

# Moderator app

Last Modified on 09/09/2024 3:22 pm IDT

**This article is designated for moderators.**

## About

This article describes how to use the moderator app.

 You must be assigned as a moderator to the relevant sessions to use the moderator app.

The moderator app is a place for moderators to manage big events. In the moderator app, moderators can:

- Organize, manage, and answer Q&A threads
- Publish a poll
- Publish a Q&A
- Answer private chats

## How to access the moderator app

There are three ways to access the moderator app.

From Kaltura Events:

Click the Interactions tab, then click on Chat settings.

The screenshot shows the 'Chat settings' page for the 'Sales Kick-off 2023' event. The left sidebar contains navigation options: Overview, Event details, Branding, Registration, Agenda, Media, People, Interactions, Emails, Notifications, Chat settings (highlighted), Analytics, Integrations, and Settings. The main content area is titled 'Chat settings' and is divided into two sections: 'Conversation' and 'Moderation'. The 'Conversation' section has three toggle switches, all of which are turned on: 'Private chat' (Allow 1:1 chat conversations and search between attendees), 'Page group chat' (Allow attendees to participate in a group chat across all pages), and 'Session group chat' (Allow attendees to participate in a group chat in all the sessions). The 'Moderation' section is titled 'Define your live sessions moderation schedule.' and includes two input fields: 'Start moderation' (set to 10 Minutes before the session start time) and 'End moderation' (set to 10 Minutes after the session end time). There is also an 'Auto reply' toggle switch, which is currently turned off. A 'Share moderation app with your moderators' callout box is highlighted with a red border, containing text about audience engagement and a 'Copy app link event' button. 'Save' buttons are visible at the end of both the Conversation and Moderation sections.

	Click to open the moderator app.
<a href="#">Copy app link event</a>	Click to copy the app link event and send it to moderators.

From the site page:

Click on the three dots in the lower right corner of the Chat & Collaboration widget screen and click **Open app**.

Via a direct URL:

Example - "<event site>/chatandcollaboration/index/moderator"

## Moderator app - Live stages tab

**Live stages** tab is a list of all the Live stages the "Moderator" is assigned to moderate. There are "Live stages" in sessions, channels, and sponsor pages.

### Q&A Chats - Pending and Assign to me tabs

After choosing a specific Live stage, moderators will see questions from attendees that came from the Q&A chat.

#### Pending tab

The **Pending** tab includes all the messages in a specific session that are not associated to any moderator. All the messages for this session waiting to be pulled by a moderator are listed here. Messages are displayed from the oldest to the newest.

Yesterday

Hi 13:00

What is the magic in github page? 13:0

Kaltura Connect Opening Keynote

Hi! Thanks for reaching out. We'll be sure to get back to you soon. 3:00

Patrick

hi, this is the link to the page <https://github.com/laderast/magic-of-markdown> 3:02

Today

Hi 10:11

Can I get the slides 10:1

Sure! <https://www.dropbox.com/s/0b51mnlhwja7m96/Leadership%20Skills.pptx?dl=0> 12:44

**Reading a question:** Moderators can click on a message in the list and read it. The message will still be shown in the Pending tab for all moderators to see.

**Replying to a question:** Moderators can reply to a message by clicking on one of the "Reply" buttons and writing a message in the text box. After replying to a message, the message will be moved to the "Assigned to me" messages list and other moderators will no longer see this thread.

### Labeling question threads:

Moderators may attach labels to threads to better organize chat messages. For example, moderators may choose to label all questions having to do with a specific topic or coming from a specific type of person (i.e., VIP). To attach a label, click in the Add label to organize & filter Q&A messages field and choose from the list of available labels. You may also start typing the first few letters of a label and a list of matching labels will populate for you.

Hi! Thanks for reaching out. We'll be sure to get back to you soon. 3:00

Patrick

hi, this is the link to the page <https://github.com/laderast/magic-of-markdown> 3:02

To add a new label, type your new label in the Add label to organize & filter Q&A messages field, then click **Create label "[label name]"**.

The screenshot shows a thread titled "pre-recorded Session" with a status of "Pending (5)". The thread is currently assigned to Brian Dennis. On the left, a list of users is shown, including Brian Dennis, Celine Garnier, Thomas Anderson, Antonio Citerio, and Ella Gartner. In the main thread area, a dropdown menu is open, showing the option to "Add label to organize & filter Q&A messages". A search bar contains "VIP X Support Issue", and a button below it says "+ Create label 'Support Issue'". The thread content includes a message from Brian Dennis: "What is the magic in github page?" and a reply from Kaltura Connect: "Hi! Thanks for reaching out. We'll be sure to get back to you soon."

To un-attach a label from a thread, click "X".

 Moderators cannot delete or edit labels; only attach or un-attach labels.

As you add labels to the threads in the right panel, those labels are displayed in the left panel as well. In our example below, the moderator has added three labels to a thread started by user Brian Dennis - "Support", "VIP", and "Marketing". The first two are always displayed in the left panel, and any additional labels are notated by "+[number of labels]". Hover over this notation to see the entire list.

The screenshot shows the same thread as above, but now with three labels attached: "Support", "VIP", and "Marketing". The left panel shows the user list, with Brian Dennis's thread highlighted. The main thread area shows the label dropdown menu with "Support X VIP X Enter label" and a dropdown arrow. The thread content includes a message from Brian Dennis: "Hi" and a reply from Kaltura Connect: "What is the magic in github page?"

Adding new labels, attaching and un-attaching them will not move the thread to the Assigned to me messages list and other moderators will still be able to see the thread.

### Filtering threads:

To better manage Q&A threads, moderators can filter and search threads by label(s) on the left panel. In our example below, we are filtering by "General" label.

As you are working in a filtered search, if new pending messages are added that match your filtered search, a message displays prompting you to refresh the list.

New pending messages. [Refresh](#)

**Assign a message:** Moderators can assign a pending message to themselves or to other moderators.

To assign a message to yourself, click on one of the **+ Assign to me** buttons.

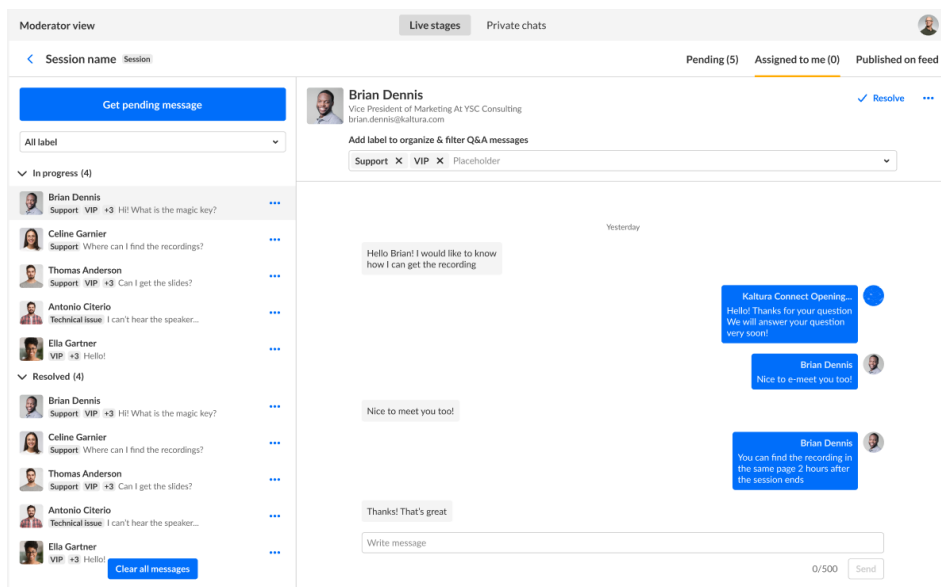

To assign a message to another moderator, click on the three dots menu in the chat window on the top left and choose Assign to other team member. Then, choose the moderator to whom you would like to assign the thread.

Once a message is assigned to a moderator, it will be shown in the Assigned to me messages list and other moderators will not be able to see it.

 When another moderator is grabbing pending messages while you are focused on the Pending tab, the grabbed messages are grayed out. The grayed out message disappears after a refresh or when the moderator exits and returns to the Pending tab. If the moderator was focused on a message that was grabbed, a banner is displayed stating that this message was grabbed by another moderator.

### Assigned to me tab

The Assigned to me tab contains all the messages that are assigned to you and waiting to be answered by you. Other moderators can't see your messages list.

**Answering questions:** Moderators can answer questions from attendees. To start answering questions, click on the attendee's name. This screen begins the one-on-one conversation with the attendee and allows you to answer their questions.

**Labeling question threads:** Moderators can also use the labeling capability from the Assigned to me tab.

**Filtering question threads:** Moderators can also use filtering capability from the Assigned to me tab.

**Getting a pending question:** Click **Get pending message** to receive pending messages. With every click of the button, you are assigned with one conversation from the top of the session's pending messages queue. The message is removed from the session's pending queue and is no longer available for other moderators. You can now begin your one-on-one conversation with the attendee and answer their questions.

**Resolving a question:** Moderators can resolve a message by clicking on the **Resolve** button on the top left or under the three dots menu in the messages list. Once a message is marked as 'resolved' it will be moved to the 'resolved' list. If a new message is coming in from the attendee, the resolved thread will automatically be moved back to the 'In progress' list.

**Publishing a Q&A in the feed:** Moderators can send directly a Q&A from the thread with an attendee to the feed by hovering over the question and clicking on **Publish in feed**.

Cancel Save as Draft Publish Message

The Attendee, Question, and Moderator fields are auto-populated. The Moderator may type an answer in the Answer box, then click **Publish Message**. The message will be

displayed on the feed.

Published Q&A will pop up to the attendees during the session on a special toast and will be shown in the Feed tab inside the Live stage tab.

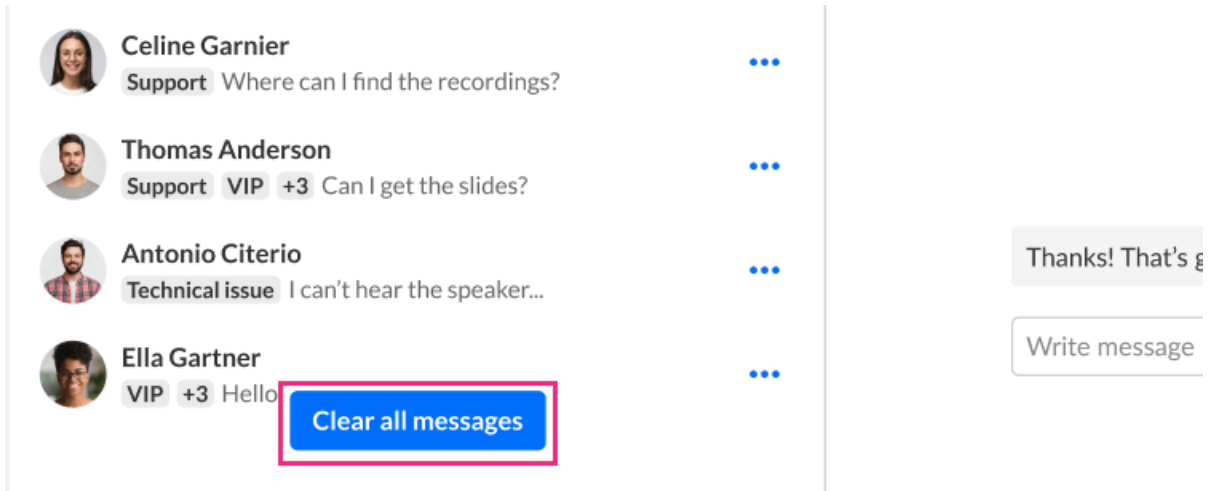

**Assigning a message to another moderator:** Moderators can move an assigned message to another moderator by choosing Assign to other team member under the three dots menu on the top left or under the three dots menu on the messages list.

**Clearing all messages:** Moderators can clear all messages from the Assigned to me list. Cleared messages will be removed from the Assigned to me list and no moderator will see them. If a new message is coming in from the attendee, the cleared thread will automatically be moved back to the 'In progress' list of the assigned moderator.

To clear all messages, click on the **Clear all messages** button at the bottom of the Assigned to me list.

**Sending a question back to "pending":** Moderators can set a thread back to the Pending list. Once a thread is moved back to the Pending list all moderators can see it. To set a message back to pending, click on the three dots menu on the top left or on the messages list and choose Set as pending.

## Published on feed tab

From the Published on feed tab, moderators can publish text polls and Q&A messages to the attendees.

## Polls

Increase your attendee engagement in the session by publishing polls. Published polls will pop up as a special toast to the attendees during the session and will display in the Feed tab inside the Live stage tab. All the poll data will be saved and displayed on the event's reports and dashboards.

Several moderators can work simultaneously on the polls. All poll answers are single-select, i.e., attendees will be able to choose only 1 answer. Each poll may contain up to 5 answers.

 Through the moderator app, moderators can create only text polls. Through the Chat and Collaboration widget, moderators can create all types of polls: text polls, rating scale polls, and crowd vote polls. Please see [Chat & Collaborate Widget](#) for more information.

## Publishing a new poll

1. Click the **Add New** button in the Published on Feed tab.

2. Choose Poll.

The following screen displays.

### Add to Message Board

Publish Poll

- Show Results toggle: Decide whether to expose the poll's results to attendees with the Show Results toggle. When enabled, the attendees will see the poll results in percentage after they voted.
- Type a question and at least two answers.  
The question character limit is 150 and the answer character limit is 100.
- Add hyperlinks by clicking the "link" icons.

3. Click **Publish Poll** to publish the poll.

Once published, the poll will be shown to the attendees on a temporary toast and permanently on the feed.

### Actions on polls

**Poll draft:** Moderators can create a poll and save it as a draft. Draft polls will not be shown to the attendees. Moderators can publish draft polls:

**End a poll:** Moderators can end a poll from the moderator app.

Once a poll is ended, attendees will no longer be able to vote and a "Poll Ended" indication will be displayed to them. Once ended, if the poll's results are shown, all attendees will be able to see them.

**Unpublish a poll:** Moderators can unpublish a poll from the feed using the moderator app.

Once unpublished, the poll will no longer be shown on the feed to the attendees. The poll will still be shown in the moderator app Published on feed list and will be marked as "Unpublished".

## Q&As

Answer common questions from your audience by publishing questions with answers on the feed. Published Q&A will pop up to the attendees during the session on a special toast and will be shown in the Feed tab inside the Live stage tab.

## Publishing a Q&A message

1. Click the **Add New** button in the Published on feed tab.

2. Choose Message.

The following screen displays.

### Add to Message Board

#### Attendee

#### Question

0/150

#### Moderator

#### Answer

0/1000

[Cancel](#) [Save as Draft](#) [Publish Message](#)

- Type a question and answer.  
You may choose a specific attendee or keep the question anonymous.  
The question character limit is 150 and the answer character limit is 1,000.
- Add hyperlinks by clicking the "link" icons.

3. Click **Publish Message** to publish the Q&A message.

Once published, the Q&A will be shown to the attendees on a temporary toast and permanently on the feed.

### Actions on Q&A messages

**Draft Q&A messages:** Moderators can create a Q&A message and save it as a draft. Draft polls will not be shown to the attendees. Moderators can publish draft Q&A messages.

**Q&A**

**Question from the audience**  
Is this session being recorded?

**TR Talia Rubin**

Yes  
13:24

**Publish**

**Draft**  
Updated by Talia Rubin, just now

**Unpublish a Q&A message:** Moderators can unpublish a Q&A message from the feed by using the moderator app.

Once unpublished, the Q&A message will no longer be shown on the feed to the attendees. The Q&A message will still be shown in the moderator app Published on feed list and will be marked as "Unpublished".

**Change order:** Moderators can change the order of the Q&A messages. The order will be changed only in the moderator app.

 The order of feed items in the Feed list is according to the last update time, not according to the "change order" in the moderator app.

To change the order of Q&A messages:

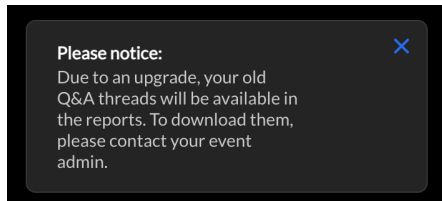

1. Click on **Change order**.

2. Click or drag the questions to the appropriate order or use the up/down arrows to change the order.
3. Click **Publish Order** and confirm.

## Known limitations

- Adding Q&A messages to the feed is available only through the moderator app
- Polls and Q&As real-time updates for attendees take up to 60 seconds; there is no need to close the widget or perform any other action.
- Links in the poll's answers are clickable only after the attendee voted.
- Starting in October 2023, due to an upgrade, some old Q&A threads will be available only through [the reports](#). If a moderator enters an old session with old Q&A threads, they will see this popup message:

## Moderator app - Private messages tab

**Private messages** tab shows the moderator's personal conversations as an attendee.

Private messages are not dependent on a specific session; but they are on an event level.

---
