

Create a video from multiple videos and images in Content Hubs

Last Modified on 04/12/2026 5:44 pm IDT

 This article is designated for all users.

About

Would you like to combine multiple videos and images into a single video? You can do this by 'stitching' together existing media using Kaltura's **media stitching** tool.

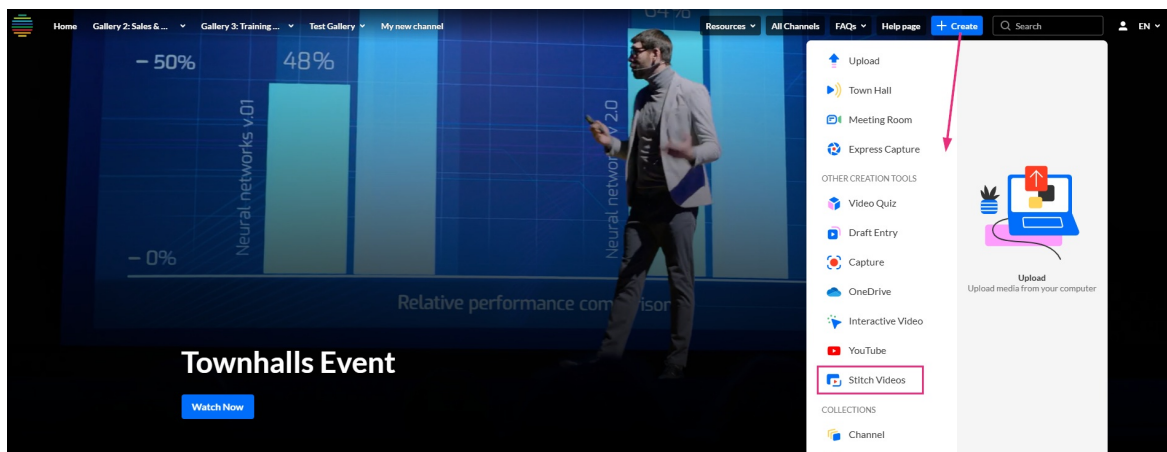

- Only VOD videos and images can be stitched.
- The duration of an image is configured by your administrator.
- [Multi-stream](#) videos are not supported.
- This feature requires the [mediastitching module](#) to be enabled.

Stitch media

You can stitch media that you are the owner or co-editor of.

1. From the **+Create** menu, select **Stitch videos**.

The 'Stitch video' page opens.

☰ **Stitch video**

Cancel Create

Choose two or more videos to stitch together. You may choose from videos you own or co-editing.

Title

New video name

My new video 001104

Media to stitch together

0 Items

Your stitching space is empty

Click the + button next to media you would like to stitch, and it will show up here.

- In the **Title** field, enter a name for your video. (The default name is *My new video* followed by the date).
- In the **Choose media to stitch** section, click the **+ Add button** next to each item. The selected items show a checkmark and appear in the **Media to stitch together** section.

- Click the **+ Add button** again to remove an item.

- You must select at least 2 items and up to 5 items.
- The total duration of the stitched video can't exceed 5 hours.

To reorder items, drag them using the handle (two lines) on the left.

You can click the **three dots** to the right of an item to:

- Move an item to the top
- Move an item to the bottom

- Remove the item

5. To finish, click **Create** at the top right.

You're redirected to the edit page, where you can add metadata.

Good to know

- After the video is created, you can't change the selected media items.
- Captions are included when stitching videos.
- If you delete a media entry after it has been added to a stitched video, it will still remain in the stitched video.

To make additional changes, see the article on [Kaltura video editing tools](#).

Fade transitions will be added in future releases.
