# Extended Audio Description setup
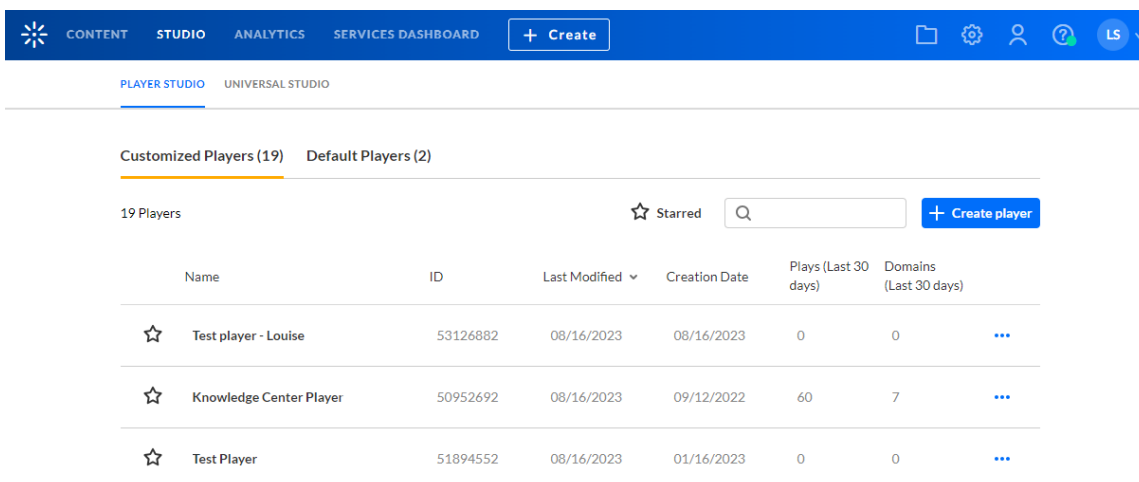

> 👤🔒 **This article is designated for administrators.**

Extended Audio Description allows playback of an additional narration track for blind and visually impaired viewers while using the Kaltura Player. Administrators can configure the Extended Audio Description plugin in the Player Studio in the KMC. Here's how:
1. In the KMC, click the **Studio** tab.

The **Player Studio** page displays with a list of all available players in your account.

> 💡 For more information about the Player Studio, visit our article The Kaltura Player Studio Getting Started.

2. Locate the player in which you'd like to enable the plugin, and click on it.

The settings page displays.

3. Click **Advanced Settings** at the bottom of the panel.

The advanced configuration panel displays.
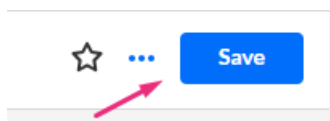

ADVANCED CONFIGURATION

Set up your player through its code editor
Recommended only for advanced player developers. **More info**

```
▼ "config" : { 6 items
    ▼ "plugins" : { 1 item
        ▶ "kava" : {} 0 items
    }
    ▼ "playback" : { 1 item
        "autoplay" : bool false
    }
    ▼ "provider" : { 1 item
        ▶ "env" : {} 0 items
    }
    ▶ "ui" : {} 0 items
    "disableUserCache" : bool false
    ▼ "viewability" : { 1 item
        "playerThreshold" : int 50
    }
}
```

4. In the advanced configuration panel, add the code below in the order given:

> ⚠ If you already have "settings" or "translations" and "en" already configured in your player, you won't need to add them.

1. under "plugins" → *pluginAdvancedAudioDescription: {}*
2. under "ui" → *settings {}*
3. under "settings" → *showAdvancedAudioDescToggle: true*
4. under "ui" → *translations {}*
5. under "translations" → *en {}*
6. under "en" → *plugin-advanced-audio-description: {}*

Below is an example of a player that has been configured:

## AAD player

5. Click **Save**.

> ⚠ Please note it may take a few minutes for the Advanced Audio Description toggle to appear on the player after you've configured it.

Here is a video that demonstrates the configuration:

User experience

Users can enable Advanced Audio Description on the Kaltura V7 player by clicking the **Advanced Audio Description** toggle to turn it on.
