

User activity report

Last Modified on 11/23/2025 7:06 pm IST

 This article is designated for all users.

The User activity report provides information on participant chat and engagement activity.

See [Analytics tab - Reports](#) for instructions on generating and downloading this report.

Data in the User activity report includes the following:

- id - A unique ID of the user (attendee, speaker, or moderator).
- email - The user's email
- connections - The number of connections the user had during the event.
- internalReceived - The number of messages received from other attendees.
- internalSent - The number of messages sent to other attendees.
- externalReceived - The number of messages received from moderators.
- externalSent - The number of messages sent to moderators.
