 This article is designated for administrators.

About

The **Widgets module** controls how session cards are displayed and how attendees interact with them on the event site.

These settings manage the visibility of thumbnails (which appear across Theming-based pages like the [Channel page](#), [Profile page](#), and [Agenda page](#)) and presenter icons, presenter navigation behavior, and the timing of the **Join now** call-to-action.

Configure

1. Go to your Configuration Management console and click the **Widgets** module. You can also navigate directly using a link: https://{your_Video Portal_URL}/admin/config/tab/widgets.

The 'Widgets' page displays.

The screenshot shows the Configuration Management console with a navigation bar at the top containing: MANAGE CONFIGURATION, MANAGE USERS, MANAGE GROUPS, KNOWLEDGE BASE, CLEAR THE CACHE, GO TO SITE, and LOGOUT. The main content area is titled "Configuration Management" and features a "Search Configuration" input field. On the left, a sidebar lists various server tools and categories, with "Widgets" highlighted in blue. The main settings area for "Widgets" includes:

- ThumbnailOnSessionCard**: A dropdown menu set to "Visible". Description: Choose to hide or display the media's thumbnail on the session cards. Session cards are used in Theming based pages, such as the channel page, profile page, and agenda.
- SpeakerOnSessionCard**: A dropdown menu set to "Visible". Description: Choose to hide or display the presenters icons in the session cards. Session cards are used in Theming based pages, such as the channel page, profile page, and agenda.
- SpeakerInfoOnSessionCard**: A dropdown menu set to "Visible". Description: Choose to hide or display the presenters advanced info card on-click in the session cards. Session cards are used in Theming based pages, such as the channel page, profile page, and agenda.
- SessionCardJoinNowIndication**: A text input field containing "15". Description: Enter the number of minutes prior to the session scheduled start time to display the 'Join now' CTA. Leave empty to set it to 15min.

A "Save" button is located at the bottom left of the settings area.

2. Configure the following:

ThumbnailOnSessionCard - Controls whether a media thumbnail is displayed on session cards. **Visible** - displays the media's thumbnail on the session card. **Hidden** - Hides the media's thumbnail from the session card.

SpeakerOnSessionCard - Controls whether presenter icons are displayed on session cards. **Visible** - displays presenter icons on the session card. **Hidden** - hides presenter icons from the session card.

SpeakerInfoOnSessionCard - Controls what happens when an attendee clicks on a presenter's name on a session card. **Visible** - opens a pop-up window displaying the presenter's advanced information card. **Hidden** - redirects the attendee to the presenter's profile page.

SessionCardJoinNowIndication - Controls when the Join now call-to-action appears on session cards. Enter the number of minutes before the session's scheduled start time to display the **Join now** button. Leave this field empty to use the default value of 15 minutes. For example, if a session starts at 10:45 am and the indication is set for 15 minutes, the **Join Now** button will appear at 10:30 am, prompting users to join.

3. Click **Save**.

User experience

The image below displays a [My Profile page](#) with session cards where media thumbnails are set to visible:
