

# Add a DIY live webcast session to your event

Last Modified on 10/01/2025 3:47 pm IDT

 This article is designated for all users.

## About

This article describes how to add a DIY live webcast session to your event.

DIY live webcasts give you the ability to broadcast/webcast a Kaltura live session directly from a Kaltura Studio room. Simply create a DIY live webcast session, then navigate to the Studio room and begin broadcasting.

Once the session is created, the studio is automatically created as well and is hidden from the general attendees. Moderators and speakers may access the studio via a direct private link. This way, they can begin preparing the studio ahead of the broadcast. The agenda, on the other hand, is available to all on the event site.

## Access Add session capability

There are two ways to add a session to your event:

- On the Event Overview page, in the Agenda at a glance section, click **Add session**.

☐ **Activate**

You are asked to confirm your action.

#### Your AI session assistant

Take action based on your session data with one click. Get real-time suggestions for interactive content and track audience mood to boost engagement.

Activate assistant

Click **Activate assistant**. You may click the "X" button to cancel the action.

#### When *activated*

- The **Assistant tab** displays for moderators in the Chat and Collaboration widget. The Assistant tab provides information on attendee numbers, chat mood (results of sentiment analysis), engagement rate (viewers who watch in full screen or with the focus on the tab and sound on), and time to end.
- The **Live stage tab** of the Chat and Collaboration widget displays the same information for moderators.

#### When *deactivated*

- The **Assistant tab** does not display for moderators in the Chat and Collaboration widget.
- The **Live stage tab** of the Chat and Collaboration widget displays information on attendee numbers, turnout (percentage of those registered who are actually logged into the session), engagement rate (viewers who watch in full screen or with the focus on the tab and sound on), and time to end.

#### 6. Choose visibility of the session.

Private - The session will be available only for team members, not for attendees.

Unlisted - The session will be reachable via direct link only.

Published - The session will be available on the event agenda.

The Session recording area is accessible via the Edit session page once the live session is finished.

#### 7. Once you are finished completing the fields, click **Create**. (The **Create** button is

enabled only after you've begun filling in the fields.) The new session is now added to your event.
