About

Kaltura's Audio Player is tailored for audio tracks, while also supporting VOD and Live media entries. For VOD and Live media entry types, the player plays the audio track, omitting the video. Its slim design ensures a small footprint, resembling a miniature version of the normal player.

With essential controls and limited height, it focuses on delivering a seamless audio playback experience. In addition to the controls, it displays only the title, description, and thumbnail of the current entry.
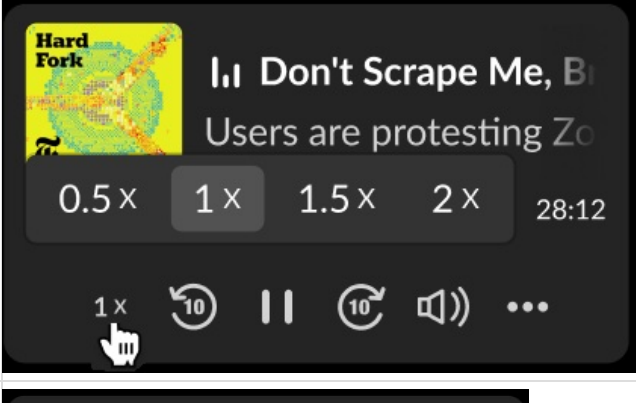

Customize its appearance with Dark or Light mode, or personalize colors using our convenient color picker tool. Need to match your brand perfectly? No problem! Just input your custom color.

Setup

To create an Audio player, see The Kaltura Player Getting Started Guide.

Features

- The title auto-scrolls to the right as needed and the description auto-scrolls on hover.
- The Audio Player supports playlists and theming.
- You can customize the player's color scheme to match your brand or personal preference.
| Feature	Example
Speed control (The Kaltura Audio Player is enabled with either a speed selector or a loop button, but not both.)	

|	
Looping (The Kaltura Audio Player is enabled with either a speed selector or a loop button, but not both.)	
Skipping (backward and forward 10 seconds)	
Pause	
Volume control	

Additional functionality

Click the three-dot button ("More" button) to the right of the volume control.

Two additional features display - Transcript and Download.

Transcript

Click **Transcript.** A floating window containing the media transcript displays. This window is draggable and resizable.

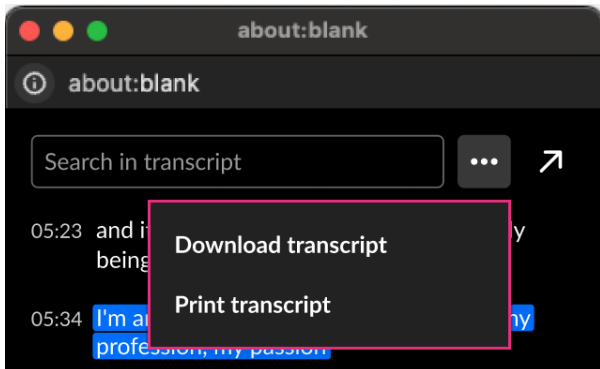

Search in transcript -

Search the transcript by typing a keyword in the search field.

Three button "actions" menu -

Click the three button actions menu to reveal additional options.

You may choose to download or print the transcript.

Up arrow "close" button -

Click the slanted upwards button to close the window.

Download

Click the arrow to the right of Download. The Download screen displays. The following is an example of an entry with multiple available flavors and caption types, as well as attachments.

Choose a flavor

If multiple flavors are available, click More flavors to expand the list of flavors available to download.

Click the download arrow to the right of the desired flavor.

Download captions

If multiple caption types are available, click More captions to expand the list of captions
available to download.

Click the download arrow to the right of the desired caption type.
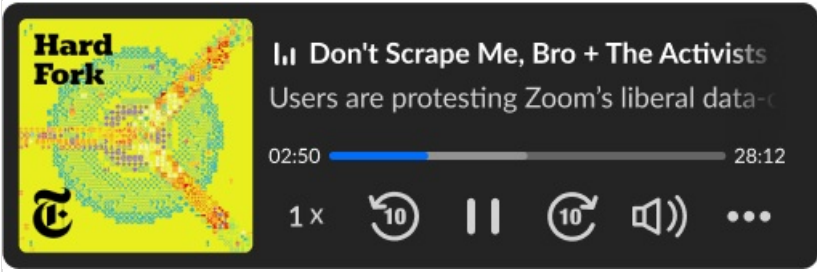

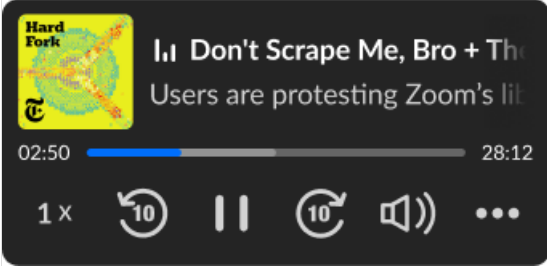

Download attachments

If files are attached to this video, click the arrow to the right of the attachment you would like to download.

You receive notification that the download has started.

Responsiveness

The Kaltura Audio Player is responsive based on the player's size.

Size	Example
Minimum 768	
Minimum 380	
Minimum 228	

The examples above showcase the player in **Dark mode**. Below you can see the player configured with **Light mode**.
