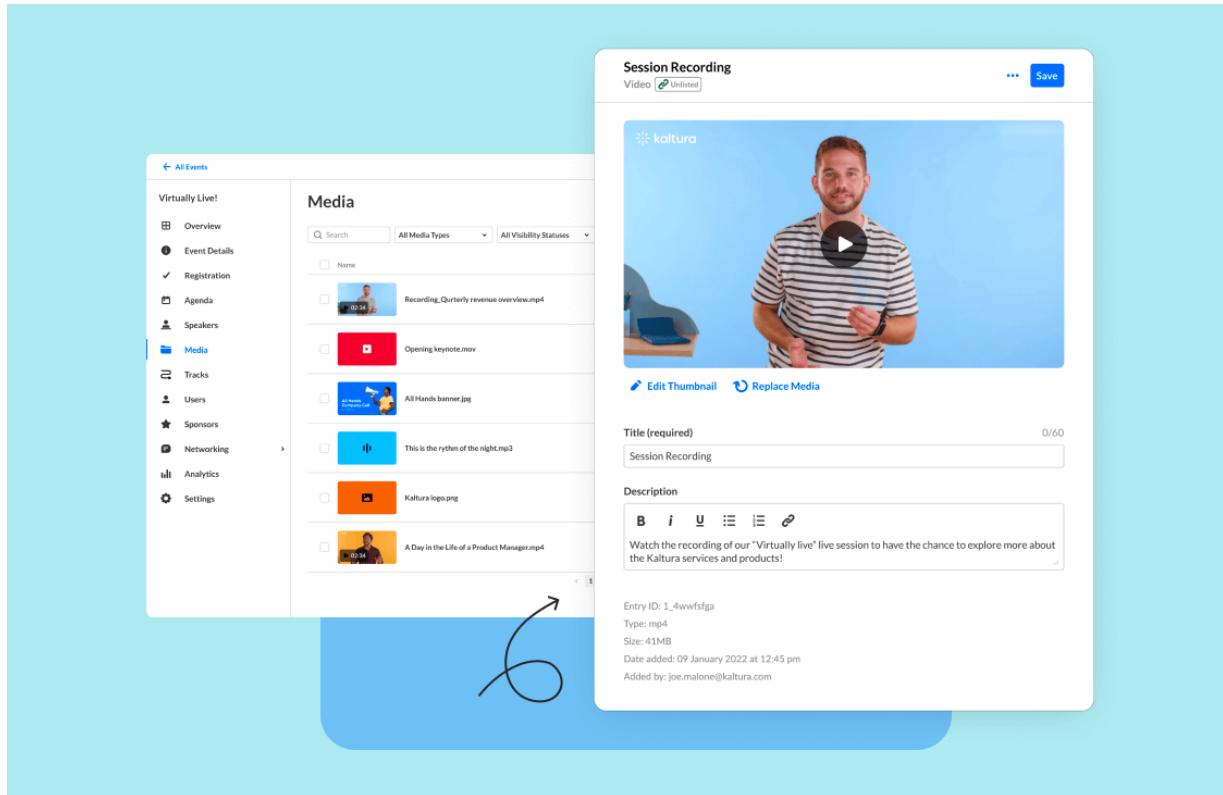

Kaltura Events November 2022

Date Released: November 2022

What's New

- Our Kaltura Events media tab just got major a revamp! Now you can upload, view, manage, and publish all your VOD and interactive room recordings — all in one place.

Use the Media tab to make your life easier in the run up for your next event— everything is at your fingertips. And yes, your interactive room recordings will magically appear there too!

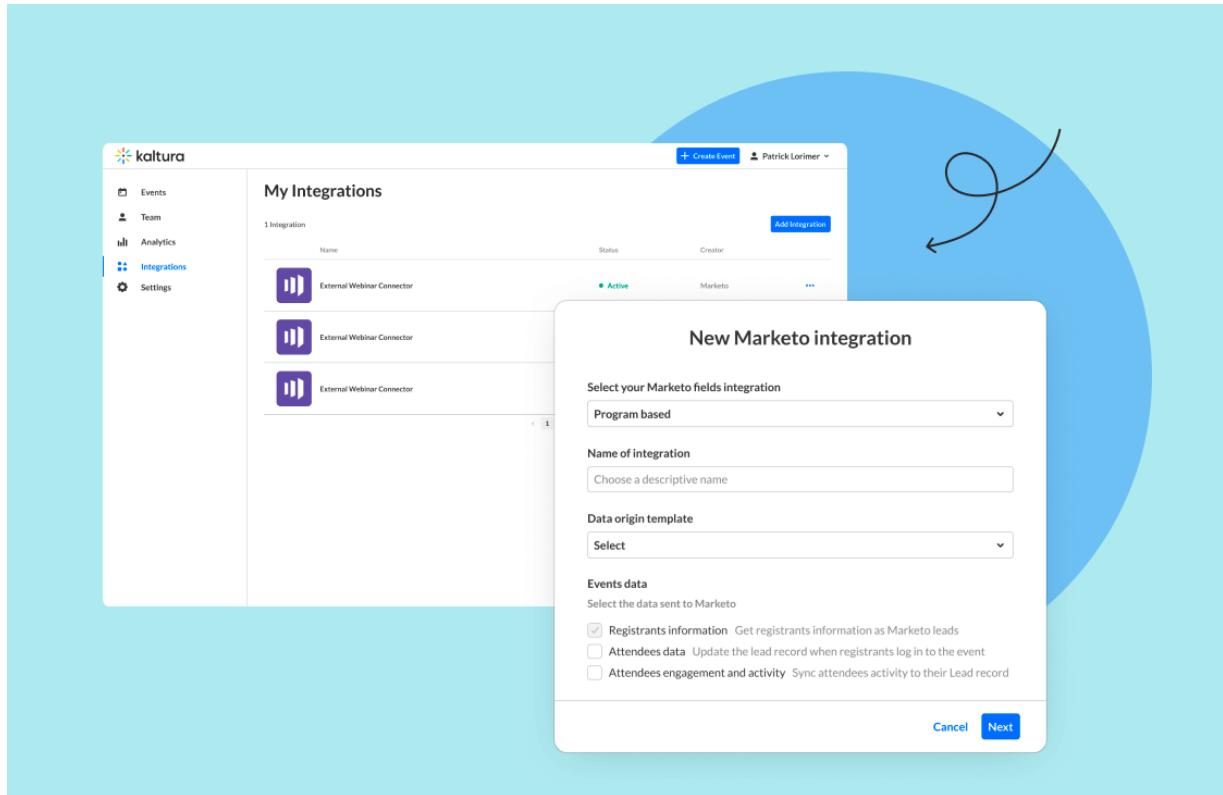

Kaltura Events October 2022

Date Released: October 2022

What's New

- This month we've enhanced our connection with Marketo and added a pre-built Marketo integration to Kaltura Events! That means that for every event, large or small, all the awesome leads that register are immediately synced into your Marketo account. And the best part is — it's all done automatically.

When you connect Kaltura Events with your Marketo account, everyone's registration, attendance, and most importantly, engagement data is synced and updated with no extra effort.

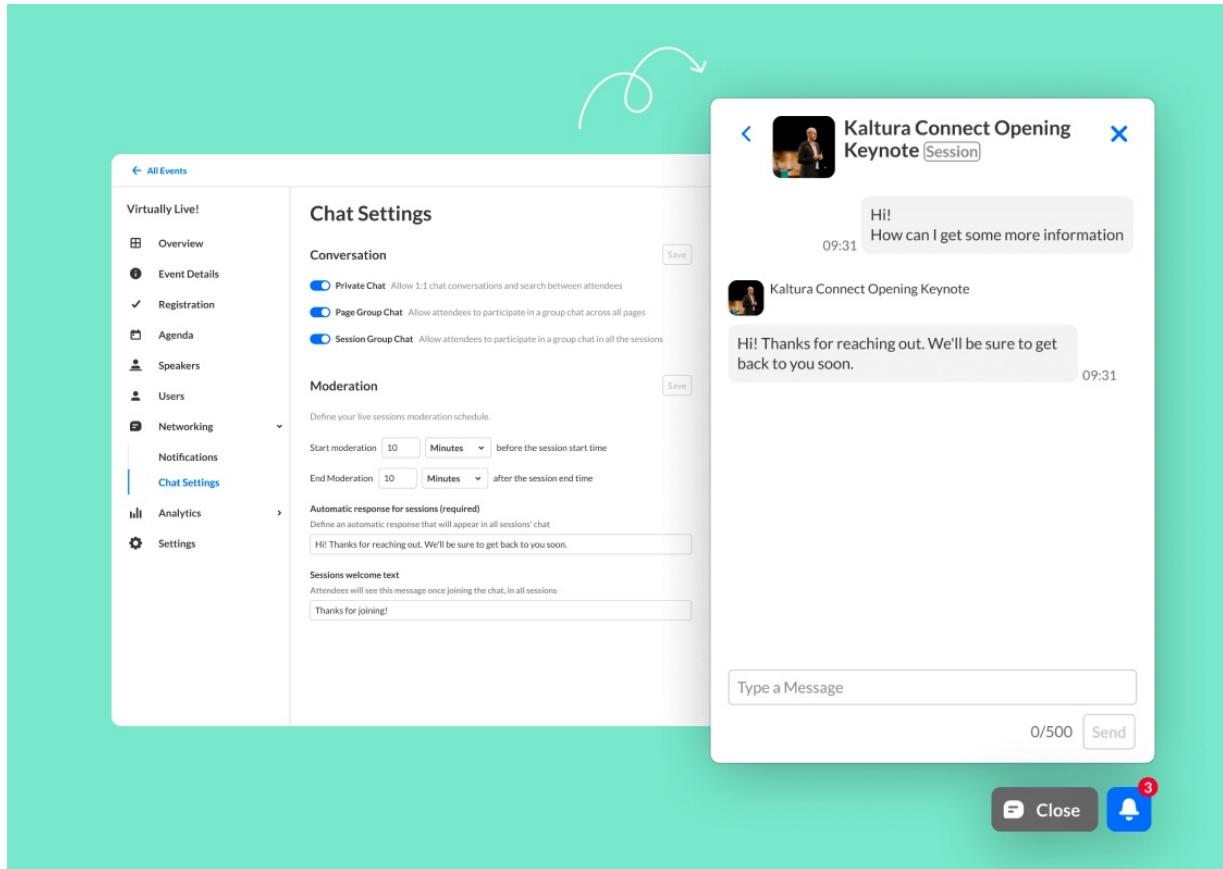

Please see [Marketo Integration for Kaltura Events](#) for more information.

Kaltura Events September 2022

Date Released: September 2022

What's New

- Schedule moderated Q&A for sessions to ensure your participants are able to contact a moderator and ask their question privately. Find it under “Chat Settings” in the Events Management, where you can also set a welcoming text.

Kaltura Events August 2022

Date Released: August 2022

What's New

- Invite multiple attendees in a flash with our **new bulk invite button!** In addition to individual invites, you can now upload a CSV file and send invitations to an entire list with a click. Easy as that! Then you can move on to organizing the rest of your event.

Check Your File

These are the two first rows of your file. If everything looks alright, you can click on 'Invite All'

	A	B	C	D	E

- Manage which items are visible on the event's agenda with the **new unlisted mode**. Now YOU decide whether a session can be seen and reached through the agenda page, or via a direct link only.

The screenshot shows the Kaltura Events interface. On the left, a sidebar titled 'Virtually Live!' lists various management tabs: Overview, Event Details, Registration, Agenda (which is selected and highlighted in blue), Speakers, VOD, Tracks, Users, Sponsors, Networking, Analytics, and Settings. The main content area is titled 'Agenda' and shows '4 Sessions'. Each session is listed with its name, date, and time, along with a thumbnail image. The sessions are: 'Opening Keynote' (Interactive webinar, 10:00 AM - 10:30 AM, Tue, December 14), 'Demystifying Marketing Automation' (Interactive webinar, 1:00 PM - 1:30 PM, Tue, December 14), 'Marketing for Gen-Z: The Future of Work' (Interactive webinar, 10:30 AM - 11:00 AM, Tue, December 14), and 'Make it Count – Understanding the Journey through the Data' (Large Scale Broadcast, 1:30 - 2:00 PM, Tue, December 14). On the right, a modal window is open for the session 'Demystifying Marketing Automation'. The modal includes fields for 'Title (required)', 'Description' (with rich text editor), 'Start' and 'End' times, 'Speakers' (Brian Dennis), 'Moderators' (Dan Scott, Lucy Brice), and 'Visibility' (set to 'Published'). A tooltip for 'Published' explains that the session is available on the event agenda. A 'Save' button is visible in the top right corner of the modal.

- Need to take a quick look at your session page as you're editing it? Now it's easy: we added a new button to take you from the agenda tab in the management area - **straight to the session** on the event site!

Kaltura Events July 2022

Date Released: July 2022

What's New

The most essential dashboard for measuring your event is now available, an engagement overview with all the vital metrics and details to keep your events machine working well. In this dashboard, you can see the general highlights such as video impressions, unique viewers, or the top videos watched.
