

Entry details page in KMC

Last Modified on 07/06/2025 3:14 pm IDT

 This article is designated for administrators.

About

The **Entry Details page** is your go-to hub for managing media assets. From customizing thumbnails to identifying and extracting "clips" from, generating quizzes for, and creating summaries of your videos; controlling access and scheduling; managing transcoding flavors; handling distribution and Live Streams; uploading captions and related files; editing video clips; adding advertisements; to managing user roles and permissions, it's all conveniently accessible in one place.

Access the Entry Details page

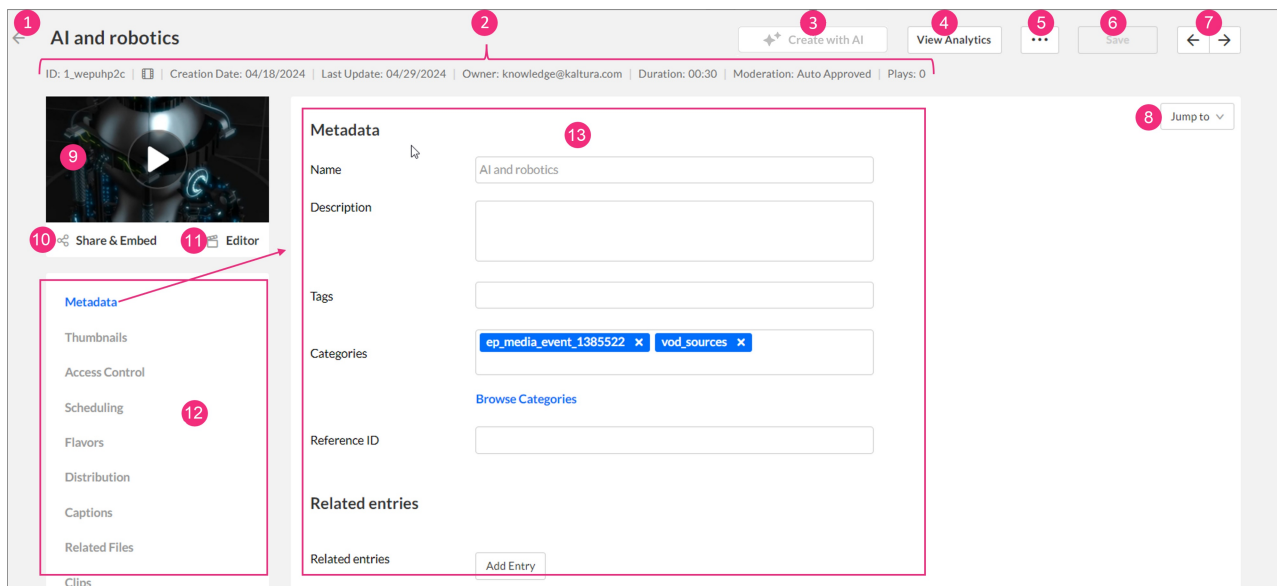

1. To access the **Entry Details page**, simply log into your Kaltura Management Console.
The **Entries** page displays by default.
2. Click on the desired entry's title or thumbnail.

Thumbnail	Name	ID	Type	Created On	Duration	Plays	Status	
	Shifting Baselines in Marine Conservation: Challenges and Perceptions	0_bbh1bm61	Video	06/26/2025 08:39	01:22	0	Ready	Create with AI ...
	DIY CL	0_2cd6ld4c	Audio	06/26/2025 10:22	N/A	0	Ready	Create with AI ...

The Entry Details page displays.

Entry Details page overview

- **Back arrow (1)** - Click to return to the [Entries](#) page.
- **Entry details (2)** - These are the details that display vary according to the type of media you select:
 - Entry Id
 - Creation Date
 - Last Update
 - Owner
 - Duration
 - Moderation Status
 - Plays
- **'Create with AI' button (3)** - Enrich and repurpose your content into engaging, snackable experiences with Kaltura's AI-powered post-production assistant. Click to access [Content Lab](#) functionality. This button will be active and enabled only on applicable entries. If you click the **Create with AI** button on an entry with no captions, you can easily navigate and order captions with a click of a button. See [Create highlight clips with AI](#), [Create quizzes with AI](#), [Create a summary and chapters with AI](#), and [Enrich metadata with AI](#) for more information.
- **'View Analytics' button (4)** - Click to access the entry analytics dashboard. To learn more, visit our article [Entry Level Analytics](#).
- **Three dots menu (5)** - Click to access Download, [Share & Embed](#), [Launch Editor](#) and Delete functions.
- **'Save' button (6)** - Click to save any changes (the button is disabled until data is modified).
- **Navigation arrows (7)** - Use to navigate to the next or previous entry.
- **'Jump to' drop-down menu (8)** - Choose a section of the page to jump to.

- **Entry thumbnail (9)** - This is the default thumbnail of the media (videos will also have a play button for previewing).
- **'Share & Embed' function (10)** - Click to access the Share & Embed page. For more information, visit our article [Share and Embed Media](#).
- **Editor (11)** - Click to launch Kaltura's Video Editor. For more information, check out our article [Kaltura Video Editing Tools - Editor tab](#).
- **Editing tabs (12)** - These are tabs that display according to the type of media you selected ([see below](#)).
- **Editing fields (13)** - This is the information that displays according to the tab you're on.

Editing tabs

Metadata

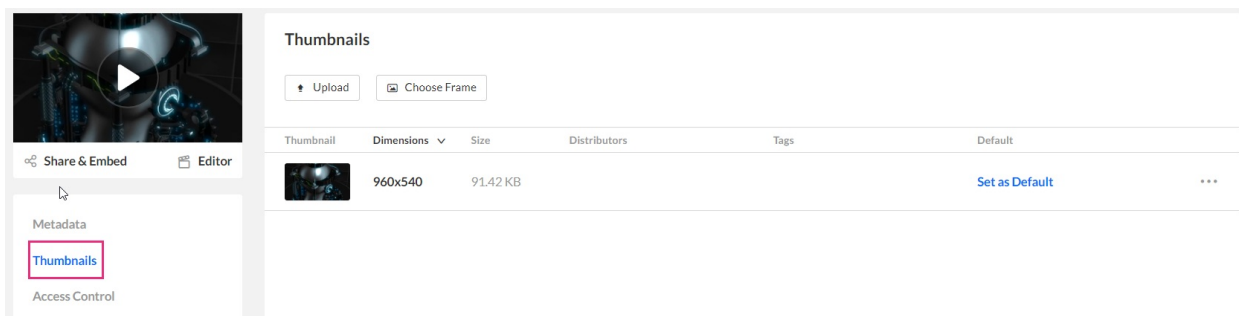

Entry Metadata fields are used to tag, manage, search and expose content. You can populate out-of-the-box fields or create your own custom metadata schema. Kaltura provides extensive asset management and metadata capabilities. Each media entry has a list of predefined metadata fields including: Name, Description, Tags, Categories, Thumbnails, Duration, Views, and other fields. See [Custom Data](#) for more information.

Everything below the out-of-the-box fields relates to custom metadata schemas and whether you have configured them as [searchable](#). See [Create a Custom Metadata Schema](#) for more information.

Thumbnails

Use to upload thumbnails, grab a thumbnail from video, crop thumbnails and select a default thumbnail. You can generate thumbnails from videos or upload external images.

Choosing a thumbnail for your video

By default, a thumbnail is generated from the video's first frames. You can choose a new thumbnail by selecting any frame from the video or uploading an image from your computer. You can assign multiple thumbnails of varying qualities to your video.

Upload

1. Click **Upload**.

2. Locate the desired image on your computer.
3. Click **Open**.

The image is added to the list of thumbnails.

Choose Frame

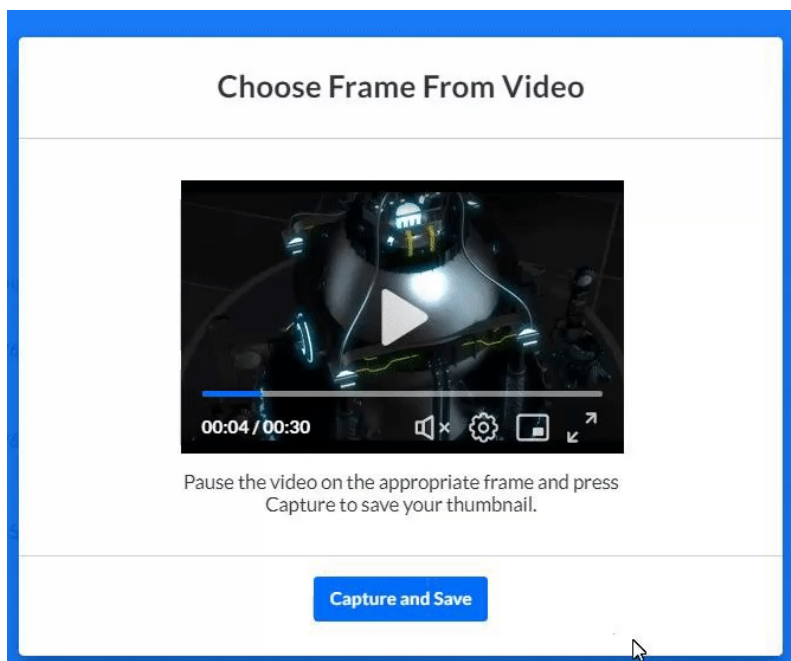

1. Click **Choose Frame**.

The Choose Frame From Video window opens.

2. Click the play button to play the video.
3. Pause the video on the appropriate frame and press **Capture and Save** to save your thumbnail.

A thumbnail will be captured from the highest quality video flavor.

Click **Set as Default** on the thumbnail you want to use for the entry. The default thumbnail displays in the entries list.

Click on the **three dots menu** to the right of a thumbnail to **Download**, **Preview** or **Delete** the thumbnail.

Thumbnails

[Upload](#) [Choose Frame](#)

Thumbnail	Dimensions ▾	Size	Distributors	Tags	Default	
	960x540	91.42 KB			Set as Default	...
	960x540	34.34 KB			Set as Default	...
	960x540	34.19 KB			Set as Default	...
	458x462	7.97 KB			Set as Default	...

- Preview
- Delete

If you have a distribution profile that requires a specific thumbnail dimension (you may have one or multiple distribution profiles) they will display as empty. You are required to provide a suitable thumbnail with the requested dimension to use for the distribution profile.

Access Control

Use this tab to assign an access control profile to the entry. Visit our article [Access Control](#) to learn how to create and assign an access control profile.

Scheduling

Content Scheduling controls when your media entries are viewable ('sunrise') and when

access ends ('sunset'). You can tailor specific scheduling for your content, allowing it to be available at any time or within a set timeframe. Keep in mind, if users try to access expired content, they'll receive an error message. Kaltura validates start and end dates, so ensure they're accurate when setting a range.

The screenshot displays the Kaltura user interface. On the left, a sidebar contains navigation links: 'Share & Embed', 'Editor', 'Metadata', 'Thumbnails', 'Access Control', and 'Scheduling'. The 'Scheduling' link is highlighted with a red rectangular border. The main content area is titled 'Scheduling' and features two radio button options: 'Anytime' (which is selected) and 'Specific range'. Below these options, a note states 'Note: Time Zone used is (GMT+3)'. There are two date input fields labeled 'Start Date' and 'End Date', each with a calendar icon. A 'Clear Dates' link is positioned below the 'End Date' field. A mouse cursor is visible over the 'Clear Dates' link.

To configure content scheduling

1. Select **Specific range**.
2. Set your specific time range.
3. Click **Save**.

The **three dots menu** offers the following:

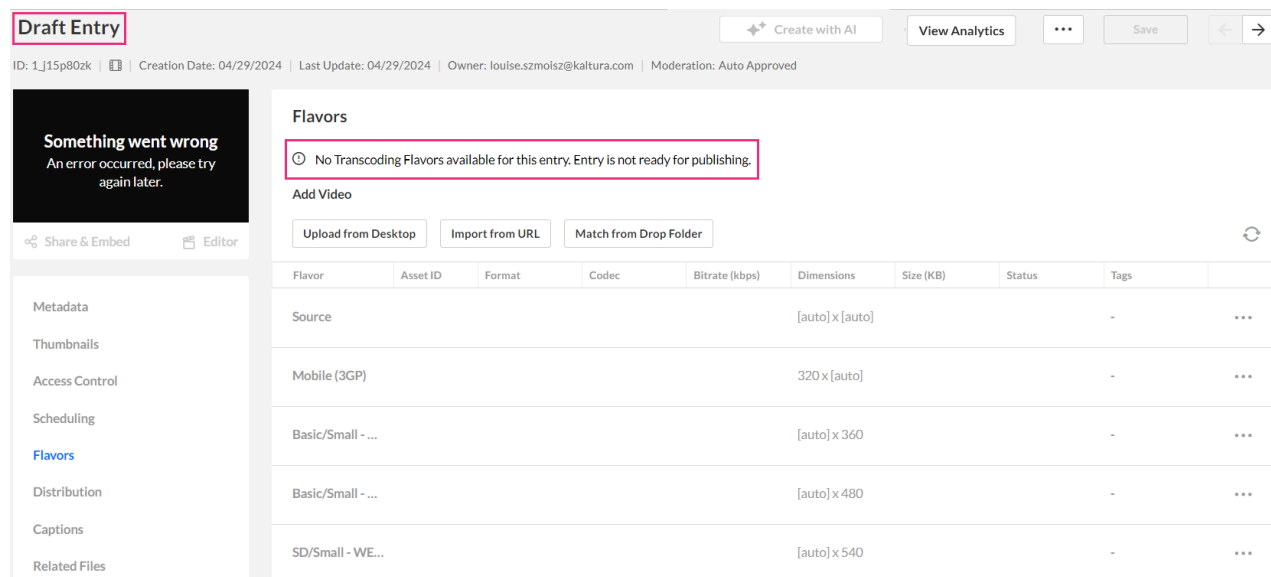

The options in the three dots menu are based on that particular flavor type and its available actions.

- **Download** - Downloads the transcoded file to your desktop.
- **Upload** - Uploads a file from your desktop you that transcoded on your own, to serve as a flavor for an entry.
- **Import** - Imports a flavor to update existing assets or adds new ones. Click to open a window and enter the file URL.
- **Drop Folder** - Used for updating existing flavors or adding new ones. (You won't see this option in the menu if you don't have the required permission.) See our article [Drop Folders Service for Content Ingestion](#) to learn more.
- **Preview** - Previews the selected source flavor. The following information is displayed: Entry Name, Entry ID, Flavor Name, Flavor Asset ID, Bitrate, Codec, Dimensions, Format, Size (KB), and Status.
- **Convert or reconvert** - Convert to transcode an entry to additional flavors or reconvert to create the flavor again from the source.
- **Delete** - Deletes the flavor. When you delete, a confirmation will display: *Are you sure you want to delete this Asset: <asset id> ?* Click Delete to confirm.
- **View DRM details** - When your KMC account supports direct ingestion of multiple bit-rate transcoding flavors, you can use the menu to add or replace a single transcoding flavor in an entry.

Add / Replace media

Use to add media to a new entry you created when the entry status shown on the [Entries](#) page is 'No Media' (for example, a draft entry), and to replace the media of an existing entry when the entry status is 'Ready' or 'Error'.

Draft Entry

Click **Click & Trim** to open the editing tools. Visit our article [Kaltura Video Editing Tools - Editor Tab](#) to learn how to work with the video editor.

Clips

Clip & Trim

ID	Name	Plays	Created on	Offset	Duration	Status
1_6851z6we	Clip of AI and robotics	0	04/30/2024 18:07	00:07	00:08	Ready
1_r7e439cb	Clip 2 of AI and robotics	0	04/30/2024 18:08	00:15	00:14	Ready

If clips were created from an original video or audio entry, the clipped entry details are displayed in the clips tab. You can click on the **clip ID** to navigate to the entry details page of that clip.

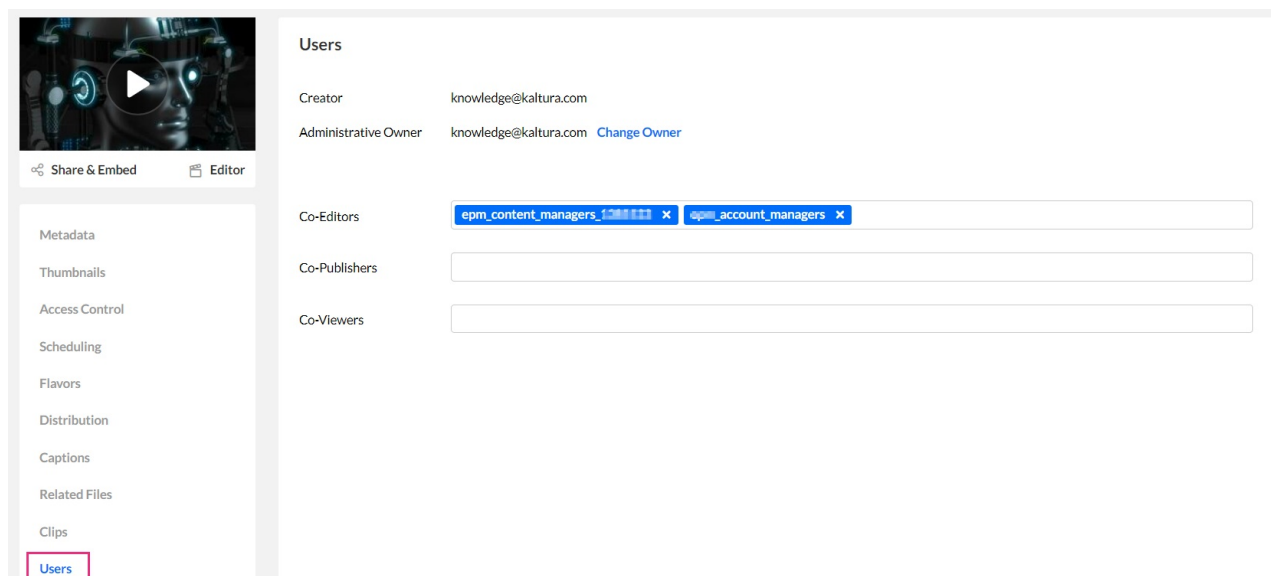

The Entry Details page of a clip displays the **original clip's ID**.

Users

The Users tab is displayed when your account is configured to support the end-user management feature. Use this tab to add editing and publishing rights for additional end-users to work with this entry across applications.

The Users tab provides information about the users that are associated with the entry:

- **Creator:** Usually the person who uploaded the media to Kaltura.
- **Administrative Owner:** The user in charge of managing the entry. By default, it's the creator, but you can change it here.

To change the Administrative Owner:

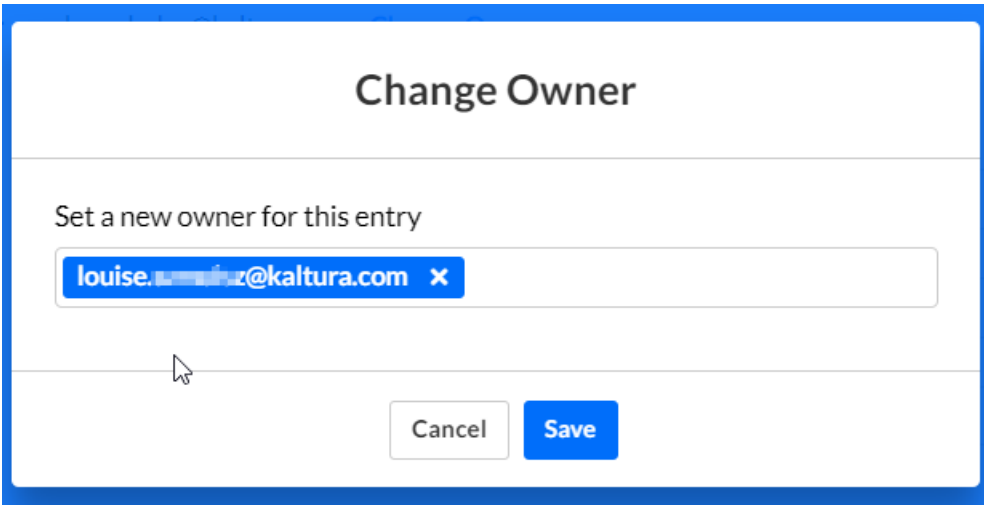

1. Click **Change Owner**.

Users

Creator	knowledge@kaltura.com
Administrative Owner	knowledge@kaltura.com Change Owner

The Change Owner box displays.

2. Type in the desired user name or user ID.

The image shows a 'Change Owner' dialog box with a blue border. The title 'Change Owner' is centered at the top. Below the title, the text 'Set a new owner for this entry' is displayed. A text input field contains the email address 'louise. [redacted]@kaltura.com' with a blue 'x' icon to its right. At the bottom of the dialog, there are two buttons: 'Cancel' and 'Save'.

3. Click **Save**.

By editing the **co-editors**, **co-publishers**, and **co-viewers** fields, you can add rights for additional end-users to work with this entry across applications.

Co-editors have permission to edit the metadata associated with the selected media, for example, customize the look and feel of an entry page.

Co-publishers have the permission to publish media anywhere that the user has the rights to publish.

Co-viewers have permissions to view the metadata associated with the selected media.

To learn more about roles and permissions, visit our article [Administration Pages](#).

Advertisements

Use to create and manage time-based advertisements with the Kaltura Video Editing Tools. To learn how to add advertisements to media, see our article [Kaltura Video Editing Tools - Advertisements Tab](#). For further information see [Advertising and Ad Networks](#).
