> 👥 **This article is designated for all users.**

The Registration report provides registrants' information from your registration form. It provides a list of attendees, their current registration status, registration origin (e.g., registration form, invitation, etc.), and all registration form fields data (including custom fields).

> 💡 See Analytics tab - Reports for instructions on generating and downloading this report.

Data in the Registration report may include the following, as is relevant, and may include additional information per registration information:

- User ID
- Origin
- First name
- Last name
- Email address
- Title
- Company
- Language
- Country
- State
- City
- Zip code
- Profile pic (URL)
- Bio
- Status Group
- Status
- Created At
- Last Login Type
- Last Login Date
- Status Update Time - timestamp + timezone
- Any other registration data, for example, phone number, interests, etc.
- utm_source
- utm_medium

- utm_campaign

Generating the report may take up to a few minutes (depending on number of registrants).
