

# Create role-based rules for channels

Last Modified on 01/27/2025 10:00 am IST

 This article is designated for all users.

## About

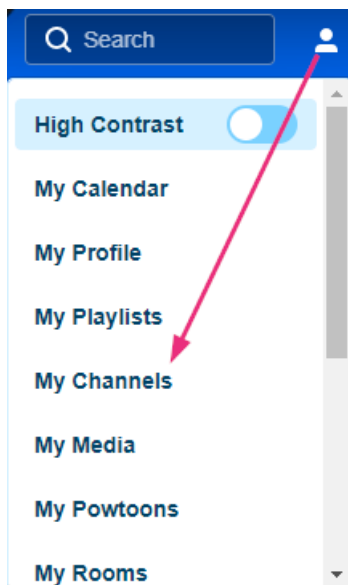

With REACH services, your videos can have quality captioning and transcriptions, featuring machine or professional human captions. To order services (captions, translations, audio descriptions, or chaptering) for a channel, simply create a role-based rule for the desired service. These rules will automatically trigger caption requests for entries meeting specific criteria.

Please note the **categoryRuleOrderRole** field must be configured by your administrator in the [REACH module](#).

## Access the channel

1. From the user menu, choose **My Channels**.

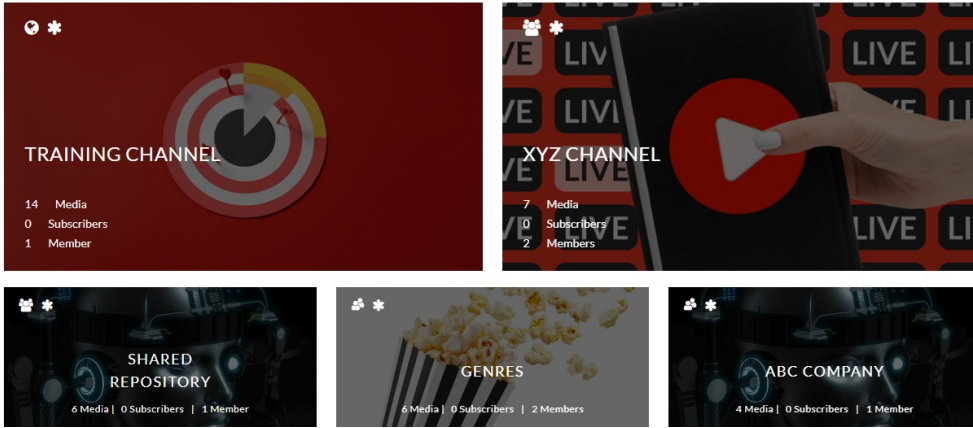

2. The **My Channels** page displays.

## My Channels

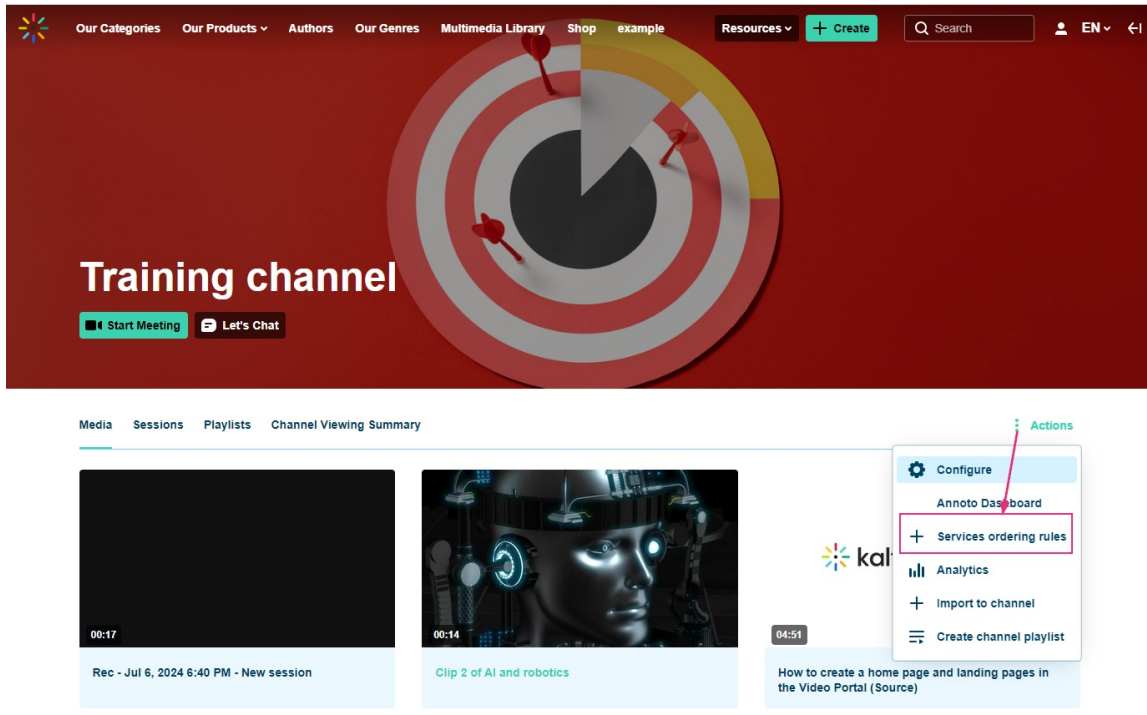

Search For Channels

Filters ▾ Sort By: Media Count ▾

+ Create Channel

3. Click the channel thumbnail to select it. You can select more than one channel.
4. Choose **+Services ordering rules** from the **Actions** menu.

5. The **Captions and Enrichment Services** page displays.
