About

Your watch history is accumulated from all devices you sign into with the same account. Your recently watched videos are displayed on the **My History** page with the latest watched first. Your history includes *Recently Watched* and *Continue Watching* playlists on the homepage (if applicable).

The following instructions have the Theming module enabled.

View My History

From the user menu, select **My History**. You can also navigate directly: http://{your video portal url}/history.

If this option is missing from the user menu, ask your administrator to configure it in the Headermenu module. Depending on your administrator's setup, the My History page can also be added to the site navigation bar.

The **My History** page displays.

For each media, standard metadata fields are displayed including the thumbnail, name, description, tags, and gallery/channel. New metadata is displayed showing when you viewed or watched the media last. Entries are displayed by the latest watched first.

You can change the page view from the Detailed view (default) by clicking the Collapsed view option, as shown in the image below:

Delete an item

1. From the user menu, select **My History**.

If the My History link in the user menu is missing, ask your administrator to configure it in the Headermenu module.

The **My History** page displays.

2. Click the trash can icon next to the item you want to delete.

A confirmation message displays.

Delete all items

1. To delete all items from your history, click **Clear History**.

A warning message displays: This will clear all your watch history from other applications as well. Are you sure you want to clear your entire watch history? You can't undo this.

2. Click Delete.

Clearing your watch history clears history in all other Kaltura applications too. It will also clear all progress bars.

Refresh My History page

Click the refresh icon at the top right of the page.

The page is refreshed and your watch history is updated.
