

Audio Player

This article is designated for all users.

About

Kaltura's Audio Player is tailored for audio tracks, while also supporting VOD and Live media entries. For VOD and Live media entry types, the player plays the audio track, omitting the video. Its slim design ensures a small footprint, resembling a miniature version of the normal player.

With essential controls and limited height, it focuses on delivering a seamless audio playback experience. In addition to the controls, it displays only the title, description, and thumbnail of the current entry.

Customize its appearance with Dark or Light mode, or personalize colors using our convenient color picker tool. Need to match your brand perfectly? No problem! Just input your custom color.

Setup

To create an Audio player, see [The Kaltura Player Getting Started Guide](#).

Features

- The title auto-scrolls to the right as needed and the description auto-scrolls on hover.
- The Kaltura Audio Player is embeddable and supports playlists and theming.
- You can customize the player's color scheme to match your brand or personal preference.

Feature	Example
Speed control	
Volume control	
Looping	

- The Kaltura Audio Player is responsive based on the player's size.

Size	Example
Minimum 768	

Minimum 380	
Minimum 228	

- The examples above showcase the player in **Dark mode**, and below you can see the player configured with **Light mode**.
