This article is designated for administrators.

About

Kaltura's **My Content Analytics** is a powerful tool for providing detailed metrics on video engagement, and equips content creators with the insights needed to make informed decisions. The **My Content Analytics** dashboard uses a variety of parameters enabling users to track and optimize their content.

Configure

Enable Userreports module

1. Go to your KMS or KAF admin page, and navigate to the [Userreports module](#). Your link should look like this: `https://{your_KMS_URL}/admin/config/tab/userreports`.
2. In the **Userreports** window, set all fields to 'Yes'.
3. Click **Save**.

Enable the link via the Headermenu module

1. Navigate to the [Headermenu module](#).
2. In the headermenu window, make sure the module is enabled (set to 'Yes').

Configure the header menu

1. Click the **+Add "menu"** button.
2. In the **type** drop-down menu, choose **My Content Analytics**.
3. Click **Save**.

My Content Analytics displays in the video portal user menu .

For the user's guide, visit our article [My Content Analytics](#).
