

# Streaming multiple video flavors or multiple audio tracks

Last Modified on 03/06/2024 11:04 am IST

 This article is designated for administrators.

To stream multiple video flavors or audio tracks alongside your live video stream use the same RTMP URL for all streams and use different stream names for each of the different flavors.

Video and audio tracks stream names should be set according to the following table:

Stream	Stream Name
<b>Video Tracks</b>	
Main video flavor	1
Additional video flavors	2 to 6
<b>Audio Tracks</b>	
English	1000
Spanish	1001
French	1002
German	1003
Portuguese	1004
Chinese	1005
Arabic	1006
Hindi	1007
Russian	1008
Japanese	1009
Finnish	1010
Swedish	1011
Korean	1012
Turkish	1013
Polish	1014
Italian	1015
Ukrainian	1016
Swahili	1017
