Kaltura Events - December 2024

Date Released: December 2024

What's New

Session analytics dashboard enhancements - Additional user information is now available on the session analytics dashboard, as well as an added searchability feature. Information in this portion of the dashboard now includes attendee name, minutes viewed, reactions, sent chat messages, polls answered, and live engagement rate. You can even hover over an attendee's name to display user registration information, such as name, role, company, industry, and country. In addition, if you'd like to search for a specific attendee in the list, simply type at least three letters of the attendee's name in the search field, then click the search "magnifying glass" icon or simply press Enter on your keyboard.

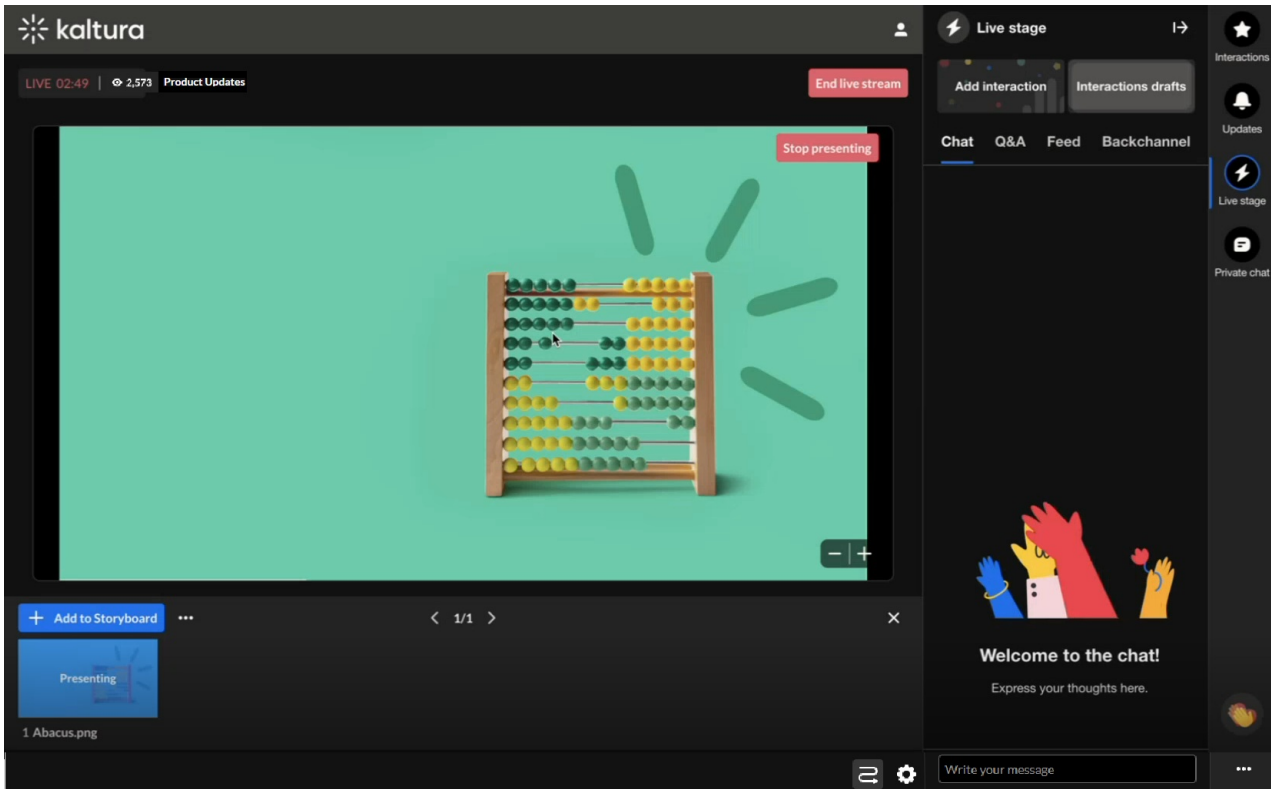

Attendees						<input type="text" value="Search attendees"/>
Name	Minutes viewed	Reactions	Sent chat messages	Poll answered	Live engagement rate	
▶ Total	44,201	31	14	14	45%	<div style="width: 45%;"></div>
▶  Roger Chalmer Product Design Manager, Spotify	44	0	34	0	45%	<div style="width: 45%;"></div>
▼  Thomas Anderson Product Manager, Kaltura	42	0	34	0	45%	<div style="width: 45%;"></div>
<div style="display: flex; justify-content: space-between; align-items: center;"> <div>0 Q&A threads created</div> <div>1/2 Attachments downloaded</div> <div>2 Raised hands</div> </div>						
▶  Barack Azim UX Research Lead, Meta	42	0	34	0	45%	<div style="width: 45%;"></div>
▶  Eric Lorimer Software Engineer, Machine Learning, G...	41	0	34	0	45%	<div style="width: 45%;"></div>
▶  Helen Patrick Data Scientist, Amazon Web Services	40	0	34	0	45%	<div style="width: 45%;"></div>
▶  Constance Chen Product Marketing Specialist, Adobe	40	0	34	0	45%	<div style="width: 45%;"></div>
▶  Jamie Lowell Frontend Developer, Airbnb	40	0	34	0	45%	<div style="width: 45%;"></div>
▶  Sandra Sunderland Cybersecurity Analyst, Cisco	39	0	34	0	45%	<div style="width: 45%;"></div>
▶  Chris Verazano Solutions Architect, Salesforce	39	0	34	0	45%	<div style="width: 45%;"></div>

For more details, check out our [Knowledge Center article](#).

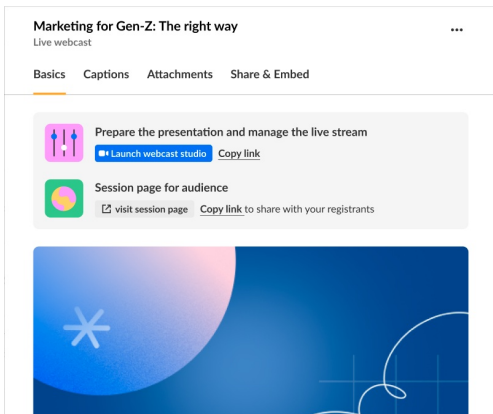

Webcast studio - Introducing a new addition to the live webcast session - Webcast Studio! This next-generation "Town Hall" is designed to elevate live-streaming experiences for large audiences. Each live session created in Kaltura Events will have the option to add a webcasting studio where producers can plan and manage their broadcast.

Key features of the Webcast Studio include:

- Prepare ahead of your broadcast - Access the webcast studio via private links to set up visuals and engagement assets before going live.
- Upload visuals to your session - Enjoy an effortless integration of slides and images to enrich your live broadcast and simplify session prep.
- Simple management of your stream - Start, stop, and manage live streams directly from the intuitive studio interface.
- Enhanced audience experience - Let your attendees leverage dual screens and cue points to make your content more accessible and to the point.

We've also improved the user experience! We increased the visibility of the "Launch" CTA in the session panel. We also simplified the process for copying and sharing session links. Additionally, clicking the "Launch" CTA now automatically opens the studio with auto-login and takes you directly into the room—no extra "Start Meeting" click required.

For more details, check out our [Knowledge Center article](#).

Support for more answers in polls and quizzes - The Interactions tab of the Chat & Collaborate widget is where moderators create and publish various interaction tools for their event, including text polls, quiz questions, rating scales, crowd votes, and open-ended questions. For polls and quizzes, we've increased the number of possible answers from 5 to 8, giving moderators more customization options for their interactions with attendees.

For more details, check out our [Knowledge Center article](#).

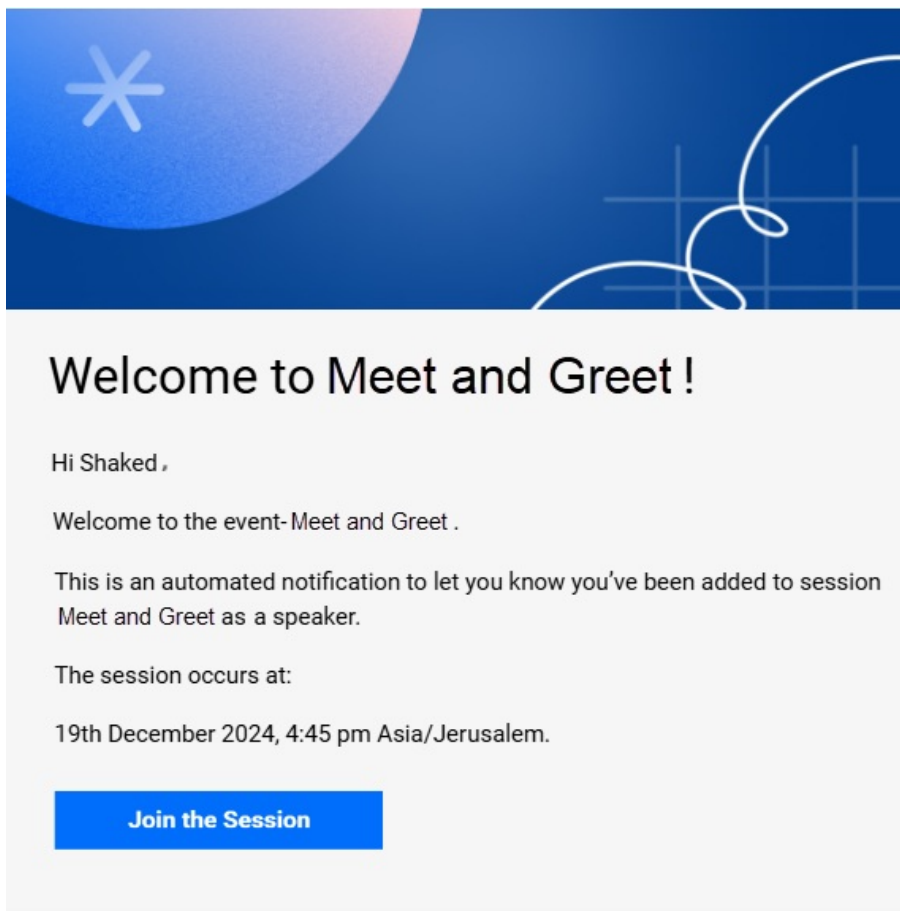

Increased character limit for Q&A message board questions - The Q&A area of our Moderator app is where moderators answer common questions from the audience by publishing questions with answers on the feed. We've now increased the question character limit from 150 to 500, giving moderators more flexibility to accommodate longer questions from the audience.

For more details, check out our [Knowledge Center article](#).

Automated system emails for speakers and moderators - Speakers and moderators can now get an automated email when they are assigned to a session or upon session schedule change. This streamlines the process of speakers/moderators getting notified about their sessions and getting into the event site/relevant session. The email includes relevant CTA buttons, for example, on a DIY session (live broadcast from a room), they get a direct link to the room and also a calendar invitation for the session. The automation of the emails is configurable and can be turned on/off on the template level, as well as the email templates content.

Email example:

Extraordinary events, every day

Turn off your Q&A chat - Based on customer feedback, we've added the option to turn off the Q&A chat for events via the Chat settings page. When the toggle is OFF, the Q&A tab will not be displayed. When the toggle is ON, the Q&A tab will be activated during session times, as long as moderators are assigned to the session (as it works today).

For more details, check out our [Knowledge Center article](#).

Skip email on bulk invite - You can now skip sending invite emails when using the bulk invite process, just like with single invites. This is particularly useful when you're still working on your event or managing a physical event and want to avoid sending unnecessary emails to executives or other participants. You can add users (e.g. speakers and moderators) without triggering an invite email. When you're ready, simply use the "Resend Email" option to send the invites.

For more details, check out our [Knowledge Center article](#).

Resolved Issues

Support ticket ID #	Description
SUP-45231	Fixed an issue where admins were sporadically receiving errors when attempting to login.
SUP-45071	Fixed an issue where the duration of an event was being incorrectly displayed.
SUP-44835	Fixed an issue where the session moderator dropdown wasn't displaying all assigned moderators.
SUP-41870	Fixed an issue where users were unable to change from Unlisted to Private.
SUP-42551	Fixed an issue where the announcement notification was not allowing "!" or ":" in URL.
SUP-45119	Fixed an issue where Claravine URL code in notifications was not being accepted.

Kaltura Events - November 2024

Date Released: November 2024

What's New

Multi-selection in Polls - We are happy to announce that multi-selection in poll answers is now available! This new feature supports questions like "Select all that apply", giving attendees more flexibility in their responses. To enable multiple selections when creating a poll, simply check the new "Enable multiple answers" checkbox.

For more details, check out our [Knowledge Center article](#).

More than one correct answer in Quiz question - We are also excited to introduce the option to select multiple correct answers in quiz questions. Moderators can now mark more than one correct answer when creating a quiz, by simply selecting multiple correct options. This enhancement broadens the range of quiz possibilities, enabling more dynamic and flexible question types for engaging participants.

For more details, check out our [Knowledge Center article](#).

Polls on Stage Monitor - We're happy to introduce a new ability - adding polls to the Stage Monitor. Moderators can now display poll questions and results on the Stage Monitor, enabling speakers to view them while on a physical stage. This enhancement strengthens our hybrid event solution, enhancing the engagement between speakers and their audience.

Question from the audience

How can marketing automation enhance customer engagement in today's fast-changing market?

In today's rapidly evolving market, how does marketing automation contribute to boosting customer engagement?

"In the fast-paced business

Poll

What are you primarily seeking in a webinar?

Learning	40%
Networking	30%
Fun	10%
Other	20%

For more details, check out our [Knowledge Center article](#).

Upcoming

- Delete group chat messages internal API
- Increase number of answers in Quizzes and Polls

Resolved Issues

Support ticket ID #	Description
SUP-45632	Fixed an issue where users were not able to copy events when a special character was used in the title.
SUP-44690	Fixed an issue where users were not able to add a social stream to a DIY live room.
SUP-44701	Fixed an issue where the option to login via SSO to KMS was missing and the only option shown was to login with email and password.
SUP-45496	Fixed an issue where the Analytics page was not responding if opened from the Edit Session drawer.

Kaltura Events - October 2024

Date Released: October 2024

What's New

System email templates improvements - Our latest additions will provide event organizers with greater control and personalization options for event branding & communication.

- **Branding consistency:** The CTA button color in the template preview area now follows branding customization selected on the custom event template.
- **Customization options:** Edit the CTA button label and footer text across all system emails (registration complete, invite, and login emails).

Note: If you're using a custom event template, the template may need to be updated to view these options.

For more details, check out our [Knowledge Center article](#).

Open-ended questions - This highly anticipated feature empowers moderators to create open-ended questions, allowing attendees to submit their responses in free text. This provides a powerful way to gather insightful and valuable feedback directly from the audience.

- **Enhanced engagement:** Encourage deeper interaction from participants by allowing them to express their thoughts and opinions in their own words.
- **Rich insights:** Collect nuanced and qualitative data, enabling moderators to gain valuable insights beyond standard multiple-choice polls.
- **Customization and Flexibility:** Moderators can tailor questions to fit specific needs,

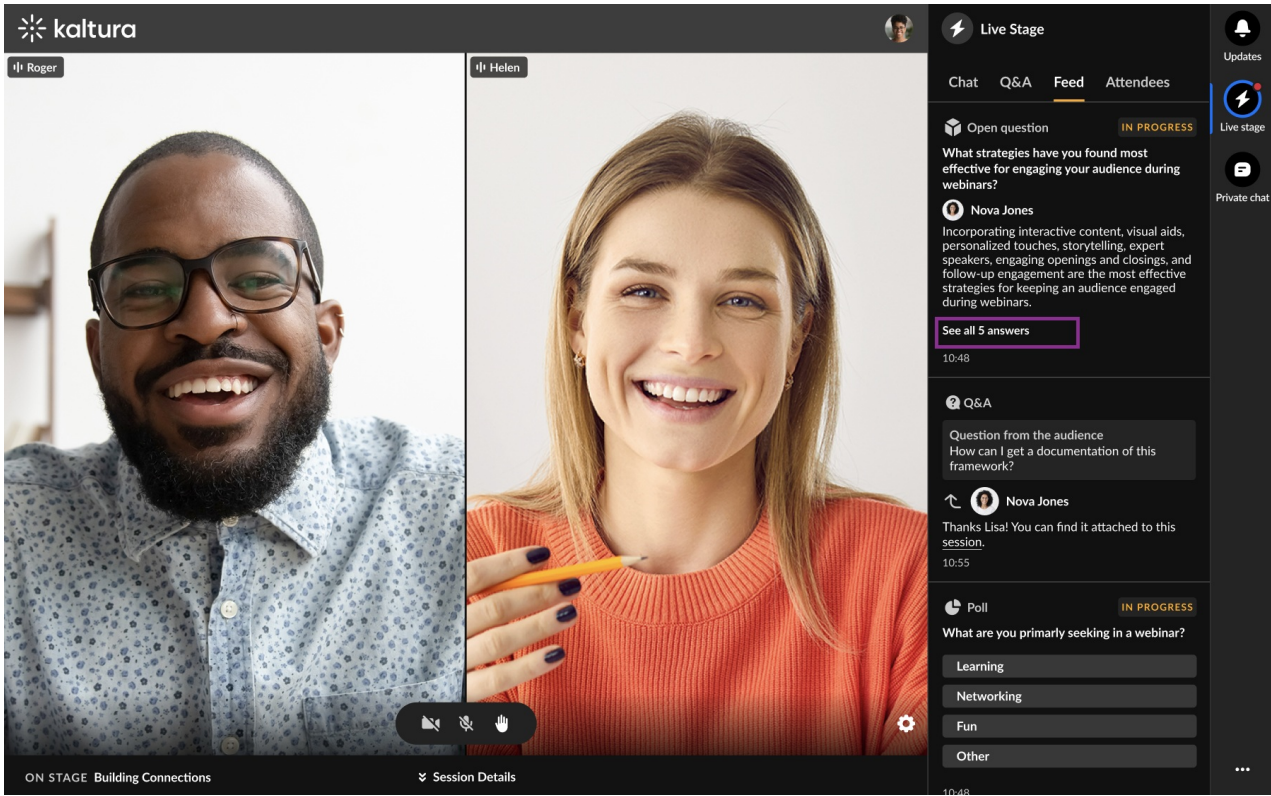

fostering a more personalized and relevant experience for attendees.

- Real-time Feedback: Receive immediate feedback from participants, allowing for dynamic and responsive discussions during live sessions.

Responses will be displayed immediately in the Feed tab, and all submissions will be

saved in the Polls Report for easy access and review.

For more details, check out our [Knowledge Center article](#).

Upcoming

- Stay tuned for email notification to speakers and moderators.

Resolved Issues

Support ticket ID #	Description
SUP-44848	Fixed an issue where an exact match of string + all special characters (for example, brackets) wasn't appearing on the search.
SUP-44984	Fixed an issue where the KMS magicLinkActionsLimit was not available for event custom emails.
SUP-44835	Fixed an issue where session moderator dropdown wasn't displaying all assigned moderators.
SUP-41870	Fixed an issue where users were unable to change site visibility for an entry from unlisted to Private in Events platform site

Kaltura Events - September 2024

Date Released: September 2024

What's New

Schedule emails - This powerful new feature that will streamline your event communication and ensure timely delivery of important messages.

- Schedule Relative to Event Time: Set emails to be sent before, during, or after your event, ensuring they arrive at the optimal time.
- Specify Exact Date and Time: For precise scheduling, you can also choose a specific date and time for your email to be sent.

The benefits of scheduled email templates are numerous -

Save time: Automate repetitive email tasks and focus on other aspects of your event.

Ensure timely delivery: Never miss a beat with automatically sent emails at the right time.

Enhance attendee experience: Provide a personalized and timely communication experience.

For more details, check out our [Knowledge Center article](#).

UX/UI enhancements to Kaltura Events - In order to streamline event management and provide a more intuitive interface, Kaltura is excited to announce the following UX/UI enhancements:

- **Consistent terminology** - We've replaced "Event manager" with "Organizer" throughout the platform for better clarity and to support additional use cases.
- **Unified event list** - We've consolidated the event list into a single view, eliminating the need for separate "upcoming" and "past" tabs. Event Organizers can use (previously released) event labels to easily filter their ever-growing event list.
- **Improved date and time selectors** - We've introduced new and improved date and time selectors for easier event scheduling.
- **Button refinements** - "Create event" is now "Create" and "Events Showcase" is now "Showcase".

The screenshot displays the Kaltura Events dashboard for user Patrick Lorimer. The interface includes a sidebar with navigation options: Home, Team, Analytics, and Integrations. The main content area is titled 'Good morning, Patrick' and features a 'Recently viewed' section with five event cards: Kaltura Academy (viewed 40 minutes ago), SKO 2023 (viewed 1 day ago), Virtual Summit 2023 (viewed 2 days ago), Training day (viewed 3 days ago), and Product palooza (viewed 3 days ago). Below this is the 'All Events & Webinars' section, which includes a search bar, a filter dropdown set to 'All labels', and a 'Showcase' button. The events are listed in a table with columns for Date, Name, Labels, Showcase, Type, and Registration.

Date	Name	Labels	Showcase	Type	Registration
07/24/24 - 07/24/24 In 16 hours	From Concept to Launch Created by Alexander Benj... 2 days • 2 sessions	Product +2	✓ Added	Webinar	● Open 172 Registrants
07/24/24 - 07/24/24 In 16 hours	How to Drive Conversions Created by Eric grant 2 days • 2 sessions		✓ Added	Interactive session	● Open 172 Registrants
07/24/24 - 07/24/24 In 16 hours	Tips and Techniques for Created by Eric grant 2 days • 2 sessions	Marketing	✓ Added	Interactive session	● Open 172 Registrants
10/24/23 - 11/30/23 Ended 8 months ago	Marketing Kick-off Created by Eric grant 37 days • 4 sessions	Marketing	✓ Added	Interactive session	● Closed 172 Registrants

For more details, check out our [Knowledge Center article](#).

Upcoming

- Stay tuned for updates to system email templates button and footer.
- Also coming soon - updates to preset event templates.

Kaltura Events - August 2024

Date Released: August 2024

What's New

New Quiz question interaction - We are excited to introduce Quiz question, a new interaction added to the 'Interactions' tab of the Chat and Collaborate widget. This feature allows moderators to send a multiple-choice question with one correct answer. Attendee responses are included in all of the existing poll reports and data. Use quiz questions to boost the interactivity and educational value of sessions, making it easier for moderators to assess participants' understanding in real-time. The new quiz question also provides admin with valuable insights from participants.

For more details, check out our [Knowledge Center article](#).

Upcoming

- Stay tuned for the upcoming Chat and Collaborate Open-ended question feature which aims to gather qualitative feedback by allowing participants to respond in their own words and foster deeper discussions during our events.
- Also look out for Chat and Collaborate Accessibility as part of our cross-product accessibility efforts.

Resolved Issues

Support ticket ID #	Description
SUP-44326	Fixed an issue where user was unable to change the Chat and Collaborate capabilities from announcement.

Kaltura Events - July 2024

Date Released: July 2024

What's New

Event dashboard -

Now Event managers can see a complete analytical overview of their event all on one page! Introducing the new event dashboard! The event dashboard combines metrics on registration, viewership, chat and collaboration, top pages, and more - all from which Event managers can draw actionable insights and conclusions. See [Analytics tab - Analytics summary](#) for complete information.

Chat sentiment analysis -

More real time insight on your session is now available in the Assistant tab of the Chat and Collaborate widget. Kaltura now helps you determine the sentiment of your attendees during a session. Sentiment values presented to the moderator are Positive, Neutral, Negative, or Quiet (no new messages in the chat for at least 5 minutes) according to data that is carefully extrapolated and calculated based on the text messages sent on the chat. For more information on this feature, see [Chat and Collaborate widget](#).

Email notifications based on registration status -

When sending custom emails via the Interactions tab > Emails page of Kaltura Events, you now have the option of choosing from a more advanced list of users, thereby precisely focusing in on your target audience. In other words, sending relevant content to your relevant audience based on their registration status. The statuses listed reflect the granularity seen upon hovering over the registration status of a user in the All users page. For more information on this feature, see [Interactions tab - Emails](#).

AI based notification suggestions -

Got writer's block? You may now create custom email templates using AI! Simply click the **Create with AI** button, decide what kind of template you would like to create, optionally provide additional context, and click **Generate**. The AI template uses all the event details (i.e., speakers, sessions, etc.) to create a custom email template just for you! See [Interactions tab - Emails](#) for complete information.

Create with AI Beta

What kind of template would you create?

What would you like to say? (optional)

The AI template uses all event details like speakers and sessions

Automated system email notifications to Event managers and Content managers added to events -

Event managers and Content managers assigned to events will now automatically receive an email notification from Kaltura. This email will include:

- **Event Name:** Quickly identify the specific event to which you've been assigned.
- **Assigned By:** See who added you as an Event/Content manager.
- **Your Role:** Understand your specific permissions and responsibilities for the event.
- **Event Link:** Easily access the relevant event for further details and action.

This notification improves communication and ensures Event/Content managers are promptly informed of their assignments.

For more information on this feature, please see [People tab > Event team - Add team members to your event](#).

Kaltura Events - June 2024

Date Released: June 2024

What's New

Remove users -

You may now remove users (attendees, speakers, and moderators) from an event by simply clicking "Remove" on the user action menu. A user who has been removed from an event will no longer have access that that event.

See the following articles for complete information:

[People tab > All users - Invite attendees to your event](#)

[People tab > Speakers - Invite speakers to your event](#)

[People tab > Moderators - Invite moderators to your event](#)

Duplicate event with users -

In April, Kaltura released the "copy event" feature allowing you to copy an existing event and save the time of configuring and setting up a new event from scratch.

We are happy to announce that you may now choose to copy over certain types of users, including speakers, moderators, and members of the event team. You may even choose to send an email invitation to them upon creation of your new event.

Here is a complete list of what's copied over when copying an event:

- Branding - Event banner image, logo image, and custom theme
- Emails - Both system emails and custom email templates
- Registration form
- Template/custom pages - Lobby page and any custom pages
- Notifications - Announcements and crowd reactions
- Chat Settings
- Event settings - Support email address and organizer name and image
- Users - Speakers, Moderators, and Event team (if selected).

See [Events tab](#) for complete information.

Richer live engagement analytics to include additional Chat and Collaborate data -

Live engagement analytics previously included rate of engagement during the session and percentage who sent live reactions during the session. Event managers now have access to more in-depth Chat and Collaborate analytics in the session dashboard including:

- Total number of reactions sent in the session
- Percentage who sent messages on the group chat and total number of group chat messages sent in the session
- Percentage who participated in polls
- Percentage who created Q&A threads and total number of Q&A threads opened in the session
- Percentage who downloaded attachments and total number of downloads of session attachments

See [Agenda tab - Session analytics](#) for complete information.

Consolidated session dashboard report -

With the click of one button on the session dashboard, you may now easily export one report that combines engagement data with user registration data (name, email, company). Simply click the **Export** button and Kaltura Events will prepare the report and send it to your email address.

See [Agenda tab - Session analytics](#) for complete information.

Kaltura Events - May 2024

Date Released: May 2024

What's New

"Images" component on the Event site editor -

Kaltura now offers a new component, "Images", on the Event site editor that allows you to even further customize custom pages for your event! You may now add two clickable images that are side-by-side, one on the left and one on the right. You may add destination links to these images so that when your users click on them, they are redirected to a given web page, either inside the event site or out of it.

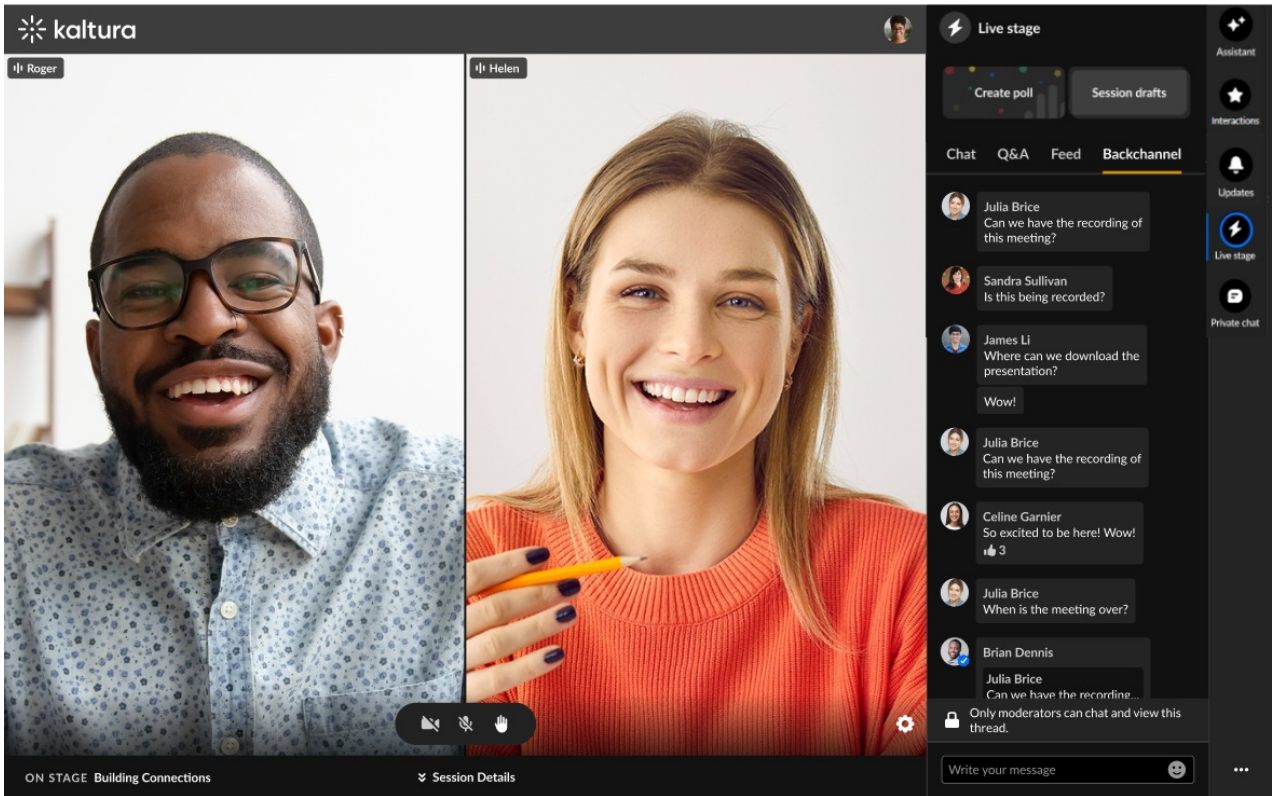

See [Event site editor tab - Create custom event pages](#) for complete information.

Moderator Back Channel -

Kaltura's Chat and Collaborate widget now includes a moderator back channel, a space where moderators can chat privately with other moderators.

To ensure a smooth transition to the new C&C backchannel, we are enabling both chats (room and C&C) in parallel until the end of next week. Then, we will disable the built-in room chat capability from the templates that include it: Interactive Session, DIY Session, and some custom templates. **Note** that the new backchannel will also appear in existing events, not just newly created ones.

See [Chat and Collaborate widget](#) for complete information.

Custom pages for Kaltura Events -

You can now build custom pages to better customize and control the structure of your event! Use this powerful design tool to create as many different pages as you want, styled with unique components, creating different experiences based on your audience. You can even choose to make these pages public, or only available to a select group of authenticated users.

See [Event site editor tab - Create custom event pages](#) for complete information.

Kaltura Events - April 2024

Date Released: April 2024

What's New

Event list filtering -

You may now add labels to your event and filter the event list by labels in Kaltura Events. Labels are used to better manage events in scale. For example, an Event Manager may label the event as having to do with a specific topic or related to a specific group (i.e., Marketing). See [Kaltura Events - Edit the Event Details](#) for information on adding labels to your event. See [Events tab](#) for information on filtering the event list by labels.

In-session notifications and crowd reactions -

In addition to being able to initiate announcements and crowd reactions from inside Events, Kaltura now allows event moderators to create and publish announcements (including titles) and crowd reactions right from the Chat and collaborate widget! This is a quick and efficient way for moderators to interact with their audience in real-time while the session is happening, thus increasing overall engagement.

See [Chat and collaborate widget](#) for more details.

Copy event -

You may now choose to copy an existing event and save the time of configuring and setting up a new event from scratch.

Copying an event copies over the following data:

- Branding - Event banner image, logo image, and custom theme
- Emails - Both system emails and custom email templates
- Registration form
- Template/custom pages - Lobby page and any custom pages
- Notifications and crowd reactions
- Chat Settings
- Event settings - Support email address and organizer name and image

Please note: Sessions, registrants, and media *are not* copied.

Copy event

Easily create & schedule new events similar to past ones. The sessions, registrants, and media will not be copied.

Title 29/120

Short description

B *i* U   **A**  

With the rise of virtual events, the divide between business get-togethers and other marketing channels has become blurrier than ever, and a new digital marketing funnel has emerged. But all that couldn't have happened without the creativity and smarts of all

Start time End time

→

Time zone

EST (GMT-5:00) Central time (US & Canada) ▼

[Copy event](#) [Cancel](#)

See [Events tab](#) for complete information.

Roles and Permissions -

Kaltura is excited to introduce a new user role in Events - the Content Manager. The Content Manager manages content of specific events. The Content manager is responsible for curating, organizing, and managing the content that will be presented during the event. Content managers **cannot** create events and do **not** have access to the full user list, analytics, and reports. See [Event user roles](#) for more details.

Kaltura Events - March 2024

Date Released: March 2024

What's New

Lead scoring report -

Kaltura now offers Lead scoring reports for Events. Lead scoring reports rank leads based on user profile and engagement level scores. You may choose from two types of Lead scoring reports - Lead Scoring Summary Report or Lead Scoring Detailed Report. See [Analytics tab - Reports](#) and [Lead Scoring Report](#) for more details.

Multi-thread in Q&A chat with a moderator -

During a session, attendees use the Q&A tab of the Chat and Collaborate widget to pose questions to the moderator. Now, with Kaltura's new multi-thread capability, each

question that an attendee asks is given its own separate thread, meaning attendees may have several chats/threads open with a moderator at the same time. This allows for organization of questions based on context. See [Chat and Collaborate widget](#) for complete information.

Attachment management -

You may now manage documents, spreadsheets, presentations, audio/video files, and images for your event sessions and attach downloadable content to your media, like videos, images, or documents. Read all about attaching media to sessions in any of the Knowledge Center articles about adding and editing sessions, such as [Agenda tab - Add and edit Interactive Room session](#). For information about attachments on media, see [Media tab - Manage media for your event](#).

Theme editor with fonts -

Kaltura now offers additional branding capabilities via the [Branding tab](#). If your account is configured with custom templates, you may now choose from a preset list of fonts or attach an external stylesheet URL containing your embedded fonts to be used on your event site.

Increased character limit on event and session titles -

We've doubled the character limit on Event and Session titles from 60 to 120 characters, leaving you more room for descriptive titles. See [Kaltura Events Home page - Create an event](#) and all the Knowledge Center articles on adding and editing event sessions, such as [Agenda tab - Add and edit Interactive Room session](#).

Kaltura Events - February 2024

Date Released: February 2024

What's New

Manage access for "closed" Single Sign on (SSO) events -

Kaltura enables hosting of "closed" SSO events, attendees of which are based on existing groups in an Identify provider (IdP). Users who are members of those IdP groups are automatically synced to Kaltura and can log into the said "closed" event.

Event Admin and Event Managers who are authorized to manage the said "closed" event can further manage access to the event via the Event Access tab in the [All users page](#), i.e., granting event access to certain groups, while removing event access from others, and enabling/disabling the option to invite or publish registration for additional users outside of the synced IdP groups.

Closed events are created via a [custom event template](#).

Kaltura Events - January 2024

Date Released: January 2024

What's New

Customize your Lobby page - The Lobby (coming soon) page acts as a "waiting room" or a landing page until the event site is open. You may now customize the look of your Lobby page. Quickly and easily change the banner image, customize the "hero" banner, add new and duplicate existing sections, re-order sections, and so much more! See [Customize your lobby page](#).

Download captions - In addition to editing the caption files, you may now download the captions file from Pre-recorded sessions directly to your local machine. See [Agenda tab - Add and edit Pre-recorded session](#).

Stage Monitor - Event speakers/presenters can now see questions from the audience in real time via the Stage Monitor. Event moderators can use the new Stage Monitor tab in the Moderator app to change the order of Q&As presented to the speaker, edit Q&As, and remove Q&As from the Stage Monitor console window. The Stage Monitor tab also provides direct access to the Stage Monitor console window and a way to copy the link to the Stage Monitor console window to share it with the speaker. See [Moderator App](#).

Conversation ID/Thread ID - As part of our expansion of moderation management capabilities, moderators can now use a unique conversation ID/thread ID as a thread a thread indicator visible in both in the Chat and Collaboration widget in-session moderation and the Moderator App. The conversation/thread ID is particularly useful for moderators' internal communication when there are several attendees with the same name. See [Moderator App](#).

Assistant - Moderators now enjoy a new "Assistant" in the Chat and Collaborate widget, The Assistant offers moderators peace of mind via several functionalities that empower them to more easily moderate and do more with their time during a session.

Kaltura pulls data points right into the session, including attendee numbers, turnout rate (percentage of those registered who are actually logged into the session), engagement rate (viewers who watch in full screen or with the focus on the tab and sound on), and time to end. These real time, crucial metrics keep moderators minded of how their session is performing.

In addition, Kaltura provides "signals" to moderators based on metric trends. Moderators are, thus, empowered to choose appropriate engagement methods based on what's going on in their session. For example, if engagement rates are trending up

(indicated by a green up arrow next to Engagement rate), it may be a great time to send out a poll. Better still, Kaltura provides shortcuts to drive these actions (creating and publishing polls, crowd votes, and chat messages to the group) right inside the Assistant, keeping everything at the moderator's fingertips. See [Events - Chat and Collaborate widget](#) and [Webinars - Chat and Collaborate widget](#).

Set sender name for email notifications - Event managers can now set a sender name for email notifications created from custom templates. In addition to "no-reply@kaltura.events", recipients will now see the *name* you set in the "From" field. This gives a more personalized feel to your email notifications. See [Interactions tab - Emails](#).

Recently viewed events - The Events page now provides Event managers easy access to events they've recently viewed. Clicking on any of these recently viewed events opens them for editing. Instead of searching through the list of events, Event managers can use this new feature to quickly revisit events they are managing. See [Kaltura Events Account Home page - Manage your events plan](#).

Easier assignment of events to Event managers upon role change - When changing a user's role from Admin to Event manager on the Teams tab, you may now quickly identify and assign events to that Event manager without ever leaving the window, similar to the flow when you add a new Event manager. See [Kaltura Events Account Home page - Manage your events plan](#).

Better control over profile pages on the event site - "Bio" information entered when adding speakers, moderators, and event team members displays on profiles pages of the event site. Instead of a simple plain text field, you are now able to better design the look and feel of this information through rich text and you may even add hyperlinks to important related information. See an example on [People tab > Speakers - Invite speakers to your event](#).

Improved flow to manage captions for your Live and DIY live webcast sessions - Edit session pages for Live and DIY live webcasts are improved to allow both the ordering of live captions for a session (before the session begins) and the ordering and upload of captions for a session recording after the session is over (if a recording is present for the session). See [Agenda tab - Add and edit Live Webcast session](#) and [Agenda tab - Add and edit DIY live webcast session](#).

Kaltura Events December 2023

Date Released: December 2023

What's New

Roles & permissions - Kaltura Events now has a new user type – Event Manager.

In addition to the existing Admin user, the Event Manager user type is specifically designed to cater to the needs of individuals responsible for planning, organizing, and overseeing events within the system. This new role can create and manage events but **cannot** access account level settings or analytics or edit other events without being specifically assigned to them.

- **Admin** is the platform admin; the one who has access to all configurations and events created for this account, adds/removes team members, and manages their user type.
- **Event manager** manages specific event(s). The Event manager can view all events but has full access only to events they manage and within them can manage and configure all the different capabilities, settings, content, and people including adding co-event managers to their event team. For more information about event roles, see [Event user roles](#).

This addition allows for more team members to manage events at scale and edit and make changes only to the events to which they have access.

For more information about this new feature, please see [Kaltura Events Account Home page - Manage your events plan](#) and [People tab > Event team - Add team members to your event](#).

Registration Analytics dashboard updates - Kaltura is now providing more meaningful insight into event registration! The Registration Analytics dashboard was recently revamped to include.

- A modification to the registration funnel which displays
 - The number of attendees registered for the event
 - The number of attendees confirmed via verification email (only shows for events with verification email enabled)
 - The number of attendees who attended the event (who logged into the event once at any period of time)
- A chart interface of registrants by origin – be it registration form, webhook, invitation from the admin, via SSO, or if they are admins of the event. Those of each origin who logged into the event (“Attended”) versus those of each origin who didn't log into the event (“No-show”) are differentiated by color.
- A modification to the way we display registrants over time. Now the percentage of registrants on each date out of the total number of registrants is displayed to help you understand the periods at which registration peaked.

For more information on Registration Analytics, see [Analytics tab > Registration analytics](#).

Registration Report updates - Kaltura updated the Registration Report to include data on custom registration form fields! The Registration Report was improved to include additional registration data pulled from custom fields in the registration form like phone number, interests, etc.

For more information on the Registration Report, see [Registration Report](#).

Simplification of registration statuses - Kaltura simplified the way you view registration statuses on the All users page! We are differentiating between two granularities of statuses - a simplified status that gives you a basic understanding of the registration status and a more detailed status that give you more information about the user's current status.

For more information on the All users page, see [All users - Invite attendees to your event](#).

Display of both simplified and detailed status in the People tab - Hovering over the registration status in the All users page reveals a higher granularity of status. For instance, hovering over a user with a registration status of “Attended” may reveal that they visited the site pre-event or during the event. Hovering over a user with a registration status of “Registered” may reveal that they were confirmed via verification email, or they registered but there was no confirmation required. See the following table detailing two levels of status.

Registration Status	Detailed Status
Registered	Registered
Invited	Invited by team member
Invited	Invited by team member to register
Registered	Confirmed email
Registered	Registered no confirmation required
Attended	Pre-event visit
Attended	During-event visit
SSO login	SSO login
Unregistered	Unregistered
Blocked	Blocked

For more information on the People tab, see [All users - Invite attendees to your event](#), [Speakers - Invite speakers to your event](#), and [Moderators - Invite moderators to your event](#).

Kaltura Events November 2023

Date Released: November 2023

What's New

- **UTMs on Registration Report** - As an Event manager, is it critical to discern which marketing campaigns are driving (or drove) the most traffic to your webinar. This knowledge is key to better allocating budgets for current and future campaigns.

Kaltura tracks the source of your registrants through the use of UTM (Urchin Tracking Module) parameters that are embedded as hidden fields in the registration form. UTM parameters consist of the following.

Traffic source (utm_source) - Are your registrants coming from Facebook, LinkedIn, Google, etc.?

Medium (utm_medium) - Are your registrants coming as a result of an email, social media, a referral, etc.?

Campaign name (utm_campaign) - What campaign drove your registrants here? You can base this on your own campaign naming conventions.

This resulting data is displayed as part of the [Registration Report](#).

Kaltura Events October 2023

Date Released: October 2023

What's New

- **Connected use cases; publishing to the video portal** - Event Managers may now publish event content (sessions and media) to video portal(s).
 - Publish sessions from the Agenda page (see [Session publishing capabilities](#)) -

- **Live/DIY recording management** - Live and DIY sessions include automated transition from live to VOD (meaning, once the live session is finished, the recording is automatically published to the event site). Event managers may now remove a VOD after the session and replace it with any video. (See [Agenda tab - Add and edit Live webcast session](#) and [Agenda tab - Add and edit DIY live webcast session](#).)

Session recording

The last recording is published automatically to the session page, but you can remove or replace it with any video.

- **Magic link token on custom/reminder emails** - We now support the magic link token on custom email templates (recommended as the button URL). You can now send a reminder for the event and include a magic link token (for supported events, using login link) so that your attendees can directly login and get a seamless experience. (See [Interactions tab - Emails.](#))

- **Event Side panel updates; People tab** - All user related pages (for users, speakers, and moderators) are now located under a new People tab.

Hello Brian! I would like to know how I can get the recordings

⚠ As a part of this update, old Q&A threads in old sessions (from before Oct 29th, 2023) will be available only in the reports. (see [Analytics tab - Reports](#)).

When entering an old session with old Q&A threads, the moderator will be prompted with the following message:

Please notice: ✕
Due to an upgrade, your old Q&A threads will be available in the reports. To download them, please contact your event admin.

Kaltura Events September 2023

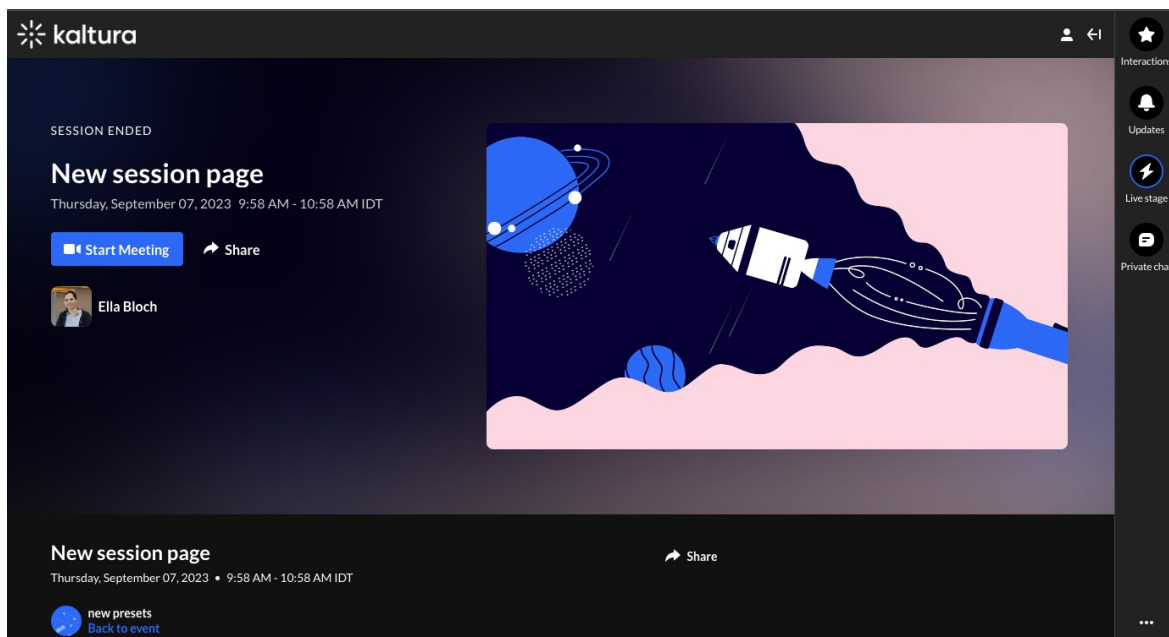

Date Released: September 2023

What's New

- **Preset template updates** - We've updated our preset event templates to include:
 - New design of the session page
 - Embedded C&C
 - Hidden reCapcha

Get started with a template

 <p>Interactive Session</p> <p>Present, speak with your attendees and use engagement tools. Perfect for a small-medium audience</p> <p>Select</p>	 <p>Live Webcast</p> <p>Broadcast a production-level session in real-time. Perfect for a large audience</p> <p>Select</p>	 <p>Pre-recorded Live Session</p> <p>A pixel-perfect session. Record and edit your session in advance, then broadcast it live</p> <p>Select</p>
 <p>DIY Live Broadcast</p> <p>Broadcast a high-quality live session directly from your browser, no production is needed.</p> <p>Select</p>	 <p>Create Your Own</p> <p>Start from scratch and create your own event with our blank template.</p> <p>Select</p>	<p>Looking for something else?</p> <p>No worries, we have tailor-made solutions just for you.</p> <p>Let's talk</p>

- **Brand editor** - Enabled accounts can now use the theme/branding editor per event and create a custom branded experience. This editor brings simplicity and better self-operated capabilities to theming settings, empowering event managers to create a comprehensive experience with their brand front and center. With just a click of a button, event managers now have access to three simplified color options for theming: Neutral, Monochromatic, and Custom. We have also added a dynamic preview feature, providing you with a real-time understanding of your theme's look and feel. [Learn more about branding options.](#)

- **Skip email on invite** - You can now add and edit your speakers without sending them an invite email. If needed you can use the resend email option once you are ready to send them. Learn more about skipping the email invite for [attendees](#) and

- **Assign role with bulk invite** - You can now bulk invite to your event and also assign them a moderator/speaker role so that if for example you have a regular group of speakers/moderators you can have a ready-made csv file you can re-upload on new events to save you time. [Learn more about bulk invite.](#)

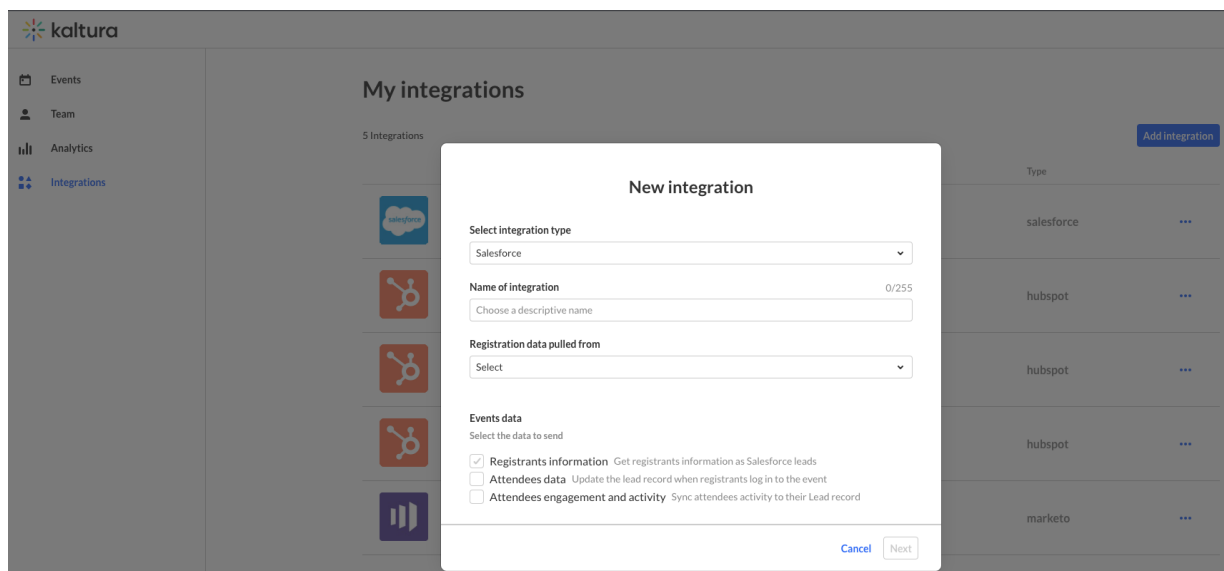

- **Support magic link email token on custom/reminder emails** - We've added the option to use Magic Link on custom email templates, so that you can now send a

reminder to the event and include a login link so that your attendees could directly login and get a seamless experience. [Learn more about customization tokens.](#)

- **Salesforce integration** - You can now select Salesforce from the integration types and push leads to Salesforce as campaign members, update on their attendance status, and sync engagement data. [Learn more about Salesforce integration.](#)

The screenshot shows the Kaltura interface for a campaign titled "pre-recorded magic link - new". The status is "Planned". Below the campaign details, there are sections for "Campaign Hierarchy (0)" and "Campaign Members". The "Campaign Members" section features a donut chart titled "Number of Members" with a total of 82 members. The chart is divided into three segments: 11 (light blue), 27 (dark blue), and 44 (medium blue). A "View All" link is located at the bottom of the chart area.

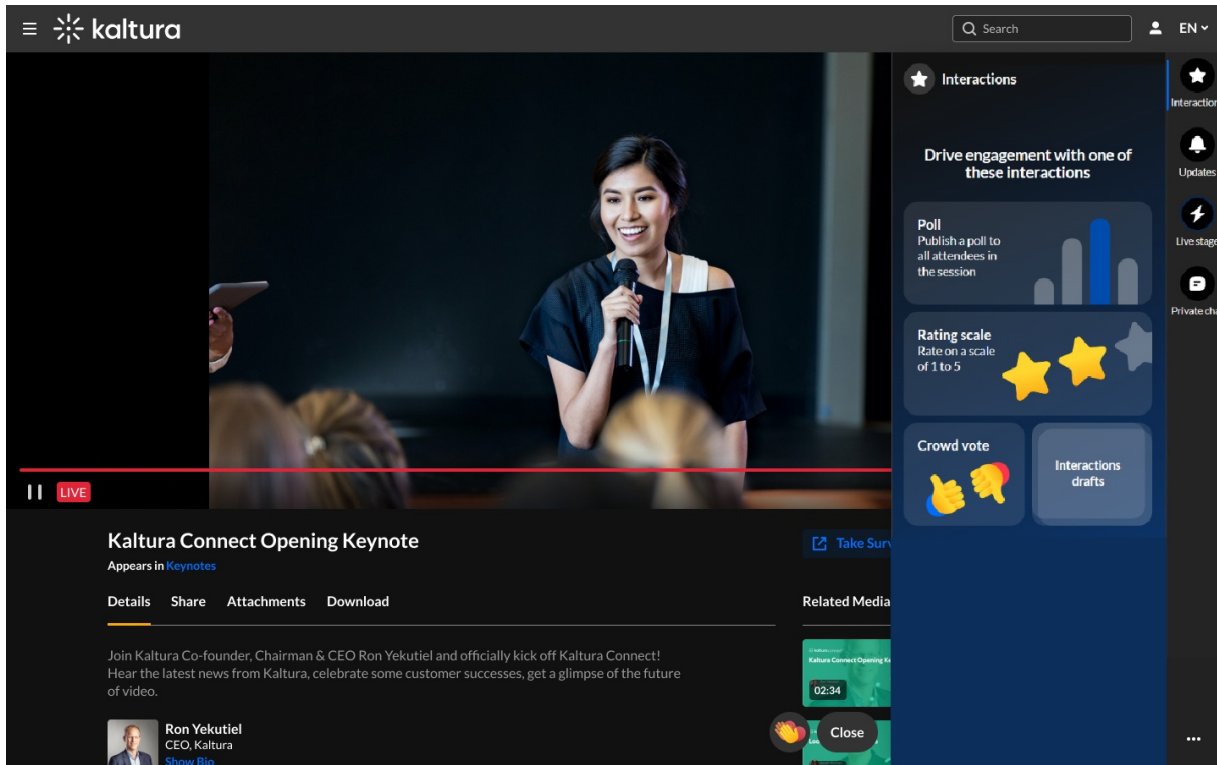

Kaltura Events August 2023

Date Released: August 2023

What's New

- **Interactions tab** - The Interactions tab is a central place where event moderators can elevate their sessions. Three interactions options are now available:
 - The existing polls.
 - Rating scale polls - The new rating scale polls empower moderators to create engaging polls that prompt attendees to rate their response using a selected emoji, based on a scale of 1 to 5. Use this poll to understand how your attendees are feeling and to increase their engagement in the session.
 - Crowd vote polls - The new crowd vote polls allow moderators to quickly publish a poll with a ready set of emojis as an answer. You can either write your question or ask it out loud when publishing the poll. Use this poll to gather opinions fast and gain instant insights.
- In addition, the existing poll report includes data on the new poll types, and we've added "Poll Type" and "Emoji Type" columns to the report for richer insights.

For additional information, please see [Chat and Collaborate Widget](#).

Kaltura Events July 2023

Date Released: July 2023

What's New

- **Registration form customizations** - Event managers creating a new event can now modify their registration form and choose which data to collect on their attendees so they can leverage this data after the event. Registration form customization includes changing the field's display name, order, deciding which field should be mandatory per event, or removing/adding fields from a fixed field list, as well as updating 'section' names.

Our preset event templates (on newly created events) now have additional fields available for event managers to add, such as city, zip code, bio, industry, and role. If you are using a custom event template, contact Kaltura to add fields to your form. For additional information, please see [Set Up Registration for Kaltura Events](#).

The screenshot displays a registration form with two main sections: "Contact Details" and "Work Info".

- Contact Details:** Contains three fields: "First Name (required)" (Free text), "Last Name (required)" (Free text), and "State (required)" (Dropdown). A "+ Add Field" button is located below this section.
- Work Info:** Contains three fields: "Job Title (required)" (Free text), "Company Name (required)" (Free text), and "Bio" (Free text). A "+ Add Field" button is located below this section.

A dropdown menu is open over the "Work Info" section, listing the following options: City, Country, Industry, Role, and Zip code.

- **Scheduled session analytics (Live) -**

- Session engagement heatmap: In this dashboard, admins can see engagement of users who attended the session, specifically when they were engaged and for how long. This dashboard displays minutes viewed, reaction clicks, and hand raises for each attendee. All of these indicate the level of the attendee's engagement, which can help admins improve their content, and speakers' presentation and help them understand in real-time whether they need to catch the audience's focus with our engagement tools (e.g. send them a notification).

- **Recording analytics -**

- Recording performance over time: Event organizers can now differentiate between the real-time session's data and the recording's data and receive a

whole session story with a better understanding of their gated sessions' audience and relevance.

- **In-session polls -**

Now, moderators can effortlessly publish polls and save poll drafts without ever leaving the chat widget interface. These in-session polls are fully synchronized with the moderator app, ensuring a seamless experience across both platforms. Any poll created in one app will be instantly visible in the other.

Kaltura Events June 2023

Date Released: June 2023

What's New

- **Login link via email (aka magic link)** - Event managers creating a new event using a preset event template can now decide how they would like for their attendees to log in - using login link (aka magic link) or using username and password. Once selected, the following happens.

- The default registration form is modified to use only email (no password field).
- The relevant system emails (invite, registration confirmation) use the magic link on their CTAs.
- A new system email, “login email” is displayed and can be customized (this is the email attendees will receive when they try to log in to the event site).
- The event organizer is able to regenerate the login link from the users tab in case attendees are having issues logging in or not receiving the email as expected.

Let's get started

Start with a few details about your event

Title 19/60

My magic link event

Short description

Notes -

1. Once set on create event, you cannot change the authentication via Kaltura Events, only as a managed service.
2. If you are using custom event templates with magic link (email login), you will **not** have the option to select the authentication on create event but you will have the new login email available, the relevant token, and regeneration option on users tab.

- **Captions on media** – Following Simulive sessions, event managers can now upload and order captions (via Reach) on Media (VODs). You can find the captions tab on videos under the media tab (just like on sessions).

- **Pre-recorded (Simulive) sessions - Select video source from library** - Event organizers can now reuse the same video source and select from a library instead of uploading it twice. This can be used for 'follow the sun' type sessions or even as a simplified Simulive production when you record yourself on an interactive room and use the recording as a Simulive source without downloading/re-uploading the same video. In addition, Simulive video sources you've uploaded are now available on the Media tab (and set as "private"). Note that these do **not** need to be published. If you publish them, they will appear on the media section of the event site **in addition** to the Simulive session.

- **Upload and order captions-** Event organizers can now order (via Reach, when configured on the account) or upload caption files for their pre-recorded sessions and media videos (on Session Edit and on Edit Media Videos screens). Ordering and uploading captions for pre-recorded sessions is available once you have a 'ready' video source (uploaded or selected from library).
- **Private media** - Similar to private sessions (on the agenda), Kaltura now offers "private" visibility on media/VODs. Event organizers can now completely hide a VOD from attendees by changing the visibility to "private" and control their content access even better. This can be used when you don't want the media to be available for attendees or when using a recording of a webinar as a pre-recorded video source.

- **Block from chat** - Event managers can now block attendees from using the chat/interaction features from the Users list. Blocking from chat is available on the Users/Attendees action menu for users who logged in to the event **and** accepted the terms (if required). Once the user is blocked, they will not be able to interact and send messages/start conversations on the chat.

- **Auto login** - Event managers clicking event site links (Event site, Registration page, Session page, etc.) will now be automatically logged in and be able to view the event site seamlessly.
- **In-session moderator chat** - This feature allows moderators to answer Q&A directly from the chat widget itself, eliminating the need to navigate to another screen. Now, moderators have the flexibility to choose whether they prefer answering audience questions from the chat widget, the moderator app, or both.

Kaltura Events May 2023

Date Released: May 2023

What's New

- Private Session – Event organizers can now completely hide a session from attendees by changing the visibility to private, making it available to event admins only. This can be used when you do not want the recording to be available for attendees or while editing a session on an existing event.
- Share and Embed – Event organizers can now share their live sessions and stream them on other social platforms as well as copy the embed code and embed the session on a different site.

Kaltura Events April 2023

Date Released: April 2023

What's New

- **Events Showcase** - An amazing tool to promote events and brands has arrived! Admins and event hosts can now share or embed this beautiful page, showcasing their past and upcoming events and webinars. Marketers can easily use this page to promote their entire events portfolio. Event organizers can select specific events from their event list they want to "showcase" and publish them to a new page which they can send to prospects and also embed on their website. They can also customize the showcase page's title, description and logo as well as theme (light or dark) for the embedded version. Read more about this new feature [here](#).
- **Custom Email Reminders and Notifications** - A great addition to Kaltura Events now allows admins and event hosts to send email reminders and notifications to their registrants and attendees to keep the attendance and engagement rates high. They can manage and send different email template like event reminders before and during the event, upcoming events to keep the audience close or a feedback request after the event is over. An email can be sent on demand to all/speakers/moderators. Read more about this new feature [here](#).

To make it easier, we've created a few basic templates to start from when using our present event templates:

- **Send a reminder** - Bring awareness to the site, calling registrants to check the speakers and agenda, wander around and watch some VOD stuff.
- **Notify your audience** - Attracting registrants to join the event after it has started.
- **Spread the word** - Inviting attendees to share content, making it clear that the recordings are available and that the site is open for registration.
- **Promote content** - Providing extra content regarding the event's subject with a spotlight on the company blogposts, products, etc.
- **Get feedback** - Asking participants for feedback with an external form.
- **Upcoming events** - Showcasing the company's upcoming events.

Customers using custom event templates can also have their own set of 'preset' email templates.

- Q&A chat Auto-Reply - Event organizers can now define an automatic response for the Q&A chats from the chat settings (Interactions>Chat settings). The auto-reply can help ensure that participants in our event receive a quick response to their questions, even if there are no available representatives to respond at the moment. This can improve satisfaction and trust during our events.

Kaltura Events March 2023

Date Released: March 2023

What's New

- New Reports tab - A new tab designed to help event organizers easily access all available reports for their events in one convenient location. With this new page, event organizers can quickly download reports without having to navigate through different pages or modules. Each report has a link to our knowledge base, so admins can easily understand the report they are downloading and make better use of the data it provides. Read more about this new feature [here](#).

The new Reports page also includes new reports: Chat user activity, Chat moderation, Moderator transcript, Group chat transcripts, and Polls activity.

Important to note:

- Some reports may require you to choose specific time frames or sessions before downloading the report.
- Some reports will be available only on newly created events. To see all available reports, create a new event.

Kaltura Events February 2023

Date Released: February 2023

What's New

- Live captions: Event organizers can now order live captions for their live webcast and DIY sessions. Check captions tab on edit session. Note that the ability to order live captions requires Reach services. Contact Kaltura to learn more.
- Hide notifications: Event organizers have the option to hide a notification that was already sent directly from Kaltura Events. You can also show it back again.

Kaltura Events January 2023

Date Released: January 2023

What's New

- Event admins can now create their own personalized invite email template for an event — banner and customization tags included. Stop by the Emails tab in the events platform today, and start customizing your own event invitation template.

Kaltura Events December 2022

Date Released: December 2022

What's New

Running events from more than one account? Now you can smoothly switch between accounts from within Kaltura Events, and run your entire events program with ease.

Kaltura Events November 2022

Date Released: November 2022

What's New

- Our Kaltura Events media tab just got major a revamp! Now you can upload, view, manage, and publish all your VOD and interactive room recordings — all in one place.

Use the Media tab to make your life easier in the run up for your next event—everything is at your fingertips. And yes, your interactive room recordings will magically appear there too!

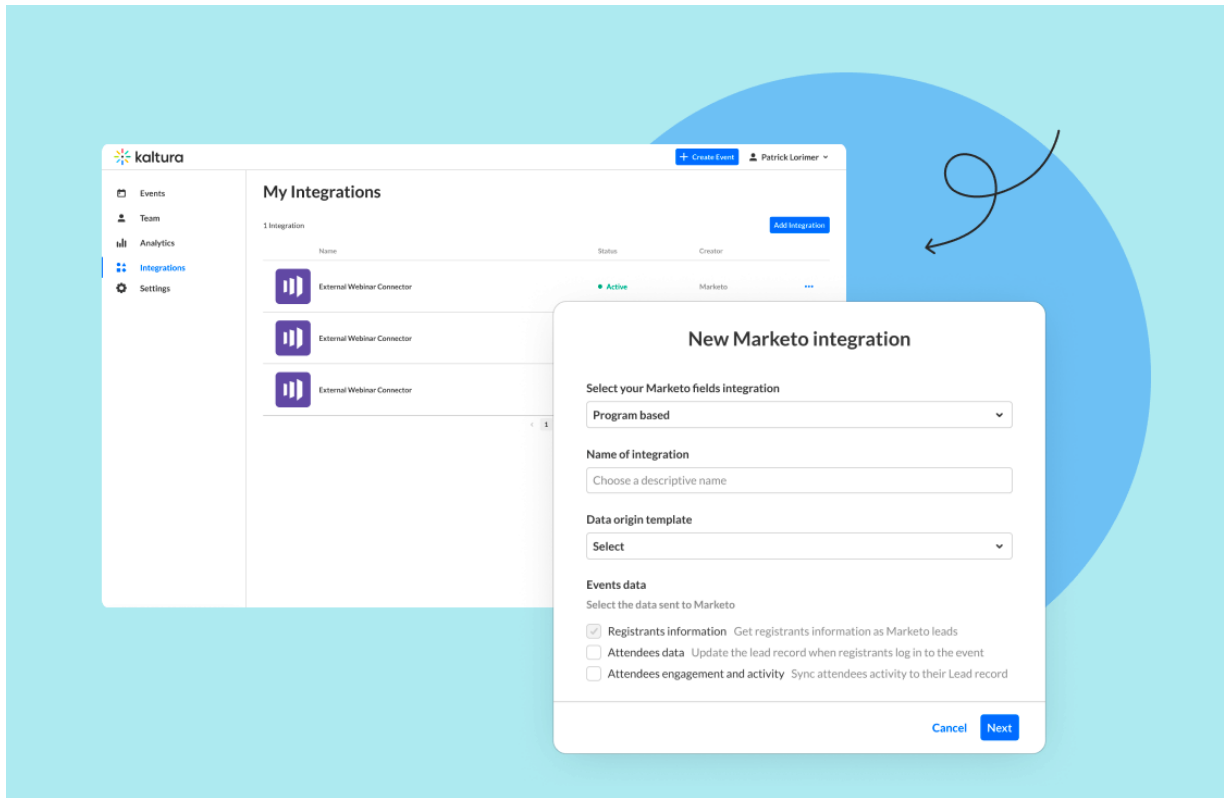

Kaltura Events October 2022

Date Released: October 2022

What's New

- This month we've enhanced our connection with Marketo and added a pre-built Marketo integration to Kaltura Events! That means that for every event, large or small, all the awesome leads that register are immediately synced into your Marketo account. And the best part is — it's all done automatically.

When you connect Kaltura Events with your Marketo account, everyone's registration, attendance, and most importantly, engagement data is synced and updated with no extra effort.

Please see [Marketo Integration for Kaltura Events](#) for more information.

Kaltura Events September 2022

Date Released: September 2022

What's New

- Schedule moderated Q&A for sessions to ensure your participants are able to contact a moderator and ask their question privately. Find it under “Chat Settings” in the Events Management, where you can also set a welcoming text.

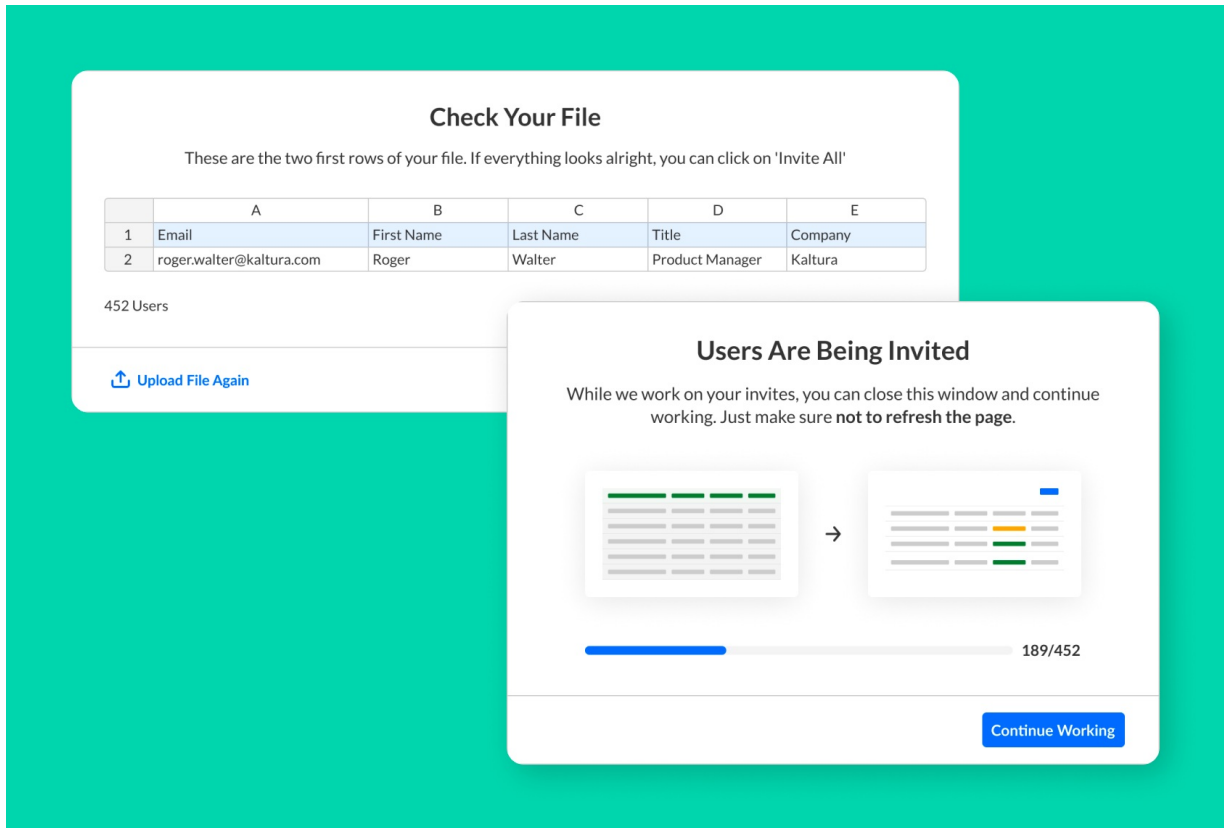

Kaltura Events August 2022

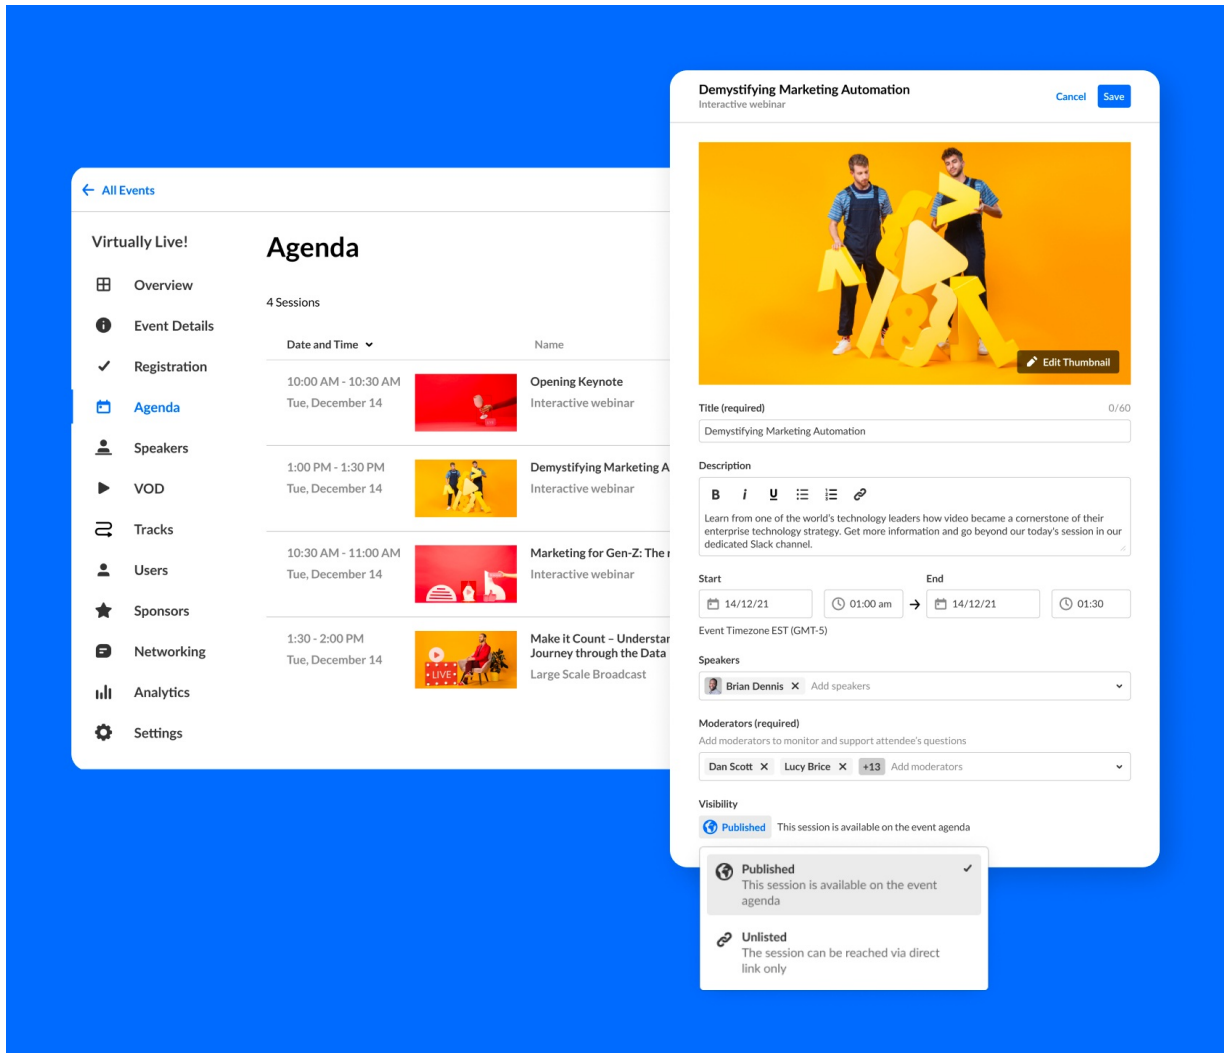

Date Released: August 2022

What's New

- Invite multiple attendees in a flash with our **new bulk invite button!** In addition to individual invites, you can now upload a CSV file and send invitations to an entire list with a click. Easy as that! Then you can move on to organizing the rest of your event.

- Manage which items are visible on the event’s agenda with the **new unlisted mode**. Now YOU decide whether a session can be seen and reached through the agenda page, or via a direct link only.

- Need to take a quick look at your session page as you're editing it? Now it's easy: we added a new button to take you from the agenda tab in the management area - **straight to the session** on the event site!

Kaltura Events July 2022

Date Released: July 2022
