## About

This article explains how to add an Interactive room session to a multi-session event.

Interactive rooms allow attendees to connect with others during your virtual event. Hosts can use this collaboration space to provide demos with advanced moderation controls, breakout rooms that allow smaller group interactions, and so much more! Engage attendees through interactive tools like chat, breakout rooms, live polls, screen sharing, whiteboard, and more. Enhance your event experience by adding an interactive session with the speaker right after the session for a small group of attendees to interact with the speaker in a more intimate environment.

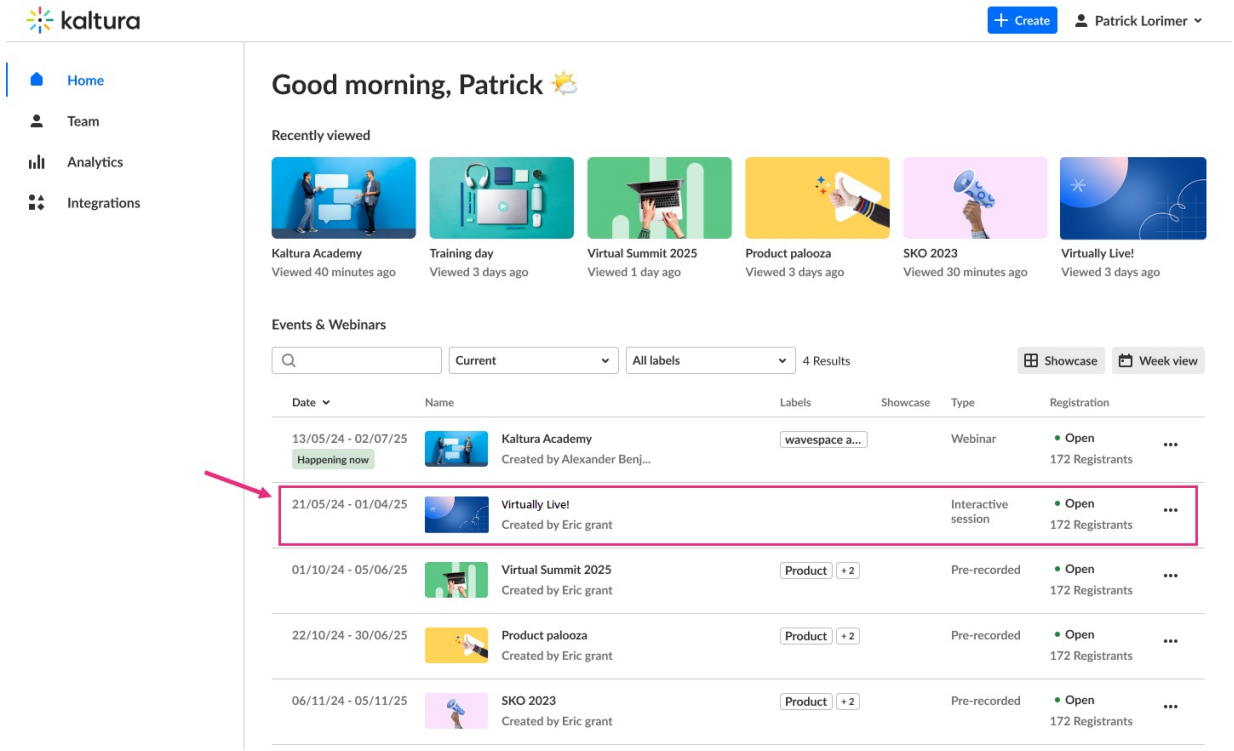

This article applies only to **multi-session events**.

Some behavior described here applies to a non-default configuration. Customer-specific variations are highlighted where applicable.

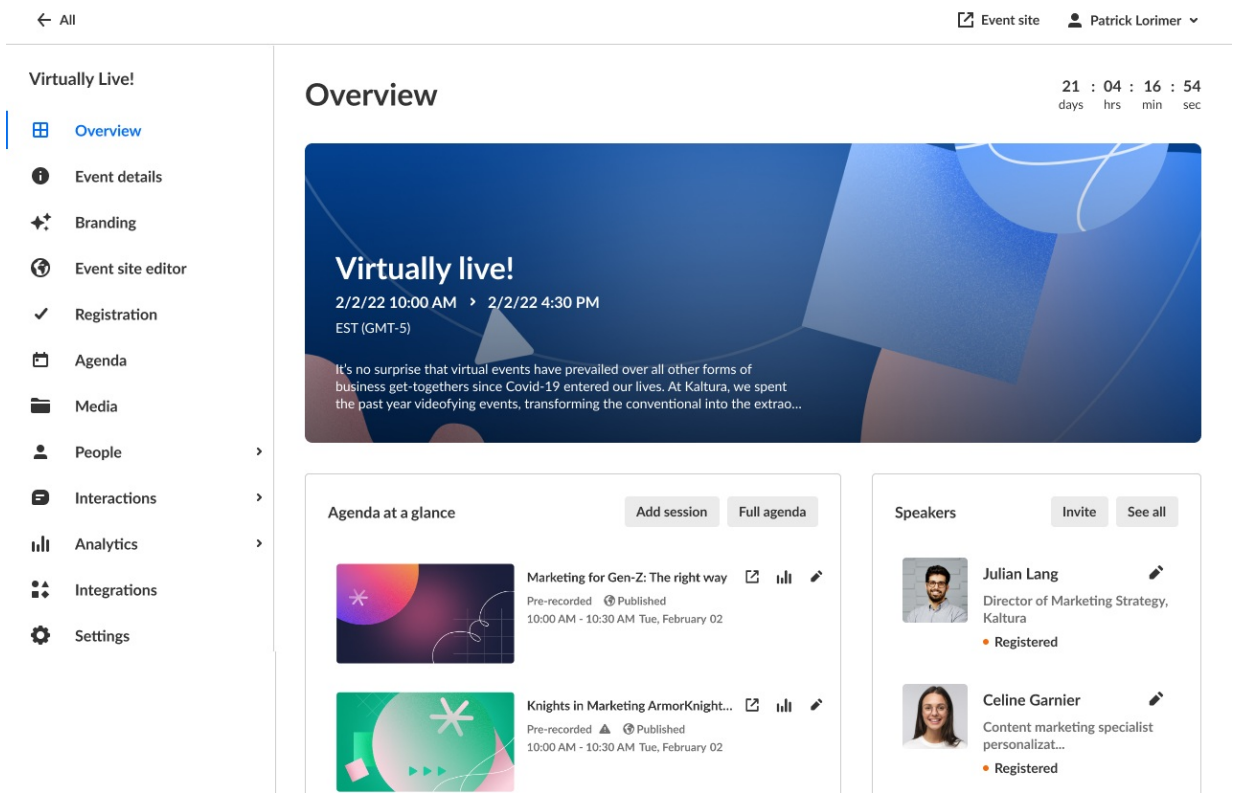

## Add an Interactive Room session

1. From the Kaltura Virtual Events home page, click on the event you want to manage.
