

## Agenda tab - Add and edit DIY live webcast session

Last Modified on 10/04/2024 9:14 pm IDT

 This article is designated for all users.

### About

This article describes how to add and edit a DIY live webcast session.

DIY live webcast give you the ability to broadcast/webcast a Kaltura live session directly from a Kaltura Studio room. Simply create a DIY live webcast session, then navigate to the Studio room and begin broadcasting.

 Once the session is created, the studio is automatically created as well, and is hidden from the general attendees. Moderators and speakers may access the studio via a direct private link. This way, they can begin preparing the studio ahead of the broadcast. The agenda, on the other hand, is available to all on the event site.

### Add DIY live webcast session

There are two ways to add a session to your event:

- On the Event Overview page, in the Agenda at a glance section, click **Add session**.

1. You may add the following information:
  - **Header** - Click **Upload thumbnail** and choose the desired file. We recommend using an image size of 1920x1080 px.
  - **Title** (required) - A title for your session (char limit is 120). **Please note:** Characters "<" and ">" are not supported.
  - **Description** - A description for your session.
  - **Date** (required) - The day your session will start.
  - **Time** (required) - The time your session will start.
  - **Duration** (required) - The duration of your session (in minutes). Max duration is 1440 minutes (24 hours).
2. To add speakers to this session, click in the Speakers field and start typing the name of a user who has been assigned a Speaker role. The name is auto filled. Click to select the user.

Speakers

  
 **CP** **Connie Peters** connie.peters@ABCcompany.com

If no results are found, click **Invite speaker**. This re-directs you to the Speakers page where you can invite speakers to your event.

3. To add moderators (required) to this session, click in Moderators (required) field and start typing the name of a user who has been assigned a Moderator role. The name is auto filled. Click to select the user.

 **JB** **John Baker** john.baker@ABCcompany.com

If no results are found, click **Invite moderator**. This re-directs you to the Moderators page where you can invite moderators to your event.

 Team members who created the event (AKA "Event organizers") are **automatically** assigned as Moderator to both the event they created (at the "Event Level") and the first session that was created as part of the event (at the "Session Level").

4. Moderation and studio links - Click **Launch moderation app** to access the chat

moderation app, which allows you and your moderators to organize, manage, and answer Q&A threads; publish polls and Q&As; and answer private chats during the session. Click **Copy app link** to share a link to the moderation app with your moderators.

 The **Copy studio link** is accessible via the [Edit Session](#) page after you've saved your new session. This is for sharing the studio access with moderators and speakers.

#### 5. Choose visibility of the session.

Private - The session will be available only for team members, not for attendees.

Unlisted - The session will be reachable via direct link only.

Published - The session will be available on the event agenda.

 The Session recording area is accessible via the [Edit Session](#) page once the live session is finished.

6. Once you are finished completing the fields, click **Create**. (The **Create** button is enabled only after you've begun filling in the fields.) The new session is now added to your event.

## Edit DIY live webcast session

There are two ways to reach session editing capabilities:

- On the Event Overview page, in the Agenda at a glance section, hover over the session you would like to edit, then click the blue pencil (edit) icon.

- On the Event Agenda page, click the name of the session, or the three blue dots to the right of the session and choose **Edit**.

 The session recording displays here **only after** the session and stream has been ended for everyone. If you are not seeing a session recording, it means that the session and stream has not yet been ended for everyone.

In some cases, Event organizers may not want a VOD available after the session, or they may want to take down the recording, go through some post-production, and then re-upload the recording.

To unpublish or download a recording:

1. Access the [Edit Session](#) page.
2. Click on the **Basics** tab.
3. Scroll down to the Session recording section.

5. Click **Select** next to the media you would like to upload to the session. You receive confirmation that the recording was published to the session page and removed from the Media page.

## Manage captions for your session

 The ability to order captions must be enabled and configured on your account. If it is not, please contact your Kaltura representative to enquire about adding it. If captions are enabled and configured on your account, you may order them only after creating your session and accessing the Captions tab of the [Edit Session](#) page.

 You may order live captions on future sessions only. You may not order live captions on sessions that have already started. If you did not order live captions for the session, and you have a recording of the session, you may order and/or upload captions for that recording.

## To order live captions for a session

Live captions must be ordered before the session starts, as early as possible,

1. Access the [Edit Session](#) page.
2. Click on the **Captions** tab.
3. Click **Order captions**. The Order captions screen displays.
