

# Restore deleted items from the recycle bin

Last Modified on 08/05/2024 2:20 pm IDT

 This article is designated for all users.

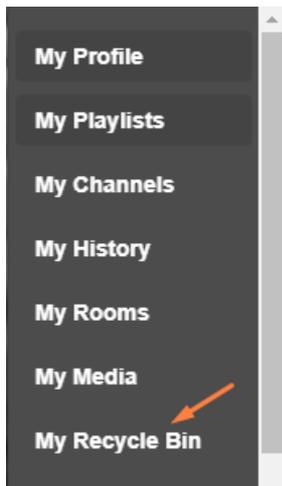

## About

Did you delete something and now you want it back? Accidents happen, but don't worry, you can easily restore deleted items without needing to ask your administrator.

 The following instructions require the [Recyclebin module](#) to be enabled.

## Restore a single item

1. Go to the user menu  and choose **My Recycle Bin**.

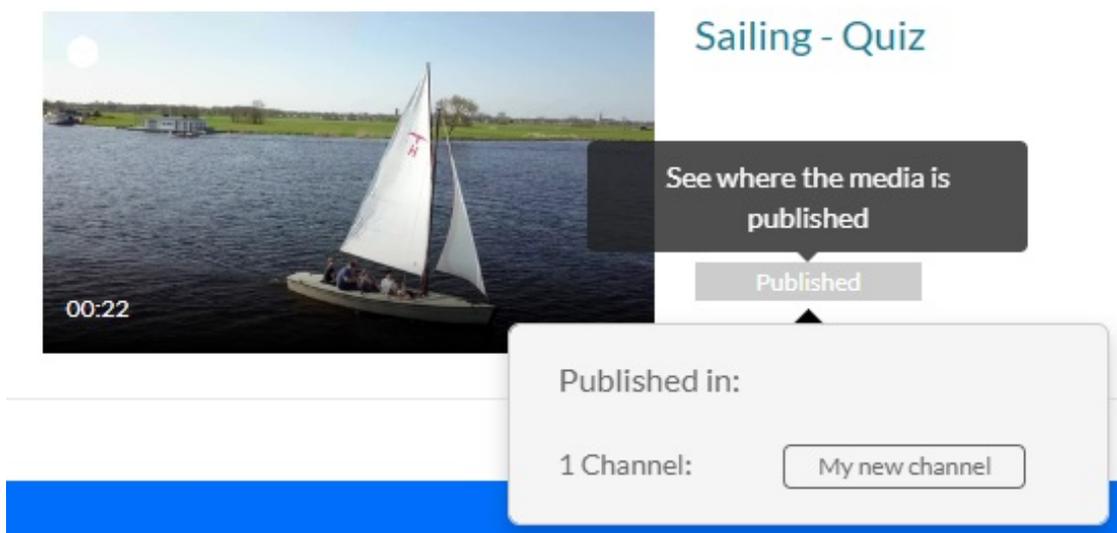

The Recycle bin page opens.

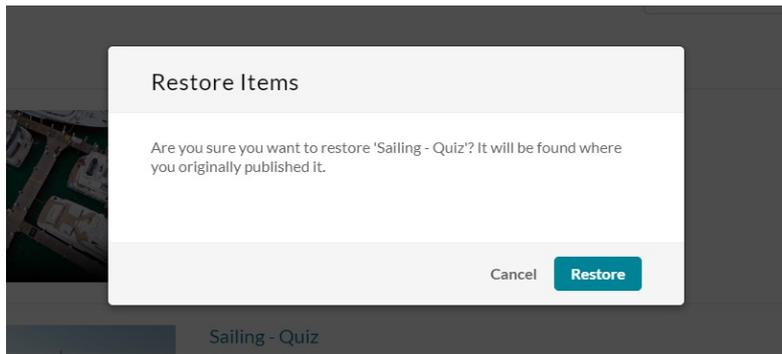

Here you can see all the media items that have been deleted. The publish status of each item is grey. If you click on it, you can see where the media was originally published.

 Only users with content ownership are able to see the deleted media in the recycle bin. Guest users won't have access.

For non-published status (such as private and unlisted) the status won't be clickable, and nothing will happen when hovering over it.

- To restore the item, click the restore icon  .  
A confirmation message displays.

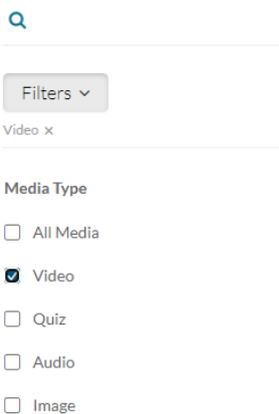

3. Choose **Restore** or **Cancel**.

The item is recovered and restored to its original place.

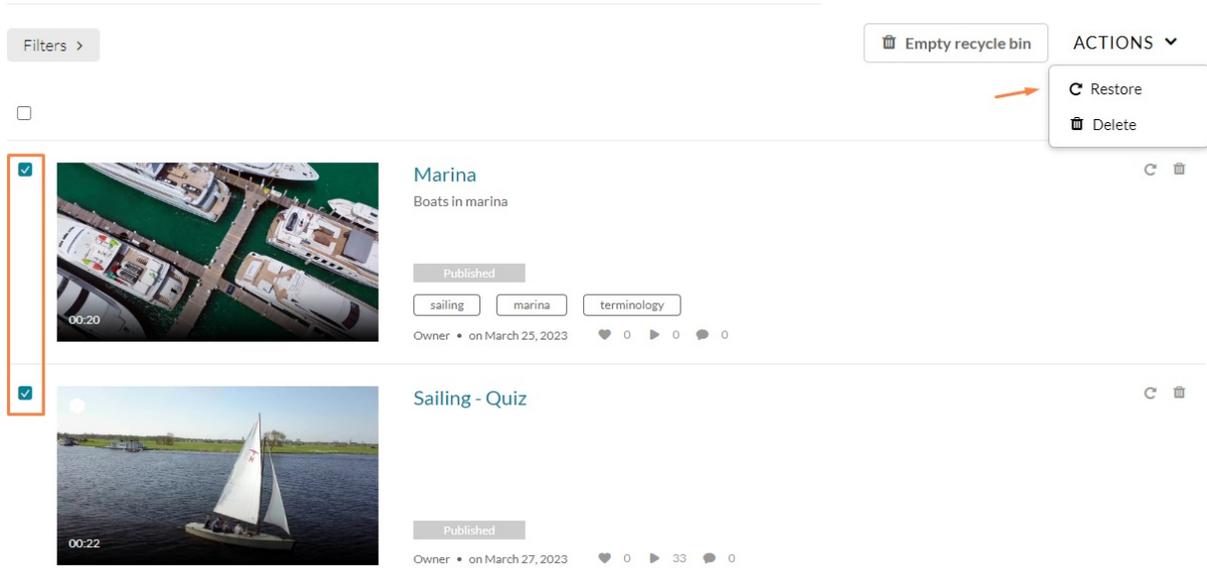

## Restore multiple items

If there are many items in the Recycle Bin, you can use the **Filters** function to search the media items by type.

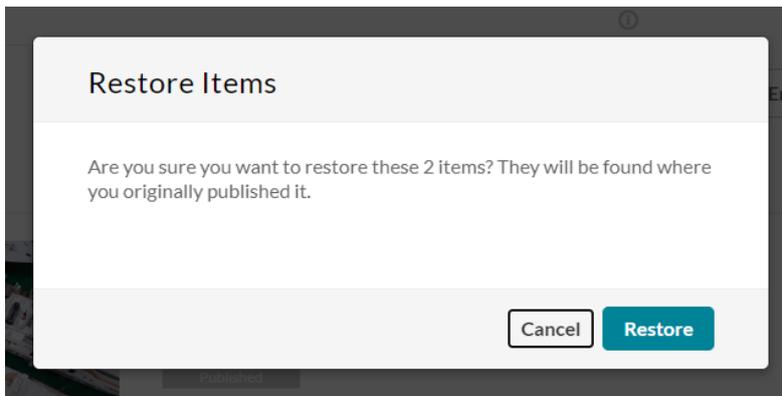

### Recycle Bin

1. Click the boxes next to each media item you want to restore.
2. From the ACTIONS menu, choose **Restore**.

A confirmation message displays.

3. Choose **Restore** or **Cancel**.

The deleted items are recovered and restored to their original places.

 The **recycle bin retention period** (number of days items stay in the recycle bin before being permanently deleted) is configured by Kaltura account management or the Customer Care team.
