

Gallery analytics in Video Portal

Last Modified on 08/05/2025 11:14 am IDT

 This article is designated for administrators.

About

Gallery analytics provide in-depth insights into user engagement, geographical location, and viewing methods, allowing you to optimize your content strategy. The intuitive dashboard offers easy exploration of data over different time periods, with comprehensive filtering options for specific analysis. Stay up-to-date with real-time data, and take action based on actionable insights.

To learn how to work with the gallery analytics dashboard, check out our article [Working with the gallery analytics dashboard](#).

Please note that privacy or ad-blocking software may cause potential issues when collecting Kaltura analytics. To address this, try allowing Kaltura domains and removing Kaltura-related sites from your firewall settings or filters.

Access gallery analytics

1. Choose the desired gallery from the navigation bar.

The gallery's main page displays.

Demo Gallery 1

16 Media | 3 Channels

Sort by Media Count ▾

2. Choose **Analytics** from the hamburger menu  .

The gallery analytics dashboard displays.

Gallery analytics dashboard

The gallery analytics dashboard enables you to explore specific gallery activities, track category usage over time, compare periods, and apply filters for tags and media type.

As a reference for analytics terms and definitions, please see the [Analytics Terminology](#) article.

The top panel of the dashboard provides an overview with details, highlights and insights for the categories in your account. To change the time period or filter any of the data, use the date picker and filter at the top of the dashboard:

Last 12 Months Jul 25, 2022 - Jul 25, 2023 

For more information, see [Working with the gallery analytics dashboard](#).

Details

At the top of the dashboard, you can see the following details: Parent category, category ID, number of sub-categories, creation date and the date of the last update.

Demo Gallery 1

Parent: galleries | ID: 236095823 | Sub Categories: 1 | Creation Date: 11/14/2021 | Last Update: 07/19/2023

Highlights

Highlights

[See Details](#)

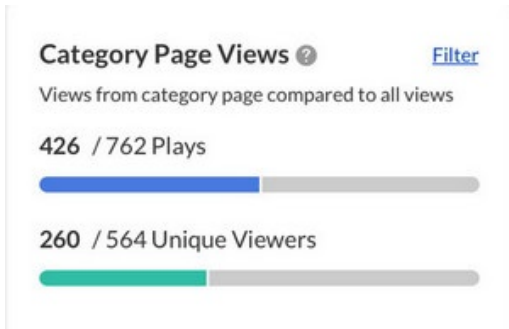

The Highlights section displays a snapshot of the important metrics for the selected timeframe. For each user you will see:

- **Player impressions** - How many times the video was loaded on the page, regardless of whether the user clicked Play or not.
- **Plays** - Number of times the Play button was pressed.
- **Unique viewers** - Number of unique users that had an active viewing action during the time period. Note that Player Impressions are not counted as a viewing action.
- **Minutes viewed (VOD)** - Minutes played across all viewers.
- **Contributors** - Users who created content.

Click **See Details** to jump to the [Category Performance Over Time](#) graph with all the metrics for the selected time frame.

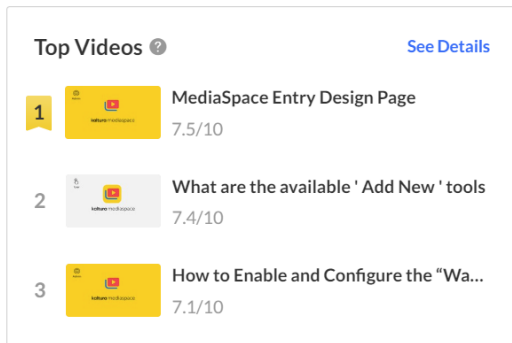

Category Page Views

This section displays the views from the [Category Page](#) (including category pages that have secure embed enabled). You can see from the example that about half of the plays are within the context of the category, and the rest of the plays are out of context, perhaps viewed from links or embed code that was shared. This analytic is relevant to applications only. See our article [Category Page Views](#) for more information.

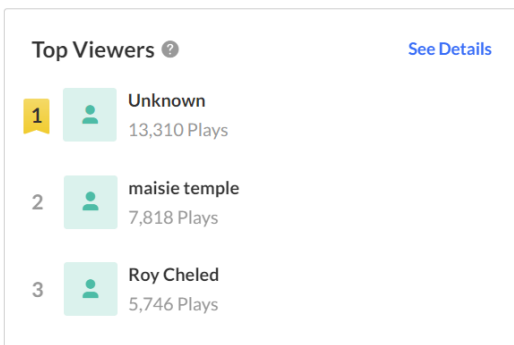

Top Videos

The top videos are selected based on a unique algorithm that takes into consideration parameters such as the amount of plays, unique viewers, and average completion rate and scores them in comparison to other videos in the account. Click **See Details** to display the [Top Videos](#) panel.

Top Viewers

Top Viewers displays the users sorted by number of plays. Click **See Details** to open the [Users](#) metrics.

Insights

Under Insights, you can find snapshots of information about the user's habits, such as what websites they usually watch videos on and their favorite tools for viewing, as well as where the user is located.

Category Performance Over Time

In this graph you can see:

- **Player impressions** (default) - A player impression event is counted each time the player is loaded on the page.
- **Plays** - A play is counted when a user clicks the Play button to watch a video. If the player is set to auto-play, a play event will be counted when the player begins to play the video.
- **Unique viewers** - Number of Unique Users that had an active viewing action during the time period. Note that Player Impressions are not counted as a viewing action.
- **Minutes viewed (VOD)** - Total number of playback minutes played by the viewers, based on quartile milestones. Example: If a user watched 4 minutes from a 10-minute video it will be calculated as 2.5 minutes (25% milestone).
- **Avg. drop off rate (VOD)** - The average percentage of drop-off quartile (last quartile watched), across all plays. Example: If a user once watched 20% of the video and the second time watched 80% of the video, the calculation will be: $(0+75)/2$ plays = 37.5% Avg. Drop Off Rate. 20% is calculated as 0 since the user didn't reach the 25% milestone and 80% is calculated as 75% as the user passed the 3rd quartile milestone.
- **Avg completion rate (VOD)** - Average percentage of completion, across all plays. Example: If a user once watched 20% of the video and the second time watched 80% of the video, the calculation will be: $(20+80)/2$ plays = 50% Avg. Completion Rate.

You can view the metrics on either a monthly or daily basis by selecting the option on the far right of the panel.

Hover over any point in the graph to see the detailed data.

Click **View Details** at the bottom of the graph to display and expand the graph for the various metrics available.

Users

Select Users from the drop down menu. A list of Users and their metrics is displayed.

Top Videos

The Top Videos data is filtered on content from the category and their sub categories. In this panel, you can see the following information for each category:

- **Video Details** - You can click on the video name to display a drop down with more information about that video.
- **Plays** - A play is counted when a user clicks the Play button to watch a video. If the player is set to auto-play, a play event will be counted when the player begins to play the video.
- **Unique viewers** - Number of Unique Users that had an active viewing action during the time period. Note that Player Impressions are not counted as a viewing action.
- **Avg completion rate (VOD)** - Average percentage of completion, across all plays. Example: If a user once watched 20% of the video and the second time watched 80% of the video, the calculation will be: $(20+80)/2$ plays = 50% Avg. Completion Rate.
- **Score** - You can see how successful the video has been in comparison to other videos in the account.

Top Videos

	Video Details	Plays	Unique Viewers	Avg. Completion Rate	Score
1	 MediaSpace Entry Design Page By Customer Training	▶ 901	👤 9	✔ 0.1%	7.5/10
2	 What are the available 'Add New' tools By Customer Training	▶ 889	👤 9	✔ 0%	7.4/10

Top Countries

The Top Countries panel ranks the geographical distribution by plays. The heatmap shows the countries; the darker the shade, the more plays for that country. For each country the following metrics are available:

- **Plays** - A play is counted when a user clicks the Play button to watch a video. If the player is set to auto-play, a play event will be counted when the player begins to play the video.
- **Plays Distribution** - Number of plays divided by the total number of plays in the selected timeframe.

Top Countries

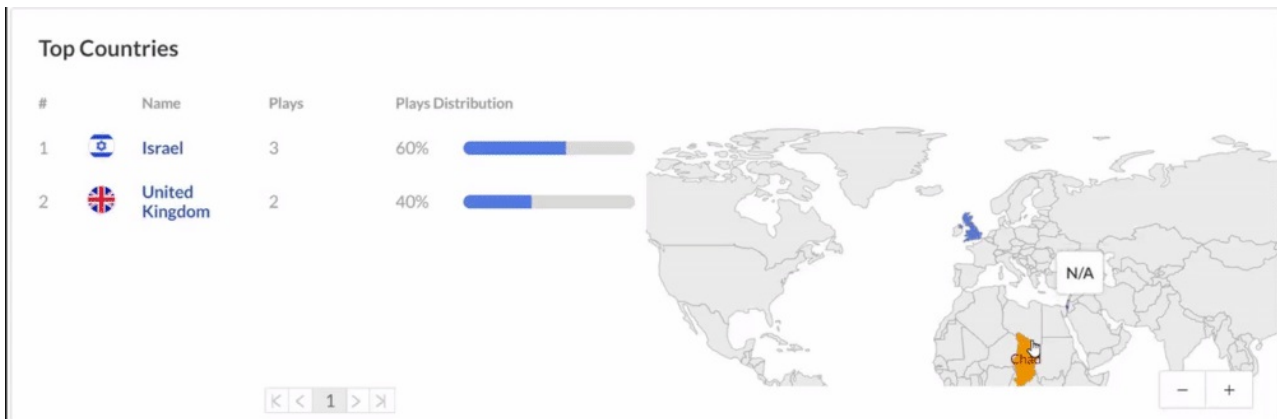

#	Name	Plays	Plays Distribution
1	 Israel	2,804	59.5% 
2	 United Kingdom	1,436	30.4% 
3	 United States	475	10.1% 
4	 Germany	1	0.021% 

◀ < 1 > ▶

– +

You can drill down to region by selecting a country on the map, then select a region to drill down to cities.

Devices Overview

In this panel, the Devices Overview graph displays the distribution of devices usage by plays. You can see on which device viewers watched the entry.

Top Domains

In this panel, the top domains are ranked by the domains that had the most plays in the selected time frame. For each domain the following metrics are available:

- **Player impressions** - A player impression event is counted each time the player is loaded on the page.
- **Player impression ratio** - The number of plays divided by number of impressions.
- **Plays** - A play is counted when a user clicks the Play button to watch a video. If the player is set to auto-play, a play event will be counted when the player begins to play the video.
- **Plays Distribution** - Number of plays divided by the total number of plays in the selected timeframe.
- **Minutes Viewed (VOD)** - Total number of playback minutes played by the viewers, based on quartile milestones. Example: If a user watched 4 minutes from a 10-minute video it will be calculated as 2.5 minutes (25% milestone).

- **Average completion rate (VOD)** - Average percentage of completion, across all plays. Example: If a user once watched 20% of the video and the second time watched 80% of the video, the calculation will be: $(20+80)/2$ plays = 50% Avg. Completion Rate.
