 This article is designated for administrators.

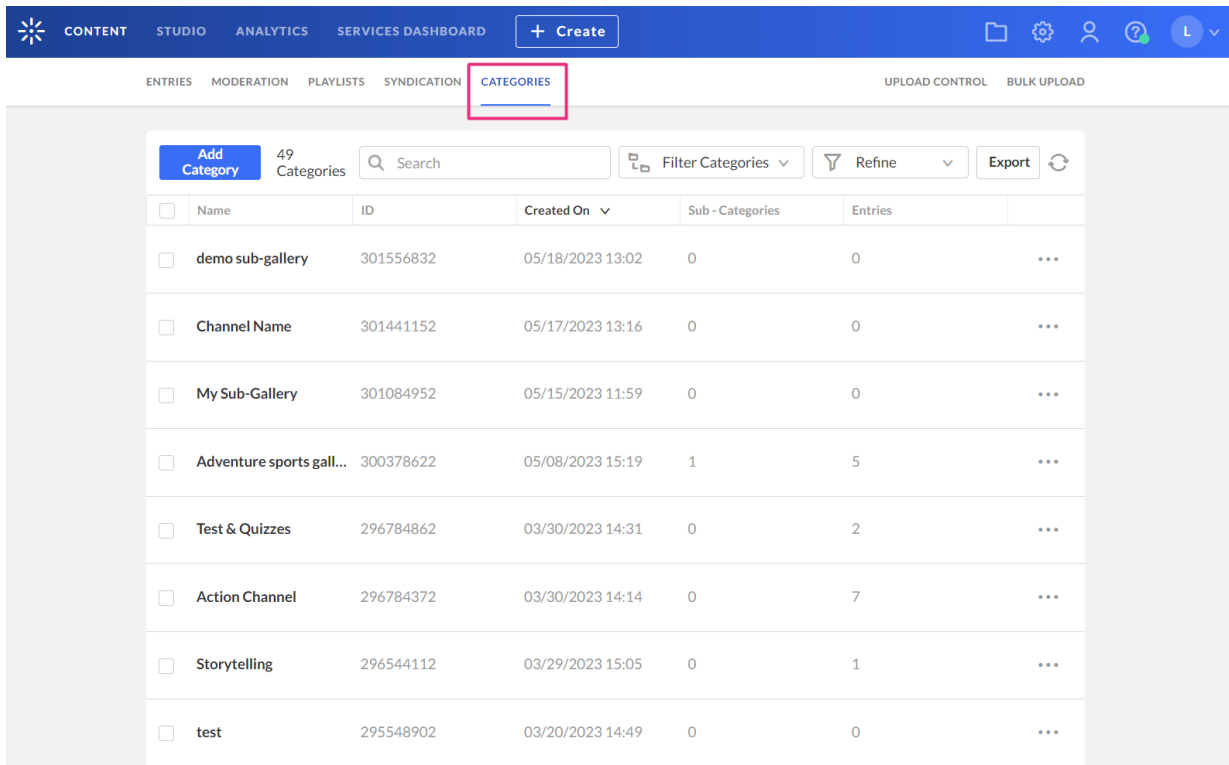

### About

When setting up a channel via the legacy Video Portal, users have an option to select the respective Privacy. If administrators (not channel owners) are requested to change the channel entitlements (for example, changing a Restricted channel to a Public, Open channel), you can do it from Rich Media CMS.

To learn more about channel private settings, visit [Create a Channel](#).

### Access the Entitlements page

1. Log into Rich Media CMS.
2. Choose the **Categories** tab.
