About

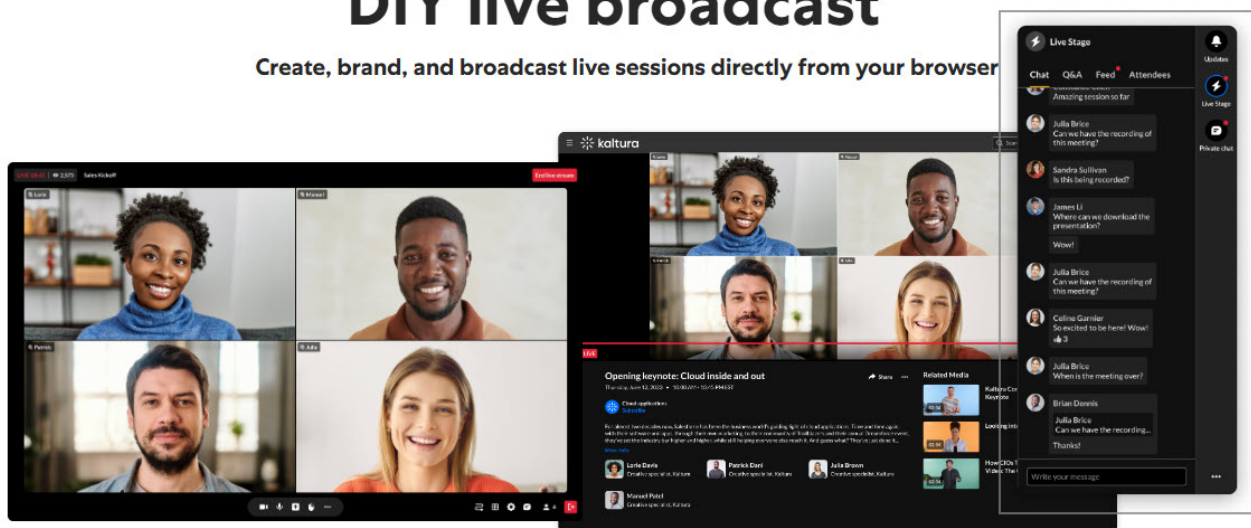

DIY live broadcasts give you the ability to broadcast/webcast a Kaltura live session directly from a Kaltura studio room. Simply create a DIY live broadcast session, then navigate to the Studio room and begin broadcasting.

DIY live sessions include automated transition from live to VOD (meaning, once the live session is finished, the recording is automatically published).

If your Kaltura Events is configured with Custom templates (as in our example above), the Get started with a template page displays two tabs - one for Preset templates (Presets) and one for Custom templates (Custom). If Custom templates are not configured, the Get started with a template page does not display the two tabs, and only displays Preset templates from which to choose.

- Choose the DIY live broadcast preset template. The Let's get started page displays.

4. Enter the following:

- Title - A title for your event (char limit is 120).
- Short description - A description for your event.
- Start time - The day and time your event will start.
- End time - The day and time your event will end.
- Time zone - The time zone for your event. The list of time zones is organized in alphabetical order by time zone name, then city name. This list is searchable and as you start typing characters, a list of matching time zones will populate for you.

5. Choose whether attendees will log into the event with a login link via email (AKA Magic Link), or with an email and password. **This option is only available for Preset event templates and, after creation of event, can only be changed by Kaltura. On Custom event templates, this will be preconfigured by the template.**

6. Click **Create**. The building process begins. This may take a few minutes.

Creating your event

Once complete, the Event page displays with the Overview tab open by default.
