

Enable clipping on a media item

Last Modified on 04/01/2026 7:29 pm IDT

 This article is designated for all users.

About

Clipping creates a new entry from an existing one and lets you control the start and end time for the new entry.

This is very useful if, for example, you want to shorten an intro to a long lecture or clip the lecture into several shorter clips divided by subjects.

The clipped content appears in **My Media** as a new entry and doesn't affect the original one.

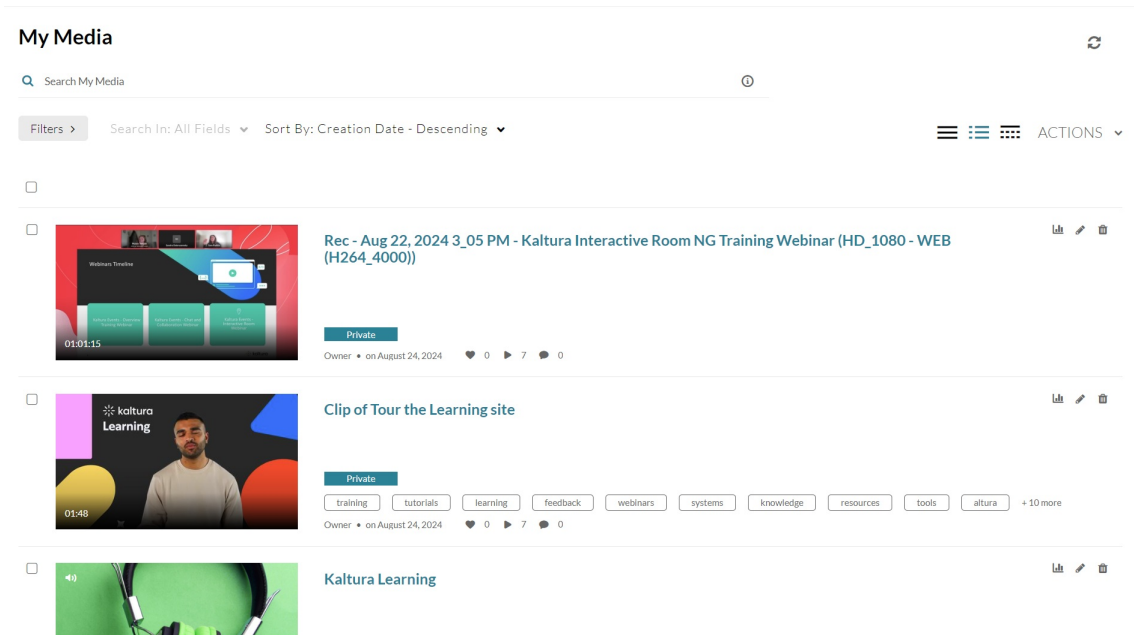

Media owners can enable clipping on a media entry for any user with 'privateRole' or higher to create clips from their video.

Access the clipping settings

1. From the user menu, select [My Media](#).

The My Media page displays.

My Media

Search My Media
