

Widgets module

Last Modified on 01/26/2026 5:55 pm IST

 This article is designated for administrators.

About

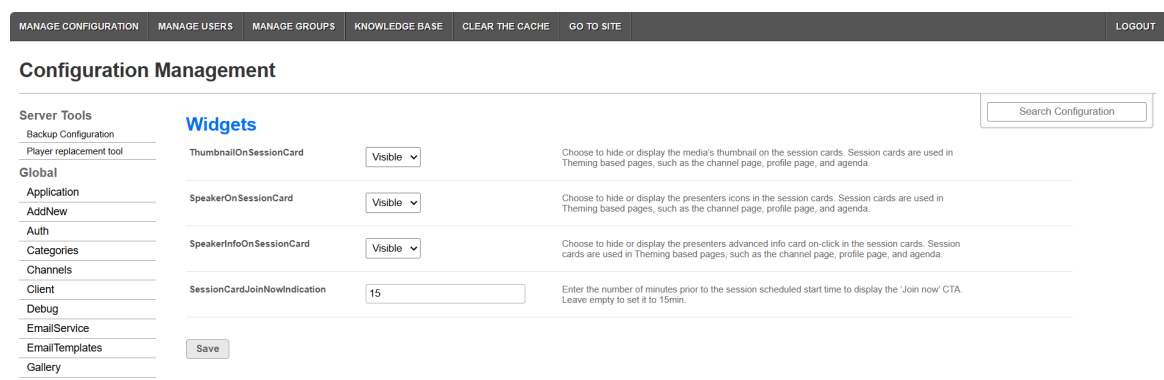

The **Widgets module** controls how session cards are displayed and how attendees interact with them on the event site. These settings manage the visibility of thumbnails (which appear across Theming-based pages like the [Channel page](#), [Profile page](#), and [Agenda page](#)) and presenter icons, presenter navigation behavior, and the timing of the **Join now** call-to-action.

Configure

1. Go to your Configuration Management console and click the **Widgets** module. You can also navigate directly using a link: https://{your_video_portal_URL}/admin/config/tab/widgets.

The Widgets page displays.

The screenshot shows the Kaltura Configuration Management console. The top navigation bar includes links for MANAGE CONFIGURATION, MANAGE USERS, MANAGE GROUPS, KNOWLEDGE BASE, CLEAR THE CACHE, GO TO SITE, and LOGOUT. The main heading is "Configuration Management". On the left, there is a sidebar with "Server Tools" (Backup Configuration, Player replacement tool) and "Global" (Application, AddNew, Auth, Categories, Channels, Client, Debug, EmailService, EmailTemplates, Gallery, Header). The "Widgets" module is selected and highlighted in blue. The main content area shows four settings:

Setting	Value	Description
ThumbnailOnSessionCard	Visible	Choose to hide or display the media's thumbnail on the session cards. Session cards are used in Theming based pages, such as the channel page, profile page, and agenda.
SpeakerOnSessionCard	Visible	Choose to hide or display the presenters icons in the session cards. Session cards are used in Theming based pages, such as the channel page, profile page, and agenda.
SpeakerInfoOnSessionCard	Visible	Choose to hide or display the presenters advanced info card on-click in the session cards. Session cards are used in Theming based pages, such as the channel page, profile page, and agenda.
SessionCardJoinNowIndication	15	Enter the number of minutes prior to the session scheduled start time to display the 'Join now' CTA. Leave empty to set it to 15min.

There is a "Save" button at the bottom left of the settings area and a "Search Configuration" button at the top right.

2. Configure the following:

ThumbnailOnSessionCard - Controls whether a media thumbnail is displayed on

session cards. **Visible** - displays the media's thumbnail on the session card. **Hidden** - Hides the media's thumbnail from the session card.

SpeakerOnSessionCard - Controls whether presenter icons are displayed on session cards. **Visible** - displays presenter icons on the session card. **Hidden** - hides presenter icons from the session card.

SpeakerInfoOnSessionCard - Controls what happens when an attendee clicks on a presenter's name on a session card. **Visible** - opens a pop-up window displaying the presenter's advanced information card. **Hidden** - redirects the attendee to the presenter's profile page.

SessionCardJoinNowIndication - Controls when the Join now call-to-action appears on session cards. Enter the number of minutes before the session's scheduled start time to display the **Join now** button. Leave this field empty to use the default value of 15 minutes. For example, if a session starts at 10:45 am and the indication is set for 15 minutes, the **Join Now** button will appear at 10:30 am, prompting users to join.

3. Click **Save**.

User experience

The image below displays a [My Profile page](#) with session cards where media thumbnails are set to visible:
