About

 The [Theming](#) design system is currently in a limited features release mode. The following features are not available for **channels** as of date of publishing, but are under development and will be available very soon: [Moderation](#), [Search](#), [Add media](#), and [Remove media](#).

Exciting news! We've launched our new Theming design system to give your Video Portal more flexibility and easy customization options!

- ✓ **Technology** - Aligned with industry-leading standards to assure faster, slicker, and better UI.
- ✓ **Branding** - Incorporate branding elements such as colors, logos, and typography to create a cohesive and recognizable visual identity for the website.
- ✓ **Design principles** - Reuse of elements and components from the layout, and coherence in the design buttons, forms, and navigation menus that can be combined to create consistent and efficient designs.
- ✓ **Accessibility** - Prioritized accessibility to ensure all users can easily access and use the site.
- ✓ **Responsive design** - Ensures usability across various devices, from desktops to mobiles.
- ✓ **Design language** - Clear terminology and naming conventions for design consistency.
- ✓ **Room to Grow** - Our new page builder allows you to create as many different pages as you want, with as many elements as you want on each page.

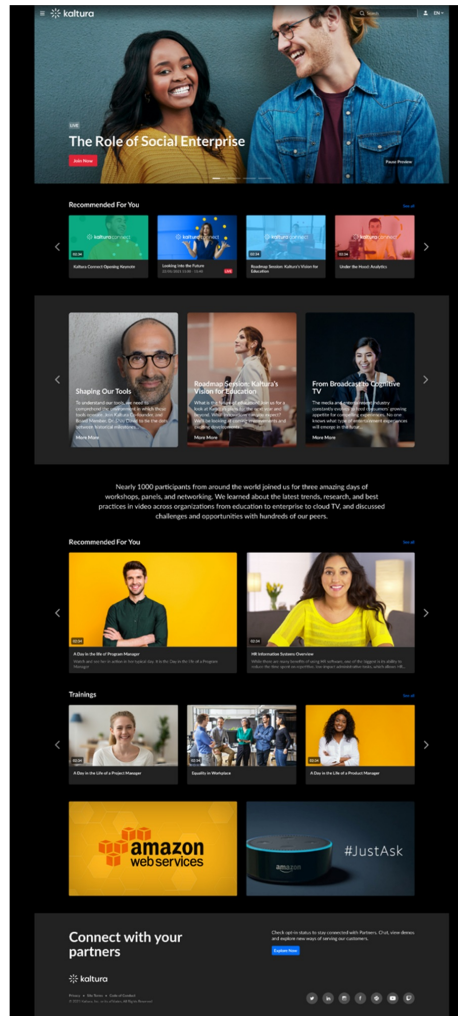

Check out the new template page!

Dynamic **Hero Unit** gives your homepage a great vibe

News items lead to articles

Playlist with two elements

Clickable images with hyperlinks

← Slim, clean **Header**

← **Playlist** with four elements

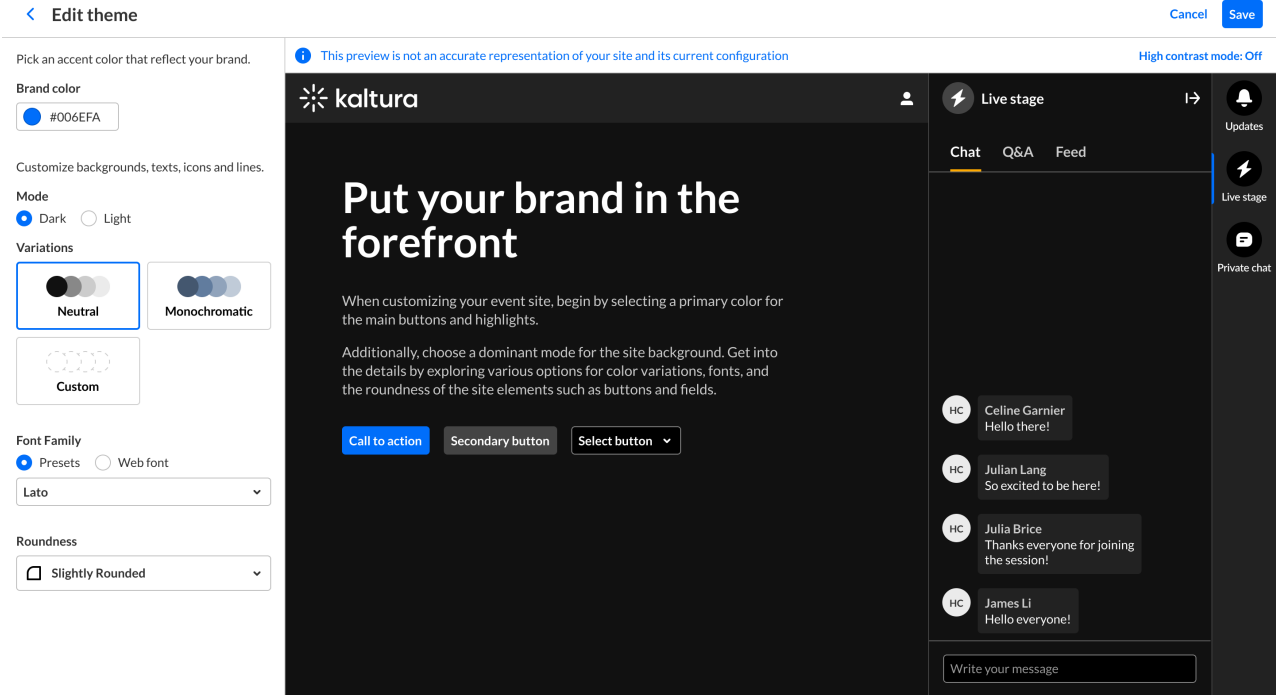

← **Plain text**

← **Playlist** with three elements

← **Spacious Footer** allows for more items

Theme Builder

A new and improved **Theme Builder** to replace the previous Styling Page is now available! Instead of customizing each element, menu, and button individually, you simply set a theme once and it will be applied across your site. Select a light theme / dark theme or customize your own theme.

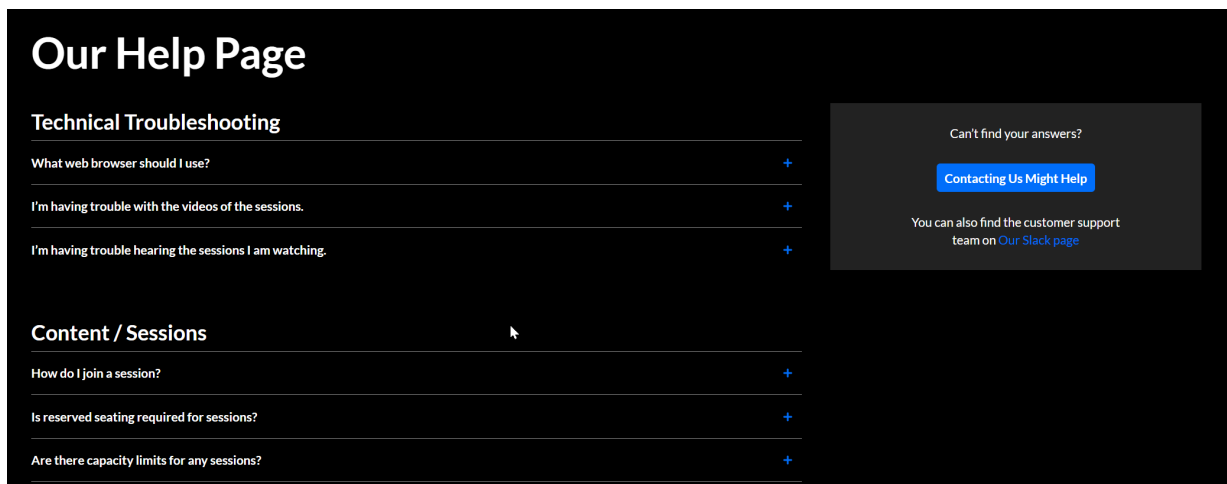

Add new pages to your site

Here is a list of new pages we've created for you.

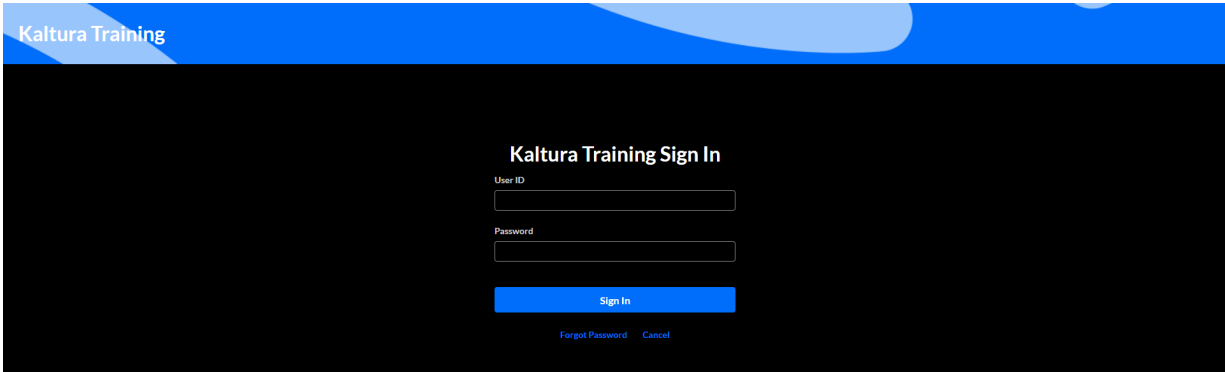

Help page

Do you want a Help Page with FAQs or Q&As? Now you can! The new Help Page can be separated into sections according to topics. You can add a title and a "Contact us" button which sends users to a dedicated URL or allows them to send an email (see example below). For the setup guide, see [Helppage](#).

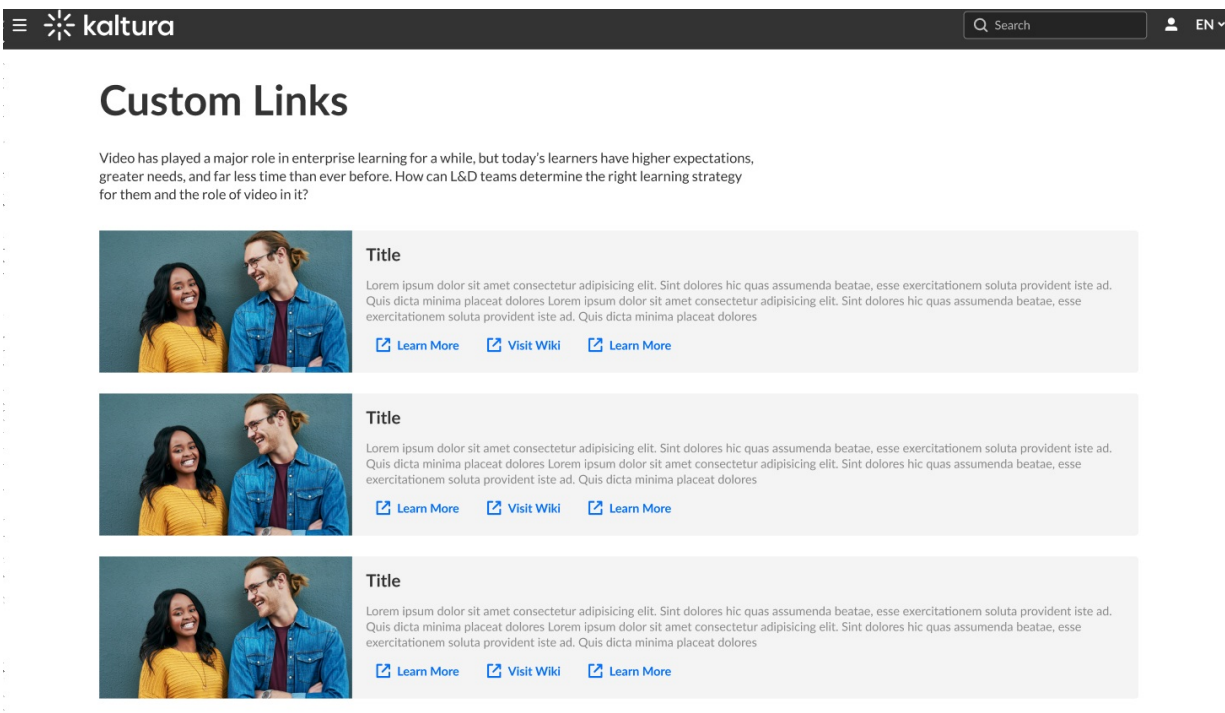

Login page

Our newly designed login page gives you the option for adding text and logo to fit your branding. For the setup guide, see [Login](#).

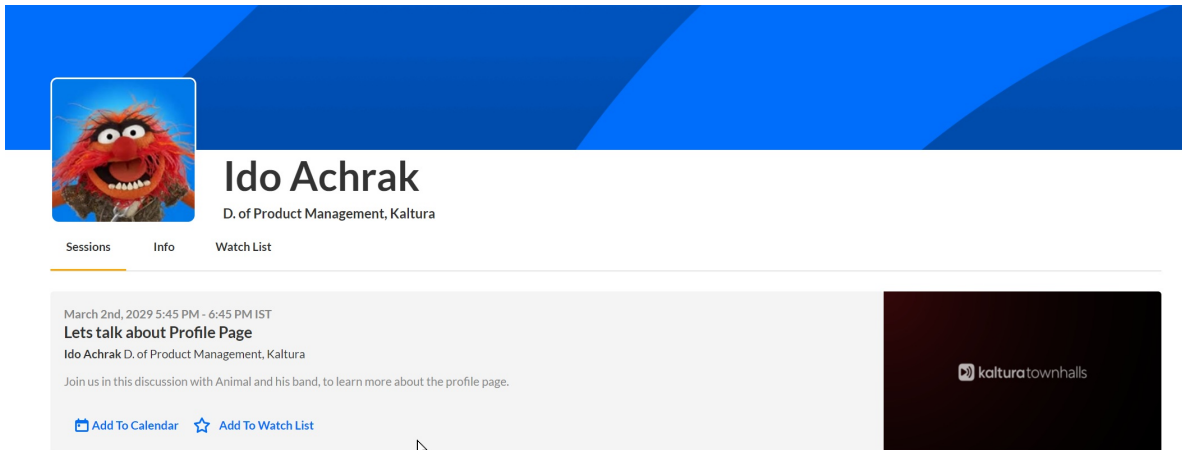

List page

This brand-new page is a list of links that can be used to spotlight special topics. You can customize the list with different titles, descriptions, and thumbnails (see example below). For the setup guide, see [Listpage](#).

Personal profile

Give your users their own profile page with their own bio, content, and great design. For the setup guide, see [Personalprofile](#).

Channels page

The Channels page got a facelift now allowing you to add your company logo, or any icon that represents what each channel is about. You can also add a 'welcome video' that will play automatically each time you navigate to this channel. For the setup guide, see [Channelthemingui](#).

Channel collections

Instead of having all your channels listed on one page as we had before now, you can create Channel Collections. A channel collection contains multiple channels that may be displayed as a grid or as a list. The collection may also include filtering options specific to the collection and manual sort order for the channels in the collection. For the setup guide, see [Channelcollections Module](#).

Groups page

Once enabled, this module allows you to create a dedicated 'group page' where users from a group are displayed in a tidy grid layout, while promoted users take the spotlight in a carousel. It's the perfect tool to organize and highlight the standout members of your community or enterprise. For the setup guide, see [GroupPage Module](#).

Add custom pages using pre-built templates

You don't have to be a designer to create the pages you want! You now have creative freedom using a variety of great new components that you can mix and match.

With the new page builder, you can create as many different pages as you want, such as several Home pages or special landing pages. It gives you all the tools you'll need to refresh the look and feel of your site and help gives that WOW effect that you can be proud of. For the setup guide, see [Create and Use a Template Page](#).

Here is a list of new components we've created for you.

Playlists

The new [Theming Feature Set](#) gives your playlists an attractive new design with more options. You can choose to have 2 to 4 thumbnails (shown above) as well as control the number of seconds that pass before the new set appears. Very useful for presenting something 'fresh' such as 'Most viewed' or 'Recently added'.

Clickable images

Attract your users with engaging images that redirect them to any web page of your choice.

Footer

No longer just an HTML box! The new and improved footer configuration allows anyone to create an attractive new footer without needing to touch a code.

Header

The new navigation bar has a slim & sleek look. You now have the option to have a 'clean' navbar (shown in image above) limited to only one or two items such as a call-to-action button and a custom logo.

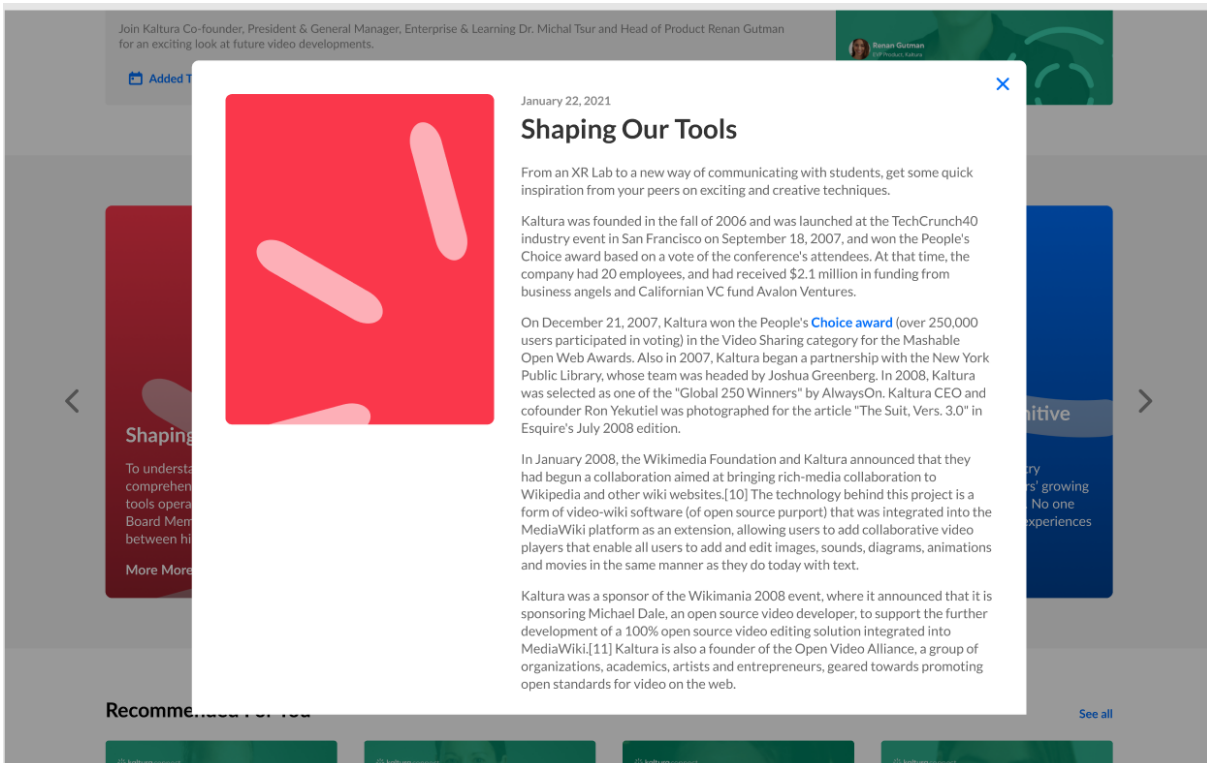

Hero Unit

You can select from two types of navbars: **Player Carousel** (see example in image above), **Text & Counter** (see example below), or you can decide not to have a hero at all.... the choice is yours!

News Items

Have a playlist of articles in the form of a carousel. Each image on the carousel opens to an article, as shown below.

Plain text

Use this tool to feature content such as a 'welcome' message, an introduction to your site, or a content policy. You control the color of the text and the background.

Registration

This component makes registering quick and easy for users. By clicking the "Register" button, the registration page opens on the side of the page for easy completion (as shown below). No need to navigate elsewhere!

Collection of channels

This feature gives users an easy way to explore and access channel collections. Clicking 'See All' will take users to your channel collection page. If you don't have any channel collections yet, you can set them up in the [ChannelCollections](#) module.

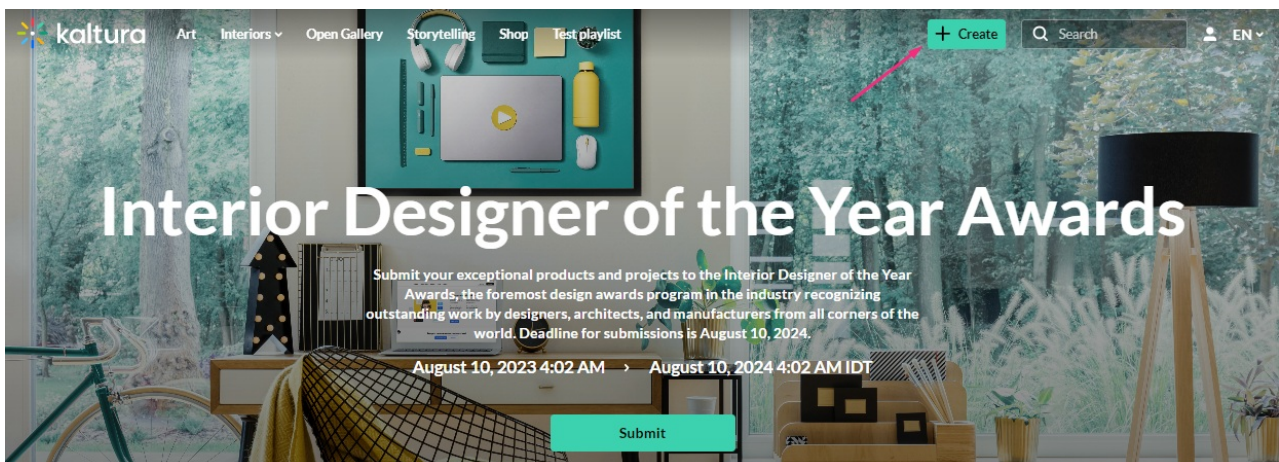

Banner & CTA

This component provides a banner with text, a call-to-action button and background image.

That's not all ... check out these other new features!

+Create menu

Upgrade your site with a newly designed **+Create** menu to replace the previous [Add New](#) menu. For the setup guide, see the [AddNew](#) module.

Upload media

Now you can save time by uploading, editing, and publishing all your media in bulk! For the setup guide, see [Uploadmedia Module](#).

🔄 1 In Queue • 1 Uploading • 1 Ready

Drag and drop files to upload

All common video, audio and image formats in all resolutions are accepted.

[Select Files](#)

3 All Media		Cancel All Uploads	Set Privacy to All	Edit All
	Walkthrough In Queue	Cancel Upload	Private	Edit
	Virtual Event Demo Uploading 10%	Cancel Upload	Private	Edit
	Product Tour Ready	Media Page	Private	Edit

Ready to get your new theming on? Check out this setup guide [Getting Started with the Theming Module](#).
